ACCOUNTS AND PAPERS:

FORTY-EIGHT VOLUMES.

— (25.—*PART I.*) —

POPULATION (ENGLAND AND WALES).

Session

5 February — 28 July 1863.

VOL. LIII.—*PART I.*

1863.†

ACCOUNTS AND PAPERS:

1863.

FORTY-EIGHT VOLUMES;—CONTENTS OF THE

TWENTY-FIFTH VOLUME.—PART I.

N.B.—*THE* Figures at the beginning of the line, correspond with the N° at the foot of each Paper; and the Figures at the end of the line, refer to the MS. Paging of the Volumes arranged for *The House of Commons*.

POPULATION (ENGLAND AND WALES):

Census of England and Wales (1861):

[3221.] General Report - - - - - p. 1

[3221.] Population Tables:—Summary Tables: Abstracts of Ages, Civil Condition, Occupations, and Birthplaces of the People—Part I.
Division I. (London) to Division III. (South Midland) - 265

CENSUS OF ENGLAND AND WALES
FOR THE YEAR
1861.

VOL. III.

GENERAL REPORT.

Presented to both Houses of Parliament by Command of Her Majesty.

LONDON:
PRINTED BY GEORGE EDWARD EYRE AND WILLIAM SPOTTISWOODE,
PRINTERS TO THE QUEEN'S MOST EXCELLENT MAJESTY.
FOR HER MAJESTY'S STATIONERY OFFICE.

ANALYTICAL TABLE OF CONTENTS.

INTRODUCTION.

	Page
Local Machinery for taking the CENSUS ; the Formation of ENUMERATION DISTRICTS, and Qualifications of the ENUMERATORS	1
Mode of dealing with PUBLIC INSTITUTIONS	1
Enumeration of Persons on board MERCHANT VESSELS in HARBOURS, DOCKS, and RIVERS	2
The ROYAL NAVY	2
Enumeration of Persons on board BOATS and BARGES in INLAND WATERS	2
How Persons NOT LIVING IN DWELLING HOUSES were accounted for	2
DISTRIBUTION of Six Millions of HOUSEHOLDERS' SCHEDULES	2
Enumeration of PERSONS ABSENT FROM HOME	2
COLLECTION of the SCHEDULES on 8th April 1861	2-3
Proceedings subsequent to the Enumeration	3
RECEIPT and SUBSEQUENT REVISION of HOUSEHOLDERS' SCHEDULES at the CENSUS OFFICE	3
COLLATERAL RETURNS relating to the ARMY and NAVY, and to British Subjects resident in INDIA and in the COLONIAL POSSESSIONS and DEPENDENCIES of the BRITISH CROWN	3-4

I. POPULATION, HOUSES, AND FAMILIES.

1. *Persons absent from the United Kingdom.*

Mobility of the People of these Islands	4
Number of BRITISH SUBJECTS ABROAD, and Places where they chiefly resort to	4
Number of EACH SEX enumerated ABROAD	4
BRITISH SUBJECTS in the UNITED STATES	4
FOREIGNERS in ENGLAND and WALES	5

2. *Population of the United Kingdom.*

Population of the UNITED KINGDOM in 1851, EMIGRATION in the Ten following Years, Diminution in the RATE of Increase of Population, the aggregate POPULATION ENUMERATED in 1861	5
The Annual and Decennial RATE of INCREASE of POPULATION ; EMIGRANTS to be taken into account in determining the Increase of the ENGLISH RACE	5
DISTRIBUTION OF THE POPULATION over Four Divisions of the UNITED KINGDOM in the Year 1861	5

3. *Increase of the Population of England and Wales.*

Increase of the Population of ENGLAND and WALES, and the DECENNIAL and ANNUAL RATE	5
Number of EMIGRANTS of ENGLISH ORIGIN	6
Increase in the Number of the Scotch and Irish in England, and also of Number of Persons born Abroad	6
EXCESS of registered BIRTHS over registered DEATHS	6
Rate of Increase of the Population if EMIGRANTS are added to the ascertained Numbers	6
INCREASE of the POPULATION during 60 YEARS of THIS CENTURY ; DOUBLING of the Population of 1801 in 1852	6
Time it would take to DOUBLE the POPULATION at the RATE of INCREASE prevailing during the LAST TEN YEARS	6

4. *Males and Females.*

Proportion of BOYS BORN in ENGLAND to GIRLS ; NUMBER of MALES and FEMALES enumerated at the CENSUS	6
EXCESS of FEMALES over MALES, and the CAUSES OF IT	6-7

5. *Houses and Public Institutions.*

The Number of Persons living out of Houses	7
Number of Persons in each Class of Public Institutions	7
Definition of the Term "HOUSE"	7
SCOTLAND the ONLY COUNTRY in EUROPE in which the Definition of "House" has hitherto offered insuperable Difficulties	7-8
ALL DISTINCT BUILDINGS enumerated as HOUSES	8
NUMBER and INCREASE of INHABITED HOUSES	8
ANNUAL VALUE of HOUSES	8
NUMBER and PROPORTION of HOUSES BUILDING ; illustrated by a Table	9
NUMBER and PROPORTION of UNINHABITED HOUSES	10
NUMBER of INHABITANTS to each HOUSE	10
CURIOUS FACTS exhibited by the TABLES 32, 33, and 39	10

6. Families.

Constitution of a "FAMILY" - - - - -	Page
NUMBER of FAMILIES in 1861 and Proportions of PERSONS to FAMILIES - - - - -	10
FAMILIES considered under THREE DIFFERENT CLASSES - - - - -	11
NUMBER of CHILDREN at HOME in FAMILIES - - - - -	11

The following Tables having reference to POPULATION, HOUSES, and FAMILIES appear in the
APPENDIX TO THE REPORT.

Table 1.—AREA in ACRES; HOUSES, FAMILIES, and POPULATION of the COUNTIES of ENGLAND and WALES, enumerated on April 8th, 1861 - - - - -	79
Table 2.—AREA in ACRES; HOUSES, FAMILIES, and POPULATION in DIVISIONS and REGISTRATION of UNION COUNTIES - - - - -	80
Table 3.—NUMBERS of the ARMY, NAVY, and MERCHANT SEAMEN in 1801–1861, which should be added to the POPULATION of the UNITED KINGDOM, as enumerated at the several CENSUSES (<i>exclusive of Natives of Colonies and Foreign Parts</i>) - - - - -	81
Table 4.—ARMY, NAVY, and MERCHANT SEAMEN ABSENT from the UNITED KINGDOM on April 8th, 1861 - - - - -	81
Table 5.—BRITISH-BORN SUBJECTS in FOREIGN COUNTRIES from which RETURNS have been received - - - - -	81
Table 6.—ABSTRACT of RETURNS received through the FOREIGN OFFICE relating to NATIVES of the UNITED KINGDOM residing in FOREIGN COUNTRIES on or about 8th April 1861 - - - - -	82, 83
Table 7.—DISTRIBUTION of the INHABITANTS in the UNITED STATES of AMERICA BORN SUBJECTS of GREAT BRITAIN, &c. (<i>as returned by the Census Office, Department of the Interior, Washington</i>) - - - - -	84
Table 8.—SUMMARY, showing the BIRTH-PLACES of the BORN SUBJECTS of GREAT BRITAIN, &c., residing in the UNITED STATES - - - - -	84
Table 9.—ENUMERATED POPULATION of the UNITED KINGDOM (including the ARMY, NAVY, and MERCHANT SEAMEN at HOME and ABROAD) at each of the CENSUSES 1801 to 1861, and NUMBER of EMIGRANTS in the Intervals - - - - -	84
Table 10.—ANNUAL RATE of INCREASE PER CENT. of the POPULATION of the UNITED KINGDOM (including the ARMY, NAVY, and MERCHANT SEAMEN at HOME and ABROAD) at each of the CENSUSES 1801 to 1861 - - - - -	84
Table 11.—POPULATION of ENGLAND and WALES in 1861, including the portion of the ARMY, NAVY, and MERCHANT SEAMEN belonging thereto, AND OUT of the COUNTRY at the time of the Census - - - - -	85
Table 12.—AREA, and ENUMERATED POPULATION of ENGLAND and WALES, SCOTLAND, IRELAND, and ISLANDS in the BRITISH SEAS (including the ARMY, NAVY, and MERCHANT SEAMEN at HOME and ABROAD) at each of the CENSUSES 1801 to 1861 - - - - -	85
Table 13.—ANNUAL RATE of INCREASE PER CENT. of the POPULATION of ENGLAND and WALES, SCOTLAND, IRELAND, and ISLANDS in the BRITISH SEAS (including the ARMY, NAVY, and MERCHANT SEAMEN at HOME and ABROAD), at each of the CENSUSES 1801 to 1861 - - - - -	86
Table 14.—POPULATION of ENGLAND and WALES (<i>exclusive of ARMY, NAVY, and MERCHANT SERVICE ABROAD</i>), and LOGARITHMS of the POPULATION, estimated to the MIDDLE of each of the Census Years 1801 to 1861 - - - - -	86
Table 15.—POPULATION of ENGLAND and WALES (<i>exclusive of ARMY, NAVY, and MERCHANT SERVICE ABROAD</i>), estimated to the MIDDLE of each of the Years 1801 to 1861 - - - - -	86
Table 16.—ENUMERATED POPULATION of the UNITED KINGDOM, <i>exclusive of the ARMY, NAVY, and MERCHANT SEAMEN at HOME and ABROAD</i> , in 1801, 1811, 1821, and 1831, and of the portion of the ARMY, NAVY, and MERCHANT SEAMEN ABROAD only in 1841, 1851, and 1861 - - - - -	87
Table 17.—UNITED KINGDOM; RATE of INCREASE PER CENT. of the POPULATION in each of the Decennial Periods 1821–31, 1831–41, 1841–51, and 1851–61; assuming that the Emigrants (<i>exclusive of Foreigners</i>) had remained in the Country, and had not increased - - - - -	87
Table 18.—NUMBER of PERSONS enumerated in BARGES, BARNS, TENTS, and VESSELS in ENGLAND and WALES, at each of the CENSUSES 1841, 1851, and 1861 - - - - -	87
Table 19.—NUMBER of PERSONS enumerated in BARGES, BARNS, TENTS, and VESSELS in 1861 - - - - -	88
Table 20.—ENGLAND and WALES. NUMBER of PERSONS in PUBLIC INSTITUTIONS, 1851 and 1861 - - - - -	88
Table 21.—PROPORTION of MALES to every 100 FEMALES in ENGLAND and WALES, 1801 to 1861 - - - - -	88
Table 22.—NUMBER of MEN in the ARMY, NAVY, and MERCHANT SERVICE ABROAD; the EXCESS of FEMALES over MALES at HOME and ABROAD, and over MALES at HOME in ENGLAND and WALES, 1801 to 1861 - - - - -	88
Table 23.—AVERAGE NUMBER of PERSONS to a FAMILY, PERSONS to a HOUSE, and FAMILIES to a HOUSE, in ENGLAND and WALES, 1801 to 1861 - - - - -	88
Table 24.—INHABITED HOUSES, FAMILIES, and PERSONS enumerated in ENGLAND and WALES at each of the CENSUSES 1801 to 1861 - - - - -	88
Table 25.—RATES of INCREASE of the POPULATION in DECENNIAL PERIODS, in DIVISIONS and REGISTRATION COUNTIES - - - - -	89
Table 26.—AVERAGE NUMBER of PERSONS to a FAMILY, PERSONS to a HOUSE, and FAMILIES to a HOUSE, in ENGLAND and WALES in 1861, inclusive and <i>exclusive of</i> PERSONS in INSTITUTIONS, in VESSELS in PORTS, &c., and of PERSONS enumerated OUT of HOUSES - - - - -	90
Table 27.—AVERAGE NUMBER of PERSONS to a FAMILY, PERSONS to a HOUSE, and FAMILIES to a HOUSE, in ENGLAND and WALES in 1851 and 1861 - - - - -	90
Table 28.—In 45,856 HOUSES, containing 258,157 PERSONS (in 14 of the SUB-DISTRICTS of ENGLAND and WALES), the PROPORTION PER CENT. (1) of HOUSES containing (<i>n</i>) PERSONS, and (2) the PROPORTION PER CENT. of PERSONS in each GROUP - - - - -	90
Table 29.—INCREASE of HOUSES in the Interval between the CENSUSES of 1851 and 1861; also the AVERAGE NUMBER of PERSONS to a HOUSE, and of INHABITED HOUSES to 100 PERSONS, in 1851 and 1861, in each of the COUNTIES of ENGLAND and WALES - - - - -	91
Table 30.—ENGLAND and WALES. NUMBER of INHABITED HOUSES 1861, and the NUMBER and PROPORTION of HOUSES ASSESSED to HOUSE DUTY in the Year ending 5th April 1862 - - - - -	92
Table 31.—ANNUAL VALUE of HOUSES - - - - -	92
Table 32.—TOTAL NUMBER of FAMILIES to a HOUSE in 14 SUB-DISTRICTS of ENGLAND and WALES in 1861 - - - - -	93
Table 33.—NUMBER of FAMILIES in the HOUSES (including PUBLIC INSTITUTIONS) enumerated in 14 SUB-DISTRICTS in ENGLAND and WALES - - - - -	93
Table 34.—ANALYSIS of FAMILIES enumerated in 14 SUB-DISTRICTS:—HEAD OF FAMILY: HUSBAND WITH WIFE - - - - -	94
Table 35. " " " " HEAD OF FAMILY: WIDOWER OR WIDOW - - - - -	94
Table 36. " " " " HEAD OF FAMILY: BACHELOR OR SPINSTER - - - - -	95
Table 37. " " " " HEAD OF FAMILY ABSENT - - - - -	95
Table 38.—NUMBER of CHILDREN at HOME in the FAMILIES enumerated in 14 SUB-DISTRICTS in ENGLAND and WALES (<i>exclusive of PUBLIC INSTITUTIONS</i>) - - - - -	96
Table 39.—NUMBER of PERSONS in the HOUSES in 14 SUB-DISTRICTS of ENGLAND and WALES, <i>exclusive of</i> PUBLIC INSTITUTIONS - - - - -	97
Table 40.—ANALYSIS of FAMILIES enumerated in 14 Sub-Districts - - - - -	98
Table 41.—NUMBER of CHILDREN at HOME and of PERSONS in 41,526 NATURAL FAMILIES having as HEAD the HUSBAND and WIFE - - - - -	99
Table 42.—NUMBER of CHILDREN at HOME and of PERSONS in 11,099 FAMILIES having as HEAD either a WIDOWER or a WIDOW - - - - -	99

II.—TERRITORIAL DISTRIBUTION AND SUBDIVISIONS.

1. *Towns.*

	Page
ASSOCIATION of the POPULATION in SMALL COMMUNITIES - - - - -	11
POPULATION of all PARISHES and PLACES distinguished - - - - -	11
DIFFICULTY of distinguishing SMALL GROWING TOWNS from VILLAGES and HAMLETS - - - - -	11
DENSITY of POPULATION a distinguishing feature of TOWNS - - - - -	11
POPULATION of 781 TOWNS, and also of the VILLAGES and COUNTRY PARISHES - - - - -	11
THE URBAN POPULATION preponderates in ENGLAND - - - - -	11
AREA and DENSITY of POPULATION of 781 TOWNS and of the REST OF THE COUNTRY - - - - -	11
AVERAGE SIZE, POPULATION, and DENSITY of TOWNS - - - - -	11
GREATER RATIO of INCREASE of POPULATION of TOWNS as compared with COUNTRY PARISHES - - - - -	12
INCREASE of the 72 LARGEST TOWNS during the present Century - - - - -	12
INCREASE of POPULATION in LONDON compared with that of other large TOWNS and CITIES - - - - -	12
RATE of INCREASE in SIX GROUPS of TOWNS - - - - -	12

2. *Density and Proximity.*

PERSONS to a SQUARE MILE and PROXIMITY of PERSON to PERSON on the Hypothesis of equal Distribution - - - - -	12
DENSITY of POPULATION expressed in METRICAL MEASURES - - - - -	12

3. *Changes of Territorial Divisions.*

ORIGIN and CHARACTER of the various TERRITORIAL DIVISIONS, Ancient and Modern, described in the CENSUS REPORT of 1851. Description of the PRINCIPAL CHANGES during the last 10 YEARS - - - - -	13
AREA and POPULATION under the METROPOLIS LOCAL MANAGEMENT ACT - - - - -	13
LIMITS of the METROPOLIS included within the WEEKLY BILLS OF MORTALITY - - - - -	13
THE METROPOLITAN BOARD OF WORKS - - - - -	13
PRINCIPAL FUNCTIONS of DISTRICT BOARDS OF WORKS - - - - -	14
DIVISION of METROPOLITAN PARISHES into WARDS - - - - -	14
METROPOLITAN POLICE DISTRICT - - - - -	14
EXTRA-PAROCIAL PLACES ACT - - - - -	14
DIVISIONS under the ACT for the better Management of HIGHWAYS in ENGLAND - - - - -	15
THE ELEVEN TOWNS which have received CHARTERS of INCORPORATION since 1851 - - - - -	15
NEW PARLIAMENTARY DIVISIONS - - - - -	15
TOWNS not being BOROUGHs ; METHOD ADOPTED in ascertaining what PLACES were entitled to be deemed TOWNS, together with the BOUNDARIES applicable to them - - - - -	15-16
PROBABLE INCREASE in the Number of TOWNS before next CENSUS, under the LOCAL GOVERNMENT ACT, 1858 - - - - -	16
ECCLIESIASTICAL DISTRICTS and New Parishes ; DIFFICULTIES in defining their LIMITS, illustrated by Examples - - - - -	16-17
LORD BLANDFORD'S ACT for the Creation of NEW PARISHES for ECCLIESIASTICAL PURPOSES - - - - -	17
SUB-DIVISIONS of LIEUTENANCY for MILITIA PURPOSES - - - - -	17
NEW UNIONS and REGISTRATION DISTRICTS - - - - -	17
CAUTION necessary in citing the POPULATION of PLACES owing to the same Name being often used indiscriminately for the PARISH, the TOWNSHIP, the BOROUGH, and the DISTRICT - - - - -	17-18

The following Tables having reference to TERRITORIAL DISTRIBUTIONS and SUB-DIVISIONS appear in the APPENDIX to THE REPORT.

Table 43.—POPULATION of 781 TOWNS in ENGLAND and WALES - - - - -	99
Table 44.—AGGREGATE NUMBER of TOWNS - - - - -	99
Table 45.—AREA and POPULATION of 781 TOWNS and in the COUNTRY PARTS of the COUNTIES of ENGLAND and WALES - - - - -	100-101
Table 46.—POPULATION of 72 TOWNS in ENGLAND and WALES, containing upwards of 20,000 Inhabitants in 1861, with the POPULATION of previous Censuses within the same, or nearly the same Limits - - - - -	102-103
Table 47.—ENUMERATED POPULATION of the 72 LARGE TOWNS in ENGLAND and WALES, 1801-1861 - - - - -	104
Table 48.—POPULATION of 580 TOWNS in ENGLAND and WALES 1851 and 1861 - - - - -	104
Table 49.—AREA and POPULATION of ENGLAND and WALES in 1861, distinguishing the AREA and POPULATION of the 781 TOWNS from those of the COUNTRY PARTS - - - - -	104
Table 50.—DISTRIBUTION of the 781 TOWNS over ENGLAND and WALES - - - - -	104
Table 51.—AREA and DENSITY of POPULATION of 781 TOWNS - - - - -	105
Table 52.—POPULATION of SIX CLASSES of TOWNS in ENGLAND and WALES - - - - -	105
Table 53.—NUMBER of DIVISIONS, COUNTIES, DISTRICTS, SUB-DISTRICTS, PARISHES or PLACES, ENUMERATION DISTRICTS, HOUSES, POPULATION, and AREA in ACRES, in ENGLAND and WALES, and in each of the 11 DIVISIONS ; and, To an Average Division the Number of Counties, Districts, Sub-districts, Parishes or Places, Enumeration Districts, Houses, POPULATION, and ACRES ; also the Number of the several subsequent items to an average County, District, Sub-district, Parish or Place, Enumeration District, House, and Person, at the time of the Census, 1861 - - - - -	106
Table 54.—ENGLAND and WALES—ISLANDS—POPULATION of the MAINLAND and of the several ISLANDS that have Names around the Coast - - - - -	106
Table 333.—AREAS of PARISHES and TOWNSHIPS in the Northern Counties of DURHAM, NORTHUMBERLAND, CUMBERLAND, and WESTMORLAND, (so far as they were ascertained by the Ordnance Survey Department on 1st July 1863), furnished to the Registrar General by Colonel Sir Henry James, R.E. - - - - -	218-222
Table 334.—STATEMENT showing the NUMBER of INHABITED HOUSES and the POPULATION according to the CENSUS of 1861 in the several WARDS formed for the ELECTION of VESTRYMEN in METROPOLITAN PARISHES divided under the Metropolis Local Management Act (19 Vict. c. 120.) - - - - -	223-224

III.—AGES OF THE POPULATION.

	Page
A CENTURY the NATURAL LIMIT of HUMAN LIFE, Number of CENTENARIANS	18
COMPARATIVE NUMBER of MEN and WOMEN at different AGES in 1821 and 1861	18
NUMBER of PERSONS living in successive GENERATIONS of 20 Years	18-19
Evidence of the AGE of CENTENARIANS requires careful Scrutiny	19
The ENGLISH POPULATION and its Relations with Generations past, present, and to come.	19
(See Table 63.)	19
ERROR of REASONING about ENGLAND as if its POPULATION and POWER were stationary	19
PROBABLE FUTURE NUMBER of PERSONS at different AGES	19

The following Tables having References to the AGES of the POPULATION appear in the APPENDIX TO THE REPORT.

Table 55.—AGES of the POPULATION of ENGLAND and WALES.—NUMBERS living at the MIDDLE of the Years 1851 and 1861, ESTIMATED FROM THE RESULTS OF THE ENUMERATION (INCLUDING the ARMY, NAVY, and MERCHANT SEAMEN ABROAD as well as at HOME)	107
Table 56.—AGES of the POPULATION of ENGLAND and WALES.—ESTIMATED NUMBERS living in ENGLAND and WALES (1) at each Year of Age and (2) at and above each Year of Age in the MIDDLE of the Year 1861, INCLUDING ARMY, NAVY, and MERCHANT SERVICE at HOME and ABROAD	108
Table 57.—AGES of the POPULATION of ENGLAND and WALES.—POPULATION in QUINQUENNIAL and DECENNIAL PERIODS of AGE, at the MIDDLE of the Years 1851 and 1861 (CORRECTED FROM THE GRADUATED TABLES), EXCLUSIVE of the Portion of the Army, Navy, and Merchant Seamen Abroad	109
Table 58.—LOGARITHMS of the above POPULATION (CORRECTED FROM THE GRADUATED TABLES) EXCLUSIVE of the Portion of the Army, Navy, and Merchant Seamen Abroad	109
Table 59.—MEAN AGES of the POPULATION of ENGLAND and WALES, as enumerated in 1851 and 1861, and as they would be if the Annual Number of Births remained stationary	110
Table 60.—ESTIMATED AGES of the ARMY, NAVY, MARINES, and MERCHANT SEAMEN ABROAD in 1861 belonging to the UNITED KINGDOM, who were not included in the enumerated Population	110
Table 61.—SHOWING the UNCORRECTED and CORRECTED AGES of the FEMALE POPULATION of ENGLAND and WALES in 1861	111
Table 62.—DECENNIAL and ANNUAL RATES of INCREASE of POPULATION, 1851-1861, at VICENNIAL PERIODS of AGE (deduced from the Numbers estimated to the Middle of the Year, including ARMY, NAVY, and MERCHANT SEAMEN ABROAD and at HOME)	111
Table 63.—ESTIMATED POPULATION of ENGLAND and WALES BORN and LIVING at each successive VICENNIAD from 1721 to 1861	111
Table 64.—SHOWING the PROPORTION of the POPULATION of ENGLAND and WALES at FIVE PERIODS of LIFE to 100 Persons under the Age of 20. (The Army, Navy, and Merchant Seamen Abroad as well as at HOME are included)	112
Table 65.—PROPORTIONAL NUMBERS of the POPULATION of ENGLAND and WALES living at FIVE AGES in 1861, as compared with the Proportional Numbers that would be living at the same AGES if the Number of Annual Births and the Rate of Mortality had remained invariable	112
Table 66.—PROPORTIONAL NUMBERS of PERSONS living at FIVE PERIODS of AGE in ENGLAND and WALES, 1861, to 100 Persons of all AGES	112
Table 67.—POPULATION of ENGLAND and WALES at VICENNIAL PERIODS of AGE, compared with the Number of Persons living on the Assumption that the Annual Births had remained as in 1751 and the Rate of Mortality had been uniform in the Years 1751-1861	112
Table 68.—PROPORTIONAL NUMBERS of MALES and FEMALES living at different PERIODS of AGE	113
Table 69.—PROPORTIONAL NUMBER of FEMALES to 100 MALES at DIFFERENT PERIODS of AGE	114
Table 70.—NUMBER of MALES and FEMALES enumerated at DIFFERENT AGES in ENGLAND and WALES in 1861, and the EXCESS of EITHER SEX at EACH AGE. (See also Tables 21 and 22.)	115
Table 71.—PROPORTIONAL NUMBER of MALES and FEMALES living contemporaneously (if there were no Emigration) at the SEVERAL AGES according to the ENGLISH LIFE TABLE No. 3., and the EXCESS of EITHER SEX at the same AGES	115

IV.—CONJUGAL CONDITION OF THE PEOPLE.

1. *Husbands and Wives.*

Number of HUSBANDS and WIVES enumerated in 1851 and in 1861	19
Increase in the Ten Years of Husband and Wives	20
ENGLISHMEN of the present Day not less disposed to CONTRACT MARRIAGE than their ANCESTORS	20
The Arrangements for sending out WOMEN as EMIGRANTS are defective	20
AVERAGE AGE of the HUSBANDS and WIVES in ENGLAND and the Numbers living at DIFFERENT AGES, with Tabular Statement	20

2. *Widowers and Widows.*

Number of WIDOWERS and WIDOWS and their respective Proportions at different AGES	20
--	----

3. *Bachelors and Spinsters.*

Decrease in the Proportion of BACHELORS and SPINSTERS between the AGES 20 and 40, and Increase in the Proportions of HUSBANDS and WIVES at those AGES	21
Number of BACHELORS and SPINSTERS of the AGES 20-40	21
The RESERVE of SPINSTERS and BACHELORS a GUARANTEE against the Depopulation of ENGLAND	21
Variation in the Proportional Number of MARRIED PERSONS	21
Numbers of BACHELORS and SPINSTERS at DIFFERENT AGES	21

4. *Women living in Celibacy, and others.*

Number of CHILDREN BORN IN and OUT OF Wedlock in the 10 Years 1851-60	-	-	-	Page
Number of CHILDREN of UNMARRIED WOMEN registered annually	-	-	-	21
Proportion of MARRIED and CHILD-BEARING WOMEN to those living in a state of CELIBACY	-	-	-	21
Proportion of MARRIED and UNMARRIED WOMEN bearing Children	-	-	-	21

The following Tables having reference to the CONJUGAL (OR CIVIL) CONDITION of the PEOPLE appear in the APPENDIX TO THE REPORT.

Table 72.—ENGLAND AND WALES. AGES of HUSBANDS and WIVES in VICENNIAL PERIODS	-	-	-	115
Table 73.—ENGLAND AND WALES. AGES of HUSBANDS and WIVES in DECENNIAL PERIODS	-	-	-	115
Table 74.—PROPORTION of EACH SEX who are SINGLE, MARRIED, and WIDOWED, to 100 MEN and 100 WOMEN of the AGE of 20 YEARS and UPWARDS in ENGLAND and WALES	-	-	-	116
Table 75.—PROPORTION of SPINSTERS, WIVES, and WIDOWS aged 20 Years and under 40 to every 100 WOMEN living at the same AGE in ENGLAND and WALES	-	-	-	117
Table 76.—PROPORTION of UNMARRIED, MARRIED, and WIDOWED PERSONS of each SEX to every 1,000 MALES and 1,000 FEMALES of ALL CONDITIONS living at 14 Periods of AGE in each of the REGISTRATION DIVISIONS of ENGLAND and WALES in 1861	-	-	-	118-119
Table 77.—PROPORTION of UNMARRIED, MARRIED, and WIDOWED PERSONS of EACH SEX to every 100 Males and 100 Females of ALL CONDITIONS, living, at different Periods of AGE, in ENGLAND and WALES, at each of the CENSUSES 1851 and 1861	-	-	-	120
Table 78.—NUMBERS and PROPORTIONS per Cent. at different AGES of HUSBANDS whose WIVES were ABSENT, and of WIVES whose HUSBANDS were ABSENT, on the Night of 7th April 1861, in ENGLAND and WALES	-	-	-	120
Table 79.—RATE of INCREASE per Cent. of MARRIED WOMEN, (1) aged 15-55, (2) 20-40, and (3) of ALL AGES and CONDITIONS, in the REGISTRATION DIVISIONS of ENGLAND and WALES in the 10 Years 1851-61	-	-	-	120
Table 80.—NUMBER of SPINSTERS and WIDOWS, and MARRIED WOMEN aged 15 and under 55, and 20 and under 40, enumerated at the CENSUSES of 1851 and 1861, and the NUMBER of LEGITIMATE and ILLEGITIMATE BIRTHS registered in the 10 Years 1851-60 in the REGISTRATION DIVISIONS and COUNTIES of ENGLAND and WALES	-	-	-	121
Table 81.—AVERAGE ANNUAL NUMBER of LEGITIMATE BIRTHS to every 100 MARRIED WOMEN, and of ILLEGITIMATE BIRTHS to every 100 SPINSTERS and WIDOWS, at the Ages 15 and under 55, and 20 and under 40, in the REGISTRATION DIVISIONS and COUNTIES of ENGLAND and WALES in the 10 Years 1851-61	-	-	-	122

V.—INCREASE OF THE POPULATION SINCE 1651.

ESTIMATED POPULATION of ENGLAND and WALES since 1651	-	-	-	22
ESTIMATED DECENNIAL INCREASE of POPULATION since 1701, together with the Baptisms and Burials (with tabular statements)	-	-	-	22

VI.—LAWS REGULATING THE GROWTH OF NATIONS.

1. *Law of Population.*

LAW governing the INCREASE or DECREASE of POPULATION in a CIVILIZED COUNTRY	-	-	-	23
Population dependent on the DURATION of LIFE, on the AGE of PARENTS when Children are born, on MARRIAGES and the FERTILITY of MARRIAGES, on MIGRATION, and on SUBSISTENCE and EPIDEMICS	-	-	-	23-24

2. *Principle of Population.*

CRITICISM of the policy of progress in ENGLAND by MALTHUS	-	-	-	24
CONFLICTING PARADOXES	-	-	-	24
THEORY, REASONINGS, and DOCTRINE of MALTHUS	-	-	-	24-25
ANALYTICAL WORK of SIR JAMES STEUART	-	-	-	25
ANALYSIS of SUBSISTENCE	-	-	-	25
REAL limits of the Population	-	-	-	25
FALLACY of the assumption that the POPULATION is redundant	-	-	-	25
THE IDLE, UNSKILFUL, and CRIMINAL CLASSES only redundant	-	-	-	26
INCREASE of the POPULATION by geometrical, and of the means of SUBSISTENCE by arithmetical progression	-	-	-	26
POSSIBLE CONSEQUENCES of adopting the THEORY of MALTHUS and HAPPIER RESULTS of the POLICY ACTUALLY PURSUED	-	-	-	26-27

VII.—OCCUPATIONS OF THE PEOPLE.

1. *Previous Classifications.*

CLASSIFICATIONS employed by MR. RICKMAN and by the CENSUS COMMISSIONERS of 1841	-	-	-	27
INTRODUCTION of a NEW METHOD of ANALYSIS in 1851	-	-	-	27

2. *Abstracts of the Occupations of the People in 1861.*

EXTENSION and IMPROVED NATURE of the inquiry into the OCCUPATIONS of the PEOPLE	-	-	-	27
NOMENCLATURE	-	-	-	27
CLASSIFICATION of the OCCUPATIONS and AGES of the PEOPLE	-	-	-	27-28
Distribution of Occupations over the Country	-	-	-	28

3. *Distribution of the People in various Occupations over the Country.*

Single LISTING of the OCCUPATIONS in the EARLY STAGES of SOCIETY and their development	26
ORGANIZATION of the PEOPLE in the PRESENT DAY	26
PRESENT DISTRIBUTION of the DISTRIBUTION of Occupations	26
Diffusion of Occupations	26-27

4. *Masters in Trades and Men in their Employ*

Importance of distinguishing MASTERS from MEN, and method adopted for denoting the difference	26
Difficulty of obtaining a perfectly accurate return	26

5. *Farmers and Labourers, and the Size of Farms.*

Farmers and Persons who actually occupy Land	26
Abstract delivered until England has the Advantage of a System of AGRICULTURAL STATISTICS	26

6. *On Nomenclature, and on the Classification of the People.*

ORGANIZATION of LABOUR considered in reference to the OCCUPATIONS	26
THE NEW CLASSIFICATION	26-30
Mode of returning DOUBLE OCCUPATIONS	30
Feasibility of a FURTHER IMPROVEMENT (see also, IMPROVEMENT of the SYSTEM in all its Branches)	30
Alphabetical Arrangement of Occupations	30

7. *The New Classification of the People in their several Occupations*
(see pages 225-248).

Characteristics of Occupations	30
The POPULATION arranged in SIX CLASSES, sub-divided into EIGHTEEN ORDERS	30

CLASS I.—(PROFESSIONAL.)

NUMBER of MALES and FEMALES in the 1st (or PROFESSIONAL CLASS)	31
NUMBER of PERSONS in the 1st ORDER (OFFICERS of NATIONAL, LOCAL, and COLONIAL GOVERNMENT)	31
NUMBER and AGES of PERSONS in the 2d ORDER (The ARMY and NAVY)	31
PERSONS comprised in the 3d ORDER (The CLERICAL, LEGAL, MEDICAL, LITERARY, and SCIENTIFIC PROFESSIONS, with their Subordinates)	31-32

CLASS II.—(DOMESTIC.)

THE NUMBER of PERSONS under the several Headings of the CLASS, comprising those engaged in the DOMESTIC OFFICES or DUTIES of WIVES, MOTHERS, MISTRESSES of FAMILIES, CHILDREN, and RELATIVES (not otherwise returned)	32-33
NUMBER of SCHOLARS, Male and Female, at DIFFERENT AGES in 1861 and 1861	33-34
INCREASE of SCHOLARS in 1861	34-35
Tabular Statement of the NUMBER and RATE of INCREASE of DOMESTIC SERVANTS 1861-61	35

CLASS III.—(COMMERCIAL.)

THE NUMBER of PERSONS under different OCCUPATIONS of the CLASS, comprising those who BUY, SELL, KEEP, or LEND Money, Houses, or Goods of VARIOUS KINDS	35-36
--	-------

CLASS IV.—(AGRICULTURAL.)

THE NUMBER of PERSONS in the CLASS, comprising those possessing or working the LAND, and engaged in growing GRAIN, FRUITS, GRASSES, ANIMALS, and OTHER PRODUCTS. TABULAR COMPARISON of these Occupations in 1861 and 1861	36-36
---	-------

CLASS V.—(INDUSTRIAL.)

THE NUMBER of PERSONS in the several OCCUPATIONS of the CLASS, comprising those working and dealing in TEXTILE FABRICS and DRESS, in FOOD and DRINKS, in ANIMAL and VEGETABLE SUBSTANCES, and in MINERALS	36-39
---	-------

CLASS VI.—(INDEFINITE AND NON-PRODUCTIVE.)

NUMBER of PERSONS in the CLASS, comprising LABOURERS and OTHERS (Branch undefined), PERSONS OF RANK and PROPERTY (not otherwise returned), and PERSONS SUPPORTED BY THE COMMUNITY and of NO SPECIFIC OCCUPATIONS	39
--	----

EXPOSITION by DR. FARR of the NEW CLASSIFICATION of the PEOPLE according to their EMPLOYMENTS.

(APPENDIX TO THE REPORT.)

Difficulty of reducing the EMPLOYMENTS of the PEOPLE to a SCIENTIFIC ORDER	-	-	-	-	Page
PRODUCTS. PRODUCERS and NON-PRODUCERS. PROCESSES	-	-	-	-	225-226

ANALYSIS of PRODUCTS on which the CLASSIFICATION is based.

MINERAL PRODUCTS and PROCESSES	-	-	-	-	226
PRODUCTS of the VEGETABLE KINGDOM	-	-	-	-	227
PRODUCTS of the ANIMAL KINGDOM	-	-	-	-	227
INTELLECTUAL PRODUCTS	-	-	-	-	228-229
THE PUBLIC SAFETY (MILITARY and POLICE) and Government excluding Anarchy, are PRODUCTS	-	-	-	-	229-230
NAMING of PRODUCERS	-	-	-	-	230-231
DESCRIPTION of each of the CLASSES and ORDERS of the NEW CLASSIFICATION	-	-	-	-	231-232
PROPOSED INQUIRY into the OCCUPATIONS of the PEOPLE, in a letter to the REGISTRAR GENERAL	-	-	-	-	233
HEADS of the INQUIRY,—AGENTS, MATERIALS, PROCESSES, PRODUCTS, MASTERS AND MEN, WAGES	-	-	-	-	233-234
EXAMPLES in detail, under the several HEADS of INQUIRY, relating to—					
SOUTH STAFFORDSHIRE, Coal Mining	-	-	-	-	235-240
MINES in CORNWALL	-	-	-	-	241-242

Table 121.—CIVIL CONDITION of MARINERS employed and AFLOAT in BRITISH MERCHANT VESSELS in PORT in the United Kingdom on 8th April 1861, or which ARRIVED in PORT between that Day and 1st May 1861	151
Table 122.—SHOWING the NUMBER of EFFECTIVES belonging to the ARMY and NAVY of the BRITISH EMPIRE, exclusive of the late EAST INDIA COMPANY'S EUROPEAN TROOPS	152
Table 132.—PROPORTION per Cent. of FOREIGNERS (being NATIVES of EUROPE) in EACH CLASS of OCCUPATIONS enumerated in ENGLAND and WALES, 1861	162

VIII.—MIGRATION OF THE PEOPLE AT HOME (BIRTHPLACES).

Of the POPULATION at Home, the Number who were born out of ENGLAND and WALES, distinguishing those BRITISH SUBJECTS who were born at SEA, or ABROAD, in the EAST INDIES or BRITISH COLONIES, in the ISLANDS in the BRITISH SEAS, in SCOTLAND, and in IRELAND	39
Subjects of FOREIGN STATES living in ENGLAND and WALES, distinguishing those belonging to AMERICA, AFRICA, ASIA, and EUROPE, and showing also their principal OCCUPATIONS, as well as where they are chiefly located	39-40
BIRTHPLACES of the INHABITANTS of ENGLAND and WALES, with Tabular Statement	40
BIRTHPLACES of the INHABITANTS of LONDON	40
Tendency to migrate to LONDON	40-41
Distribution of NATIVES of LONDON over other COUNTIES	41
LANCASHIRE and CHESHIRE important Centres of Attraction	41
Limited Number of the SOUTH SAXON POPULATION who migrate to the NORTH	41
Distribution of the NATIVES of each COUNTY over every ENGLISH COUNTY and WALES	41-42

The following Tables having reference to the MIGRATION of the PEOPLE AT HOME (BIRTHPLACES) appear in the APPENDIX to the REPORT.

Table 123.—BIRTHPLACES of the INHABITANTS of the CIVIL COUNTIES of ENGLAND and WALES	153-155
Table 124.—To every 10,000 INHABITANTS in EACH (CIVIL) COUNTY, the NUMBERS BORN in that and in the OTHER (CIVIL) COUNTIES of ENGLAND and WALES	156-157
Table 125.—DISTRIBUTION of the PEOPLE BORN in EACH COUNTY of ENGLAND over ENGLAND and WALES, SHOWING OUT of 10,000 BORN in EACH CIVIL COUNTY, and LIVING in ENGLAND, the PROPORTIONAL NUMBERS RESIDENT in EACH CIVIL COUNTY at the Time of the CENSUS	158-159
Table 126.—COMPARATIVE POPULATION and NUMBER of NATIVES of ENGLAND, SCOTLAND, IRELAND, the COLONIES, and FOREIGN PARTS, enumerated in the PRINCIPAL TOWNS of ENGLAND and WALES, 1851, 1861	160
Table 127.—Of the 2,961,093 PERSONS living in ENGLAND and WALES BORN in LONDON, the NUMBERS living in LONDON and in the Groups of COUNTIES	161
Table 128.—BIRTHPLACES of the INHABITANTS of LONDON	161
Table 129.—BIRTHPLACES of the INHABITANTS of the NORTH-WESTERN COUNTIES	161
Table 130.—DISTRIBUTION of the NATIVES of SCOTLAND and IRELAND over the several GROUPS of the CIVIL COUNTIES of ENGLAND and WALES	162
Table 131.—Showing (1) the PROPORTIONAL NUMBERS in each COUNTY, out of every 100 PERSONS in ENGLAND and WALES BORN in the same COUNTY; and (2) the PROPORTIONAL NUMBERS born in each COUNTY, out of every 100 RESIDING in the same COUNTY	162
Table 132.—PROPORTION per Cent. of FOREIGNERS (being NATIVES of EUROPE) in EACH CLASS of OCCUPATIONS enumerated in ENGLAND and WALES, 1861	162
Table 133.—PROPORTIONS per Cent. of FOREIGNERS born in the COUNTRIES of EUROPE, in ASIA, in AFRICA, and in AMERICA, &c., enumerated in each REGISTRATION DIVISION of ENGLAND and WALES	163

IX.—THE BLIND AND THE DEAF-AND-DUMB.

1. The Blind.

Important Service rendered by STATISTICS of the BLIND	42
Mode of obtaining the Information	42
NUMBER and PROPORTION of the BLIND in each Division of the UNITED KINGDOM in 1861	42-43
BLINDNESS more prevalent in IRELAND than in other parts of the UNITED KINGDOM	43
NUMBER and RATIO of the BLIND in VARIOUS COUNTRIES, with Tabular Statement	43-44
DISTRIBUTION of the BLIND in ENGLAND	44
NUMBER and PROPORTION of the BLIND in LARGE TOWNS, with Tabular Statement	44
NUMBER and PROPORTION of the BLIND of EACH SEX in ENGLAND and WALES, SCOTLAND, and IRELAND	45
AGES of the BLIND in ENGLAND, with Tabular Statements	45-46
Previous or present OCCUPATIONS of the BLIND	46
OCCUPATIONS of those who have been BLIND FROM BIRTH	46-47
Interest attaching to an Inquiry as to the CAUSES of BLINDNESS in ENGLAND	47
Vague use of the term "Born Blind"	47
NUMBER and PROPORTION of the BLIND and the BORN BLIND in REGISTRATION DIVISIONS of ENGLAND, with Tabular Statement	47
SMALL-POX and PURULENT OPTHALMIA prolific causes of BLINDNESS	48
SPECIAL INQUIRY through the Clergy respecting the BLIND in HEREFORDSHIRE	48
ORIGIN of and AGE at which BLINDNESS occurred	49
NUMBER of the BLIND INSTRUCTED, and their MEANS of SUPPORT, with Tabular Statement	49-50

INSTITUTIONS and CHARITIES for the BLIND	Page
PROVISIONS of recent STATUTE (25 & 26 Vict. c. 43.) authorizing Guardians to send Poor Blind and Deaf-and-Dumb Children to special Schools	50
Table showing the LOCALITY, DATE of FOUNDATION, and AMOUNT of ACCOMMODATION of the PRINCIPAL INSTITUTIONS for the INSTRUCTION of the BLIND in ENGLAND and WALES	52-53
EDUCATION of the BLIND	54
PERSONS who are BLIND as well as DEAF-AND-DUMB, with tabular statement	54
Usefulness of SPECIAL HOSPITALS for diseases of the Eye	55

2. The Deaf-and-Dumb.

Method of obtaining information in respect to the DEAF-AND-DUMB	55
NUMBER, PROPORTION, and INCREASE of the DEAF-AND-DUMB in ENGLAND and WALES in 1851 and 1861	55
NUMBER and PROPORTION of DEAF-MUTES in Scotland and in Ireland	55
Aggregate Returns for the UNITED KINGDOM and Comparison with the Returns of other Countries	55-56
Distribution of the DEAF-AND-DUMB in England	56
Difficulty of ascertaining the number of CONGENITAL CASES of DEAF-MUTISM	56
CAUSES of CONGENITAL MUTISM	57
CAUSES of ACQUIRED MUTISM	57-58
AGES of MALE and FEMALE MUTES, with tabular statement	58
OCCUPATIONS of the DEAF-AND-DUMB	59
INSTITUTIONS for the Education of the DEAF-AND-DUMB	59-60
Necessity of SPECIAL INSTRUCTION	60
Table showing the NUMBER, LOCALITY, DATE of FOUNDATION, and AMOUNT of ACCOMMODATION of the INSTITUTIONS for the INSTRUCTION of the DEAF-AND-DUMB in ENGLAND	60-61
Nature of the INSTRUCTION afforded to DEAF-AND-DUMB CHILDREN; conflicting opinions	62
Number of the DEAF-AND-DUMB UNDER INSTRUCTION	62
Special Inquiry as to the DEAF-AND-DUMB in HEREFORDSHIRE, the Number and Age of Males and Females	63
Assigned CAUSES of CONGENITAL DEAFNESS	63-64
EDUCATION, and OCCUPATIONS of the DEAF-AND-DUMB in HEREFORDSHIRE, with tabular statements	64-65

The following Tables having reference to the BLIND and the DEAF-AND-DUMB appear in the
APPENDIX TO THE REPORT.

Table 134.—NUMBER and DISTRIBUTION of PERSONS RETURNED as "BLIND" or "BLIND FROM BIRTH," and PROPORTION of BLIND to POPULATION in ENGLAND and WALES, in 1861	164
Table 135.—NUMBER and DISTRIBUTION of PERSONS returned as "BLIND FROM BIRTH," and PROPORTION of BLIND FROM BIRTH to TOTAL BLIND in ENGLAND and WALES, in 1861. (Included in foregoing Table.)	165
Table 136.—NUMBER and DISTRIBUTION of PERSONS RETURNED as "DEAF-AND-DUMB," and PROPORTIONS of DEAF-AND-DUMB to POPULATION in ENGLAND and WALES, in 1861	166
Table 137.—PROPORTION of the BLIND, DEAF-AND-DUMB, PAUPERS in WORKHOUSES, PRISONERS, LUNATICS in ASYLUMS, and PATIENTS in HOSPITALS, to the MALE and FEMALE POPULATION in ENGLAND and WALES, 1861	167

X.—PUBLIC INSTITUTIONS:—INMATES OF WORKHOUSES, PRISONS, LUNATIC ASYLUMS, AND HOSPITALS.

1. Inmates of Workhouses.

Right of all poor and destitute persons to Food, Shelter, and Medical Attendance	65
Cost of the system of Relief in England and Wales	65-66
Number of Persons in the receipt of relief	66
DISTRIBUTION, AGES, and OCCUPATIONS of PAUPERS	66-67

2. Prisoners.

Changes in the Law and Practice relating to Criminals	67
NUMBER, PROPORTION, AGES, and OCCUPATIONS of PRISONERS	67-68

3. Inmates of Lunatic Asylums.

Judicious treatment of the Insane	68
Number of the INSANE in ASYLUMS, and their proportions to the Population in 1851 and 1861, with tabular statement	68-69
Causes of the increased number of PAUPER LUNATICS	68-69
AGES of Male and Female Patients in LUNATIC ASYLUMS	69
Former OCCUPATIONS of the INSANE	69

4. *Patients in Hospitals.*

	Page
Various kinds of HOSPITALS	70
PROPORTION to Population, and AGES of the Sick in HOSPITALS	70
Tendency of indiscriminate Medical Relief in Hospitals to encourage improvident habits in workmen	70-71
OCCUPATIONS of the Male and Female Patients in HOSPITALS	71
The labours of Miss NIGHTINGALE have created a new era in HOSPITAL MANAGEMENT	71

The following Table having reference to INMATES of WORKHOUSES, PRISONS, LUNATIC ASYLUMS, and HOSPITALS appears in the APPENDIX to the REPORT.

Table 137.—PROPORTION of the BLIND, DEAF-AND-DUMB, PAUPERS in WORKHOUSES, PRISONERS, LUNATICS in ASYLUMS, and PATIENTS in HOSPITALS, to the MALE and FEMALE POPULATION in ENGLAND and WALES, 1861	167
---	-----

XI.—ISLANDS IN THE BRITISH SEAS.

Population of the ISLE of MAN in 1851 and 1861	71
Population of JERSEY in 1851 and 1861, its Decrease accounted for	71
Population of GUERNSEY and of ALDERNEY and ADJACENT ISLANDS	71
INHABITED HOUSES and Number of Persons to a House	71
Great excess in the FEMALE POPULATION	71

The following Tables having reference to the ISLANDS IN THE BRITISH SEAS appear in the APPENDIX TO THE REPORT.

Table 138.—AVERAGE NUMBER of PERSONS to a FAMILY, PERSONS to a HOUSE, and FAMILIES to a HOUSE	168
Table 139.—INCREASE of HOUSES in the INTERVAL between the CENSUSES of 1851 and 1861, and AVERAGE NUMBER of INHABITED HOUSES to 100 PERSONS in 1851 and 1861	168
Table 140.—PROPORTIONAL NUMBERS of MALES and FEMALES living at DIFFERENT PERIODS of AGE	168
Table 141.—PROPORTIONAL NUMBER of FEMALES to 100 MALES at DIFFERENT PERIODS of AGE	168
Table 142.—PROPORTION of EACH SEX who are SINGLE, MARRIED, and WIDOWED, to 100 MEN and 100 WOMEN of the AGE of 20 YEARS and UPWARDS	168
Table 143.—PROPORTION of UNMARRIED, MARRIED, and WIDOWED PERSONS of EACH SEX to 1,000 MALES and 1,000 FEMALES of ALL CONDITIONS living at 14 PERIODS of AGE	169
Table 144.—BLIND, and BLIND FROM BIRTH	169
Table 145.—BLIND FROM BIRTH. (<i>Included in the foregoing numbers</i>)	169
Table 146.—DEAF-AND-DUMB	169

XII.—AREA AND POPULATION OF THE BRITISH EMPIRE.

DESIRABILITY of ENUMERATING THE POPULATION OF THE QUEEN'S DOMINIONS SIMULTANEOUSLY	72
POPULATION and AREA of the UNITED KINGDOM, the BRITISH COLONIES and POSSESSIONS, and of BRITISH INDIA, with tabular statement	72

CONCLUSION.

Acknowledgment of the Services rendered by COLONEL SIR HENRY JAMES, R.E., and LIEUT.-COLONEL G. A. LEACH, Assistant Tithe Commissioner, in supplying valuable information	72
Satisfactory discharge of their Duties by the SUPERINTENDENT REGISTRARS and REGISTRARS of BIRTHS and DEATHS	73
EXPENSE of all the Operations, in the COUNTRY and in the CENTRAL OFFICE	73
Efficient Services of the CLERKS appointed to the CENSUS OFFICE by the LORDS OF THE TREASURY	73
Acknowledgment of the Assistance rendered by the OFFICERS and CLERKS of the GENERAL REGISTER OFFICE who were engaged on the CENSUS	73
ENUMERATED POPULATION of the UNITED KINGDOM, April 8th, 1861 (exclusive of the part of the Army and Navy and Merchant Seamen out of the Country)	74
The FORM of HOUSEHOLDERS SCHEDULE and INSTRUCTIONS made use of at CENSUS 1861	75-76

The following Tables having reference to the BRITISH COLONIES AND POSSESSIONS, appear in the APPENDIX TO THE REPORT.

REPORT

TO

THE RIGHT HONOURABLE SIR GEORGE GREY, BART., G.C.B., M.P.,
HER MAJESTY'S PRINCIPAL SECRETARY OF STATE FOR THE
HOME DEPARTMENT.

SIR,

CENSUS OFFICE, *London*, 23rd July 1863.

THE detailed Abstracts of the Returns made under the authority of the Act for taking the Seventh Census of England having been printed and laid before both Houses of Parliament, we have now the honour to present a Report on the general results of this important inquiry. 23 & 24 Vict. c. 61.

The Census of the United Kingdom for the year 1861 was taken under the powers conferred by three Acts of Parliament, applicable respectively to England, Scotland, and Ireland; and, in the case of Scotland, the enumeration was for the first time required to be made apart from that of England, under the superintendence of the Registrar General in Edinburgh, and through the agency of the local registrars appointed under the Act for the Registration of Births, Deaths, and Marriages in Scotland. In the Channel Islands and the Isle of Man the Census was taken, in conformity with instructions from the Home Office, by the respective lieutenant-governors acting in conjunction with the English Central Office.

As the local machinery by means of which the present Census of England has been taken differs in no material respect from that employed in 1851, a brief sketch of the mode of procedure will suffice to convey all needful information upon the subject.

Local machinery for taking the Census.

The 634 superintendent registrars' districts in England and Wales are generally co-extensive with the Poor Law Unions, and are subdivided into 2,194 sub-districts, each having a local registrar of births and deaths. Under the supervision of the Superintendents, it was the duty of the Registrars to divide the sub-districts into *enumeration districts*, in accordance with directions furnished by us. While the boundaries of *parishes* or townships were to be taken as the basis upon which to frame the division, strict attention was to be paid to the limits of boroughs (whether parliamentary or municipal), towns, wards, hamlets, tithings, chapelries, ecclesiastical districts, &c., so that the number of houses and of inhabitants in these various local sub-divisions might afterwards be readily and accurately ascertained. Where a parish or township was sufficient to form of itself a distinct enumeration district, it was to be assigned to one enumerator. In no case, however, was the District to be too extensive or too populous to be enumerated by an active man within the compass of a *single day*; and, as a general rule, it was to be assumed that where the enumerator would not be required to visit more than 200 houses in towns, or where he would not have to travel more than 15 miles in visiting a smaller number of houses in the country, the district would not be too large. When completed, the scheme for the division of each sub-district was revised by the superintendent registrar, and by him transmitted to the Central Office for the approval of the Registrar General, together with the names of the persons proposed as enumerators.

Formation of enumeration districts.

The enumerators were required to be intelligent and active, able to read and write well, not younger than 18 years of age or older than 60; they were to be respectable persons likely to conduct themselves with strict propriety and courtesy in the discharge of their duties, and well acquainted with the district in which they were to act. No difficulty was experienced in procuring the services of a highly respectable body of enumerators, including clergymen and many other professional men who undertook the work from public motives.

Qualifications of enumerators.

Public institutions, such as county gaols, convict prisons, reformatories, workhouses, hospitals, barracks, and lunatic asylums, whose inmates exceeded 200 persons, and in some instances a smaller number, were treated as separate enumeration divisions, and the governor or principal resident officer was appointed the enumerator. The smaller institutions were treated as ordinary houses, and the particulars regarding their inmates were obtained by the district enumerators in the usual way.

Public institutions.

The whole of England and Wales was divided into 30,329 enumeration districts, and the islands in the British Seas into 300, to each of which an enumerator was appointed: there were in addition 533 public institutions with a distinct enumerator.

The enumeration of persons on board merchant vessels, fishing smacks, and other craft in the ports, docks, creeks, and rivers was satisfactorily accomplished by the officers of Her Majesty's Customs. Schedules, duly filled up by the masters, were obtained in the case of the vessels in port on the Census day, and on the arrival of every home-trade and coasting vessel within the month next following, inquiries were made in order to ascertain whether the Census return had been given in at any port in the United Kingdom, and if not, the master was forthwith requested to fill up a schedule. All the returns collected by the officers of Her Majesty's Customs in England were transmitted direct to the Central Office. A return subsequently furnished by the Registrar General of Merchant Seamen afforded full details with respect to the seamen *absent* in British foreign-going vessels in all parts of the world.

The information about seamen and others on board vessels of the Royal Navy, at home and abroad, was supplied to us pursuant to instructions addressed by the Lords of the Admiralty to the officers in command of Her Majesty's ships and vessels.

In order to secure the enumeration of persons on board boats, barges, and other craft in inland waters not within the jurisdiction of the officers of Customs, it was arranged that such vessels should be visited on the morning of 8th April, and the required particulars obtained from the master or person in charge, either by the ordinary enumerator or by a person specially employed for the purpose. About 290 persons were engaged to perform this duty at the principal wharves and stations on canals.

The enumerators were directed to make diligent inquiry for the purpose of ascertaining the number of persons not in any dwelling-house on the night of the 7th April, but sleeping in barns, sheds, caravans, tents, &c., or in the open air, and to enter such particulars as might be obtained respecting them in a form provided for the purpose.

In this manner, more or less strictly in accordance with the instructions, the whole of England and Wales, of the Channel Islands, and of the Isle of Man, was divided in a suitable manner, and provision was made for the complete enumeration of all the inhabitants.

The first duty of the enumerator was to deliver, in the course of the week preceding the 8th of April 1861, to every occupier of a house or tenement, a *householder's schedule*, to be filled up by or on behalf of such occupier,—under a penalty in case of wilful default,—with the following particulars respecting himself and family; viz., name, sex, age, rank or occupation, condition as regards marriage, relation to head of family, and birthplace; noting also whether any were blind or deaf and dumb. The schedules, which were almost identical with those used in taking the Census in 1851, were of two sizes; the smaller size, adapted for ordinary families, containing spaces for 15 names; and the larger, adapted for large establishments and schools, affording room for 55. An adequate supply of each description, with a liberal allowance for waste, was forwarded from the Census Office to the local registrars, and by them supplied to the enumerators; the total number of separate forms thus distributed being nearly 6,000,000.* For the use of the enumerator in delivering and collecting the schedules, a “memorandum book” was provided, in which he was required to note the description of dwelling (whether a private house, lodging-house, hotel, &c.), the number of occupiers or separate families, and of schedules left, with other particulars. The large public institutions were not furnished with schedules, but the governor or principal resident officer received from the registrar an “Enumeration Book” in which to enter the particulars required by the Act. In the case of the smaller institutions, which were not considered as separate enumeration districts, a “special schedule,” printed in red, was delivered by the enumerator to the resident head.

The schedule was to be filled up by the occupier with the requisite information concerning every person who abode in the house or apartment on the night of Sunday April 7th, 1861. No member of the family absent on that night was to be entered, except in the case of persons who were engaged at their usual labour during the night, and who regularly returned home in the morning; persons travelling by railways or otherwise were in like manner to be enumerated at the hotels or houses at which they might stop on the following day.

On Monday the 8th April 1861 the enumerators had to visit every dwelling-house in England and Wales, in order to collect the schedules which they had left in the course

* A fac-simile of the householder's schedule is printed at pages 75, 76. About 80,000 schedules were printed in Welsh, for the use of the poorer native population of Wales. The weight of the schedules, blank enumeration books, and other forms despatched from the Central Office prior to 8th April exceeded 50 tons.

of the week preceding. When the schedule was already filled up, the enumerator had to see that the entries were made in a proper manner, and to satisfy himself that the particulars were likely to be correct. If from any cause the schedule was not filled up, it was his duty to fill it up himself from the verbal information of the occupier or other competent member of the family. He was directed in all cases to ascertain carefully that no person who abode in the house or lodgings on the previous night was omitted, and that no person then absent was included, except those travelling or out at work during that night and who returned home on the following morning. He was authorized to correct any schedule which contained manifestly false particulars. When satisfied of the correctness and completeness of the entries, he noted the receipt of the schedule in his memorandum book, in which he entered also the particulars respecting the number of houses, inhabited, uninhabited, or building,—of persons who slept in barns, sheds, outhouses, &c.,—of residents temporarily absent, and strangers temporarily present.

We have the satisfaction to state that by the efficient exertions of the local officers, aided by the general good-will of all classes of the community, the enumeration was accomplished in a successful manner within the appointed time, and that not a single instance occurred in which it was found necessary to adopt proceedings under the penal clauses of the Act of Parliament. Several of the enumerators who had acted in the same capacity ten years before remarked that a more intelligent appreciation of the objects and uses of the inquiry, combined with the utmost willingness to furnish the returns, was evinced by the poorer population; a result which may be fairly ascribed to the co-operation of the educated and influential classes of society, particularly of the clergy of all denominations and of public writers in the press.

Immediately after the completion of the process of enumeration the local officers were occupied chiefly with the following matters:—(1.) the transcription by the enumerator of the particulars contained in the householders' schedules into the "Enumeration Book," accompanied with proper indications of all local boundaries, and a summary of the total number of houses and of persons enumerated; (2.) the collation of the schedules and the enumeration books, as well as the careful revision of the latter by the registrar, who had then to make out a summary for his sub-district, and to transmit it, with the other documents, to the superintendent registrar; (3.) the general revision of the returns by the superintendent registrar, who was required to test their accuracy, and to satisfy himself that the registrars and enumerators had in all cases duly performed the duties required of them. These several operations were to be completed by fixed days, and the different documents were to be transmitted to this Office as early as possible in May. Accordingly, by the end of that month, the householders' schedules, amounting to about 4,500,000, the enumeration books, more than 31,000 in number, and the various other returns, were received here; and on the 7th of June, within two months from the date of the Census, we were enabled to present to the Secretary of State for the purpose of being laid before Parliament a preliminary statement of the approximate numbers of the population and houses enumerated in England and Wales and the Islands in the British Seas, compiled from the summaries furnished by the local officers.

A careful revision of the enumeration books was then undertaken at the Census Office. Not only were all totals and summaries verified or corrected, but every entry was examined for the purpose of ascertaining that the particulars in the several columns were consistent with each other, and that the ages of the sexes were entered in their allotted columns. On the completion of this minute but indispensable process of revision, which involved the examination of upwards of 20 millions of entries contained on more than one million pages of the enumeration books, the classification as well as the tabulation of the facts was proceeded with. The detailed abstracts are contained in the two volumes which have already been presented to Parliament,—the first volume comprising the various Tables which show the numbers of the population, and of the houses enumerated, and their distribution over the country; and the second volume comprising the abstracts which exhibit the ages of the people, their occupations, birth-places, and condition as regards marriage, the numbers of the blind and of the deaf-and-dumb, with other particulars.

The measures above detailed comprised all that was absolutely necessary to obtain the Census of the inhabitants of England and Wales, but it appeared desirable to obtain also several collateral returns relating either to British subjects not residing within the United Kingdom, or to certain *classes* of the community already in part enumerated dispersedly among the general population. Accordingly, His Royal Highness the General Commanding-in-Chief was pleased to direct that a return should be made, distinguishing officers from non-commissioned officers and rank and file, by the com-

returns at
Census Office.

Subsequent
revision.

Collateral
returns relating
to Army, &c.

manding officer of every regiment or battalion of the British army at home and abroad, showing the ages, country of birth, and whether single, married, or widowers; also of the numbers and ages of the women and children. The Lords of the Admiralty, as already stated, directed that returns of a like nature should be furnished with respect to the officers and men of the Royal Navy. The Secretary of State for India in Council procured returns of the numbers, ages, civil condition, occupations, and birth-places of the British-born subjects (exclusive of the Army) resident in India at the date of the Census; and by the Secretary of State for the Colonies the latest returns of the population of the colonial possessions and dependencies of the British Crown were obtained. Through the intervention of the Secretary of State for Foreign Affairs, returns of the number of British subjects residing in several foreign States were furnished by their respective governments, or by the consular agents of this country. The numerical results shown by these various returns will be found in Tables printed in the Appendix to this Report.

I.—POPULATION, HOUSES, AND FAMILIES.

1. *Persons absent from the United Kingdom.*

Persons absent
from the
United King-
dom.

The people of these islands are more movable than other nations, and large numbers of them are always abroad, sometimes on distant voyages, sometimes on the Alps, sometimes in the deserts of Africa, or in the strangest places; but generally in ships at sea, in the great commercial entrepôts, in the capitals of Europe, in our colonies, or in the States of America.

The measures which were taken to procure the returns of the army and navy, and merchant seamen abroad, either on sea or land, have been already described, and they were successful. The numbers exceeded a quarter of a million (250,356); of whom 162,273 belonged by birth to England and Wales. The army and navy of a country are an integral part of its population; they should therefore be counted among its numbers. But the population of travellers and of temporary settlers in other States are less accurately defined; their numbers are not easily ascertained, and they are represented to some extent by exiles and foreign visitors in England. They are therefore excluded from our Tables. The number of the British subjects, including the Scotch and the Irish, abroad, of which we have returns, was 67,969. This number does not include the English in America, in India, or in the colonies, neither does it include any of the English in France, except those who were domiciled. Upon the other hand, some of the people born at the Mediterranean Stations were inscribed in the Consular Registers as British Subjects; but as a general rule the Maltese and Ionians are excluded from the list.

British resi-
dents in
Foreign parts.

France is the country to which the English most resort in Europe, and 25,844 are domiciled there; 4,092 are returned in Belgium, 827 in Holland, 1,124 in Switzerland, 7,365 in Germany, 5,467 in Italy, including Rome, 2,072 in Portugal, and 3,879 in Spain, 525 in Greece, 2,360 in Turkey, and 931 in Egypt; in Denmark 372, in Norway 242, and in Sweden 411; in Russia 3749. Passing to Asia, 30 of Her Majesty's Subjects were returned in Persia, 1,072 in China, 81 in Japan, and 24 in Siam. The English population in India, according to the returns of the Indian Government (apparently defective), amounted to 125,379, including the English Army, 85,008 strong. They are not included in Table 5, page 81; see Tables 325–332, pp. 213–17.

340 English people are in the empire of Morocco. Algeria and the rest of Africa make no return.

Central America returns 145 English residents, Ecuador 27, Chili 4,152, of whom 3,265 are males, chiefly miners, and Brazil 2,838.

Table 6, pages 82–3, shows, in detail, the particular places in which the English resided, and the notes supply some necessary explanations.

The numbers of each of the two sexes returned abroad did not greatly differ, as the males were 36,734, and the females 31,235. In France and Belgium the women exceeded the men in number; and in Germany there was little difference. The girls at school probably affect this result. In China, Japan, Chili, Brazil, and India the men preponderated largely.

The natives of England in the United States exceed the numbers in all other countries. Mr. Kennedy, the able Superintendent of the Census of the United States, has favoured us with an elaborate return of the numbers of the inhabitants of each State in 1860 who were born in this kingdom, amounting in the aggregate to 2,224,743; of whom it was ascertained that 477,455 were born in England and Wales, 108,518 in Scotland, and 1,611,304 in Ireland, 27,466 were described simply as born in the United Kingdom. In addition to these numbers 249,970 were born in British America,

and 1,419 in Australia. The distribution of the 2,474,713 emigrants over the several States is shown in the Appendix, Table 7.

Our information about foreigners in England and Wales is tolerably complete, and we shall refer to the details hereafter. The number was 84,090, or, exclusive of those from the United States, 76,229. This is some compensation, therefore, for the English abroad, who, as has been already stated, are not included in our numbers.

Foreigners enumerated in England and Wales.

2. Population of the United Kingdom.

The population of the United Kingdom in 1851 was 27,745,949. The increase, which had been so great in Ireland up to the era of Catholic emancipation, ceased after 1841; and the population emigrated in large numbers to new fields of industry, so that the increase in the United Kingdom was found in the ten years ending in 1851 to be less than it had been in any previous decenniad since the first Census was taken. The rate of increase decreased, and only 709,499 people were added to the population in ten years. In the ten years following, emigration flowed in a still larger stream, for by the returns, at least 2,054,578 British emigrants sailed from the ports at which accounts are kept*; the country was engaged in a war with one of the European powers, and it was again visited by the Asiatic epidemic; so that although it was probable that the population had advanced, the extent of the increase remained uncertain. All doubt, however, was dispelled by the enumeration, and the Census showed an increase of 1,575,339 people; making the aggregate population of the United Kingdom, including its army, navy, and merchant seamen abroad, 29,321,288.

Population of the United Kingdom.

The increase was at the rate of 5·68 per cent. in the ten years, and of ·553 per cent. annually.

Rate of increase.

This gives a correct view of the rate at which the population has increased; but to determine the increase of the English race the emigrants must be taken into account.†

The ascertained excess on the population of 1851, with the emigrants, makes 3,629,917.

The increase of the emigrants abroad, and the number of persons unregistered who leave the country, probably counterbalance not only the number of emigrants returning, of whom no record is kept, but also the number of immigrants into this country from other states.

The population has produced numbers to replace the dead, and on every thousand families an addition of 131, of whom 57 are provided for at home and 74 in America and Australia.

The population was thus distributed over the four divisions of the United Kingdom in the year 1861:

Distribution of the Population.

TABLE I.

	TOTAL POPULATION.	Population, excluding Army, Navy, and Merchant Seamen Abroad.	Proportion of Population in 4 Divisions of the Kingdom.
UNITED KINGDOM - - - -	29,321,288	29,070,932	100·0
England and Wales - - - -	20,228,497	20,066,224	69·1
Scotland - - - - -	3,096,808	3,062,294	10·5
Ireland - - - - -	5,850,309	5,798,967	19·9
Islands in the British Seas - -	145,674	143,447	·5

The facts respecting Scotland and Ireland are discussed by the Commissioners for those parts of the United Kingdom; and we have now to notice the general results of the Census of England and Wales and of the Islands in the British Seas.

Out of ten parts of the population of the country, nearly seven belong to England and Wales, two to Ireland, one to Scotland, and a small fraction ($\frac{1}{20}$) to the Channel Islands.

The population of England and Wales, including the army, navy, and merchant seamen abroad, was 20,228,497.

3. Increase of the Population of England and Wales.

The increase of the population of England and Wales since the last Census was 2,174,327. The increase was at the rate of 12 per cent. in 10 years; or, 1·141 annually.

Increase of Population, England and Wales.

* 2,249,355 emigrants sailed from British ports, but 194,777 of that number were foreigners.
† The emigrants of the ten years were most numerous in the early years, and left the country on an average 6·35 years before the Census of 1861; and at the English rate of increase would amount to 2,208,122 in that time, or 153,544 in excess of the original number. The actual increase was probably greater.

Emigrants.

The emigrants of English origin in the last ten years amounted to 640,316, which makes the numerical increase since the Census of 1851 to be 2,814,643. The increase of the emigrants abroad is probably rapid, and it may be taken to represent the emigration reflux.

Immigrants.

A certain deduction must be made for the Scotch immigrants who crossed the Tweed and never returned, as well as for the Irish emigrants who settled in England. The increase in the ten years of the numbers of the Scotch and Irish in England was 120,790, which has, however, to be reduced by the increase of the Englishmen in Scotland and Ireland. The number of persons in England born abroad increased by 63,429 in the ten years; but this is counterbalanced again by the increase of Englishmen abroad, exclusive of the recorded emigrants. If the whole of the increase of the 184,219 persons in England, born out of its limits, be struck off, the natural increase recorded becomes 2,630,424; and it is certainly the minimum to be arrived at by estimate, the true number being between this and 2,814,643.

Increase of
Population.

Taking the natural increase at only 2,630,424, the excess of the registered births over the registered deaths accounts for 2,260,935 of the number, leaving 369,489 children in ten years, or 36,950 annually, who are left unregistered under the Act, which does not enforce by penalty the registration of births on the parents or on the guardians of children.*

The increase of the population was at the rate of 12·0 per cent. in ten years. If the emigrants are added to the ascertained numbers, the rate of natural increase will be 15·6 per cent.; or, allowing for the Scotch, Irish, and other immigrants, 14·6 per cent.

The population of England and Wales has advanced steadily through this century; from 9,156,171 people in 1801 to 20,228,497. In actual numbers, the additions during ten years of war were 1,298 thousands; in the ten years 1811-21, divided between war and peace, the increase was 1,718 thousands; and in the next ten years, 1,879 thousands; making the aggregate population at the Reform era, 14,051,986. Since the year 1831 the population, advancing firmly at a composed rate, has grown in each ten years by 1,983 thousands in 1831-41, 2,019 in 1841-51, and 2,174 in the last ten years, making the addition to the population since 1831 full 6,176 thousands, or exactly 6,176,511. In the same period swarms of emigrants have left these shores.

The annual rate of increase of the home population was highest in the years following the peace, before emigration was developed; it was 1·533 in 1811-21, and has fallen successively to 1·141.

The annual rate of increase in the 60 years of this century was 1·330, and the actual aggregate increase is 11,072,326, or 121 per cent. The population of 1801 doubled its numbers in the year 1852.

At the rate of increase prevailing in the last ten years, the population would double itself in 61 years. The period of doubling, deduced from the annual rates reigning during this century, is 52 years.

4. *Males and Females.*

Sex.

The boys born in England are in the proportion of 104,811 to 100,000 girls†; but they experience a higher rate of mortality, and, according to the new English Life Table, the rates are so finely adjusted that the numbers are reduced in the end very nearly to an equilibrium, the men and women living, of all ages, being in the proportion of 100,029 to 100,000. Such would be the state of things if there was no emigration, or if the men and women emigrated in pairs. That has not hitherto been the case; and at the Census, 10,289,965 females, and 9,770,259 males were enumerated. There was an excess of 513,706 women at home; or, deducting 162,273 from their number on account of their husbands and of other men in the army, navy, and merchant service abroad, the difference is reduced to 351,433 women at home; the men of the corresponding ages being on the continent, in the colonies, or in foreign lands, unless their numbers have been reduced by higher rates of mortality than prevail in England.

To 100,000 women, of all ages, in England, there are 95,008 men, of all ages, at home; or, including a due proportion (1,577) of the army, navy, and merchant seamen abroad, 96,585, leaving 3,415 of the absent unaccounted for.

Appendix,
Tables 21, 22.

The excess of females over males at each Census is shown in Tables 21 and 22 (see page 88 App.) The proportion of men to women at home is less than it was in 1851, owing

* Births registered in the ten years 1851-60, 6,471,650; deaths, 4,210,715. The deaths of a certain number of children in the first days of life probably escape registration; some are buried as stillborn who were born alive.

† See English Life Table No. 3.

probably to the increase of the army abroad. It will be observed that the disparity in the numbers of the two sexes at home was greatest in 1801 and 1811 during the war; this was due to the men abroad in the several services.

To complete this view of the proportions of the two sexes living at home, their ages must be taken into account. There is an excess of boys over girls living under the ages of fifteen: and by the Life Table an excess of men is provided all through the middle period of life; but that surplus is overdrawn by emigration, so that the women exceed the men in number to a considerable extent in the early, and middle, and still more in the advanced ages, when their longevity comes into play.

Tables 70, 71.

The excess of the emigration of males over females accounts for the present difference in the proportions of the sexes.

5. Houses and Public Institutions.

The nomadic race which once peopled these islands has a certain number of representatives still existing. Fairs and races are their field-days, and their irregular battalions are there easily passed in review. But the enumerators had to follow them to their haunts; and succeeded in discovering accounts of 7,130 who on the night of 7th April were in the open air, in tents, or in caravans, and of 4,314 in barns, sheds, and other places of shelter. The numbers living out of houses vary with the seasons; in winter they shrink into dwellings, and in summer they swarm again in the fields, which have irresistible charms for the vagabond race, as well as for their near relatives the hop-pickers and haymakers. Mixed among them are found some of the victims as well as some of the outcasts of society.

Persons enumerated out of houses.

The ascertained houseless class amounted to 20,348 persons on 7th June 1841; 15,764 on 31st March 1851; and 11,444 on 8th April 1861.

In 1861 we found also 11,915 persons living in barges, 6,663 in inland vessels in ports, and 55,765 persons in seagoing vessels in the ports of England and Wales. Of the whole class of the population, including those in vessels, out of fixed dwellings, 75,188 were males, and 10,601 were females.

Classes of the population, which in uncivilized societies are often without fixed dwellings, are now lodged, voluntarily or involuntarily, in public institutions.

Thus 26,096 criminals are in prisons; 24,345 lunatics are in asylums; 10,414 patients are in hospitals; 125,722 of the poor and infirm are in workhouses.* There are 23,598 inmates in the principal charitable institutions and asylums. The inmates of colleges and schools have not been distinguished, and a multitude of small institutions of various kinds are treated as houses.

Inmates of Public Institutions.

There were 63,840 soldiers in barracks.

In 1,684 public institutions of various kinds were 37,778 officers and servants, with their families, in addition to the special inmates.

The great mass of the population was enumerated in houses.

What is a house? appears to be a question admitting of an explicit answer. And the enumerators of the United Kingdom were instructed to class under that category every habitation; each separate house comprising by definition all the space within the external and party walls of the building. Thus it became impossible to count either each room or each story as a separate house, although it might be separately occupied or owned, or might even have attached to it the privileges of voting.

Definition of a house.

On the continent, each hotel, however numerous may be its occupiers or tenants, is reckoned as one house; and the English practice was formally sanctioned, after discussion, by the official delegates of the various governments of the world at the London session of the International Statistical Congress.†

Scotland is the only country of Europe in which the definition of "house" has hitherto offered insuperable difficulties. In that country, the population of 3,062,294 souls has sufficient space,—19,639,377 acres,—giving six acres and more to each inhabitant; while houses in the open country enjoy the perfect security which is sought within the walled cities of the continent; yet Scottish families, instead of living on the earth in pure air, with the sky over their dwellings, in many instances prefer lying stratum over

Difficulty of defining a house in Scotland.

* The Number of Criminals in Prisons, of Lunatics in Asylums, of Patients in Hospitals, and of Paupers in Workhouses, in Summary Table XII., Population Tables, Vol. I., will be found to differ from those in Summary Table XXXII. in Vol. II., a few of the establishments reckoned as institutions in the former table having been excluded from the latter, which shows the corrected numbers.

† M. Legoyt, in his report of the proceedings in Committee, observes:—"La section est tombée d'accord sur la définition du mot 'maison,' et sur les faits intérieurs et caractéristiques auxquels la maison doit être reconnue. Elle a refusé notamment d'attribuer cette désignation aux divers étages dont peut se composer une construction affectée à l'habitation, lors mêmes que ces étages seraient occupés par des familles distinctes, et qu'ils auraient un escalier séparée."—*Rep. on Stat. Cong.*, p. 153.

stratum in flats, opening into a common staircase,—“a continuation of the street,”—as it has been called, which receives the organic emanations of the families on each floor. In several of the towns they, at the various Censuses up to 1851, conferred the names of houses on these flats or floors as they would be called in England, *étages* as they would be called in France.* And the Scottish Commissioners who possessed many local advantages, do not appear to have been more successful in 1861 than we were in 1851, in getting the actual number of houses in Scotland.† This must be borne in mind in comparing the houses of Scotland with those of England and of other countries.

Distinct
buildings
enumerated
as houses.

We have, in conformity with the practice since 1801, for the sake of uniformity, enumerated as houses all the distinct buildings which were inhabited, as well as uninhabited houses, and houses building; and after thus avoiding the inextricable difficulties of the “flats,” we have still many heterogeneous structures mixed up with houses in the ordinary sense of that word. The house is a very variable unit; it includes in the Census the hut on the moor, the castle on the hill, and the palace; so that every one of these structures, and of the intermediate mansions and cottages, is reckoned as a house. The ordinary house varies in size and structure in town and country,—in its cubical contents, in its hearths, in its doors, and in its windows; so that to give a correct view of the accommodation which houses afford the population, and of their value, and of their sanitary influences, a special inquiry is indispensable.

The Inhabited Houses in England amounted, in 1861, to 3,739,505; showing since the last Census an increase of 461,466.

Annual value
of houses.

The great difference in these houses is shown by their annual value. Thus 519,991 houses are returned at rentals varying from 20*l.*‡ to 20,000*l.* a year; or at 52*l.* · 8 on an average.

3,219,514 householders, or more than six in seven, pay no house duty; and the annual value can only be estimated approximatively, by continuing the series as shown in the Table 31 (p. 92 App.) By this method the average rent of houses at rents under 20*l.* a year is 9*l.* · 5; and the mean annual value of all the houses in England is 15*l.* · 5 (15*l.* and 5 florins).

The annual value of all the houses at this rate is 58,013,181*l.*, of which 7,159,000*l.* is due to the 461,466 new houses erected in the last ten years.

At 15 years' purchase the dwelling-houses erected in ten years are worth 107,000,000*l.*; and all the houses standing in 1861 are worth 870,000,000*l.*

1,575,923 houses were inhabited in 1801, and the subsequent additions of new houses, besides replacing houses decayed and destroyed, leave a surplus of 2,163,582.

The value of the houses has probably increased in a greater ratio than their numbers.

Number of
houses.

184,694 houses were uninhabited, and 27,305 were building in 1861. To 1,000 houses inhabited there were 49 uninhabited and 7 building.

The number of “houses building” was 27,305, or in the proportion of 1 house building to 137 inhabited and to 7 uninhabited.

The houses building were first enumerated in 1811; and the enumeration has been since repeated at every Census. In a country under depopulation the old houses fall into decay; many houses are uninhabited; and few new houses at a Census are “building.” And as the question, Is England increasing or decreasing—decaying or flourishing—was seriously discussed during the last French war, it was thought that the inquiry into the “houses building” might assist in its solution. §

* Johnson has been quoted in support of the notion, held by some persons in Scotland. A “house” he defines as (1) a place where a man lives; a place of human abode.” (2) “any place of abode,” &c. &c. Now it does not follow that because a house is “a place wherein a man lives,” that every place wherein a man lives is a house; for instance, a tent, a barge, a ship, a cell, or a chamber is not a house. In the example which Johnson quotes, “Sparrows must not build in his house eaves,” Shakespeare finely characterizes the house by its eaves: the man living under his own roof, not under another man’s “flat.” Again there is the other quoted passage:

“The bees with smoke, the doves with noisome stench,

“Are from their hives and houses driven away.”

Here a dovecote is a “place of abode,” but it is not a house in the Census sense; and there is a difference between cell and hive. Johnson defines “flat;” and he was acquainted with Scotland, yet he nowhere intimates that “a flat” is “a house”; so that his authority is explicitly against the extension of the name of the part to the name of the whole of a building.

If any doubt remains on the subject, it will be dispelled by the following quotation from Boswell, who so faithfully reflects Johnson’s opinions in the *Journal of the Tour in the Hebrides*. After citing a certain baronet, upon the perils of walking the streets of Edinburgh at night, he adds:—“The peril is much abated by the care which the magistrates have taken to enforce the laws against throwing foul water from the windows; but, from the structure of the Houses in the old town, which consist of many STORIES, in each of which a different FAMILY lives, and there being no covered sewers, the odour still continues. A zealous Scotsman would have wished Mr. Johnson to be without one of his five senses upon this occasion. As we marched slowly along, he grumbled in my ear, ‘I smell you in the dark!’ But he acknowledged that the breadth of the street, and the loftiness of the buildings on each side, made a noble appearance.”—*Boswell’s Life of Johnson*, Croker’s edition, p. 270.

† Report on Census of Scotland, p. xxvii.

‡ Return ordered to be printed by House of Commons, 10th July 1863. The Return gives the number of houses assessed to House Duty on 5th April 1862. The number of houses under 30*l.* is 205,528, and is taken as applying to houses of the annual value of 20*l.* and under 30*l.*

§ Preface to Census, 1811, p. x.

Upon comparing the number of "houses building" with the total numbers standing this result is elicited:—in 1811 to 1 house building there were 114; in 1831 the proportion was 1 to 105; in 1861 it was 1 to 144.

This seems to imply that since 1831 this "indication of prosperity" has taken an unfavourable turn.

The question requires investigation, as it is by no means so simple as it appears to be on the surface.

Houses are built to replace old houses, and to provide for the new families of the increasing population. If we assume, for the sake of illustration, that *one* house in 100 falls into decay every year, so as to require reconstruction, the 3,431,533 houses of 1851 would be reduced, by the decay of 328,116, to 3,103,417 in ten years; but the houses in 1861 amounted to 3,924,199, or to 492,666 in excess of the houses in 1851; the new houses sufficing to replace the old houses, and to leave the enormous surplus, must upon this estimate have amounted to 820,782, or to 82,078 annually on an average.

If an equal number of houses is built every year, and they last on an average the same number of years, the proportion which the number of houses building bears to the number of houses existing will depend on the mean time it takes to build a house. Thus, if the houses of a place amount to 1,000, and each lasts 100 years, the 1,000 houses will be kept up by the erection of 10 new houses every year; and if each of the 10 houses is built in a year the numbers "building," corresponding to those at the Census, will, on an average, be 10. If each house takes 2 years for its construction, 20 houses building will figure in the Census return; if the houses are built in half a year on an average, 5 only will be building, for 5 built in the first half of the year, and 5 in the second half of the year, make 10 annually.

The change in the proportion of the houses building to the subsisting houses is probably the consequence of the more rapid system of construction which is now carried on in the towns. Thus if houses, including huts and cottages, as well as castles and palaces, were built at the rate of 82,078 a year; then the 27,305 building in 1861 would imply that they were built on an average in about 4 months. If the houses were built on such a system as to require $5\frac{1}{2}$ months for completion in 1831, and 4 months in 1861, the difference in the proportion of houses building in 1831 and in 1861 would be accounted for by this cause alone.*

TABLE II.—PROPORTION OF INHABITED and UNINHABITED HOUSES to 1 HOUSE BUILDING in ENGLAND and WALES in each of the CENSUSES 1811–1861.

Years.	To 1 House building, the Proportion of Houses			Houses building to 1000 existing.
	Inhabited and Uninhabited.	Inhabited.	Uninhabited.	
1811	114·057	110·909	3·148	8·8
1821	111·958	108·341	3·617	8·9
1831	105·071	100·228	4·843	9·5
1841	113·584	107·271	6·313	8·8
1851	129·146	123·369	5·777	7·7
1861	143·717	136·953	6·764	7·0

* The relation between the five elements involved in this question of houses can be easily expressed, where the number of houses remains stationary. When either x or y is known, the equations become determinate; in the illustration which is given in the text, y is taken at 100. The effect of taking any other higher or lower figure is evident.

H = the number of houses enumerated.

y = the mean duration of houses in years.

b = the number of houses building; that is, the average number in the course of construction, represented approximately by one enumeration.

h = houses built annually.

x = mean time employed in the construction of a house.

Then from $yh = H$; and $h = \frac{b}{x}$; if h remains invariable, we have—

$y = \frac{xH}{b}$ = duration of houses; when houses existing and building are given, as well as x . If $x = 1$, the time of construction is one year, and $\frac{H}{b}$ = the mean duration of houses.

$b = \frac{xH}{y}$ determines the number of houses building when x and y as well as H are given.

$x = \frac{yb}{H}$ determines the mean time employed in the construction of houses when y is given as well as b and H .

When h increases, the H determined by enumeration is below the ultimate number of houses.

The following note is by a London Architect:—

"The number of houses building on a given day would depend upon—

"1. The season of the year;

"2. The building operations in the seasons immediately preceding;

"3. The facilities of obtaining money by small builders, and the price of materials in large speculations.

"It would be a fair assumption that houses on an average are built in six months, many more small suburban houses being built annually than houses of any other description. The ground rent commences sufficiently soon after the building is begun to supply a strong motive for rapid completion. Everything is quicker now."

That such an increase in the relative velocity of building houses has taken place is quite in conformity with experience, and justifies us in refusing to consider the decrease in the proportion of houses building as any indication of the failing prosperity of England.

Uninhabited
houses.

The uninhabited houses amounted to 184,694; or there were 49 uninhabited houses, besides 7 building, to every 1,000 inhabited houses. This number represents the number of houses absolutely uninhabited on the Census night, for the Census Act did not enable us to distinguish the number of houses unoccupied by tenants paying rent to the landlord. The house unlet, in charge of a single woman, is counted as an inhabited house; and it happened in some cases that a house occupied by a tenant was uninhabited on the Census night.

A return of the number of houses unlet would throw much light on the relative value of house property; but we found it impracticable to deal with this question without special local inquiries.

Proportion of
persons to,
inhabited
houses.

The number of inhabited houses was 3,739,505, and on an average there were 537 persons to 100 houses; making the proportion 5·37 to a house, or nearly 16 persons to 3 houses.

If the 397,582 persons in 1,684 institutions and ships are excluded, the persons to an inhabited house are reduced to 5·26.

The proportion of persons to 100 inhabited houses has gradually decreased from 575 in 1821 to 537 in 1861. This is a satisfactory movement, for the isolation of families in separate dwellings is in every way salutary.

This average, it is understood, is a mean result, and includes extremes and varieties of the utmost importance. We give illustrations of the variety of distribution in the houses of fourteen sub-districts.*

Thus of 48,273 houses, institutions excluded,—2,417 were uninhabited; 1,501 houses contained one person in each, or 1,501 inhabitants; 5,361 contained two inhabitants in each house, or 10,722 in the aggregate; 6,627 houses contained three inhabitants in each house; 7,048 houses (the maximum) contained four inhabitants in each house; the numbers then gradually decline. Each of 25,319 houses contained *five or more* people; 4,465 contained 10 or more people; 1,389 contained 15 or more; 596 contained 20 or more; and 142 contained 30 or more inhabitants.

While more than half of the houses contain five or more inmates, more than half of the inhabitants live in houses containing seven or more inmates.

The Table (39) exhibits a series of very curious facts, and is particularly useful in indicating the precautions to be taken in the employment of averages, as well as in determining the different degrees of house accommodation.

6. Families.

Families,
their consti-
tution and
numbers.

The family in its complete form consists of a householder with his wife and his children; and in the higher classes with his servants. Other relatives and visitors sometimes form a part of the family; and so do lodgers at a common table who pay for their subsistence and lodging. In taking the Census the enumerator was directed to leave with each occupier a householder's schedule; the occupier by definition including the owner, or the person who pays rent, whether (as a tenant) for the whole of the house, or (as a lodger) for any distinct floor or apartment. Thus a lodger alone, or in company with another lodger, occupying common apartments, is an occupier, and as such is classed as a family in the abstracts. The occupiers of separate almshouses, of public buildings, of porters lodges, and of detached dwellings, although nominally paying no rent, are also treated as families; except in the case of servants boarding in their master's house.

The number of families was 4,491,524 in 1861; and the proportion of persons to a family was 447 persons to 100 families; 4·47 persons to 1 family; or nearly 9 persons to 2 families. The proportion of persons to a family varied from 4·69 in 1801 to 4·83 in 1851. And the reduction of the proportion to 4·47 in 1861 is fairly referable to the multiplication of families by the recognition of lodgers as constituents of the class. If the 1,684 institutions and their inmates and persons out of houses (397,582) are excluded from the calculation, the proportion of persons to a family will be reduced to 4·38.

There are 12 families to 10 houses.

We have endeavoured to give a more definite view of the constitution of families, by analyzing their constituent parts, in 14 sub-districts, representing different classes of the community.

* See Appendix, Tables 32, 33, 39.

We distinguish three classes of families; the first has at its head a husband and wife; the second has a widower or a widow at its head; and the third has a bachelor or spinster at its head. The head of the family was absent in 3,163 instances out of 65,031; and of 61,868 families 41,526 had the husband and wife at their head; 11,099 had a widower or widow, and 9,243 had a bachelor or spinster at their head. About two-thirds of the existing families consisted of married couples; 6,487 were alone; and of the rest 31,896 had one or more children. The numbers who had children, relatives, visitors, servants, and apprentices, or trade assistants, in the various combinations, are shown in the Table; which also exhibits the corresponding facts for the other classes of families.

Families.
Tables 34-41.

The number of children resident with their parents was 93,788; and there were 2·26 children on an average to each family, or 4·26 children and parents, including the father and mother, to each family of this class. Striking off the families consisting of husband and wife, sole, there remain 31,896 pairs having with them at home 93,788 children; that is, 2·94 children to a family, or 4·94 children and parents to a family. A fourth part of the families had 4 children or more at home; and these families of parents and children consisted of 7 persons on an average. The families of which widowers or widows were the heads had children connected with them in 6,677 out of 11,099 cases.

Children.
Tables 41, 42.

II.—TERRITORIAL DISTRIBUTION AND SUBDIVISION.

1. *Towns.*

The population of England consists of several thousands of small communities; which are associated together more or less intimately by vicinity, and by common interests, duties, or rights.

Tables 43-52.
Difficulty of defining a town.

The populations of parishes or places are distinguished in the volume; and a certain number of these places are parts of cities, or constitute municipal boroughs which have legally defined boundaries. Many of them are market towns, others are such aggregations of houses as are commonly called on that account towns, without having yet any other elements of union, except the ordinary parish organization. It is difficult to distinguish these small growing towns from villages and hamlets; and the line of separation cannot be drawn between them by any definite rule.

The area of the small towns can only be determined approximatively; but the density of population is so distinguishing a feature of towns, that, in the absence of better methods, the rules in the note to Table 45 were followed in a certain number of cases.

781 towns, of which the names are given at the foot of the table, contained 10,960,998 inhabitants; while the villages and country parishes contained 9,105,226, a large population in itself, and exceeding indeed in number the whole population of England and Wales in 1801, but less by 1,855,772 than the population of the towns in 1861.*

Town and country population.

The English nation then, without losing its hold on the country, and still largely diffused over 37 million acres of territory, has assumed the character of a preponderating city population. It enjoys the advantages of the cities of the ancient world in the proximity of its citizens for intercourse, for defence, for counsel, for production, and for the interchange of commodities; for rapidly as the population has increased, it has not kept pace with the progress of industry and wealth.

The area which the 781 towns covered was 2,991 square miles; while the area of the rest of the country was 55,330 square miles. [The area of the 781 towns was equivalent to 7,745 square kilometers. The average area of each town was 9·9, nearly 10 square kilometers, or 992 hectares.†]

Area of 781 towns.

There were 10,960,998 people living on 2,991 square miles, and 9,105,226 people living on 55,330 square miles.

Comparative density of town and country population.

The average population of a town is 14,035; and the average size is represented by a square of two miles (1·957) to the side, or a circle of 1·1 mile to the radius. The people are distributed unequally, but the mean town density is expressed by 3,665 persons to a square mile, 5·73 persons to an acre. And upon the hypothesis of equal distribution the people live at a mean distance of three quarters of a mile (·736 mile) from the centre.

In the country around the towns the people are scattered; there are nearly 4 acres (3·89) to a person, 165 persons to a square mile.

* The population of England and Wales in 1801 was 8,892,536, exclusive of its share of the army, navy, and merchant seamen abroad.

† The meter is longer than the English yard, and a square of 100 meters to the side is a hectare (land measure), while a square of 1,000 meters to the side is a square kilometer. We give the metric measures in conformity with the decisions of the International Statistical Congress.

But the towns are so distributed over the kingdom that every part of the country enjoys some of their advantages. Thus the kingdom is divided into 781 portions, in each of which there is a town. And the mean area of the districts of which the town is the centre is 75 square miles; so they are equal to circles of a radius of 4·875 miles; and on an average the distance of districts from centre to centre is 9·286 miles. The mean distance of the population of such a district from the centre is upon the hypothesis of equal distribution $3\frac{1}{4}$ miles.

Increase of
population in
the 580 towns
distinguished
in 1851.

580 towns were distinguished in 1851, and the population in them and in the surrounding country was nearly equal. But in the subsequent ten years, while the population in the villages and the country around increased by half a million (584,548), the population in the 580 towns increased by a million and half (1,554,067). The increase of the population of the country parishes is 6·5 per cent., and of the towns 17·3 per cent. The difference in the rates of increase is due to migration from country to town.

The 72 largest
towns.

Three-fourths of the total increase of population has taken place in the towns. There are seventy-two towns in England of an average population of 106,495, none of them having less than twenty thousand inhabitants. Their population in 1801 was 2,221,753, 4,225,958 in 1831, and 7,667,622 in 1861. The rates of increase varied to a great extent; thus Birkenhead on the south side of the Mersey had 667 inhabitants at the beginning of the century, and 51,649 in 1861; Canterbury had at the same dates 9,000 and 21,324 inhabitants. The population of York grew from 16,846 to 40,433; of Bradford from 13,264 to 106,218.

In population, next to London stands Liverpool (443,938), and Manchester (357,979) in the north-west; Birmingham (296,076) in the Midland counties; Leeds (207,165), and Sheffield (185,172) in Yorkshire; and Bristol in the west (154,093). In the vicinity of these large cities, and beyond their boundaries, are often towns and populous districts which are in constant relation with them. Thus Salford is almost as closely associated with Manchester as Southwark is with London. London still maintains its pre-eminence as the metropolis of the empire, of which it amply expresses the growth. Its population was 958,863 in 1801, and 2,803,989 in 1861.

The increase in the population of London during this century was 1,845,126, and the increase in the other seventy-one large towns and cities was 3,600,743; making the aggregate increase of the population of the great towns 5,445,869.

The increase in the towns of less than twenty thousand inhabitants as well as in villages and in the country was 5,727,819.

Rates of
increase of
town popula-
tion.

While the actual increase was greater, the annual rate of increase (1·039 per cent.) was less in the country and in the small towns than it was in the great towns (2·085). The velocity at which the great towns increase is double the rate at which the rest of the population increases.

Table 52.

We have formed six groups of towns to show the rates of increase of each class, exclusive of London. The county and assize towns increased in the ten years since 1851 at the rate of 1·39 annually; the manufacturing towns at the rate of 1·35, the towns where silk and woollen goods and gloves were made increasing most slowly, the towns famous for cotton, stockings, shoes, and strawplait, increasing most rapidly; the inland watering places,—Cheltenham, Bath, Leamington, and Tunbridge Wells increased slowly, those on the coast much more rapidly. The increase of population was most rapid in the seaport towns, and in the towns amidst the mining districts where hardware is made. In that direction the tide of national industry has recently flowed,

2. Density and Proximity.

Density and
proximity.

Placing a person on each square yard, 3,097,600 persons might stand upon a square mile, and if the whole population of England were mustered they might stand upon an area a mile deep and $6\frac{1}{2}$ miles (6·478) long. It has been shown that the people are unequally distributed over the kingdom; but if we assume them by hypothesis to be equally distributed over the 58,321 miles of territory, there will be 344 persons to each square mile.

And it is usual in this case to say that the density of the population is such that there are 344 persons to a square mile, or 1 person to 1·86 acres. The mean proximity is 102 yards upon the same hypothesis, and that is the mean proximity of person to person.

For the sake of comparison with other countries, and in conformity with the recommendations of the Statistical Congress, we state these facts in the metrical measures. Thus the specific population is 133 to a square kilometer; 1·33 persons to a hectare; and the mean proximity is 93 meters.

3. *Changes in Territorial Divisions.*

The origin and distinctive character of the various territorial divisions of the country, ancient and modern, were elucidated and described in the Report on the Census of 1851. It will be sufficient now to notice the principal changes that have occurred in these divisions during the last ten years.

Territorial divisions.

By far the most important recent measure bearing upon this subject is the Metropolis Local Management Act (18 & 19 Vict. c. 120), which was introduced in 1855 by Sir Benjamin Hall (Lord Llanover), then First Commissioner of Public Works, and received the Royal Assent on the 14th August in that year. Although in the administration of its internal affairs the City of London has for many years rested on a basis which has practically secured for its inhabitants a representation of their interests and wishes,—a result ascribed in a great measure to the mode in which the Common Council is elected,*—the advantages of local government were confined to the narrow area included within the City proper, and the extensive outer area beyond was, until the introduction of this new enactment, for the most part excluded from their operation. By this statute, however, a municipal organization has been given to an area comprising, with the City, upwards of 123 square miles, a population in 1861 amounting to 2,809,004, and an annual rental of 12,514,053/.

Area and population under Metropolis Local Management Act.

The limits of “the Metropolis” have been defined from time to time in Acts of Parliament and by various authorities for certain specified purposes. One of the earliest examples of such a district was that first included within the Weekly Bills of Mortality, or weekly reports of the parish clerks relative to christenings and burials, established about the year 1592–3, in consequence of the prevalence of the plague in London. Additional parishes figured from time to time in the bills, but subsequently to 1726 no actual addition was made to the area which they embraced.† The parishes of Marylebone, St. Pancras, Paddington, Chelsea, and Kensington were not within the Bills, but Mr. Rickman considered it proper to include them within the “Metropolis” in the Census Abstracts 1801 to 1831. To this area several additions were made by the Registrar-General on the establishment of the new weekly tables of mortality in London in 1840, bringing in the parishes of Camberwell, Bow, Hammersmith, Fulham, and others, together with the parishes comprised in the Greenwich Union. A further addition was made in 1844 of the parishes in the Wandsworth and Clapham Union; and three years later were added those in the Lewisham Union, and the parish of Hampstead. During the last sixteen years these limits have remained unaltered, but extensive as they are, it must be admitted that several suburban localities, now inhabited chiefly by persons engaged in business or employments in London, are excluded.§ The district of the Registrar-General was adopted, with the addition of the hamlet of Penge,|| as the District of the Metropolis Local Management Act.

Limits of the Metropolis included within the Weekly Bills of Mortality.

Under the powers conferred by this comprehensive measure, provisions contained in several hundreds of local Acts by which the metropolitan parishes without the City were governed in matters affecting drainage, paving, lighting, &c., have been for the most part superseded, and an effectual system of local management has been introduced. The twenty-three larger parishes have a separate system of administration under vestries, and the other parishes and places are grouped in districts, which are managed by district boards. The number of vestrymen to be elected for each parish is dependent on the number of rated householders, and in the case of combined parishes the district board is elected by the vestries. A body called the Metropolitan Board of Works is constituted, members being elected by the Corporation of London, the vestries of the larger parishes, and the district boards. The Metropolitan Board is charged with the maintenance of the main sewers, and with the execution of works for intercepting sewage from the Thames, and is empowered to make orders for maintaining the main and general sewerage, naming streets, and numbering houses, for preserving the regular line of buildings, and for other

Metropolitan Board of Works.

* Report of Commissioners appointed in 1853 to inquire into the state of the Corporation, p. 12.

† See Table showing houses, population, and annual value of property in the district of the Metropolitan Board of Works, Population Tables, 1861, Vol. I. p. 223.

‡ The only additions, after the year 1636 (with the exception of the parish of St. Mary-le-Strand, added in 1726,) were the new parishes which had been taken out of ancient parishes; for example, in 1729 St. George Hanover Square appears for the first time, but it had previously been included as part of the parish of St. Martin-in-the-Fields. Thus the area within the old bills of mortality was not increased after 1726, although the names of eleven newly-formed parishes appeared subsequently from time to time in the bills. See Population Tables, 1851.—Numbers of the inhabitants. Division I, pp. 38–45.

§ The circumstance that *entire* Superintendent Registrar's Districts or Unions have, for the sake of convenience, been included in the Registrar-General's limits, may account for the exclusion of the parish of West Ham, which contains the populous suburb of Stratford. That parish is part of a Superintendent Registrar's District extending too far into Essex to be properly included, as a whole, within the boundary of “London.” It is, however, a defect in the present boundary that it extends much further eastward on the south side of the River Thames, below Woolwich, than on the north side, where it terminates at Blackwall.

|| Penge is a detached hamlet of Battersea parish in the Croydon Union, no portion of which is within the district of the Registrar-General.

objects. The Board is also authorized to make, widen, and otherwise improve streets, and to effect other objects of public benefit, subject in certain cases to the approval of the Commissioners of Her Majesty's Works, or to the sanction of Parliament.

The principal functions of the vestries and district boards are to maintain existing local sewers and construct new ones with the approval of the Metropolitan Board; and various powers are conferred upon them for enforcing house drainage, abating nuisances, and regulating the paving, lighting, watering, cleansing, and improving the parishes and districts. Powers are also given to these bodies to levy a sewers rate, a general rate, and in some parishes or parts a lighting rate. Borrowing powers are given to the Metropolitan Board and to the vestries and district boards; and provision is made for auditing the accounts. It could not be expected that an Act dealing with so great a variety of interests and affecting the provisions of so many local Acts should be free from defects. Two Acts have already been passed to amend its provisions, and it is not improbable that experience will point out the necessity for other amendments.*

In order to carry out the principle of local representation, the Act requires that parishes containing more than 2,000 rated householders shall be divided into wards, and further provides that if at any Census the relative number of inhabited houses in such wards is found to have varied from those shown by the previous Census, the number of vestrymen may be altered. We have therefore ascertained, not without considerable difficulty owing to the boundaries being little known in the localities, the number of inhabited houses and the population in each of the wards constituted under the Act, thus establishing a standard for comparison when the results of the next Census shall be ascertained.† (See Appendix, Table 334, p. 223.) A return is also printed showing the number of inhabited houses and the population in 1851 and 1861, with the annual value in January 1862 of property assessed, in the several parishes and places within the district of the Metropolitan Board of Works.‡

The district of the Metropolitan Police is much more extensive than that of the Metropolitan Board of Works; it extends over the whole of Middlesex (exclusive of the City of London) and the surrounding parishes in the counties of Surrey, Kent, Essex, and Hertford, of which any part is within 12 miles from Charing Cross, and those also parts of which are wholly within 15 miles in a straight line from the same point, comprising an area of 439,770 statute acres, equal to 687 square miles, and a population of 3,110,654 souls. The City of London, in the midst of the district, includes an area of 1.13 square miles, with 112,063 resident inhabitants.§

A striking anomaly in the territorial arrangement of England has existed in the large number of places not included within the limits of any parish, thence called extra-parochial, and which have in consequence enjoyed a virtual exemption from burdens borne by the rest of the community. These places are found usually to have been the sites of religious houses, or of ancient castles, the owners of which were able in former times to prevent any interference on the part of the civil authorities within their limits; the royal forests, and some tracts of land acquired in recent times either by reclamation from the sea or by the drainage of fens also possessed similar immunities. They were exempt from maintaining the poor, because there were no overseers upon whom a magistrate's order could be served, and in escaping the poor rate they avoided the other local charges now incorporated with that rate; in fact they had a chance of escaping from direct taxation of every kind, while their inhabitants were virtually exempt from many civil duties and offices served by others for the benefit of the community. The Act "*to provide for the Relief of the Poor in Extra-parochial Places*" (20 Vict. c. 19), which was introduced by Her Majesty's Government and passed in 1857, is intended to remedy this defect, and to remove the just cause of complaint arising from an unreasonable exemption of particular localities from certain general laws. Under the provisions of this Statute, all extra-parochial places entered separately in the Report on the Census of 1851 are to be deemed *Parishes*, "for all the purposes of the assessment " to the poor rate, the relief of the poor, the county, police, or borough rate, the burial " of the dead, the removal of nuisances, the registration of parliamentary or municipal

* See a concise abstract of the chief provisions of the Acts in the introduction to the *Metropolis Local Management Acts*, by E. H. Woolrych, Esq., one of the Metropolitan Police Magistrates. By the Thames Embankment Act, 25 & 26 Vict. c. 93., the execution of one of the most important undertakings required for the improvement of the Metropolis, viz., the Thames Embankment, has been confided to the Metropolitan Board.

† The 41st section of the amending Act, 25 & 26 Vict. c. 102., is intended to provide for the division of a parish into wards where the population has increased since the passing of the original Act so as to exceed the limit of 2,000 rated householders; the terms employed, however, suggest a difficulty, as the wards may be formed only "when at any time, upon any account taken of the population by the authority of Parliament," any such parish "shall be found to contain more than 2,000 rated householders,"—the number of *rated householders* not being amongst the matters comprised within the Census inquiry.

§ See Population Tables, 1861, Vol. I. p. 224.

Vestries and district boards.

Wards in Metropolitan parishes.

Metropolitan police district.

Extra-parochial Places Act.

“ voters, and the registration of births and deaths,” and the Justices of the Peace having jurisdiction are to appoint overseers; and with respect to all other places being or reputed to be extra-parochial, such Justices *may* appoint overseers. Where, however, the owners and occupiers of two-thirds in value of the land desire to annex any extra-parochial place to an adjoining parish, the Justices may, with the consent of such parish, make an order of annexation accordingly.

In pursuance of the Act, out of 598 extra-parochial places (or places reputed to be such), reported by the Clerks to the Boards of Guardians of the several Poor Law Unions as situated within or adjoining the respective unions, 341 had been dealt with to 1st August 1862, overseers having been appointed by the Justices for 327 of such places which have now become parishes; while in 14 instances the places have been annexed to adjoining parishes. Three of the Inns of Court, and the Charter-House, London, being somewhat peculiarly situated, are specially provided for by the Act, which assigns the duties of overseer to the person filling a certain office for the time being.*

Under the Act for the better management of highways in England (25 & 26 Vict. c. 61.), a new set of county divisions is in the course of formation for applying the principle of unions of parishes which has worked so advantageously under the New Poor Law. By this statute power is given to Justices in general or quarter sessions to issue orders for dividing their county into highway districts, to consist of parishes and places not comprised within the jurisdiction of boards constituted under other Acts. Waywardens are to be annually elected for the parishes in each district, to form, with the Justices acting therein, a Board or corporate body, with power to acquire and hold lands, to appoint officers, and to perform all other necessary acts in relation to maintaining and keeping in repair the highways; the salaries of the treasurer, clerk, and district surveyor are to be charged on a district fund, to which the several parishes are to contribute in proportion to the average expenditure incurred during the three preceding years; but the expense of maintaining the highways of each parish is to be a separate charge on such parish. As the Act came into effect only on 1st January 1863, we are unable to state what progress has been made in the formation of the new highway districts. Highway districts.

Eleven towns have received Charters of Incorporation since 1851, namely, Aberavon, Brighton, Burnley, Dewsbury, Hanley, Margate, Middlesborough, Rochdale, Stalybridge, Wrexham, and Yeovil. The municipal boundaries of the borough of Salford have been extended, and made co-extensive with those of the parliamentary borough; those of Stockton have also been enlarged by the Stockton Extension and Improvement Act, 1852. New municipal boroughs.

Upon the redistribution of the four seats in the House of Commons, which became vacant by the disfranchisement of Sudbury and St. Albans, the new parliamentary borough of Birkenhead was constituted, and one member assigned to it. The West Riding of Yorkshire was divided into Northern and Southern Divisions, each to return two members, after the present Parliament; and an additional member was assigned to the Southern Division of Lancashire.† Additional seats in Parliament.

With respect to corporate towns and boroughs returning or contributing to return members to Parliament, the returns required by the Census Act have been prepared with little difficulty, the boundaries being clearly defined, and well known to the local officers; but in the case of towns not having boundaries for municipal or parliamentary purposes it was not easy to establish a satisfactory basis for the returns of houses and population naturally looked for in the Census Tables. It became necessary to determine what places were entitled to be deemed *towns*, and then to ascertain which of them had recognized boundaries applicable to the particular object in view. On the first point we consulted the Clerk of the Peace and the Chief Constable in each county, by whom we were supplied with lists of the places reputed to be towns; and from the Superintendent Registrars we obtained information as to the nature of the existing boundaries, if any. Towns not being boroughs.

It was found that the towns in question might be classed under three heads:—

1. Towns with defined limits applicable, in the opinion of the Superintendent Registrars, to the purposes of the Census;
2. Towns with defined boundaries which were considered to be inapplicable to the purposes of the Census; and
3. Towns without legally defined boundaries for any purpose whatever.

* See Memorandum respecting the operation of the Extra-parochial Places Act, by W. C. Glen, Esq., of the Poor Law Board, Population Tables, 1861, Vol. I. p. xxxiii.

† Act of 24 & 25 Vict. c. 112.

The towns with defined limits comprised many for which boundaries had been settled under the Public Health Act (1848), the Local Government Act (1858), and various Acts for local purposes, such as improvement, police, lighting, paving, drainage, &c.

Principle adopted in stating the population of towns not being boroughs.

As the official return of the population of a town is regarded, for obvious reasons, a matter of importance by its inhabitants, we were anxious to adopt effective measures for securing correct information for our guidance. We therefore consulted Lieutenant-Colonel Leach, R.E., Assistant Tithe Commissioner, and Mr. Ranger, C.E., Inspector under the Local Government Act, as to the best mode of proceeding, and upon their advice we determined upon adopting, as far as possible, recognized and defined boundaries wherever they were at all suitable for the object in view, and in the case of towns without legally defined boundaries, or where the boundaries were inapplicable, to follow the course pursued in 1851, namely, to instruct the local Registrars and Superintendent Registrars to define, with the assistance of the parochial officers, the limits proper to be taken as the basis of a return of the population, and to give the numbers upon their authority. Accordingly in the Tables will be found returned, in addition to 245 parliamentary boroughs and 208 corporate cities and boroughs, 231 towns, not being boroughs, each containing upwards of 2,000 inhabitants.*

Under the Local Government Act, 1858, places which have not yet acquired the legal character of towns may have a boundary settled for them, on petition to the Secretary of State, for the purposes of that Act; and as the expense attending its adoption is insignificant, the number of towns, strictly so called, will probably be considerably increased before the next Census.

Ecclesiastical Districts.

The population within the ancient parochial divisions of the country is accurately ascertained at each Census, but it is obviously of great importance to know also the actual or at least the approximate number of inhabitants in each of the numerous Ecclesiastical Districts or New Parishes which have been constituted under the authority of various Acts of Parliament during the last thirty years. According to the theory of the parochial system of the Established Church of England, the clergyman is bound by solemn engagements to advance the temporal and spiritual welfare of the portion of the community among whom his residence is fixed, and he is responsible for the performance of the necessary clerical duties within a given area. Whether this theory is carried out in actual practice or not, it is essential to the efficient discharge of his duties that the clergyman should have the means of informing himself from time to time as to the number of souls within his district; and, as might be expected, one of the first questions asked by any of the great societies, like the Pastoral Aid Society, the Additional Curates' Society, and the Church Building Society, whose object it is to lessen the amount of spiritual destitution, has reference to the amount of population. For almost every new church there is a district, either legally assigned by the bishop of the diocese or the Ecclesiastical Commissioners, or adopted conventionally for purposes of temporary convenience and having no legal force or effect; but the districts which are merely conventional do not fall within the scope of the Census Act. Unfortunately the precise limits of the legal districts are only imperfectly known to the public and in some instances to the incumbents themselves, especially when the latter are new clergymen, who have failed to obtain from their predecessors correct information on the subject. These essential details being so difficult of attainment, it will be readily conceived that the task of setting out the population of upwards of eighteen hundred of these ecclesiastical districts was a very laborious one; nor can it be a matter of surprise that the numbers returned to us, although in every instance submitted to the examination of the incumbents previous to publication, are in some cases approximative rather than strictly accurate.†

* Population Tables, Vol. I., Summary Tables, No. IX., p. xxi. At the London Session of the International Statistical Congress it was agreed that places not containing a strictly urban population of 2,000 and upwards might conveniently be omitted in Tables relating to towns.—*Report on Statistical Congress*, p. 150.

† The following extract relating to one of the sub-districts of Liverpool will exemplify the difficulties to be encountered. The Registrar was required to distinguish the municipal wards and the ecclesiastical districts.

		Ecclesiastical District.	Population.
Mount Pleasant Sub-district, Population 47,410	Abercromby Ward, Population 24,944	St. Saviour, part of	1,292
		St. Catherine	9,679
		St. Silas, part of	5,160
		St. David, part of	2,267
		In conventional Districts:	
		Workhouse	2,420
	Rodney St. Ward, Population 22,466	Residue	4,126
		St. Saviour, part of	3,323
		St. David, part of	5,175
		St. Bride	3,954
		St. Philip	508
		St. Mark, part of	3,497
		Residue	6,009

As another example, we have to mention that Mr. Marshall, the Superintendent Registrar of Ely, has called our attention to an error in vol. I. p. 10, of the Population Tables. The "special district" of Ely, which was in 1861 separately rated for the purpose of drainage, water supply, sewerage, and lighting, had then, according to him, 6,179 inhabitants. This number, to be substituted for the other (7,428), differs little from that given in 1851.

Since 1856, the functions of the Commissioners for Building New Churches have been merged in those of the Ecclesiastical Commissioners, the latter body and the bishops being now the sole authorities empowered to assign legal districts to churches, where this is not done by special Act of Parliament. From the commencement of the Church Building Commission in 1818 to its termination on 31st December 1856, the total number of districts assigned under the Church Building Acts, and the parish of Manchester Division Act, 1850, was 1,077; and subsequently, under the same Acts, the Ecclesiastical Commissioners had assigned 235 additional districts to 31st October 1861.* The districts and new parishes constituted under "The New Parishes Acts" to the date of the Census amounted to 284. In addition, there are the districts assigned by the bishops, making the total number returned in the detailed Tables 1,822. In 1851 the number was 1,254; the increase, as might be expected, has occurred chiefly in the dioceses of London, Manchester, Lichfield, Ripon, Winchester, and Chester.

Number of
Ecclesiastical
Districts and
New Parishes.

In 1856 the Act of 19 & 20 Vict. c. 104. (commonly known as Lord Blandford's Act) was passed, for the creation from time to time of new parishes for all ecclesiastical purposes, with the same status as those created under Sir R. Peel's Act of 1843. The Act comes into operation on the avoidance of the living of the mother parish or sooner; and it is expected that the removal of many anomalies will be effected through its operation.

Lord Bland-
ford's Act.

The laws relating to the militia may be said to affect directly or indirectly every man in the country. At the present time the militia force for England and Wales is fixed at 80,000 men, who could be called out and embodied upon a short notice; and this national army is now a body of volunteers. But in order to meet the contingency of a falling off in voluntary enlistment, a machinery is provided for procuring a sufficient number of men by means of the ballot. In the several counties Sub-divisions of Lieutenancy have been constituted for the purpose of raising the militia quotas; provision has also been made for the making of lists of men liable to serve, and for the balloting and enrolling of men to supply vacancies. The Acts authorizing these proceedings being suspended only, they may be put in force at any time by Order in Council.

Militia Sub-
divisions.

It would be inexpedient to make use of the returns obtained at the Census for any special object connected with the ballots for the militia, even were the details sufficiently recent and exact to be so employed, but no reasonable objection can be urged to the employment of such information for a general purpose. Accordingly, we have included in the Tables a statement of the number of persons of each sex in the several sub-divisions of lieutenancy, which in many counties are identical with the Petty Sessional Divisions. Assuming the exempted classes to be pretty equally distributed, the total male population will afford a basis for computing the proportionate number of militiamen to be raised in each sub-division.† The provision contained in the Militia Act of 1852, for making, when deemed expedient, these sub-divisions conterminous with the Superintendent Registrars' Districts or Poor Law Unions, has not hitherto been acted upon, chiefly on account of the inconvenience which, it is supposed, might arise from many of the districts being composed of parts of two or more counties.

15 & 16 Vict.
c. 50.

During the last ten years eleven New Poor Law Unions and Superintendent Registrars' Districts have been formed, either by the severance of parishes from large unions (as in the case of Birkenhead, taken from the Wirral Union), or by bringing into unions parishes previously in Gilbert's incorporations, or under the Act of Elizabeth. Under the Registration Act the Superintendent Registrars' Districts are liable to be altered from time to time when any changes are made in the Poor Law Divisions. As, however, the Tables show the population both in 1851 and 1861, within the *present* limits, it is unnecessary to particularize the changes which have occurred.‡

New unions
and registra-
tion districts.

Before quitting the subject of our territorial divisions it may be useful to point out how necessary it is, when citing the population of a place, to state explicitly what limits are referred to. For example, the term "Manchester" may mean the parish, the township, the parliamentary borough, the municipal borough, the Registration or Poor Law District, or the town in a popular sense, including suburban places. A want of precision in

6 & 7 W. 4.
c. 86.

* House of Commons Papers, No. 557, Sess. 1861, and No. 267, Sess. 1862.

The 1,312 Ecclesiastical Districts assigned under the Church Building Acts include 40 distinct and separate parishes, 81 district parishes, 81 consolidated chapelry districts, 846 district chapelries, 120 particular districts, 58 districts under "The Parish of Manchester Division Act, 1850," and 1 church endowed under 7 and 8 Geo. 4. c. 72. s. 3.

† The persons liable to serve in the militia are those between the ages of 18 and 35; but the following, amongst others, are exempt:—army, navy, marines, and members of any corps of yeomanry or volunteers; resident members of the universities, clergymen, ministers of registered places of worship, attorneys, constables, and other peace officers, articled clerks, apprentices, seamen or seafaring men, artificers in H.M. dockyards, ordnance artificers, and "any poor man who has more than one child born in wedlock." See 43d sect. of 42 Geo. 3. c. 90.

‡ The 11 New Poor Law Unions, &c. and Superintendent Registrars' Districts since 1851 are—Bedwely, Birkenhead, Dulverton, Gower, Great Ouseburn, Hartlepool, Kirkdeighton, Mile End Old Town, Wetherby, Wharfedale, and Whitchurch.

speaking of places which give name to several local sub-divisions not unfrequently leads to mistakes, and when such places are compared with others, without proper care being taken to apply the comparison to corresponding boundaries, erroneous inferences are drawn. Only recently a claim was put forth on behalf of Glasgow as the second city in the British Islands; but to establish this claim "Glasgow," in its widest popular sense, including the suburban villages on both sides of the Clyde, was compared with Liverpool and with Manchester, strictly so called, and within borough limits. When the same view is taken of all three, and the population in the outlying suburbs of the Lancashire boroughs is added, it is found that the western capital of Scotland may claim to rank in point of population as the *fourth* and not as the second city in the United Kingdom.

III.—AGES OF THE POPULATION.

As the population in its distribution may be studied in space, so under the head of age it may be studied in relation to changes of generations, in time. Standing in the nineteenth century, we have before us in the Census, the centenarians descended from the middle of the eighteenth century; and the infants just born, of whom a certain number will live into the middle of the century coming.

Natural limit
of human life.

A century is the natural limit of human life, and of every generation a few men and women attain the age of a hundred years where the last waves of population break. Two hundred and one reputed centenarians were returned in 1861, out of a population of twenty millions; 216 centenarians were enumerated in 1821; *one* in 100,000 is now the existing proportion.

Men and
women in
vicennial
periods of age,
1821 and 1861.

The men and women of the ages 80–100 were 81,546 in 1821, and 113,349 in 1861; the increase was 31,803, 39 per cent. in forty years, or at the rates of 0·8 per cent. per annum. Continuing the comparison between the numbers in 1821 and 1861, the persons of the age of 60 to 80 rose from 822,792 to 1,378,930; so the increase was 556,138, or 68 per cent. in 40 years, and 1·3 per cent. annually.

The men and women of 40–60 were 1,927,844 in 1821, and 3,506,510 in 1861, so the increase was 1,578,666, that is 82 per cent. in the interval, or 1·5 per cent. annually. 3,439,926 of the age of 20–40, the athletic age of men, and the prolific age of women, were enumerated in 1821, and 6,147,201 in 1861; thus the increase was 2,707,275, or 79 per cent. in forty years, and 1·46 per cent. annually. 5,917,851 children and youths of the first twenty years of life were enumerated in 1821, and 9,135,396 in 1861. The increase was 3,217,545, or 54 per cent. in 40 years, and 1·1 per cent. annually.

The increase in the 40 years from 1821 to 1861 was greatest in the middle ages of life (20–60). This requires some explanation.

9,135,396 children and young persons under 20 years of age were enumerated in 1861; and they had all been born since the Census of 1841. Allowing something for emigration, they are the natural survivors of about 12,664,000* children born in the 20 years.

Successive
generations.

It will be convenient for the moment to call the persons born in each successive twenty years a generation; and the 9,135,396 will be the division of the first of the new generation; which will all have passed to the second stage (20–40) in 1881, and according to the English Life Table, be reduced to 7,633,000; to become 5,839,000 of the third age (40–60) in 1901; and 2,927,000 of the fourth age (60–80) in 1921; and 291,479 of the fifth age (80–100) in 1941; leaving 245 centenarians struggling onward still further into the middle of the twentieth century.

We enumerated 6,147,201 persons of the second age (20–40) who were born in the twenty years (1821–41); and they are the survivors of 7,356,988 of the first age (0–20) who were enumerated in 1841, and were then only partially engaged in the employments of life. They are soldiers, sailors, artisans, and labourers, and constitute the mass of the junior members of the professions. They are the young fathers and mothers of the country.

The 3,506,510 persons of the third age (40–60) are the fathers and mothers of families with children grown up; they include the majority of overseers and masters; they comprise the heads of the professions. They were born in the twenty years 1801–21; and were enumerated not only in 1841 at the age (20–40) when the numbers of this generation were 4,980,655, but in 1821 when they were of the first age (0–20), and were in numbers 5,917,851. The diminution is chiefly by death, and to some extent by emigration, which has been partially counterbalanced by immigrations; for a certain number of immigrants are in their ranks. Born in the years of the war, and in the

* The births of 12,144,634 children were registered in the twenty years 1842–61 inclusive. The above numbers are deduced from the Life Table.

first years of the peace, this generation was in its prime (20–40) when trade emancipation began, and when the first railway was opened, and the Reform Bill was carried; further on in its life the corn laws were repealed after the failure of one of the great staple crops of the kingdom; the population at home was tranquillized by the Reform Bill, a war with a great and increasing power was conducted to a successful issue, and our empire was extended and consolidated in India.

In all the measures for the improvement of the country, and in the inventions which are at present in use, they were aided and often led by the generation born in 1781–1801, of whom 1,378,930 (age 60–80) were living on the Census day of 1861. Born at the end of the American war, and in the earlier stages of the French Revolution, this generation consisted in 1801 of four millions, including Wilkie, Macauley, Peel, Graham, Byron, Shelley, and some of the most distinguished men now living. The steam-engine, and various machines were now placed in the hands of manufacturers; and the United States, ceasing to be the colonies, became the best customers of England.

We are carried still further back into the last century by the 113,349 persons of the fifth age (80–100), who were born in the years 1761–81, and then formed part of a young corps of three millions of the first age, including Wellington, Cobbett, Mackintosh, Robert Hall, Chalmers, Malthus, Astley Cooper, Sidney Smith, Wordsworth, Walter Scott, Moore, Coleridge, Southey, Campbell, Ricardo, Mill, Turner, Jeffrey, Hume, Hallam, and Brougham, who is one of the living representatives of this glorious generation.

With regard to the 201 persons of the reputed age of 100 years and more, the evidence of age requires careful scrutiny; only documentary evidence can be relied on, and that of course was not accessible on the Census day. But we see no reason to doubt the statements, that a certain number of the 201 centenarians who are scattered over every division of the kingdom were born before 1761, and before George III. ascended the throne; when the great Commoner was in his zenith; when Nelson and Burns were born; when Canada was conquered, and the foundations of our Indian empire were laid by Clive. Centenarians.

The Table (App. 63.) should be carefully studied by those who would clearly understand the organization of the English population and its relations with the generations past, present, and to come. Table 63.

It is a common error to reason about England as if its population and its power were stationary, while progress is the natural law of the land. As an instance, it will be seen that the 6,147,201 persons of the age 20–40 in 1861 are not, as is sometimes supposed, the survivors of a number equal to 9,135,396 living at the age (0–20) in 1861, but of 7,356,988 who were enumerated of the age (0–20) in 1841.

Availing ourselves of this property, the population living at several ages far back into the past century can be calculated, and we can also look into the probabilities of the future.

According to this law of increase since 1821, the population of England—now 20,281,587—will be 25,511,445 in the year 1881; comprising 11,343,700 persons of the first age (0–20); 7,660,850 of the second age (20–40); 4,453,332 of the third age (40–60); 1,893,012 of the fourth age (60–80); 160,274 of the fifth age (80–100); and of 277 centenarians. The number will not equal this estimate, if emigration increase; but diminutions in the rate of mortality prolonging the lives of the successive generations will tend to augment the number of survivors. The population is only limited by its skill and industry, so long as its valour is unshaken, and its merchants have access to the markets of the world. Probable number of persons in 1881.

IV.—CONJUGAL CONDITION OF THE PEOPLE.

Marriage is of so much importance in every civil community that no Census is complete in which the conjugal condition is left undistinguished. Yet it was strangely omitted in the Census, and was only discussed by speculative writers unacquainted with the facts, until 1851 when the conjugal condition of the people was first inquired into, and the results were published. Tables 72–81.

1. *Husbands and Wives.*

In 1851, 2,958,564 husbands and 3,015,634 wives were enumerated in England. The numbers have since that date rapidly increased, and in 1861 the husbands in England amounted to 3,428,443, the wives to 3,488,952. About 60,509 husbands whose wives were at home, were absent from this country in 1861. Husbands and Wives.

Increase in
number of
Husbands and
Wives.

The increase in ten years was 469,879 in the number of husbands, and 473,318 in the number of wives at home. The married women of the age 15–55 increased at the rate of 16 per cent. This rapid rate of increase in the married part of the English population at home will dissipate the fears of those who entertain any apprehensions that Englishmen of the present day are less disposed to contract marriage, and to take upon themselves the duty of heads of families, than their ancestors. The increase of families living in the healthy condition of matrimony is chiefly the cause and partly the result of the prosperity of the country. While other nations have been cutting up their small plots of land into smaller plots, living unmarried on life annuities, and reducing the number of their children in various ways, the English people have followed an entirely different policy; they have married, worked with increasing industry, skilfully struck out into new fields of employment, and peopled cities and colonies with millions of their descendants.

Female
Emigrants.

The female emigrants marry in full as large proportions as the women at home; but the arrangements to enable men to take wives out as emigrants are defective: hence the increase in the proportion of married men is greater than the increase in the proportion of married women.

Table 78.

The population of England was enumerated on the night of April 7th; and, owing to separation on that night, the wives of 186,021 husbands, the husbands of 246,530 wives, were separately enumerated.

Average age of
Husbands and
Wives.

The average age of the husbands in England is 43·0 years, and of their wives 40·5 years. The husband is 2·5 years older than the wife. While the numbers of each quinquennial period of age are given in Table V., Population Tables, 1861, Vol. II., the corresponding ages of husband and wife are displayed in the Table IX. Thus 474,808 husbands of the age 30 and under 35, lived with 1,168 wives of the age 15 and under 20, 35,483 of the age 20–25, 153,548 of the age 25–30, 209,788 of their own age 30–35, 57,276 of the age 35–40, . . . and one wife of 90–95, unless there is some mistake in the strange return. The like suspicion attaches to the statement that of 491,515 wives of 30–35 one was married to a husband of 90–95; but there is not the same reason to doubt the accuracy of the return of these young wives having 10 husbands of 85–90, and 32 of 80–85, and 75 of 75–80, and 209 of 70–75. The extreme disparities of age are rare, and in the majority of marriages the ages are well assorted.

TABLE III.

2. *Widowers and Widows.*

Widowers and
Widows.

As husband and wife never die in the same instant of time, every marriage ends in widowhood; and in a stationary population marrying at a uniform rate, as many widowed persons are left annually as there are annual marriages. The sum of the annual widowers and widows is equal to half the sum of the persons married; but the married persons enumerated do not bear this proportion to the widowers and widows. The number of widows depends upon the mortality of husbands, and the mean duration of widowhood which is cut short either by death or by re-marriage. The same rule applies to widowers. And as more widowers re-marry than widows the widows exceed the widowers in number.

Table 74.

The widowers in 1861 amounted to 359,955, and the widows to 756,717. Of 100 men of the age of 20 and upwards 6·8 are widowers; while of 100 women of those ages 13·2 are widows. To five wives there is one widow.

Table 77.

The proportional number of widowers increases with age; thus at 25–30 the proportion in 100 men is 1·1; at 50–55 it is 8·9; at 60–65 it is 17·9. After the age of 30 the proportion of widowers to the number of men at the several ages is doubled every ten years. The proportion of widows is still greater even in the earlier ages;

and at the age of 60–65 more than one in three; at 70–75 more than one in two women living are widows; at 80 and upwards four out of five living are widows.

3. *Bachelors and Spinsters.*

While the number has increased, the proportion of bachelors and of spinsters at all the ages between 20 and 40 has decreased; and the husbands and wives at those prolific ages have not only increased in number but in proportion. Thus the wives of the age of 20–40 were 1,608,216 in 1851 and 1,846,514 in 1861, the increase having been nearly two hundred thousand.

The spinsters of the age of 20–40 were 1,229,051; only 60,665 more than the numbers unmarried at the same ages ten years ago.

The bachelors of the age of 20–40 were 1,198,050 in 1851; and so rapidly do they abandon this state that their numbers are scarcely increasing; they amounted to 1,201,576 in 1861.

Those who dread the depopulation of England will observe with satisfaction the resources which the country commands in this reserve both of spinsters and bachelors; while the economists will see that prudence is exercised to an extent which Malthus scarcely anticipated.

The proportional number of women between the ages of 20–40 in the married state varies in every county; it is 51 in 100 in Westmorland, and 69 in Durham.

If all the unmarried men of the age of 20 and upwards are classed as bachelors their numbers in 1861 were 1,447,319; including besides the 1,201,576 unmarried men of the age of 20–40 no less than 187,221 men of the age 40–60; 55,145 of 60–80; and 3,371 whom it is allowable to call old bachelors, for they are of the age 80–100; and as if to show that celibacy is compatible with long life, six proclaimed themselves centenarians.

Besides 944,714 girls of 15 and under 20, there were more than a million and a half (1,537,314) spinsters of the age of 20 and upwards in England; including 643,366 of 20–25, and 307,633 of 25–30, and 168,100 of 30–35, and 109,952 of 35–40; at 40–60 their numbers fell to 223,205; at 60–80 to 78,618; at 80–100 to 6,440. Twenty of these spinsters were centenarians.

To 100 men of the age of 20 and upwards, 28 are bachelors; to 100 women of the corresponding ages, 27 are spinsters. Between the ages of 20–40 of 100 women, 39 are spinsters, 58 wives, and 3 are widows.

4. *Women living in Celibacy, and others.*

To complete this view of the population, it is right to bring into account the number of unmarried women, who bore 423,171 children in the ten years 1851–60, when 6,048,479 children were borne in wedlock by an average number of 2,757,705 wives of the age of 15 and under 55.

42,317 children of unmarried women are registered annually. Now 100 wives of the age of 15–55 bear 22 children (21·933) annually; consequently 192,938 married women of the age of 15–55 would bear 42,317 children. The inference is probable then, that as far as child-bearing women are in question, 192,938 must be added to the wives and deducted from the spinsters.

Of women of the age of 15–55, about three millions are married, or are otherwise to the same extent as married women bearing children, and one million are living in a state of celibacy.

While out of 100 married women of the age of 15–55 full 21·9 bear children annually; 100 unmarried women bear children in the proportion of 1·7.

If the mothers of all the children are of the ages 20–40, then 35·0 in 100 married women and 3·3 unmarried women bear children annually. One in three married women of the age (20–40) bears a child annually; and of the unmarried women of that age the proportion is one in 30. Allowing for unregistered births this proportion is not overstated.

Bachelors and Spinsters.

Table 74.

Unmarried Women and their Children. Tables 80, 81.

V.—INCREASE OF THE POPULATION OF ENGLAND AND WALES SINCE 1651.

This and the following chapter are, with slight alterations, reprinted, after revision, from our previous Reports, which are out of print.

As the first Census was taken in 1801, no exact account of the population in the earlier periods can be obtained; but various estimates of the population were framed in those times by contemporary writers; and series of returns of baptisms and burials have

been preserved in many parishes since 1571. After collating the various sources of information, the following estimates have been framed, which are founded on data that justify us in considering that they represent approximately the population of England and Wales in the middle of each of three centuries.

	Middle of the Years.		Estimated Population of England and Wales.		Increase of Population.
Population in	1651	-	5,466,572	-	—
1651, 1751,	1751	-	6,335,840	-	869,268
1851, 1861.	1851	-	18,109,410	-	11,773,570
	1861	-	20,281,587	-	2,172,177

Increase of
population.

Thus, according to the estimates, the people of England and Wales amounted to more than *six* millions in 1751, and to more than *eighteen* millions in 1851; they having increased nearly *twelve millions* in the hundred years; while the increase of the numbers in the preceding century (1651–1751) was less than *one million*: and the numbers can scarcely be wrong either way more than half a million.*

1857–61.
1651–1751.

The increase of population in the last four years 1857–61 was as great as the increase from the year 1651 to the year 1751; from the year of the battle of Worcester to the year Arcot was taken by Clive.

A comparison of the excess of Baptisms over Burials in 1801–1810 shows that the excess of Baptisms over Burials must be raised nearly *one third part* for the births of children who are not baptized to make it equal to the increase of population. Proceeding

*See Davenant's Works, vol. ii. p. 175–185. Ed. 1771, and the Tables of Baptisms, Burials, and Marriages in the Census Reports, 1811; 1841. The facts on which the population of 1651 is estimated will be found in the Preface to the Enumeration Abstract, 1841, p. 36. By Mr. Rickman's estimate the population of England and Wales was 5,600,517 in 1630; after various corrections we find the population of that year to be 5,466,572, and the population of 1670 to be 5,090,045; we assume that the population of England and Wales was 5,466,572 in 1651.

Baptisms,
Burials,
1700–1840.

TABLE IV.—BAPTISMS and BURIALS in ENGLAND and WALES, 1700–1840.

1770	213,427	180,396	220,894	189,372	31,522	1770
1781–1790	†2,397,139	†1,885,760	239,714	188,576	51,138	1781
1791–1800	2,617,760	1,954,695	261,776	195,470	66,306	1791
1801–1810	2,878,906	1,950,189	287,891	195,019	92,872	1801
1811–1820	3,255,067	2,009,998	325,507	201,000	124,507	1811
1821–1830	3,753,493	2,462,907	—	—	—	1821
1831–1840	3,965,725	2,934,521	—	—	—	1831

† The numbers of Baptisms and Burials in the parishes that made Returns in England and Wales are given in the prefaces to the Population Returns for 1811 and other years; for every 10th year from 1700 to 1780, and for every year from 1781 to 1840.

Population
(estimated and
enumerated),
1701–1861.

TABLE IV^a.—ESTIMATED POPULATION of ENGLAND and WALES, 1701–1791, and ENUMERATED POPULATION, estimated to the Middle of Census Years 1801–1861.

YEARS.	(Estimated) Population, including Army, &c. Abroad.	Increase in the 10 Years preceding.	YEARS.	(Estimated) Population, including Army, &c. Abroad.	Increase in the 10 Years preceding.
1701	6,121,525	—	The numbers following are deduced directly from enumerations, and estimated to the middle of each of the years.†		
1711	6,252,105	(increase +) 130,580			
1721	6,252,750	+			
1731	6,182,972	(decrease —) 69,778			
1741	6,153,227	(decrease —) 29,745			
1751	6,335,840	(increase +) 182,613			
1761	6,720,547	384,707			
1771	7,153,494	432,947			
1781	7,573,787	420,293			
1791	8,255,617	681,830			
			1801	9,192,810	937,193
			1811	10,467,728	1,274,918
			1821	12,190,302	1,722,574
			1831	14,070,681	1,880,379
			1841	16,050,542	1,979,861
			1851	18,109,410	2,058,868
			1861	20,281,587	2,172,177

The method which has been here employed of making the estimate appears, upon the whole, to be better than that of assuming any constant relation to subsist between the population and the marriages, births, and deaths. The estimates that have been made by others differ somewhat from these for the first forty years; but the excess of Burials over the Baptisms in the same parishes during the three years 1710, 1720, 1730, appears to show conclusively that the population decreased in that period.

† The Population will be found to differ slightly, for the years 1821 and 1841, from that given in Table I., p. cliv., Appendix to Report, of Population Tables, 1851, Vol. I., relating to Ages and Occupations, &c.

backwards in this manner from 1791 to 1741, the probable increase of population is obtained for every 10 years; and by referring to the probably deficient registration of baptisms in the earlier period the series is carried back to 1701.

VI.—LAWS REGULATING THE GROWTH OF NATIONS.

1. *Law of Population.*

It is not intended to discuss here what has been sometimes called the *Law of Population*, further than briefly to state how the increase of population depends on many elements, which vary and produce various results—sometimes identical in the mere numbers which they present at the Census, but different under all other aspects. Law of population.

The numbers, and consequently the increase or decrease of people in a civilized country, depend upon the age of Marriage and the age of the parents when their children are born—the numbers who marry, the fertility of the Marriages—the duration of life—the activity of the migration flowing into or out of the country. These acts more or less influence each other, and in the present state of statistical observation, the precise effect of a change in any one of them involving others cannot be easily determined. It will be sufficient to indicate the effect of a change in each element, while the others remain constant.

1. The numbers of the population bear a definite relation to the duration of life, or to the mean lifetime. Thus, if the mean lifetime of a population is 30 years, then if the Births are 100,000 a year and remain uniform, the population will be 30 times 100,000, or 3,000,000. Now, the Births remaining the same, let the lifetime be gradually extended to 40 years; then the population will become 4,000,000; or if the lifetime is extended to 50 years, the population, from the extension of life alone, will rise from *three* to *five* millions. The Deaths, upon this hypothesis, will be equal to the Births; and the same in number when the population is *five*, as when it is *four*, or *three* millions. It is probable that the mean lifetime of the great body of the population did increase from the year 1801 to 1821, when the increase of population was greatest in Great Britain. Population dependent on the duration of life.

2. The interval from the birth of one generation to the birth of their descendants of the generation following bears also a definite relation to the numbers, which increase as the interval is shortened. Thus, if the population increases at the rate of 1·329 annually, and if the intervening time from generation to generation is $33\frac{1}{3}$ years, it follows that the increase from generation to generation is 55 per cent.; or that every 1,000 women are succeeded, at the interval of $33\frac{1}{3}$ years, by 1,553 women; every *two* couples, male and female, by *three*. If the interval is contracted, and the increase from 1,000 to 1,553 takes place in 30 years, the annual rate of population increases, simply on this ground, from 1·329 to 1·477 per cent.; and, as we assume by hypothesis that the Births and the lifetime remain the same, the population would be ultimately one-ninth part more numerous than it was under the former conditions. Early marriages have the effect of shortening the interval between generations, and tend in this way to increase the population. Age of parents when children are born.

3. An increase in the fertility of Marriages will evidently cause an increase in the population.

4. In ordinary times, a large proportion of the marriageable women of every country are unmarried, and the most direct action on the population is produced by their entering the married state. A change in the matrimonial condition of a large proportion of the unmarried women, at the child-bearing age, would have an immediate effect on the numbers of the population; and, if continued, by increasing the rate of birth to the living through successive generations, would operate on population like a rise in the rate of interest on the increase of capital. Fertility of marriages.
Marriages.

5. The effect of migration on the numbers of the population is evident. It is probable, that the immigration of Irish has contributed to the increase of the population in England; and it is certain that the emigration from the United Kingdom contributes largely to the increase of the population of the United States. The emigrants are a self-perpetuating body in healthy climates; and they increase faster abroad than the general population at home, as they contain an excess of population at reproductive ages; so that, if their numbers are added together, it is certain that we get in the aggregate a number much below the number of survivors. The population of the United Kingdom, including the army, navy, and merchant seaman, was 21,272,187 in 1821, and 29,321,288 in 1861; but, in the interval, 4,906,623* persons emigrated, who, if simply added to the population of the United Kingdom, make the survivors and descendants of the races, within the British Isles in 1821, now 34,227,911. Migration.

* This number includes about 9 per cent. of foreigners who sailed from our ports; but it is probable that there is no record of many emigrants.

Subsistence
and epidemics.

6. Finally, the numbers of the population are increased by an abundance of the necessities of life; and reduced by famines, epidemics, and public calamities, affecting the food, industry, and life of the nation. The pestilences of the middle ages—the famine, the influenza, and the cholera of modern times—are examples of one class of these agencies; the security, and freedom, which England has latterly enjoyed, are examples of the beneficent effect of another class of influences, not only on the happiness of the people, but also on the numbers which the country can sustain at home, and can send abroad to cultivate, possess, and inherit other lands.

All these causes affecting the increase of the population of Great Britain, and the precise extent to which each operates, will ultimately be known by means of a continuous series of such observations as have been commenced at this Census.

2. "The Principle of Population."

Criticism of
the policy of
progress.

The policy which England, since 1751, has pursued in respect to population, was directly condemned and opposed by an acute and diligent critic; who endeavoured to establish a new doctrine, and to deduce, from what he designated "the principle of population," the most adverse inferences. His doctrine has held such sway for some years in the works of political economists, and has such a direct reference to practice, that we shall notice two or three of its fundamental propositions.

Malthus.

Thomas Robert Malthus was born in 1766 at the Rookery in Surrey, amidst a poor and healthy but not a very intelligent agricultural population. His father, an accomplished speculative man, was one of the executors of Jean Jacques Rousseau; and placed young Malthus under the tuition of Mr. Graves, the author of the *Spiritual Quixote*, and of Gilbert Wakefield. After proceeding to Cambridge in 1784, Malthus became a Fellow of Jesus College in 1797, under the conditions of celibacy which still linger as traces of the monastic system in our universities.* In consequence, apparently, of a friendly controversy with his father, he wrote and published the first edition of his "Essay on Population," in 1798; chiefly with a view to combat the doctrines of Condorcet and Godwin, who held that the human race was perfectible, and was advancing towards an ideal standard of excellency. His paradox was at direct issue with theirs, as the "principle of population" rendered vice and misery, he contended, inevitable in all ages.

Conflicting
paradoxes.

Population, we know, cannot increase indefinitely; its limit is as absolute as the limits of the world, or of the matter of which the world is composed; and in Great Britain the rate of increase is retarded by the premature mortality, the vice, the postponement of marriages, and the celibacy of the inhabitants. But Malthus went further in his doctrine; he insisted that the increase of mankind is the chief source of misery, and that extensive abstinence from marriage, or the repression of population, is to be regarded as the fundamental condition of human happiness. Population, he argued, is necessarily limited by the means of subsistence; but population increases naturally in a geometrical progression, or as 1, 2, 4, 8, while subsistence cannot increase at a faster ratio in the same time than is expressed by the arithmetical progression 1, 2, 3, 4,; consequently population is checked, and the checks which repress the superior power of population, and keep it on a level with the means of subsistence, are all resolvable into moral restraint [celibacy], vice [licentiousness], and misery [famines, plagues, disease]. Such was in short his doctrine. The ranks of this army—the population of every country—are full; the supply of the commissariat is limited; therefore, the number of annual recruits remaining invariable, any decrease of the deaths in battle must be followed by an equivalent increase in the deaths by famine and fever; or if the deaths from all causes are to decrease, the number of annual recruits must be diminished. Jenner had recently discovered an antidote to the poison of small-pox. It was declared immediately to be no benefit to mankind. "I feel not the slightest doubt," says Malthus, "that if the introduction of the cow-pox should *extirpate the small-pox*, and yet the NUMBER OF MARRIAGES CONTINUE THE SAME, we shall find a very perceptible difference in the *increased mortality of some other diseases*." And again: "The operation of the preventive check—*wars—the silent though certain destruction of life in large towns and manufactories—and the close habitations and insufficient food of many of the poor—prevent population from outrunning the means of subsistence*; and, if I may use *an expression which certainly at first appears strange, supersede the NECESSITY OF GREAT AND RAVAGING EPIDEMICS TO DESTROY WHAT IS REDUNDANT*. If a WASTING PLAGUE WERE TO SWEEP OFF TWO MILLIONS IN ENGLAND, and SIX MILLIONS IN FRANCE, it cannot be doubted that, after the inhabitants had recovered from the dreadful shock, the proportion of

Malthus.

Doctrine of
Malthus.

* *Socius collegiorum nuptiis esse non permittimus, sed statim postquam quis uxorem duxerit, socius collegii desinat esse.*—Report of Cambridge University Commission, p. 172. The Commissioners do not propose to abolish the condition of celibacy; but suggest a competing body of professors who are permitted to marry.

“ BIRTHS to DEATHS would rise much above the usual average in either country during the last century.”*

“ What prevents the population of hares and rabbits from overstocking the earth ?” demands a distinguished disciple, in a chapter on the increase of mankind.†

One of the corollaries from the doctrine was a plan for the gradual abolition of the poor laws, by declaring that no child born from any marriage taking place after a given date “ should ever be entitled to parish assistance.”

All that is peculiar in this doctrine, all that is erroneous, and all that has shocked the public opinion of the country, ever since its enunciation, flows from a flagrant oversight ; which might be pardoned in a young, hasty controversialist, but should assuredly have been at once taken into account when it was discovered in the light of Sir James Steuart’s original analytical work that had been first published in 1767.‡ Malthusianism had, however, become a sect ; had been persecuted ; and was modified and softened, but still upheld by its disciples.

Sir James Steuart.

Sir James Steuart, who wrote before Adam Smith, lays down the fundamental principle of Malthus, but limits it by a preceding overruling proposition. (1.) We find, he says, the *productions of all countries*, generally speaking, *in proportion to the number of their inhabitants* ; and (2.), on the other hand [as Malthus asserts], *the inhabitants are most commonly in proportion to the food*. Steuart then shows that the food of the world may be divided into two portions : (A.) the natural produce of the earth ; and (B.) the portion which is created by human industry. (A.) corresponds to the food of animals, and is the limit to the number of savages. (B.) is the product of industry, and *increases* (all other things being equal) *in proportion to the numbers of civilized men*. The whole of the chapter on Population in Steuart’s work should be consulted. Malthus, it will be observed, loses sight of this analysis, and throughout his work confounds the yield of the untilled earth with the *produce of human industry* ; which increases at least as rapidly as the numbers of civilized men, and will increase until the resources of science are exhausted and the world is peopled.

Analysis of subsistence.

The *population* that a country sustains does not depend exclusively on the amount of *subsistence existing* at any one time. The produce of a country is limited chiefly by the character of the inhabitants. For if, as an example, *twenty-three millions* of men from any part of Europe were put in the place of the people of Great Britain after harvest, the various produce would not be maintained in succeeding years ; and in the hands of Caffres, of American Indians, or of the wretched inhabitants of Terra del Fuego, however great the stock of subsistence may be at the beginning of a ten years’ occupation of these fertile islands, it is evident that, at the end, both the subsistence and the people would vary with their industry, but would decline, and be, comparatively to the actual produce, inconsiderable in amount. Future generations of Britons, if they have genius, science, skill, and industry—and if they are more numerous—will necessarily produce more than the country now yields.

Subsistence is produced, and varies in amount with the character of the producers.

It does not follow, as the theory of Malthus assumes, that a diminution of the number of the people in 1800 or in any other year would have had for its result the division of a larger share of subsistence among the survivors ; for in that year a failure of the crops was followed by a severe famine, although the number of families to be fed was not by one-half so many as the number at present in these islands. And, conversely, the share of each person’s produce is not diminished as the population increases ; for the share of the produce of every kind that falls to a family in the most populous state of America is incomparably greater than the share of the Indian hunter’s family when there was not one person to every square mile of territory.

In the rudest state, where men live on fish, or fruit, or game, the population is rarely limited by the amount of subsistence existing, but directly by the skill, industry, and courage of the savage ; for any improvement in the use of the net, hook, bow, spear, or weapon is followed by an increase of the tribe ; while any diminution of its courage or industry is followed by extermination or decay. In the pastoral or in the civilized state, the same causes, operating on a larger scale, produce effects still more striking.

Real limits of the population.

The character of every race of men is the real limit to its numbers in the world, if allowance be made for accidents of position and time.

Population is often out of the place where it is wanted, or could be most productive ; but the population of the world is not, as Malthus assumes, redundant ; and not only is there a paucity of men of transcendent genius in all countries, but few persons, who have occasion to undertake or who accomplish great industrial, political, warlike, or other

Population not redundant.

* Malthus on Population, B. II. chap. xiii. ; see also B. I. chapters i. and ii., and the work, *passim*.

† John S. Mill, Political Economy, i. 10. 2.

‡ The works of Sir James Steuart of Coltness, Bart., published by his son, General Sir James Steuart, 1806, vol. 1.

operations, ever find that the men of skill, industry, and entire trustworthiness—of whom they can dispose, either in the highest or the lowest departments—are superabundant. Every master knows that good men—and every man that good masters—are scarce.

The idle, unskilful, and criminal.

The idle who will not work, the unskilful who cannot work, and the criminal classes who cannot be trusted, are, however, it may be admitted, whether numerous or few, always redundant. But as the disciples of Malthus, if there were “two millions of such people in Great Britain,” would not hear the public executioner invoked for their destruction, neither can we admit the validity of the argument of that writer when he attempts to reconcile us to the loss of lives by shipwrecks, explosions, small-pox, close habitations on low sites—by the ignorance of men, the fevers of towns, or the blind fury of pestilences,—which are fatal to all classes of the nation. New births may repair the numbers, but never fill the places of the dead.

The geometrical and arithmetical progressions.

The assumption that subsistence increases at a rate corresponding to any arithmetical progression rests on no authentic observations. The produce of this country has never been valued at stated intervals. Capital, however, increases, it is always assumed, when terms of years are considered, in a geometrical progression; and at compound interest the increase is much more rapid than the increase of population in any European state. The interest of money, indicating the annual increase of value, is the produce of property, and bears a rather close analogy to the increase “of the means of subsistence.” At 3 per cent. per annum compound interest the value of capital is doubled in 24 years; and a population increasing at 3 per cent., which is near the natural rate, doubles in the same time; while actually the British population has increased at the rate of 1·329 per cent. annually for the fifty years 1801–51; and has doubled in 53 years. Thus—if we take this indication—the means of subsistence have increased faster than the numbers of the people; for while the population has doubled the value of capital under investment at 3 per cent. compound interest has quadrupled.* The produce of Great Britain, which in the present state of commerce is *always convertible into the “means of subsistence,”* has probably not increased at a lower ratio; and no one can pretend, in the absence of the exact facts, that the ratio has been arithmetical.

The assertion falls to the ground, that the disappearance of small-pox, of cholera, or of other epidemics, must be followed immediately by famine, or by an increase of other diseases. The principle may hold of “rabbits,” and of animals that have no power of creating subsistence; but its application to civilized men is absurd.

Possible consequences of adopting the theory of Malthus.

If the reasoning of Malthus had been just, and the people of Great Britain had acquiesced in its conclusions, the ravages of disease might have gone on undisturbed, and such numbers have remained in a state of celibacy or of libertinage that the population of Great Britain would not now have exceeded *seven millions*. Such a course might indeed have been pursued without the sanction of his doctrine. To secure a fuller share of the means of subsistence and luxury, every man might have converted his property into a life annuity, and have expended his income on personal enjoyments. The life of licentiousness, selfishness, and extravagance which was introduced into England by Charles II. was lived by the court and nobles of France down to the outbreak of the first French revolution. Such a course was pursued on a grand scale by the Romans under Augustus, and ever afterwards until the destruction of the empire,—as prevailed in what was once called the Augustan age of England.† Happily the people of Great Britain after 1751 embraced totally different principles. The United Kingdom is now covered by *twenty-nine millions of people*; and has thrown out towards the west a long line of colonies and independent states that speak her language, that preserve the purity of the English family, that have lost none of the courage or industry

Happier consequences of the policy actually pursued.

* While 100 people in Great Britain became 200 in 53 years, 100*l.* invested, and allowed to accumulate, at 3 per cent. interest, became 479*l.*

† See the speech which Augustus addressed to the Equites, in Dion. Hist. Romanæ, A. U. C. 762. Lib. 56. 1–10; see also Tacitus, Suetonius, and the other historians; and Juvenal’s terrible picture of the Roman women, Satire 6. The Romans who were soldiers expressed a general disinclination to marriage after the eastern conquests. Q. Metellus, in one of his orations, has the following curious passage: “Si sine uxore, Quirites, possemus esse, omnes ea molestia careremus: sed quoniam ita natura tradidit, ut nec cum illis satis commode, nec sine illis ullo modo vivi possit, salutis perpetuæ potius, quam brevi voluptati con-sulendum.”—(Aul. Gellius, 1–6.) No purely military caste, or army in active service, can keep up its own numbers; and the Roman state was now an organized army.

Horace ascribes the degeneracy of the Roman people to its true cause. See the whole of the Ode, 3, 6. Ad Romanos, commencing:

Delicta majorum immeritus lues

Fecunda culpæ sæcula nuptias

Primum inquinavere et genus et domos:

Hoc fonte derivata clades

In patriam populumque fluxit.

Ode 4, 4, lines commencing:

Fortes creantur fortibus et bonis

Ode 4, 5, see the lines ending:

Laudantur simili prole puerperæ.

of their race—but furnish this country with supplies of food, as well as with the materials of manufactures, in exchange for wrought produce. And now it is no subject of regret that, instead of counting on the strength of seven or of nine millions of people or of having to resort, under a threat of invasion, to Holland, Hesse-Cassel, or any foreign state for troops—the Queen of this kingdom,—who embodies the virtues on which the strength of her people is founded,—could send mighty fleets and armies to the seas and shores of her enemies, for the defence of civilization against the enterprising Power that has, during the same century, organized and placed arms in the hands of sixty millions, including nearly all the barbarians that wander over the north of Asia and of Europe.

There is nothing, therefore, in the past or in the present conjugal condition of the population to inspire any apprehension of a redundancy or a scarcity of population in England; but a great deal to encourage the policy of further improvement in this condition—in the training of the young, in the circumstances in which children are born and families live; so that the English race, growing better and greater, may increase in numbers at home, and continue to send out every year thousands of new families to the colonies.

VII.—OCCUPATIONS OF THE PEOPLE.

1. *Previous Classifications.*

In the previous Report (1851, Part II. Vol. I.) some account will be found of the results of inquiries into the occupations of the people, and of the various classifications which were employed by Mr. Rickman and by the Census Commissioners of 1841. Previous classifications.

In 1851 we introduced a new method of analysis, which is described in the Report for that year. The observations then made are applicable, with some slight modifications, to the present abstracts. For although we were able to introduce some improvements in the preliminary instructions, and the occupations were better described than in any previous Census, the confusion and imperfections of nomenclature were only partially overcome in 1861.

2. *The Abstracts of the Occupations of the People, 1861.*

This branch of the abstracts has occupied a large portion of the labour of the Central Office. It was considered important to extend the inquiry, so as to show, as nearly as was practicable, the number of men, women, and children in every trade or profession; and to obviate some of the difficulties which had interfered with the previous inquiries, short instructions on important points were printed upon every householder's schedule; and instructions still more elaborate were distributed among the enumerators and registrars. The result has been a great improvement in the quality of the information under this head; although it is still imperfect, as the inquiry is attended with inherent difficulties, which can only be removed by special measures, to which we shall shortly advert. Occupations.

Improvement in the quality of the information.

If the names are taken by which people designate their own occupations, it is found that they amount to several thousands; that in some instances, the same name is applied to different occupations; that various names are applied to the same occupations in different counties; and that the occupations in town and country, in manufacturing and other districts, are subdivided to a very different extent. Several of the names are vague and of doubtful interpretation. Nomenclature.

It was held to be desirable, not only to take out the numbers of persons of each sex in each occupation, but the numbers at each quinquennial period of age; for without this information the relative salubrity of the professions, and a great variety of important questions, cannot be determined. But the mechanical difficulties of the undertaking were great. It would be, and was felt to be, a vain expenditure of time to attempt to compress the numbers returned under each occupation and each age in one table for each district; so upon observing that certain occupations were followed by few persons, the printed list of males for use in 1861 was reduced to 431 occupations, on lines which were vertically cut by lines to indicate the quinquennial ages. The facts respecting the occupations of males were in the analysis laid down on sheets 26 inches long by 51 inches wide; and the *ages* of those whose occupations were not in the large list were written in printed supplementary sheets for subsequent transcription. To have ensured perfect accuracy in all the details, the whole of the abstracts of the occupations should have been repeated in duplicate and compared; but with the force at our disposal, this could not have been achieved in the prescribed time. Considerable pains were taken to correct evident errors of nomenclature; to instruct, assist, and check the abstractors in Classification of People of various Occupations in QUINQUENNIAL PERIODS of AGE.

their work ; so that, notwithstanding the difficulties in the way, we look with confidence on all the general results of their labours. The occupations which were referred to "Others" in the several sub-classes, and which appear in detail only in the large Tables XVII. and XIX., Census 1861, Vol. II., are the least satisfactory part of the abstracts ; but those which appear in the original abstract tables, comprising the occupations in which large numbers are engaged, are published in detail for each county and district ; and in the Tables XVII. and XIX. they are printed in capital letters ; as they are, on the whole, the most accurate and important in this kind of classification. The tabulation was elaborate, and employed much skill and careful attention.

Distribution of all the chief occupations shown in districts over the country.

It is important, in a Census of the people, to show not only the numbers that follow each occupation, but their distribution over the country ; and this it will be seen is done for counties, for districts, and for all the large towns of the country. To this circumstance chiefly the voluminousness of the publication is referable ; and it must be borne in mind that the Census is a topographical as well as a national survey, and that, as far as is practicable, it is desirable to supply the inhabitant of each district with that information in which he is most particularly interested. Hence in the first volume (for 1851) it was deemed right to publish the area and population of each of the several thousands of *parishes and townships* in Great Britain ; and in the second volume, besides the county returns, the occupations of the males and females of the age of 20 years and upwards in each *district* appear in detail.

3. *Distribution of the People in various Occupations over the Country.*

Simple occupations of the early stages of society.

In the early stages of society the occupations are so simple that whole tribes have been designated hunters, shepherds, agriculturists, according as the members live on the produce of the chase, on the produce of their flocks, or on the produce of the cultivated land. There is in such cases but one chief occupation, and the subsidiary occupations are few, employing comparatively small numbers. How different, and how much more complicated the social organization of the people of Great Britain is in the present day, the great variety of occupations in the tables shows. To render this evident to the eye, and to give a general notion of the distribution of employments over the face of the country, we requested Mr. Petermann, in 1851, to construct a Map from the tabular data with which he was supplied. That Map we do not propose to republish : it requires little correction to adapt it to the state of things in 1861.

Multipled occupations of the present day. Map exhibiting a large number of the occupations ;

Agricultural population :

The general tint of the map is green—to indicate the diffusion over the country of agricultural population, comprising the landowners, the farmers, the graziers, and the various classes of workmen either in or out of doors ; watching the flocks on the hill pastures, managing the herds in the meadows, working with the horses the arable fields, or labouring in the various buildings for carrying on the multifarious processes of production, which are now branches of agriculture.

Shipping population : Fishermen.

The figures of ships and fishes around the coasts, or in every creek, show that another large class of the population surrounds the inhabited islands of Great Britain, and is constantly employed in drawing sustenance from the rivers and the deep waters of the sea ; or in constructing, animating, and directing ships that connect the islands and the continents of the earth, and are at once the carriages and the highways of the ocean. The Celt on the hills, the Anglo-Saxon in his farm-house, and the Scandinavian in his ship—all find suitable occupations. They are diffused over sea and land. Mr. Petermann has conceived a great variety of quaint, ingenious, and suggestive devices, which are scattered in profusion over the map, to represent the people that are engaged in works, crafts, mines, and manufactures ; and the first, and, we believe, a true, impression, on glancing over the symbols of the map—so crowded in certain parts that marginal references are necessary—undoubtedly is, that the British people are very ingenious, and very industrious ; as there is scarcely a mineral, a plant, or an animal on the earth or under the earth, that they have not undertaken to move, to modify, or to make subservient to some use.

General diffusion of the occupations of towns.

Besides agriculturists, fishermen, and seamen, the trades common to towns are as widely diffused as the towns themselves ; which are sufficiently indicated by the maps in the previous Report. The map shows only the places where certain well-defined works and manufactures are concentrated. Thus ships are made at Woolwich. In London silk is manufactured ; watches are constructed ; ale and porter are brewed ; pottery, and engines and machines are made in a large way : gardens surround it for the supply of vegetables ; on both sides of the Thames paper is manufactured. Straw-plait, lace, and shoes employ the people in the South-midland counties ; the silk manufacture extends to Bucks, to Suffolk, to Norfolk—particularly around Norwich—to Coventry,

Nottingham, and Macclesfield, with the districts surrounding the towns. Silk now employs hands in Manchester and Bradford. Glovers abound about Yeovil, Barnstaple, Worcester, and Woodstock. Thus the seats of the principal manufactures can be traced: the miners and the manufacturers of the principal metals; quarriers; the people spinning and weaving wool, silk, cotton, and flax; the *manufacturers* or *makers* of hats, stockings, gloves, shoes, watches and clocks, guns, engines, machines, tools, ships, chemicals, soap, combs, skins, leather, ale, toys, straw-plait, ropes, nets, thread, paper, glass, jewellery, locks, buttons, wire, nails, anchors, boilers, files, cutlery, needles and pins.

A Table at page 133 of the Appendix contains a list of the principal localities in which the various works are carried on. Table 86.

4. *Masters in Trades, and Men in their Employ.*

A Census in the most extended sense, and as it has been understood in some countries, embraces an enumeration of the visible property and of the annual produce; it includes, therefore, industrial and agricultural Statistics. The present Census was restricted by the Act to an enumeration of the population, and of certain circumstances illustrative of their condition and occupations. No attempt could therefore be made to enumerate the number of manufactories, shops, or separate properties in the country; but in connexion with occupation it was thought desirable to distinguish masters from men, and for this purpose to ask the masters in trade and manufacture to so distinguish themselves by writing "master" after the names of their respective occupations, and by adding the *number of men* on the Census day in their employ. Farmers, who are *masters* of a particular occupation, were requested to state *how many acres* of land they occupied, and *how many labourers* they employed, with a view of giving a definite idea of the term "farmer," and of laying the foundation of a further inquiry.

Masters and men.

Farmers' acres of land, number of labourers.

This information can evidently only be made perfectly accurate by a careful and laborious revision on the spot; but, in the absence of this revision, the returns furnish information of so much interest on a matter so imperfectly understood, that it was thought proper in 1851 to construct tables showing the size of farms in each county, together with the number of labourers that were employed.

The return of the masters in trades is imperfect; all the masters have not so returned themselves; and it can only be rendered complete in the event of the Census being extended to an Inquiry into the Industry of the Country.

5. *Farmers and Labourers, and the Size of Farms.*

Some uncertainty prevails as to whether the farmers returned here all their in-door farm servants; and women and boys were included in some cases and not in others. To obtain the total number of persons who are employed on the farm, the farmer himself must be added, and frequently the farmer's sons at home. The General Tables should be referred to in connexion with this subject; and it should be borne in mind that many of the agricultural labourers there entered are out of employment, and are disabled; that many of the farmers by profession are superannuated, or have given up their farms—as the rule in the general abstracts has been in all cases to refer the retired tradesman or professional man to his profession, although he is only an ineffective member.

Tables 87-101

As there is now some prospect that England as well as Ireland will enjoy the advantages of a system of Agricultural Statistics, we have not thought it necessary to abstract all the information in the returns. But if any inference can be drawn from the abstracts of ten counties (reckoning the North Riding of York as one), it would appear that the size of farms has increased in the last ten years. The farms of less than 100 acres declined from 31,583 to 26,567; so 5,016 were amalgamated to form other farms of larger acreage. See Table 101, Appendix.

6. *On Nomenclature, and on the Classification of People.*

The organization of the labour of the country may be considered in reference to the occupations; or the people may be classified in groups, easily distinguishable, on the principles that have been adopted since the time of Linnæus in the natural sciences. Great value would undoubtedly attach to an analysis of the existing organization of labour; under which the people, armed with capital, tools, and machines, carry on an endless variety of processes for the conversion of the materials of the animal, vegetable, and mineral kingdoms, into an infinite variety of products. A preliminary provisional classification was framed at an early stage of the work in 1851, before either the analysis in question was undertaken or the nomenclature settled.

Organization of labour.

The new classification.

The length of the list was curtailed within its present limits by referring the names of the different classes of workpeople in the branches of manufactures to one head, such as pin-maker, needle-maker, cotton manufacturer, and silk manufacturer; for it was assumed that the subdivision of occupations will be separately investigated at a future time.

Double
occupations.

The double occupations were as great a source of difficulty as the varying degrees of the subdivision of labour in the manufacturing and other districts. The same person is a member of parliament, a magistrate, a land proprietor, and an occupier of land; in a lower circle, an innkeeper and a farmer; a maltster and a brewer; a fisherman in the season, a farmer or a labourer in the rest of the year. The enumerators were instructed to this effect, that "a person following more than one distinct trade may insert his occupations in the *order of their importance*;" and in the classification the first occupation was generally taken.

The whole population had to be passed in review, and every man had to be referred to some one head, although his time might be passed in two occupations; but if a class thus sometimes obtains more constituents than it deserves, it on the other hand often sustains counterbalancing losses.

Arrangements were made on the working sheets by which a further analysis of the double occupations could be carried out. Table 99, Appendix, for instance, exhibits the other occupations of occupiers of land.

The prosecu-
tion of a
further inquiry.

With the knowledge that has now been acquired, a further inquiry may, we think, be instituted with advantage into the industry of the country in all its ramifications; a nomenclature be laid down; the various subdivisions of labour be defined; and the classification be finally revised, so that at the next Census the foundation may be laid of a complete knowledge of the organization of the labour of Great Britain. Such an inquiry would in many ways be useful, and tend at once to extend science, to promote production, and to dissipate subversive theories.

Alphabetical
arrangement of
occupations
in Vol II.,
Census 1861.

For ready reference all the occupations are arranged *alphabetically* in Table XVII., Vol. II., containing, besides the number of males and of females, distinct references showing in what class and sub-class of the classified tables each occupation is to be found.

An inquirer can easily construct from this table a classification of his own for any particular purpose, as the number of persons in all the principal occupations is distinguished.

7. *The New Classification of the People in their several Occupations.*

Characteristic
costumes.

In the present day costume is not in extensive use to distinguish one class of people from another. The soldier, the seaman, the policeman, the beadle, the footman, the butcher, the turncock, have peculiar dresses; the peer, the judge, the barrister, the clergyman, and the alderman assume costumes in discharging the particular duties of their offices: but few people in trades are now easily distinguishable by the colours or qualities of their clothing.

Characteristics
of occupations.

If the people are looked at, however, in their several occupations, striking differences will be immediately perceived: (1) in the *skill, talent, or intelligence* that is exercised; (2) in the *tools, instruments, machinery, and structures* that are used; (3) in the *materials* that are worked; (4) in the *processes* of making or manufacturing; and (5) in the *products* that are created. All these elements and their conflicting claims have been considered in the classification; but, in conformity with the first notions of mankind of which we have record, the greatest weight has been given to the *materials* in which people work, as they generally imply important modifications not only in the tools, in the machines, in the processes, and in the products, but in the characters of the men. How much is the philosopher distinguished from the artizan? How well characterized are all the members of the learned professions? By his trade, and by the matter which surrounds him, how different is the blacksmith from the tailor; the shoemaker from the hairdresser; the butcher from the baker; the horsedealer from the grocer; the sweep from the navy; the fisherman, the waggoner, the pedlar, and the cotton-spinner, from each other.

The classification of 1851 has been entirely revised, and the new classification which we have adopted on the present occasion is described in a paper by Dr. Farr. See Appendix, p. 225.

The whole of the population was arranged under eighteen orders, each distinguished by the character of its occupation, and the orders were collected under six classes.

CLASS I. (PROFESSIONAL.)

PROFESSIONAL
CLASS (I.)

THE PROFESSIONAL CLASS comprises 481,957 persons; 385,345 males and 96,612 females.

87,350 persons are engaged in the general or local government of the country; and 79,653 of them are men of the age of 20 and upwards. 43,133 men are officers of the Government; 35,319 are officers of municipal and other local governing bodies; and 1,201 are officers of the East Indian and Colonial Government. As many of the offices, such as that of alderman and of magistrate, are filled by persons who are engaged in other pursuits, the whole of the numbers are rarely found under the respective heads; and it must be borne in mind that these offices are often honorary, and occupy only a portion of the lifetime. Table XIX. shows, however, the relative ages of the men and women in professions, of which the whole numbers are not returned.

Order 1.

Census 1861,
Vol. II.

The civil servants, not in the Post Office and Revenue Departments, amount to 6,996; the Post Office and the Revenue Departments employ 22,518; 2,429 Government messengers and workmen were enumerated; 13,995 artificers and labourers were engaged in the dockyards.

It will be observed that a great number of the men in the service of the Government belong to the industrial classes; but it appeared to be desirable to collect in one order all the persons who are in the employ or pay of the State.

2526 magistrates, 299 sheriffs officers, with 21,938 police, 2,612 prison officers, 6,133 union, district, and parish officers, constitute the majority of the officers of local government; but 361 officers of local boards, 560 mayors, aldermen, and municipal officers, and 834 firemen fill offices too important to be overlooked. High-sheriffs, lord lieutenants, deputy lieutenants, coroners, high constables, clerks of the peace, and clerks of magistrates are often returned under other titles.

There are 47 health officers in the return. This is a new medical office. Hitherto the medical skill of the country has been usefully employed in the treatment of the sick; but the science of life-preservation was neglected, and was rarely applied practically, because it formed no part of the business of the medical profession. The health officers, few in number, have already done incalculable good; and the local government of no community is complete without them. The conditions on which health depends are so various as to require for their regulation the highest order of medical education and talent.

The ancient office of executioner has *one* representative left in England.

1,822 women are returned in the employ of the Post Office; 1,507 fill the offices of matrons, &c. in the various unions; and 458 are prison officers. The numbers under any other head in the first class are small.

THE SECOND ORDER consists of 131,944 men at home—in the army and navy, effectives and ineffectives. The soldier is rarely retained longer than 20 years in the ranks; but he generally retires with a pension, and finds other employment, under which he is classed. Adding the numbers abroad, the Effectives in the order are 306,062.

Order 2.
Army and
Navy.

Table 122.

Only 11,342 men returned themselves as Chelsea pensioners; while the number of such pensioners on the list is 57,770. They are returned under other heads. In like manner only 6,095 seamen returned themselves as Greenwich pensioners, whereas there are 8,960 on the list, exclusive of 5,240 marines.

While the non-commissioned officers and men are discharged on account of inefficiency before the middle age of life, the officers remain on the effective list in large numbers at the age of 60; thus, of 5,455 officers aged 20 years and upwards, 361 were of the age 60–70; 245 were 70–80; 33 were 80–85; 8 were 85–90; and 2 were 90–95. It has been conjectured that some officers on half-pay are included in these numbers; but taking the half-pay list the numbers of advanced age are largely augmented; thus 728 veteran officers on half-pay were of the age 60–70; and 524 were 70–80; 99 were 80–85; 29 were 85–90; 3 were 90–95; and one was 95 and on the way to 100. The longevity of naval officers on the effective list is equally remarkable; so that no absolute age of abdication appears to be recognized in the services.

THE THIRD ORDER has in its ranks 262,663 persons in the learned professions, or engaged in literature, art, or science.

Order 3.

19,195 clergymen, 7,840 Protestant ministers, 1,216 Roman Catholic priests, and 103 priests of other bodies were enumerated; besides 1,916 missionaries, itinerant preachers, and Scripture readers, 743 theological students are specified. Then there are sacristans and other church officers; officers of religious societies and clerical agents.

Order 3.

The parish clerk is occupied in his church duties chiefly on Sundays; hence he has other secular occupations of more or less importance. This is a striking example of double occupation; and of the officiating parish clerks of the kingdom only 2,140 are so returned, the others appearing under other heads. So it is of sextons, or gravediggers, as they often call themselves. 1,087 sextons are returned, and 161 sextonesses, who probably act by deputy. The men of this Sub-order are 35,483, and the women 3,053. Among the women are 585 nuns of all ages, 90 pupils at convents, 236 young sisters of charity or mercy, and 752 pew openers. The female Scripture readers, religious teachers, and inmates of religious institutions are numerous.

The LAW SUB-ORDER includes 34,991 persons, of whom only 21 are women chiefly law stationers; 60 judges, 3,071 barristers, 11,386 solicitors and attorneys, and 70 parliamentary agents are at the head of the list; 706 law students, 1,896 officers of law courts, and 16,605 law clerks follow; 1,172 law stationers and others complete the list.

The MEDICAL SUB-ORDER comprises 38,441 persons, of whom 35,995 are men and 2,446 are women; 14,415 physicians, surgeons, and apothecaries are at the head of the list; 3,566 medical assistants and students, 1,567 dentists, and 16,026 chemists and druggists, including apprentices and assistants (3,388 of the age 10–20), follow. Then there are of men, cuppers 10, officers of medical societies and agents 21, corn-cutters 56, professors of hydropathy and homœopathy 27, herb doctors and patent medicine vendors 92, 82 medical botanists, 50 galvanists, 12 mesmerists, 21 bone-setters, 22 quack doctors, so returned, and 2 cancer doctors, besides others. The women consist chiefly of druggists 388 and midwives 1,913. These women, if properly instructed, are most useful, and otherwise they are dangerous. Midwifery is a branch of medicine which women are quite competent to study; but there are cases requiring the utmost skill and judgment of the physician.

By a curious coincidence the numbers of men engaged respectively in the highest and lowest departments of the three learned professions are nearly equal; 35,483 are enrolled in divinity, 34,970 in law, and 35,995 in medicine; thus they constitute in the aggregate an array of 106,448 men, who, with their wives and children, would fill a large city.

The progress of civilization introduces changes in men's occupations; and we have now for the first time placed with these three sub-orders six others not perfectly defined, but still distinct, and entitled to figure here; literary men, artists, musicians, actors, teachers, and scientific men. The teachers are a numerous sub-order, amounting to 30,347 men, to 80,017 women, and exclusive of these the five other sub-orders comprise 33,170 men and 7,161 women. In the literary section 1,528 authors, editors, and public writers are counted, 636 reporters; among the artists 4,637 painters figure, 612 sculptors, 4,667 engravers, and 2,366 photographists (a new occupation); these are men; and there are besides 853 women painters, and 168 photographic artists. Of actors there are 1,311, of actresses 891. There are dancers and danseuses, and equestrians, conjurors and acrobats, ventriloquists (14), cricketers (102), pugilists (18), pedestrians, aeronauts, turfites and betting men, booth keepers, shooting-gallery keepers, and others ministering in the lowest fields of public amusements; 10,470 men and 4,721 women are devoted to music, including the great masters of song, the *prima donna*, the solo performers on instruments, the chorus singers, the teachers of music, the street ballad singers, and the wretched organ grinders.

The class shows various rates of increase in its various ranks. Thus in 1851 and 1861 the numbers of the clergy of the Church of England were 17,320 and 19,195; protestant ministers, 6,405 and 7,840; Roman catholic priests, 966 and 1,216. Barristers increased little (2,816 to 3,071); solicitors and attorneys were stationary, 11,350 and 11,386. Physicians and surgeons decreased (15,241 and 14,415); but medical students, assistants, and dentists increased. Upon the three groups in the aggregate there was an increase. There is a tendency to subdivision of labour in the professions.

The chemists and druggists rose in number from 14,307 to 16,414.

Photography has interfered with engraving; for we have at the two censuses, photographers, 45 and 2,534; engravers, 4,948 and 4,715; but, while the decrease of engravers is inconsiderable, the increase of the artists in photography is enormous.

The taste for the beautiful art of music is more diffused; the musicians and music masters were 11,105 in 1851, and 15,021 in 1861. Of actors and actresses there was an increase.

Civil engineering is also a profession rapidly increasing; the numbers were 2,577 and 3,329.

CLASS II. (DOMESTIC.)

DOMESTIC
CLASS (II.)

Order 4.

10,058,938 persons belong to the domestic order (4), including one-third of the male and two thirds of the female population.

2,650,096 wives and 269,142 widows are not otherwise described. These women are sometimes returned as of no occupation. But the occupation of wife and mother and housewife is the most important in the country, as will be immediately apparent if it be assumed for a moment to be suppressed.

838,856 wives are returned under other occupations, and so are 487,575 widows. Many daughters, sisters, nieces, and grand-daughters, resident with relatives, are here returned; but others are returned among the industrial classes engaged in household duties. The numbers were 2,279,257, of whom 246,874 were twenty years of age and upwards. Again, 1,597,310 females nearly all under the age of 20 were scholars.

Deducting the numbers of this order, and of order 18, from the total female population, 3,436,749 women remain, who figure in the other orders, including the wives of 402,473 inn, beer, lodging-house, and shop—keepers, of farmers (also their daughters), shoemakers, and butchers. The occupation of the 3,436,749 women in other than household and maternal duties will be seen under the other classes.

The male children and others in this order are 1,710,395; while the scholars (boys) so described are 1,552,738.

The number of scholars has increased in the last ten years to an extent showing remarkably how the education of children was neglected down to the date of that enumeration.

England and Wales.		1851.	1861.
Male scholars	- - -	1,170,136	1,552,738
Female scholars	- - -	1,127,096	1,597,310
		<u>2,297,232</u>	<u>3,150,048</u>

The two returns include children receiving private tuition at home. The proportions of the scholars of each quinquennial period of age are shown in Tables 102, 103, Appendix, which deserve careful study.

The number of male scholars returned in the householders' schedules of 1851 agreed closely with the number of scholars deduced from the school returns of the Educational Census. And the Census of 1861 is in this respect certainly of equal accuracy.

The number of scholars under 5 years of age has doubled in ten years. At the age 5-10 the scholars from 1,222,493 rose to 1,587,834; or from 61 to 69 in 100 boys, 56 to 66 girls living of that age. 2 of the 100 boys are returned under some occupation, and 37 boys, 43 girls in 100 are at home, or not scholars, and of no stated occupation. At this age the proportion of boys at school is greater than the proportion of girls.

At the next period of life (age 10-15), the scholars from 772,906 in 1851 rose to 1,028,897 in 1861; thus 39 and 45 boys and 41 and 52 girls in 100 were returned as scholars at the two censuses. The proportion of boys in recognized occupations remains the same as it was (37 in 100); and so is the lower proportion of girls (20); the increase of scholars arising from the transfer to the class scholars of numbers from the unoccupied class at home, which even in 1861 comprised 18 in 100 boys, 27 in 100 girls.

In 1861 the scholars increased at the age of 15-20; when we have 37,208 boys and 59,126 girls returned as scholars, 4 and 6 per cent. of the whole number; 91 in 100 boys, and 69 in 100 girls, being employed in other classes. A high proportion, 25 in 100, of the girls of 15-20, are at home, and unclassified in any definite occupation, but they are often employed in household duties. The education of nearly all, except the professional classes, is completed at the age of twenty; but 3,862 males and 1,673 females are returned as scholars of that age and upwards.

4,449,242 children were living between the ages of 5 and 15; 2,616,731 it is gratifying to find were "scholars" receiving instruction; 638,274 were occupied in various ways; and, unfortunately, 1,194,247 were at home, apparently deriving no instruction from any of the schools.

The fifth order (Class II.) comprises 1,367,782 persons, who are engaged in enter-
taining and performing personal services; 210,783 are males and 1,156,999 are females.

Order 5.

The first sub-order of 159,134 persons (73,336 males and 85,798 females) comprises the great class of hotel-keepers, innkeepers, publicans, lodging-house keepers, and eating-house keepers. 66,260 persons, namely, 52,735 men and 13,525 women, are returned

as hotel, &c. keepers, licensed victuallers, or publicans. The number of publicans' licences in force in the year 1861 was 64,991.

The men of the second sub-class are nearly all domestic servants; 24,453 are inn and clubhouse servants, 554 are college servants, and 1,651 are hospital attendants. Of the domestic servants, 11,897 are coachmen, 21,396 are grooms, and 14,621 are gardeners, who are intimately connected with the third or fourth class.

224,642 men servants were taxed by the Inland Revenue Department, and 17,834 were exempt from charge in the census year, the former including 73,030 servants under 18, and 141,453 servants of 18 years of age and upwards, besides 7,404 under-gardeners, and 2,755 under-gamekeepers. The net of taxation, therefore, encloses 90,199 men, who are probably out-door and not domestic servants, living in detached dwellings, and calling themselves simply gardeners, grooms, gamekeepers, labourers, or something else. The male servants who are charged are evidently not all domestic servants, with whom they must not be confounded. Of the 17,834 servants exempt, 2,001 are kept by officers of the Army and Navy.

Of 1,208,648 women of the second sub-order, 65,273 are charwomen; 2,797 are nurses or attendants at hospitals, and 24,821 are nurses, not apparently domestic servants; 67,785 nurses are domestic servants. There are 962,786—nearly a million—female domestic servants in the country; 102,462 are returned as housemaids, 77,822 as cooks, 66,406 as housekeepers, and 644,271 without any special description. In addition, 14,145 female servants are attached to hotels, clubs, and dining-rooms. Many daughters at home, it will also be borne in mind, perform the duties of domestic servants.

The number of servants has increased since 1831 by 30,267 males and 415,952 females; the males having increased at a slower rate, the females at a faster rate than the general population. See below Tables V. and VI.

COMMERCIAL
CLASS (III.)

CLASS III. (COMMERCIAL.)

Products are often exchanged directly by the producer and consumer; still, under the commercial class, 623,710 persons are ranged, namely, 585,420 males and 38,290 females.

Order 6.

They are naturally divided into two orders. The first is the mercantile order (6), and it includes 12,944 merchants, 1,363 bankers, 596 bank officers and agents, 2,716 insurance officers and agents, 101 actuaries, 1,682 stock and share brokers or dealers, 2,563 ship brokers, 2,884 brokers, 8,695 agents or factors, besides 1,926 coal and colliery agents, and 772 iron merchants or agents, 3,542 auctioneers, appraisers, or valuers,* 6,239 accountants, 55,657 commercial clerks, and 10,754 commercial travellers.

Then in the section of General Dealers, males, are 4,726 pawnbrokers, 3,656 marine store dealers, 12,548 hucksters and costermongers or general dealers, and 13,704 hawkers or pedlars. At some shops a great variety of articles is retailed; and we have 4,556 shopkeepers of branches undefined.

Of women 758 are employed in pawnbroking, 3,331 as costermongers and hucksters, 8,088 as hawkers, and 10,024 as shopkeepers, branches undefined.

Order 7.

In the carrying order are 440,067 persons, chiefly males, 431,186; females, only 8,881. In its six sections are 53,542 persons in the railway service, 104,054 persons engaged at carrying work in streets and on roads, 35,817 on canals, and 141,848 on seas and rivers. The latter number includes only the 94,665 seamen at home in the merchant service. If we add the 64,804 abroad, the number of persons in the carrying order on rivers and seas will amount to 206,652.

* 3,658 auctioneers took out licences in the year ending 31st March 1861.

TABLE V.—NUMBER OF DOMESTIC SERVANTS IN ENGLAND AND WALES enumerated at the Censuses of 1831, 1851, and 1861.

YEARS.	PERSONS.	Males.	Females.
1831	665,709	104,730	560,979
1841	The abstracts of this year cannot be used.		
1851	908,138	124,595	783,543
1861	1,111,928	134,997	976,931

TABLE VI.—AVERAGE ANNUAL RATE OF INCREASE per Cent. of DOMESTIC SERVANTS and of the GENERAL POPULATION in ENGLAND and WALES in the Intervals of the Censuses 1831 to 1851 and 1851 to 1861.

YEARS.	AVERAGE ANNUAL RATE OF INCREASE PER CENT.			
	DOMESTIC SERVANTS.		GENERAL POPULATION.	
	Males.	Females.	Males.	Females.
1831-1851	·87	1·68	1·81	1·26
1851-1861	·81	2·23	1·08	1·18

Among the carriers of men and things on roads are coach, cab, and omnibus owners, 3,226; coachmen (not domestic servants, from whom they are not easily distinguishable in imperfect returns), 17,251; cab and flymen, 9,055; carriers, carmen, carters, and draymen, 67,070; as well as 3,263 toll-collectors.

Besides the seamen on seas and rivers, we have among the men 1,568 shipowners, 2,980 pilots, 1,275 boatmen on seas at Deal and elsewhere, 1,447 wharfingers, 3,568 persons in the steam navigation service, 1,471 ship stewards.

The warehousing of goods and storeage, with meting and packing, employed 20,095 men and 4,321 women.

Porters, messengers, and errand boys carry goods short distances, but they frequently carry verbal messages or letters. Their number was 74,592, of whom 27,759 were boys under 15 years of age. This is exclusive of 1,977 cotton porters. We have 141 couriers; 20 guides. The new telegraphic transmission of intelligence employed 2,399 men and boys, 493 being boys of 10–15, and 862 boys of 15–20. Few old people are in the service. Of 213 women only 2 girls were under 15, 61 were of the age 15–20, and 100 were 20 and under 25, 33 were 25–30, and only 17 exceeded the age of 30. The number of males and females in the telegraph service was 261 in 1851, and 2,612 in 1861. See also the Post Office Service, Class I.

CLASS IV. (AGRICULTURAL.)

We come now to the great central productive class of the country, in which 2,010,454 persons are directly employed, 1,631,652 males and 378,802 females.

8,926 are woodmen and persons engaged in the woods and forests, including only 9 women; 81,532 persons (79,675 males) are engaged in the cultivation of fruit, flowers, and garden stuff. Of men we have 8 trufflers, 8 servants of Horticultural societies, 55 water-cress growers, 2,838 nurserymen, and 76,760 gardeners.

As the land proprietors of the country fill many public offices under which they are returned, the tabular numbers are defective; thus, under this title, 15,131 males and 15,635 females are returned, making in the aggregate 30,766. The farmers and graziers, including those retired, or not in the actual occupation of farms, amounted to 249,735;

AGRICUL-
TURAL CLASS
(IV.)

Order 8.

TABLE VII.—NUMBER of PERSONS engaged in AGRICULTURE in ENGLAND and WALES, enumerated at each of the Censuses 1851 and 1861.

OCCUPATIONS.	PERSONS.		Males.		Females.	
	1851.	1861.	1851.	1861.	1851.	1861.

TABLE VIII.—NUMBER of FARMERS and GRAZIERs, FARM BAILIFFs, FARM SERVANTS (IN-DOOR), AGRICULTURAL LABOURERS, and SHEPHERDS (OUT-DOOR) enumerated at the CENSUSES of 1851 and 1861 in ENGLAND and WALES.

1851	1,347,387
1861	1,340,916

226,957 men—and 22,778 women, who often display remarkable talent in the management of large establishments. The farmers' sons, brothers, grandsons, and nephews at home of the age of 15 and upwards generally work on the farm, and their number is 92,321; then there are 914,301 agricultural labourers, 25,559 shepherds, and 158,401 in-door farm servants. 94,959 of the in-door servants are under 20 years of age.

Besides 22,778 women who are designated farmers, there are 163,765 farmers' wives and 83,830 farmers' daughters, and other relatives, of the age of 15 and upwards, who are engaged more or less in the dairy and other work of the farm. English women do not work extensively in the fields, except during harvest; yet 43,964 are returned as out-door agricultural labourers, and 46,561 as in-door farm servants (dairymaids, &c.)

The number of persons who are employed on the land depends upon the kind of culture; and less labour than was engaged in 1851 might create produce of a greater value in 1861. This was probably the case. The number of men at work on farms was rather less in 1861 than in 1851 (*see* Table VIII., p. 35 of Report).

It is difficult to draw any certain deduction from the earlier returns; but they seem to show that the increase of farmers and farm labourers since 1801 bears no kind of proportion either to the increase of agricultural produce or to the increase of the industrial class.

Order 9. Closely connected, and in the same class with the farmers and graziers, are 86,344 persons engaged about animals; of whom 85,985 are males, and only 359 are females. It includes of men, 1,284 horse owners, breeders, and dealers; 1,488 horse-breakers; 36,595 horsekeepers and grooms (many of them out-door servants), 6,774 farriers, 9,848 gamekeepers, 1,758 ratcatchers and vermin destroyers, and 16,992 fishermen. Nearly all the women of the order are fisherwomen (235).

The number of gamekeepers was 7,703 in 1851 and 9,848 in 1861. The number of persons licensed to kill game in 1861 was 34,441, and the number of licensed keepers was 2,536.

INDUSTRIAL CLASS (V.)

CLASS V. (INDUSTRIAL.)

THE INDUSTRIAL CLASS (V) consists of 4,828,399 persons, 3,262,510 males and 1,565,889 females. More than a million young people of both sexes under 20 years of age are employed in one or other of its six orders, besides 2,580,425 men and 1,164,410 women of the age of twenty and upwards.

Order 10. The first order (10) in the class consists of 953,289 persons, chiefly males, for only 60,067 of the number are females. 54,293 persons are employed in making or selling books and newspapers. Many thousands are engaged in making and selling musical instruments, prints, carvings, designs, and tackle for sports. 20,221 males and only 536 women are engaged in watchmaking; 13,744 men and women manufacture and sell arms; 117,418 machines and tools; 20,128 carriages; 19,414 harness; 43,779 ships and boats; 505,671 houses. The 25,579 women comprise 24,630 house proprietors; the 480,092 men, 11,402 house proprietors. This building sub-order is only numerous in countries where many new houses and structures are erected; they are early sufferers in a revolution or in a country's decay. In furniture 63,916 persons are employed; on implements 39,623; chemicals 20,009.

Some of these trades are rapidly increasing; thus in 1851 the printers amounted to 22,399, in 1861 to 30,590; in the same years the musical instrument makers and dealers were 3,971 and 5,168; lithographers 1,393 and 2,912; wood carvers 1,163 and 1,834; gunsmiths 7,440 and 11,873; engine and machine makers 42,597 and 60,862; coach-makers 15,347 and 18,870; shipbuilders and shipwrights 21,100 and 31,294; carpenters and joiners 156,267 and 177,969; brick-makers 29,019 and 39,620; bricklayers 67,158 and 79,458; masons 77,733 and 84,434; painters, plumbers, and glaziers 57,576 and 74,619; cabinet makers and upholsterers 34,649 and 41,037.

Order 11. 2,231,617 persons are engaged in making and in dealing in the textile fabrics; 238,814 in wool; 117,989 in silk; 563,014 in cotton and flax; 83,170 in mixed materials. In converting these products and others further into dress 1,205,747 persons are employed, namely, 399,166 males and 806,581 females. Great numbers in the domestic class are partially employed in making, mending, and washing dresses.

The number of persons who are employed on a product does not bear any constant proportion to its quantities; thus by the introduction of machinery the number of weavers is reduced, while the amount of cloth is increased enormously; and generally the greatest increase of artizans since 1851 is in trades to which machinery has not yet been successfully applied, as in the building trades; but it sometimes happens, as in the cotton manufacture, that the increase of hands is caused by the application of machinery,

which reduces the price of products so much as to place them within the reach of innumerable customers.

We may now notice the numbers returned in 1851 and 1861 under different branches of textile manufacture:—Woollen cloth manufacture 122,256 and 130,034 persons; worsted manufacture 102,714 and 79,242; silk manufacture 111,940 and 101,678; cotton manufacture 371,777 and 456,646; calico or cotton printers 12,098 and 12,556; calico dyers 3,278 and 4,772; flax and linen manufacturers 26,325 and 22,050. Among persons in the order of dress the hairdressers remained nearly stationary, 11,220 and 11,064; hatters 15,957 and 13,814; straw hat and bonnet makers 20,393 and 18,176; tailors 132,715 and 136,390; milliners and dressmakers 234,712 and 287,101; shoe-makers 240,252 and 250,581.

430,220 persons worked or dealt in food and drinks, 347,614 males and 82,606 females. Order 12. The numbers were nearly equally distributed among the sub-orders:—that dealing in animal food 141,185, that dealing in vegetable food 136,354, and that trading in drinks and stimulants 152,681.

In the years 1851 and 1861 the cowkeepers and milksellers amounted to 14,386 and 17,694; the butchers' to 62,185 and 68,114; fishmongers 9,084 and 11,305; bakers 51,738 and 54,140; maltsters (masters and men) 10,566 and 10,677; brewers (masters and men) 17,380 and 20,352; grocers and tea-dealers 71,658 and 93,483.

12,040 persons are working in grease, gut, bone, horn, ivory, and whalebone, of whom Order 13. the majority are soap boilers, tallow-chandlers, and comb-makers. The soap boilers in 1851 and 1861 were 1,216 and 1,623, tallow-chandlers 4,949 and 4,686, and the comb-makers 2,038 and 1,478. The progress of civilization has been greatly promoted by these trades; for cleanliness and artificial light distinguish the English and other civilized nations from barbarians, immersed in dirt and darkness. The decrease of the tallow-chandlers is counterbalanced by the rise of a gas-service, and combs are now often made of metal.

Skins, feathers, and quills furnish employment for 29,756 persons, of whom 28,360 are males, 1,396 are females. The leather-manufacture occupies the majority; the numbers of curriers and tanners in 1851 and 1861 were 19,571 and 21,493.

14,296 persons were working in hair and bristles; 9,711 men and 4,585 women. In 1851 and 1861 there were 2,470 and 3,002 persons engaged in the hair and bristle manufacture; 9,393 and 11,178 persons engaged in making and selling brushes and brooms.

There were 144,184 persons, chiefly males, working and dealing in vegetable substances, Order 14. exclusive of those used as food; 14,659 in gums and resins, 79,066 in wood, 2,352 in bark, 17,302 in cane, rush, and straw, and 30,805 in paper. Notwithstanding the introduction of saw-mills, sawyers increased slightly in ten years from 30,552 to 31,647; coopers were at the two censuses 16,029 and 17,821; cork-cutters 1,753 and 2,257; basket makers 8,016 and 8,899; rag gatherers and dealers 2,851 and 3,462; paper makers 10,809 and 13,357. The number of women employed in paper making at the last census was 5,611; and the number of men 7,746.

We now come to the great order of workers in minerals, in which 1,012,997 persons are engaged. Few women work in this laborious field, for 956,684 of the number are males.

The first sub-order of miners consists of 330,352 men, of whom 248,284 are connected Order 15 : 1. with coalpits as owners, inspectors, clerks, or colliers. 32,041 are tin or copper-miners, 18,552 are lead-miners, 20,626 are iron-miners, 7,502 are indefinitely described as miners; 2,502 are described as secretaries and servants of mining companies.

Coal-miners or colliers in the last ten years increased from 183,389 to 246,613; copper Order 15 : 2. and tin-miners from 31,360 to 32,041. The export of coal and the import of copper partly account for the discrepancy, and for the increase of the numbers employed in the copper and tin manufactures from 10,637 to 15,040.

The number of coal-heavers was 15,540 in 1851 and 17,410 in 1861, when the coal-merchants and dealers were 11,201 and 12,266; and coke-burners or dealers, 2,110 and 3,075. The production of gas occupies more persons every year; gas-meter, &c. makers at the two censuses were 136 and 314; the gas-fitters 2,217 and 5,469; persons in the gas-works service 4,718 and 8,672. Upon work in coal and its immediate products coke and gas nearly 300,000 persons were employed in 1861.

Women are still employed at coal works, chiefly at the pit's mouth; their number was 3,260 and 3,763 in 1851 and 1861.

In stone and clay 144,773 persons were employed, of whom 142,170 were males, Order 15 : 3. including 22,243 stone quarriers, quarry agents and owners, 4,679 stone agents, merchants, and cutters, 9,360 slate-quarriers, 5,507 limestone and lime workers, 82 stone dredgers and diggers, 139 coprolite diggers and dealers, and 1,069 plaster and cement manu-

facturers or dealers, are indications of peculiar trades. Of clay labourers in 1851 and 1861 there were 1,427 and 2,912; of brick-makers 29,019 and 39,620. Thus showing an increased demand for the building materials which are not produced by machinery. Of railway labourers, navvies, excavators, and platelayers, the number was 34,618 and 43,008; of road surveyors, contractors, and labourers 8,611 and 10,495; the increase being considerable among those employed both on the iron and stone ways of the nation. Of the not very agreeable but of the very important group of scavengers and nightmen, we had 1,065 and 1,374 at the two censuses.

1,203 and 1,852 women were returned as brickmakers; hence the number of women so employed is increasing. A certain number also work in clay.

Order 15 : 4. 47,144 persons are working in earthenware; 32,981 males and 14,163 females. The persons employed in this important manufacture were 34,341 and 38,072 in 1851 and 1861, when the dealers and importers of earthenware and glass were 4,605 and 4,965. The makers of tobacco pipes, and of drainage and other pipes, are sometimes apparently confounded under the common name of pipe-makers; but as far as could be ascertained the number of tobacco-pipe makers was 3,637 at the last and 3,882 at the previous census.

Order 15 : 5. 15,603 persons work in glass, including only 1,392 women. We see here the effects of the liberation of the manufacture from the Excise Duty; the numbers engaged in the glass manufacture in 1851 and 1861 were 11,282 and 15,046.

Order 15 : 6. In saltworks 1,412 and 2,120 persons were employed at the two censuses; so that the amount of labour which is expended in producing this important article is not considerable, but is increasing. The addition of merchants and dealers makes the number 2,527.

Order 15 : 7. Water is an article of greater necessity than salt, and although it is bountifully distributed in this country by the Author of nature, its supply in a state of purity demands labour and skill. The water of nearly all our wells in towns and the water of many wells in the country is impure. It is therefore gratifying to observe, that since 1851 the men in the waterworks' service have increased from 864 to 1506 in 1861, when we had also 523 well-sinkers, 77 water carriers and dealers, 23 ice makers, merchants, or dealers.

Order 15 : 8. Gold, silver, and precious stones are imported; so the numbers employed in finding and getting them do not figure in our accounts; the workers here were 21,576 in 1861. The numbers are increasing; in 1851 and 1861 we had 11,391 and 16,247 goldsmiths, silversmiths, jewellers, and lapidaries, the latter number including 1,733 women, chiefly young persons. 298 men and 858 women are guard-chain makers.

Order 15 : 9. 9,733 persons, exclusive of miners, worked in copper in 1861, including 3,827 men and 3,961 women in copper manufactures. 1,882 men and 11 women are copper-smiths. The numbers of persons in the copper manufacture rose from 6,558 to 7,788 in ten years.

Order 15 : 10. On tin and quicksilver 22,878 persons were employed; 18,434 males and 4,444 females. In the tin manufacture, 3,266 men and 3,986 women were employed; as tin-workers and tinkers 7,720 men and 121 women; as tin-plate workers 7,278 men and only 282 women. There are 81 men and 22 women engaged on tinfoil. The numbers in the tin manufacture were 4,079 and 7,252, in tin-plate working 3,473 and 7,560, at the two censuses.

Order 15 : 11. The zinc manufacture employed 432 and 760 men at the two censuses. In lead and antimony 4,997 persons were working in 1861, including 970 women and 4,027 men. Of the men, 2,797 are engaged in lead manufacture, 313 are pewterers, and 863 are type-founders; of the women, 938 are lead-workers, 11 are type-founders. The increase of work in lead is not considerable.

Order 15 : 13. In brass and other mixed metals 45,577 persons are working, 41,612 men and 3,965 women. Among the men we have 1,517 metal refiners and dealers, 15,985 brass founders and manufacturers, 2,219 braziers, 5,472 locksmiths and bell-hangers, 5,448 gas-fitters, 900 white metal manufacturers, 322 pin manufacturers, 3,342 wire makers, 2,287 wire-workers, 919 lamp and lantern makers, and 494 spoon makers. There is a great increase in this kind of work; the brass founders and manufacturers, with braziers, were 14,725 and 18,510, the wire-drawers and wire-workers 4,147 and 5,974, at the two censuses.

Order 15 : 14. 316,572 persons, exclusive of miners, worked in iron and steel, at the time of the census; 299,697 men and 16,875 women. Of the men, 123,430 worked in iron manufactures; 9,852 were whitesmiths; 107,770 blacksmiths; 15,369 made nails; 3,964 were anchor and chain-smiths; 13,016 boiler makers; 9,166 ironmongers; 1,080 hardware dealers; 3,186 steel-makers and workers; 1,247 grinders; 903 bit-makers; 1,042 stove

and grate makers ; 1,871 bolt-makers ; 1,062 key-makers ; 1,137 screw-cutters. Of the women, 2,341 were in iron factories ; 10,761 made nails ; and 1,546 were screw-cutters.

There has been a great extension of this branch of work ; the persons at the two censuses in the iron manufactures were 68,053 and 125,771 ; boiler-makers, 6,022 and 13,020. But nails as well as needles, and some other iron and steel products, are now made extensively by machinery, so the persons employed in the nail manufacture fell from 26,940 in 1851 to 26,130 in 1861, when 15,369 men and 10,761 women were employed in this work, which is begun at a very early age.

CLASS VI. (INDEFINITE AND NON-PRODUCTIVE.)

This Class arises in great part from imperfect returns, which rendered the distribution of a certain number of people in their places under the preceding classes impossible. Thus in Order 16. 306,544 men are simply returned labourers, 11,621 mechanics, 3,550 shopmen, and 2,584 apprentices, the particular branch of labour, art, or shop-keeping being left undefined. Steam-engines are, like men, employed on railways, on rivers and seas, and in factories of various kinds ; hence we have here 9,318 undistributed engine drivers, stokers, and firemen, in this indefinite class.

110,299 persons in Order 17. are returned ; 22,870 men solely as gentlemen or annuitants, and 87,429 women as gentlewomen or annuitants.

77,993 persons are supported by the community, and of no specified occupation ; they include pensioners, dependants on relatives, alms persons, paupers, prisoners, and others of no specified profession. Then there are vagrants, beggars, gipsies, and others of no stated occupation. 385,974 of the class are males, and 158,120 are females.

Such is a brief sketch of the distribution of the work of every variety in which 20,066,224 of people are engaged. The whole of the details, arranged under the several classes and orders, will be found in Table XIX. for males and Table XX. for females, Vol. II.

The ages of males and females in the *principal occupations* are given for London and for the several counties under their respective divisions. The number of males of the age of 20 and upwards following the principal occupations are also given under each district. For the females, there is a similar table.

The distribution of the six classes over the kingdom is shown in Tables 82, 83 (App.)

VIII.—MIGRATION OF THE PEOPLE AT HOME (BIRTH-PLACES).

The Schedule supplied the means of distinguishing, not only the number of the inhabitants, but also the numbers born in each county of England, in Scotland, in Ireland, and in Foreign Parts.

Of the population at home, 946,172 persons were born out of England and Wales, 3,509 were born at sea, 17,742 were British subjects born abroad, 51,572 were born in the East Indies or the British Colonies, 18,423 were born in the Islands of the British Seas, 169,202 were born in Scotland, and 601,634 were natives of Ireland. These were all subjects of the Queen.

In the midst of 19,982,623 British subjects lived 84,090 subjects of Foreign States. They are of all ages ; but there is a great excess of men between the ages of 20 and 40. 9,502 of the subjects of Foreign States belonged to America, 518 to Africa, 358 to Asia, and 73,434 to Europe ; 40,909 of them are in London, and the rest are distributed all over England.

The diplomatic corps stands among the subjects of Foreign States, first in importance, but its numbers are not considerable. The merchant seamen amount to 15,561, chiefly from Norway, Denmark, Sweden, and Germany, the descendants of the same races as invaded England.

We give a Table of the ages and occupations of the subjects of European States. Of the subjects of France, 12,989 are reckoned, including teachers of languages, governesses, cooks, servants, merchants, clerks, seamen (1,532), tailors, bootmakers, dressmakers, and smaller numbers in a great variety of occupations.

Italy sends us musicians, artists, priests, figure and image makers, looking-glass makers, and merchants. 667 Italian seamen were in our ports. Germany, with Austria and Prussia, besides seamen (4624), supplies us with a large number of musicians, teachers of the German language, servants, merchants, factors, and commercial clerks, watch and clock makers (965), engine and machine makers, tailors, shoemakers ; with many bakers, and a large colony of sugar refiners (1345).

The cities, and especially the metropolis, are the principal seats of foreign residents. London in 1851 contained 30,057 persons born in Foreign Parts ; and in 1861 it contained 48,390 foreigners by birth.

Tables 123-
133.

Foreigners in
England.

Summary
Table XXX.,
Vol. II.

Table 126.

BIRTH-PLACES.

Liverpool at the two censuses contained 4,167 and 4,412 foreigners; Manchester and Salford 2,035 and 3,086 persons born in Foreign Parts. Birmingham, Hull, and Brighton were the only other towns that contained more than 1,000 foreigners.

Table 133.

Of 100 foreigners residing in England, 36 were born in Germany, Austria, and Prussia, 16 in France, 9 in the United States of America, and 39 in all the other States of the world.

18,423 persons in England were born in the Islands of the British Seas.

Table 123.

601,634 persons in England were born in Ireland, of whom nearly five in six, or 497,116, comprising 244,840 men and 252,276 women, were twenty years of age and upwards. The 104,518 under twenty years of age comprised rather more boys than girls, and many of them were the children of the adults. The distribution of the Irish immigrants over England is shown in the Tables; thus, 245,933 of them are in Lancashire and Cheshire, 124,646 in the Metropolitan Counties,—Middlesex, Surrey, and Kent, 50,664 in Yorkshire, and 42,753 in Durham and Northumberland. Wherever employment is active the Irish flock, and they abound in the large towns,—London, Liverpool, Manchester, Birmingham, Leeds, Bradford, and Sheffield,—generally occupying particular streets and quarters.

169,202 persons in England were born in Scotland, of whom 42,656 were in Lancashire and Cheshire, and 42,226 were in the Metropolitan Counties. Half of the Scottish population in England were in these five counties,—18,461 resided in Northumberland, 9,025 in Cumberland over the border, 13,621 in Durham, 10,376 in Yorkshire, and 4,419 in Hampshire. A certain number of Scotchmen are scattered over all the other counties.

Tables 128 and 129.

There is not only a constant movement of parts of the population to and from other countries and England, but there is a constant migration from one part of England to another. The migration of the English about their own country is traced in the series of Tables displaying the birth-places of the inhabitants of each county. It may be illustrated by the instances of London and of the North-western Counties, Lancashire and Cheshire.

London is the metropolis of the empire, and thither the representatives of other nations, of the colonies, and of Scotland and Ireland, resort; but it is chiefly the field in which the populations of the several counties of England find scope for their talents and their industry.

The majority of its inhabitants are, it is true, indigenous, for 1,741,177 were born within its limits; but of the 1,062,812 who were born elsewhere 852,994 were born in the extra-metropolitan counties and parts of counties of England and Wales.

62 in 100 of the inhabitants were born in London, 19 in the counties of the three divisions around London, 7 in the South-western and the West Midland Counties, 4 in the North Midland and all the Northern Counties. In 100 inhabitants little more than $1\frac{1}{4}$ were natives of Scotland, nearly 4 (3·8) were natives of Ireland, ·5 were natives of British Colonies, $1\frac{7}{10}$ were natives of Foreign parts.

It is evident that these proportions do not show the tendency of the various populations to send emigrants to London; for to determine this relative tendency the numbers of the population from which the emigrants come must be taken into account.

Thus the Islands in the British Seas sent 3,429 of their natives to London, and Ireland sent 106,877; but as the population of the islands is 145,674, and the population of Ireland is 5,850,309, it follows that the islands send proportionally more natives to London than Ireland contributes. To 1,000 people in the islands there are 24 natives of

TABLE IX.—BIRTH-PLACES of the INHABITANTS of ENGLAND and WALES.

		1851.	1861.	Difference or Increase in 1861.	Estimated Immigrants in the 10 Years 1851-61.

those islands in London; while to a population of 1,000 in Ireland there are 18 Irish- Birthplaces.
men in London.

The Table 128 will correct some popular errors. Thus it will be noticed that the tendency of the Scotch to go to London is less than the tendency of the people of any other parts of great Britain, except Lancashire and Cheshire. Taking 1,000 as the population basis, there are to 1,000 people in Scotland nearly 12 Scotchmen in London, to 1,000 people in Yorkshire 13 Yorkshiremen in London, to 1,000 people in Wales and Monmouthshire 15 of Welsh birth in London, to 1,000 people in the Northern counties 16 Northern men by birth in London. Table 128.

The counties of Lancashire and Cheshire are themselves centres of attraction, to which the population of other counties flows; but to 1,000 of their population there were 8 natives of those counties in London. Table 129.

From the counties between the Wash and the Humber there is a small but constant stream of emigrants to London; for Lincoln, Leicester, Derby, and Nottingham have to 1,000 inhabitants 26 of their natives in London, while the counties around the Severn have the somewhat larger proportion of 31 natives in London to 1,000 inhabitants. The stream to London from the South grows larger, and the counties of Cornwall, Devon, Somerset, Dorset, and Wilts send 128,442 of their natives to be enumerated in London,—70 natives to every 1,000 of the inhabitants of these South-western counties. The influx of the inhabitants of counties immediately about London rises to still higher proportions, and to 1,000 inhabitants, the South Midland counties had 114 natives, the South-eastern counties 123 natives, the Eastern counties 133 natives resident in London. Proximity to the metropolis, and the absence of manufactures at home, first drew the natives of these counties to London, and the migration continues to flow thither in unabated force. Labourers, artizans, of various kinds, and the professional classes, go to London probably in less unequal proportions from the various counties.

It naturally happens that the children enumerated in London were nearly all born within its limits, and of 1,186,059 young people under the age of 20, only 196,263 were born elsewhere.

Of the adults of the age of 20 and upwards, 866,549 were born out of London, and only 751,381 were natives of the soil. The proportion of adult immigrants to natives was 115 to 100, or rather less than 7 to 6.

The men of the age of 20 and upwards who were not natives were in the proportion of 121 to 100 natives; the women in the proportion of 111 to 100.

2,061,093 persons in England were born in London, and the distribution of the 319,916 natives of London who were in other counties is shown in Table 127. The attraction between London and the other divisions is not necessarily reciprocal, but the proportion of Londoners bears a certain proportion to the distance of the counties from the metropolis. Table 127.

The two counties round the Mersey and on the Irish sea were inhabited by 865,791 people at the beginning of this century, while at the last Census their inhabitants amounted to 2,934,868, of whom 2,264,618 were born on the soil, and only 670,250 were strangers by birth, comprising 245,933 natives of Ireland, 42,656 natives of Scotland, 6,348 natives of the Isle of Man and the other islands of the British seas, 102,728 natives of the contiguous county of York, 191,972 natives of the other northern divisions, and only 61,080 natives of London and all the Eastern, Southern, and South-eastern counties. Cheshire and Lancashire.

Essex, Suffolk, and Norfolk only sent 6,992 natives to Lancashire and Cheshire, while they sent 156,592 to London.

The tendency of the South Saxon population to emigrate to the North is excessively small; to 1,000 of their inhabitants none of their divisions had more than 5 or 8 natives in Lancashire and Cheshire. Yorkshire is intimately associated with Lancashire and Cheshire by trade and by vicinity, so to 1,000 inhabitants it had 51 natives in those two counties; the Islands in the British Seas and Ireland stand next in order, 44 and 42; Wales (39), the Northern counties (35), the North Midland counties (33), and the West Midland counties (25) follow with decreasing proportions of representatives. Scotland had only 14 in this division to 1,000 at home. The population of Scotland has evidently a large field of employment at home, and its natives in England are not so conspicuous in numbers as they are in other respects.

The Table (123) deserves careful study; it shows (1) in what counties the inhabitants of each county were born, and (2) the distribution of the natives of each county over every English county and Wales. Thus, to take an example, the population of Cumberland was 205,276, of whom 166,786 were born in the county, and 38,490 were Table 123.

Birthplaces.

born in other English counties, 10,529 in Ireland, 9,025 in Scotland, over the border and elsewhere. Again, 213,754 of the inhabitants of England were natives of Cumberland, and as only 166,786 were in their native county, 46,968 of them were diffused all over England; 18,661 in Lancashire and Cheshire, 7,590 in Durham, 6,846 in Northumberland, and 3,713 in Westmorland, 2,657 in Yorkshire, and 2,569 in Middlesex; none of the other counties counting more than a few hundreds of the natives of Cumberland.

Thus Cumberland exported and imported population, the excess being on the side of movement outwards to the extent of a much higher number than 8,478; for 38,490 natives of other parts were in the county, and of the natives who left the county 46,968 were enumerated at the Census in other English counties. And the numbers who went to Scotland, Ireland, the Colonies, and Foreign parts, are not here brought into account. Two Tables (Appendix, 124, 125) show the proportionate number in 10,000 inhabitants born in each county, and the distribution of 10,000 natives over every county.

Table 131.

The population of some places consists almost exclusively of natives, but there are only two counties of England in which the natives are in the proportion of more than 9 in 10. In 10,000 inhabitants, Cornwall contained 9,194, Norfolk 9,055 who were born in those counties, which afforded little scope to the industry of the inhabitants of other counties.

IX.—THE BLIND AND THE DEAF-AND-DUMB.

1. *The Blind.*

Benefits of statistics to the blind.

It is everywhere acknowledged that an important service has been rendered by statistics to the Blind and to the Deaf-and-Dumb. Not only have the authentic numbers of these unfortunate members of the community been ascertained and found to be much larger than was previously supposed, but a fresh impulse has been given to the efforts of philanthropy on their behalf.

Mode of obtaining the information.

During the last thirty years the Blind have been enumerated in the principal European countries and in the United States of America; in Great Britain and Ireland an inquiry into their numbers was, for the first time, instituted in 1851, and there is no reason to doubt the general accuracy of the information then obtained. At the recent Census the inquiry in England was repeated in the same form as in 1851, and this consisted simply in providing in the Householder's Schedule a special column, wherein the householder was instructed to write "*Blind*," or "*Blind from Birth*," against the entry of the name of any member of the family to whom such a description was applicable. From other columns of the schedule we learn their names, ages, sexes, and occupations. It is possible that a few persons labouring under *partial* blindness may have been entered as blind, but such cases may be taken as a set-off against accidental omissions. In preparing the abstracts, however, every care has been taken at the Census office to exclude persons described in such a manner as to indicate that their sight was merely impaired by the advance of years or otherwise, and to reckon those only who might be fairly assumed to be destitute of sight for all useful purposes.

Number of the Blind, 1861.

The number of blind persons enumerated in the United Kingdom on 8th April 1861 was 29,248, viz.

In England and Wales	-	-	19,352, or 1 blind to every 1,037 persons.
Scotland	-	-	2,820, or 1 " 1,086 "
Ireland	-	-	6,879, or 1 " 843 "
Islands in the British Seas	-	-	197, or 1 " 728 "

Total in United Kingdom 29,248 or 1 " 994 "

England.

A comparison of the numbers in England and Wales with the return of 1851 shows an absolute increase of 1,046 blind persons; but it is satisfactory to find that relatively to the population the number has not increased, the proportion being 1 in every 1,037 persons in 1861 against 1 in 979 at the preceding Census. In Scotland the number of blind returned in 1851 was 3,010, or 1 in every 960 of the population; the present return shows a decrease of 190 persons, the proportion being now 1 in 1,086. Whether this decrease is attributable to the information being less complete than in 1851, when the numbers were scarcely likely to have been overstated, or to other causes, we have not been able to ascertain; the Scottish Commissioners will probably afford some explanation on the subject in their Report. In 1851 the blind in Ireland were 7,587, or 708 more than in April 1861, but in consequence of the decrease of the Irish people to the extent of three quarters of a million during the interval of ten years, the ratio of the blind to the population is now somewhat higher than at the former period, being 1 in 843 against

Scotland.

Ireland.

1 in 878. There is an increase of 26 blind persons in the Isle of Man and Channel Islands since 1851, while the population has remained almost stationary. The general result for the United Kingdom shows an absolute increase as compared with the number returned in 1851 of 174 only, and a decrease in the ratio to population from 1 in 950 to 1 in 994 persons. In round numbers the blind in this country may be set down as amounting to nearly 30,000, or about 1 in every 1,000 of the inhabitants.

Islands in
British Seas.

It will be observed that blindness is much more common in Ireland than in the other parts of the United Kingdom. This circumstance has been investigated by an eminent authority on the subject, Dr. W. R. Wilde, one of the Irish Census Commissioners, who has traced the history of several outbreaks of epidemic ophthalmia in that country during the last 160 years, and described particularly the effects of the great "epidemic constitution," so marked by the failure of the potato, and by consequent famine in Ireland during the years 1845 to 1852. A wide-spread inflammation of the eyes prevailed throughout the pestilential period, not only amongst the peasantry suffering from want, and exposed to the vicissitudes of the weather in their wretched dwellings, but amongst the masses of pauper children crowded in the workhouses; and even regiments of healthy and well-fed soldiers became the recipients of this peculiar influence upon visiting those localities where the disease existed in an epidemic form. The number of those who suffered from ophthalmia in the Irish workhouses alone during the years 1849 to 1852 was as many as 118,800, besides vast numbers in the rural districts and in the different cities and towns. In the 13 years from 1849 to 1861 the cases of ophthalmia in the workhouses, according to the published statement of the Irish Poor Law Commissioners, were little short of two hundred thousand. Latterly the disease has been gradually lessening in the workhouses, and in 1860 there were only 5,416 cases.*

Blindness in
Ireland.

Blindness it is supposed becomes gradually more prevalent as the equator is approached from the poles, and fixed ratios of the blind to the sighted have even been assigned to different parallels of latitude. No sufficient data exist, however, for any certain conclusions of this nature; and although the prevalence of blindness in tropical countries is well known, we believe the fact may be ascribed to causes which exercise a more powerful influence than climate. In countries where the masses of the people are badly fed and lodged, where sanitary laws are disregarded, and where there is little knowledge of ophthalmic surgery, blindness will always be common, and it will be little modified by the circumstances of mere geographical position. In the subjoined Table† we give the latest statistics accessible to us relating to foreign countries and to a few of our colonial possessions. It will be observed that in Norway the ratio is as high as 1 blind to every 540 inhabitants, or nearly two to one as compared with Great Britain. In the American States the ratio of blind to the whole population is 1 in 2470, and of blind slaves to all slaves, 1 in 2616; in several of the southern states between 26 and 33 degrees of latitude the proportion is much lower, tending to show

Distribution of
blindness.

* *On the Number and Condition of the Blind in Ireland*, by W. R. Wilde, M.D., a paper read before the "Congrès International de Bienfaisance" in London, 1862. Dr. Wilde attributes the wide-spread result of the workhouse ophthalmia to the "crowding" together of multitudes of badly-fed children and young persons in close, ill-ventilated, and unsewered temporary workhouses at the period of the famine; but he considers the great variability of climate of Ireland and the continuance of easterly winds often far into the summer, to be unfavourable conditions, which, combined with the want of special hospitals for the treatment of diseases of the eye, and the extreme apathy and indifference of the Irish people with regard to these diseases, as well as a certain amount of uncleanness, contribute to swell the number of the blind. It is due to Dr. Wilde to state that he has himself been largely instrumental in relieving sufferers from this class of diseases amongst the poor in Ireland, St. Mark's hospital for diseases of the eye and ear, having been maintained in active operation in Dublin during sixteen years chiefly through his connexion with the institution, which he has munificently assigned to trustees for the use and advantage of the afflicted poor. It contains 5 wards with 30 beds, and last year relieved 257 in-patients and more than 2,000 out-patients. Pauper patients were received in the institution from 21 Poor Law Unions under the Amended Poor Law Act for Ireland (25 & 26 Vict. c. 83, sect. 7.), which empowers Boards of Guardians in cases requiring special treatment to send inmates of the workhouse to any hospital or infirmary, the managers of which shall be willing to receive such inmates, and to pay the cost of their maintenance and treatment out of the poor rates; these patients were received at the rate of nine-pence per day.

† TABLE X.—NUMBER and RATIO to POPULATION of the BLIND in the under-mentioned COUNTRIES, according to the latest Returns. (From the Report on the Status of Disease in Ireland, 1861.)

COUNTRIES.	Number of Blind.	Ratio to Population.	COUNTRIES (Cont.)	Number of Blind.	Ratio to Population.
Norway	2,759	1 in 540	France	38,413	1 in 938
Sweden	2,566	" 1,419	Savoy	614	" 884
Denmark	1,710	" 1,523	Piedmont	5,683	" 887
Prussia	10,205	" 1,738	Belgium	3,675	" 1,233
Saxony	1,606	" 1,386	Holland	1,990	" 1,663
Hanover	1,196	" 1,579	United States of America	12,635	" 2,470
Wurtemberg	1,198	" 1,436	Newfoundland	86	" 1,426
Hesse Darmstadt	696	" 1,231	Nova Scotia	185	" 1,788
Oldenburg	167	" 1,720	Prince Edward's Island	43	" 1,880
Bavaria	2,362	" 1,986			

that climate has here had little or no direct influence. But it must be borne in mind that in the United States, and in several of our own colonies, where the people are largely recruited by the immigration of young and healthy persons, the blind will naturally be in a low ratio to the rest of the population. Persons labouring under deprivation of sight, like the sick, the maimed, and the decrepit, rarely emigrate; and, apart from this circumstance, the comparatively small proportion of aged persons in the population of these countries will sufficiently account for the inconsiderable numbers of the blind.

Distribution of
the blind in
England.

With regard to the distribution of the blind in different parts of England, the recent returns lead to the same conclusion as those of 1851, namely, that this affliction is more common in the rural districts than in those chiefly devoted to manufacturing, mining, and commercial industry. For example, in the south-western counties, comprising Wilts, Dorset, Devon and Cornwall, the average proportion is 1 blind in 793 inhabitants; in the eastern counties (Essex, Suffolk, and Norfolk) it is 1 in 902, and in North Wales 1 in 880; these parts of the country being for the most part agricultural and pastoral. On the other hand in the north-western counties (Cheshire and Lancashire) the ratio falls to 1 in 1253; in York, West Riding, it is 1 in 1296; in Durham 1 in 1252; and in Bedfordshire, where young persons are largely employed in the straw-plait manufacture, 1 in 1325. But to whatever causes the high ratios in the agricultural counties are due, it is certain that the crowded dwellings and defective sanitary arrangements of large towns, combined with the occupations usually carried on amongst dense masses of people, are extremely conducive to diseases resulting in loss of sight. The lower proportions observed in the manufacturing and mining districts must therefore be mainly ascribed to immigration, and the comparative youthfulness of the population in those localities. Loss of sight being greatly influenced by age, part of the excess of blind persons in the rural districts is owing to the fact that they contain a larger proportionate number of persons in advanced life than the towns and manufacturing districts; while the immigrants into the latter are chiefly young persons who labour under no physical disability to interfere with their employment in the factories, in domestic service, or in trade as apprentices and work-people.

Blindness in
the principal
towns.

Hence we find that in the principal cities and towns the ratios of the blind are below the average for England, although institutions or charities for the benefit of this class are in operation in many of them. In London where the number (2638) is augmented by the presence of blind children and adults from the provinces who are receiving benefit from charities administered in the metropolis, the proportion is 1 in 1063 inhabitants; in Liverpool it is 1 in 1111, and in Manchester 1 in 1320. The Table at foot exhibits the ratios in the districts representing these and other large English towns.*

Distribution
influenced by
the age of the
people.

In most of the agricultural counties the proportional number of the people above 60 years of age is high, being seldom less than 9 or 10 per cent.; while in Lancashire scarcely more than 5 per cent. are found to have attained that age; in York West Riding, Cheshire, Durham, and Staffordshire, about 6 per cent. On comparing the numbers of the blind at ages above 60 with the population at the same ages, the differences apparent

* TABLE XI.—NUMBER and PROPORTION of BLIND in DISTRICTS representing the under-mentioned TOWNS.

on a comparison between the blind and the people *at all ages* become less striking.* But while the influence of the age of the people on the distribution of blindness is sufficiently obvious, other influences which have not yet been fully investigated are undoubtedly at work in particular localities.

Of the 19,352 blind persons enumerated in England and Wales, 10,249 were males, and 9,103 females, being in the ratio of 113 males to 100 females. In 1851 the ratio was nearly the same. In Scotland the female blind are rather in excess of the other sex (102 females to 100 males), a result partly owing to the preponderance of the female population, particularly at advanced ages, in that country. In Ireland the inequality of the sexes amongst the blind is still greater, the proportion being 118 females to 100 males; and here there is a large numerical excess of females. But on comparing the blind of each sex with the enumerated population *of each sex*, we obtain the following results:—

TABLE XII.

	BLIND to 100,000 Persons enumerated of each Sex.	
	Males.	Females.
In England and Wales - - - -	105	88
Scotland - - - - -	96	88
Ireland - - - - -	111	126

The proportion of the blind in every 10,000 of the population of each sex is shown for the Divisions and Counties in Table 137 of the Appendix (p. 167). In nearly all the English counties the proportion of blind males is greater than that of females; the exceptions are Bedford, Dorset, and Rutland.

As the occupations followed by men are likely to produce accidents and diseases resulting in loss of sight to a greater extent than those of women, it is natural to expect that blindness amongst males would be more common than amongst females; where such is not the case, as in Ireland, the explanation must be sought in circumstances connected with the relative numbers of the sexes living at advanced ages, or in other conditions peculiar to the country.

The influence of age on the distribution of the blind has already been adverted to; we proceed to notice the principal facts shown by the Tables on this important head of the inquiry.† It appears that 2,702—about one-seventh of the whole number of the blind in England—are under 20 years of age; viz. :—

† See Vol. II., Summary Table XXXIII., p. xciv, and the Tables showing the Ages of the Blind in the Registration Counties of each division.

In the early years of life the number is small, only 529, including both sexes, being under 5 years of age. Between the ages of 5 and 20 there are 2,173 boys and girls, who are mostly within the limits assigned for the admission of pupils into schools for the special instruction of the blind.

At the ages between 20 and 60 there are 7,852 persons, or about 40 per cent. of the whole number; while 8,798 persons, or 45 per cent., are at the advanced ages above 60, and their blindness must in many instances be regarded as the result of natural infirmity attendant upon old age. The following are the numbers of each sex at the ages above 60:—

TABLE XV.

	Total above 60.	60—	65—	70—	75—	80—	85—	90—	95—	100 & upwards.
Males - -	4,125	817	794	903	771	519	251	54	14	2
Females - -	4,673	754	847	938	928	728	336	115	23	4

It is a significant fact, that of the persons in England who had attained ages from 80 and upwards, 1 in every 56 men, and 1 in every 55 women, was found at the Census to be destitute of sight.*

Previous or
present occu-
pations of the
blind.

The information given in the Householders' Schedules with respect to the *occupations* of the blind affords no correct indication of their condition and resources, nor is it sufficiently precise to admit of a rigid distinction between the employments carried on in a state of blindness and those followed previous to the loss of sight by persons in adult life. In some instances blind persons are engaged as employers in pursuits apparently incompatible with loss of vision; but, except in the case of employments commonly taught in the institutions,—such as basket-making, brush-making, sack, mat, and net making,—the occupations specified in the returns are usually those in which the persons were engaged before their deprivation.

The previous or present occupations of the blind have been classified in Tables for each sex, according to the arrangement adopted for the general population.† In the “professional class” are returned 43 clergymen and ministers, 17 physicians and surgeons, 11 barristers and solicitors, 79 schoolmasters, schoolmistresses, and teachers, and no less than 609 musicians and teachers of music. Besides 16 army officers, there are 164 Chelsea pensioners, soldiers, and militia-men; of naval officers there are 16, of Greenwich pensioners 58, and of seamen 106. Amongst the other occupations of males in which considerable numbers are or were engaged are the following,—agricultural labourers 754, labourers, not otherwise described, 349, farmers 341, coal and other miners 253, engaged in the iron manufacture, blacksmiths, and other workers in iron 167, shoe-makers 164, carpenters 109, bricklayers and masons 94, tailors 80, stone and limestone quarriers, &c. 59. In the trades which the blind practise with success are 571 basket makers, 178 mat, rope, sack, and net makers, and 51 brush and broom makers. With respect to the females, the largest items are domestic servants 305, dressmakers, seamstresses, and staymakers 111, knitters 94, washerwomen 123, basket makers 68, charwomen 56, brush and broom makers 27. The great textile manufactures appear to have furnished only a moderate contingent; viz., the cotton manufacture 112, including both sexes, woollen cloth manufacture 61, silk and ribbon 61, in all 234 persons distinctly returned as having been engaged in these branches of industry. With respect to 7,220 no information is given as to their occupations or means of support; 1,091 are described as dependent on parochial relief or assistance from charitable sources, besides 1,805 children and others living with their relatives.‡ It is to be feared that the bulk of the blind, even including those who are referred to distinct occupations, are unable to support themselves; nevertheless, the returns include a small proportion of persons belonging to the upper and richer classes. We find 140 described as land proprietors, 145 as house proprietors, 156 as of independent means, and 30 as merchants and capitalists, in addition to those of the learned professions already referred to.

Occupations of
the born
blind.

Amongst the occupations of those described as “blind from birth” are the following: musicians and teachers of music 134, basket-makers 111, mat, rope, and net makers 29, agricultural and other labourers 15, brush-makers 6, knitters (females) 18, newspaper vendors 2, and town criers 4. With respect to 512 adults born blind no information is given on this head.§

* Aged 80 and upwards,—male population 47,260, of whom were blind 840; female population 65,990, of whom were blind 1,206.

† See Vol. II., Summary Table XLI., p. c.

‡ According to a Return, ordered by the House of Commons to be printed in 1861, of the adult paupers who had been inmates of workhouses during a continuous period of five years and upwards, blindness was assigned in 428 instances, and “bad sight” in 166 instances as the reason why the pauper in each case was unable to maintain himself or herself. Many others were returned as “aged, nearly blind.”—Parl. Ret., No. 490, Session 1861.

§ See Vol. II., Summary Table XLII., p. ci.

Sufficient experience has now been acquired with regard to the employments best suited to the blind, and the truth is recognized that their welfare is more likely to be promoted by affording them the means of learning and supporting themselves by such employments, than by training them to pursuits in which they cannot hope to compete with the sighted. Even the study of music, in which the blind take great delight, is said to be of doubtful advantage to them, for although some of the musical pupils, on leaving the schools, obtain situations as village organists, a large number fail in this object; while it is asserted that devotion to music almost always precludes success in any industrial work.*

The mode of procedure adopted in taking the English Census precluded the enumerators from pausing in the performance of their appointed task for the purpose of making special inquiries, which would be of great interest if they could be efficiently carried out, in reference to the blind; such as the causes of their infirmity and the period of life at which it commenced, their circumstances with regard to instruction, and their means of support. An attempt was made, for the first time, upon this occasion, to ascertain the extent of congenital blindness, by means of an instruction in the Householder's Schedule, to the effect that persons *blind from birth* were to be so described; but whether the information thus obtained may be regarded as tolerably complete and satisfactory we are not prepared to say. It appears that the term "born blind" is often applied to children losing their sight in the early years of life as well as to those actually blind from birth; and no doubt the difference is slight between those who never beheld the light and those who lost the faculty of vision before they had used it long enough to acquire permanent impressions.† To what extent the vague employment of this term, thus sanctioned by popular usage and similarity of condition, has affected the value of the statistics of the born blind, we are unable to state; but it is not improbable that while some of the persons making the returns would use the words in a popular sense others would restrict them to their literal meaning, and that imperfect information would be the result.

Congenital blindness.

Vague use of the term "born blind."

However this may be, we find that 1,846 persons, namely, 1,005 males and 841 females, were returned as blind from birth, being 1 in 10·5 of the whole number afflicted with blindness. The highest ratios of the born blind are observed in the counties of Bedford, Herts, Norfolk, Leicester, Lincoln, Chester, York, and Durham, which furnish an average of about 1 in 8. In Monmouthshire and Wales, on the other hand, the average ratio is only 1 in 17·5; in Surrey (extra-metropolitan), 1 in 19: Westmoreland and Rutland had only one each, and in several of the counties the numbers were remarkably small. The average proportion in London was 1 in 11, in the south-western counties, the part of England in which blindness most prevails, 1 in 10, and in the north-western counties (Cheshire and Lancashire) 1 in 9. In Herefordshire, where there is one blind person to every 693 inhabitants, the ratio of the born blind to the total is 1 in 12·8.‡

Number returned as born blind.

* In the Report of the School for the Indigent Blind in St. George's Fields, London, for 1862, we read: "Few of those who study music learn much in the school-room or workshop, and great difficulty exists in procuring situations for blind organists. * * * * * The pupil who becomes a good musician, and is able at once to command employment, may do well; but if from lack of talent or other causes he is unable to find employment as a musician, or to gain his living at a trade, he will probably become a burden to his friends."

† The late Dr. T. Bull, who was himself deprived of sight during the last eight years of his life, wrote as follows: "Those truly born blind are very few in number. Not one case came under my notice during a professional life of more than 25 years in London, although physician for the greater part of that period to a lying-in institution, averaging more than 1,000 cases annually; nor do I remember a single one to have occurred in the practice of a large circle of medical friends."—*The Sense Denied and Lost*, by T. Bull, M.D., p. 7.

‡ See Appendix, Table 135, p. 165. The following are the ratios of the blind and the born blind to the total population in the eleven divisions of England, arranged according to the prevalence of blindness:—

The experience of the Liverpool School for the Blind, the oldest in Great Britain, furnishes a ratio of 1 in 10 born blind; but the observations have been confined to young persons.

Blindness
resulting from
diseases.

Small-pox has undoubtedly been one of the most prolific causes of blindness in England. Of 1,456 pupils received into the Liverpool School from 1791 to 1860, no less than 250, or more than one-sixth, are said to have been blinded by small-pox; and of the pupils admitted to the London asylum a large proportion had been deprived of sight by the same disease. Purulent ophthalmia, with which the new-born infant is frequently attacked a few days after birth, is a disease quickly destructive of sight unless arrested by careful treatment. Many other forms of disease result in this calamity; but happily the great advances made in the knowledge of the anatomy of the eye have enabled surgeons to treat successfully many of the structural causes of blindness, and to restore sight in cases which, not many years ago, would have been considered hopeless. If all diseases of the eye cannot be traced to their origin, there can be no doubt that the bulk of them, when not attributable to advanced age, are induced by the unhealthiness of dwellings, the want of cleanliness, bad or insufficient food, and other well-known causes of physical deterioration, as well as by every description of overwork involving a considerable strain on the organs of vision, whether that of the student, the needlewoman, or the mechanic. To these undoubted causes of blindness must be added the various accidents to which all classes, and the labouring classes in particular, are constantly exposed.

Special inquiry
respecting the
blind in Here-
fordshire.

We have already noticed the practical difficulties which stand in the way of employing the enumerators to collect special information with regard to the persons returned as blind or deaf and dumb. In Ireland these difficulties do not exist, the Census Commissioners being enabled through the Constabulary and police force to institute a secondary inquiry into the circumstances connected with each case noted by the enumerators; and in 1851 the mass of information thus collected afforded the most complete account of these classes which has been yet obtained in any country. We have endeavoured, however, to supplement the Census inquiry with some additional particulars in reference to one county—Hereford—where, as shown by the returns both of 1851 and 1861, the blind and the deaf and dumb are more numerous in proportion to the whole population than in any other part of England. In Herefordshire the ratio of the blind is 1 in 693 inhabitants, the average for England and Wales being 1 in 1,037. Of 10,000 of each sex in Herefordshire 15·6 males and 13·3 females are blind, the corresponding ratios for England and Wales being 10·5 and 8·8 respectively. Of deaf mutes the ratio in Herefordshire is 1 in 998 against 1 in 1,640 for all England.*

Physical
character of
the county of
Hereford.

Hereford is an inland county, almost exclusively devoted to agriculture, and celebrated for its breed of cattle, its cider, and its wool. The surface of the county is beautifully diversified by magnificent woods, and the soil is represented as fertile, with rich alluvial lands on the banks of the Wye and other rivers. On the east it is separated from Gloucestershire by the Malvern Hills, and on the south-west from Wales by the Black Mountains. The population has increased from 88,436 in 1801 to 123,712 in 1861, being at the rate of 40 per cent. in 60 years; in the last ten years the increase was 8,223 persons, or 7 per cent. About one fourth of the population inhabit the towns.

Mode of ob-
taining the
information.

To the officiating clergyman of every Herefordshire parish in which any blind or deaf and dumb person was living at the time of the Census a circular letter was addressed, accompanied by forms to be filled up with the results of inquiries respecting the individuals, where the particulars could be ascertained without inconvenience; and our acknowledgments are specially due to the clergy for their trouble in obtaining, in a large number of instances, and chiefly by personal inquiry, the information sought for. In several cases, however, no particulars could be furnished, in consequence of the persons referred to having either died since the Census or removed from the neighbourhood. The inquiries with respect to the blind were restricted to the following points:—whether the person was blind from birth, or if not, to what accident or disease the infirmity was attributed; whether any other members of the family were similarly affected; whether he had received instruction in any institution, or assistance from any charity; and lastly to what extent he was able to support himself by any trade or occupation. Out of 154 cases of blindness returned at the Census, these inquiries were answered with respect to 131.

As regards the origin of the blindness, we learn that in 10 of these 131 cases the persons (7 males and 3 females) were born blind; at the Census the total number of this class returned for the county was 12, or about 1 in 13 of the total blind. In 25 other cases the loss of sight is attributed to “inflammation” or “cold,” probably ophthalmia of the common form; 2 cases are ascribed to scrofula, 6 to cataract, 2 to amaurosis, and 40 to other forms of disease, (in one case only is small-pox assigned as the cause,) 18 to old age, 1 to lightning, and 24, or more than one seventh of the whole, to accidents of

* The difference in the ratios is still greater when Herefordshire is compared with Staffordshire and Warwickshire, in the same group of counties (West Midland division):—

			One in				One in
Blind, to population in	Herefordshire	-	693	Deaf-and-Dumb, to population in	Herefordshire	-	998
"	Staffordshire	-	1,099	"	Staffordshire	-	1,832
"	Warwickshire	-	1,194	"	Warwickshire	-	1,840

various kinds, mostly connected with rural pursuits.* In one instance the blindness is attributed to neglect of ablutions, combined with the effects of wood smoke in a badly ventilated cottage, wood being the fuel commonly used by the poor.

The period of life at which blindness occurs has a most important influence over the future history of the individual. Those who are born blind, or who become so before they have learnt to observe, are dependent for knowledge on the remaining senses, which usually attain an increased development; and the same may be said of those who are deprived of sight in youth, to whom, however, the acquisitions of the few years of vision they have enjoyed will prove of great value. But to those who experience this calamity in adult life the remaining senses will afford little additional aid, and the powers of the mind and body, if not already on the wane, are often severely shattered by the blow. In 40 out of 109 specified instances in Herefordshire the blindness occurred at different ages under 20, in 43 instances at ages between 20 and 65, and in 26 at the advanced ages over 65. Of the adult blind only a part, therefore, were destitute of sight in infancy or youth.

Influence of age at which blindness occurs.

In answer to the inquiry as to whether any other members of the family of the individual were similarly affected, we learnt that of the 7 males born blind two were brothers; amongst the non-congenital cases, in one instance the father was blind; in another, a brother and the mother; in two instances the grandfather (in one of these an uncle and an aunt also); in two instances a brother, and in three a sister. The father of one person had lost the sight of an eye, while one uncle was born blind, and another had become so. In several instances other members of the same family were said to be partially blind. From these statements it may be inferred that blindness, like deaf-dumbness, has a tendency to manifest itself in families; and the causes which influence both these defects are no doubt in some degree similar.

Blindness in families.

Only 12 of the blind in Herefordshire were stated to have received any instruction in special institutions; namely, 5 in the London School in Southwark, and the others in the asylums at Liverpool, Bath, Bristol (3), Exeter, and Avenue-road, London. It is an encouraging fact that nearly all these persons were able to support themselves by following the industrial or other occupations acquired at school, besides having had also the advantage of some mental culture.

Number of the blind instructed.

The returns show, however, that the proportion of the blind who can wholly or even partially support themselves in any trade or calling is very small, and that the majority of those who are not in good circumstances, or whose friends do not maintain them, are forced to take refuge in the workhouse, or to obtain out-door relief from the parish.† The

Means of support.

* Amongst the accidents mentioned are the following: "blindness produced by an acrid weed blowing into his eye while attending a thrashing machine;" "from a grain of corn flying into his eye, the other eye having failed from sympathy;" "from a thorn having entered his eye while hedging;" "from the lashing of his eyes by the bough of a tree whilst at his business as a game-keeper;" "from a blow in the eye whilst breaking stones;" "one eye lost in boyhood during play, the other at the age of 45 in consequence of a cold after washing sheep."

† TABLE XVII.—Showing the MEANS of SUPPORT of 129 BLIND PERSONS in HEREFORDSHIRE, as stated in the Returns furnished by the Clergy.

(a) One organist earns 6s. or 8s. a week, and the other £10 a year.

information given as to the means of support in the case of 129 blind persons shows that while 21 were wholly or partially able to maintain themselves, no less than 70, of whom 63 were adults, were dependent on parochial relief; but as two thirds of these were upwards of 60 years of age, it is probable that some of them would have been recipients of this relief owing to advanced age and infirmity, independently of loss of vision. Seven persons were in receipt of small annuities from the Rev. W. Hetherington's charity for the blind, and two persons had been enabled by their training as musicians to obtain engagements as village organists.

Institutions
and charities
for the blind.

Blindness being one of the greatest misfortunes with which humanity can be afflicted, it is not surprising that in this country the active sympathy and assistance of the benevolent should have been largely extended to the sufferers from this infirmity; still it appears doubtful whether the efforts which have yet been made to diminish the ignorance and improve the general condition of the class have been commensurate with the necessities of the case. The institutions established for their benefit in different parts of the country have undoubtedly accomplished much good in instructing the young, and in teaching them useful trades whereby they may be enabled wholly or partially to earn their own livelihood; but a large number of the blind amongst the humbler classes are a burden on the parish or their friends, or wander about in hopeless mendicancy, often for want of the opportunity of learning a simple trade. Everything that has yet been done has been the unaided work of private charity. Philanthropic persons, impressed with the helpless condition of the ignorant and neglected blind, have often urged that it is the duty of the State to throw around these unfortunate persons its special protection, and to secure for them the blessings of education, combined with such industrial training as may assist them in supporting themselves. But this view has been opposed on the ground that State assistance would tend to check the flow of private benevolence, and that cripples, orphans, and other suffering members of the community would be equally entitled to similar aid. In most of the European countries, however, as well as in the United States of America, it has been regarded as a duty of the Government to make suitable provision for the instruction of the blind and the deaf and dumb.*

25 & 26 Vict.
c. 43., which
empowers
Guardians
of the poor to
send children
to special
schools.

Under the provisions of a recent Act of Parliament the Guardians of any parish or union are authorized to send poor children to any school or institution certified by the Poor Law Board as fitted for the reception of such children, and to pay out of the funds in their possession the expenses incurred in the maintenance, clothing, and education of each child during the time such child shall remain at the school (not exceeding the total sum which would have been charged for the maintenance of the child at the workhouse), such expenses to be charged to the same fund and in the same manner as the relief otherwise supplied to the child would be charged. It is manifestly the duty of the Guardians to avail themselves of this provision of the law by placing such poor children as are blind or deaf-and-dumb in the special schools, where they can be instructed in a manner suited to their condition, and in a great measure qualified to support themselves, instead of being a burden upon the ratepayers during the rest of their lives. To be fitted to become useful members of the community is a part of the relief to which these children are entitled. But while facilities are thus given to Guardians of the poor to provide education and maintenance for *pauper* children in schools and institutions, there is no adequate provision for the instruction of the children of those who, like agricultural labourers and others in receipt of low wages, are not reduced to the condition of pauperism, although unable to bear the expense of sending a child to an institution.

Without expressing an opinion on the question of the expediency of subsidizing these institutions from the national exchequer, we may remark, that no trustworthy information regarding the number and condition of the classes under consideration existed previous to 1851, and as the usual practice in this country is to make full inquiry in the first instance, in order to ascertain whether any necessity for interference exists, it can scarcely be a matter of surprise that no action of the kind suggested has yet been taken by the Government.

Different
classes of
charities for
the blind.

The efforts of the benevolent to promote the well-being of the blind in England have led to the establishment of several classes of charities; namely, (1) the schools and educational institutions designed to afford them mental culture and the means of learning a trade; (2) the institutions, which are in fact manufacturing establishments, affording regular employment to blind workers, most of whom reside at their homes; (3), societies for visiting the poor blind, for supplying them with home teachers, and for printing and distributing books in embossed type; and (4) relief funds and charities

* The support of 22 institutions for the deaf and dumb in the United States, with 2,000 pupils, costs not far from 350,000 dollars (£70,000) annually, of which as much as 300,000 dollars are appropriated by the legislatures of 29 States, and provision for the instruction of the deaf and dumb, in some cases restricted to the indigent, in others made free to all, is made by law in all the States, except in a few sparsely settled ones. Legislative assistance is also largely given to the institutions for the blind. See Mr. Kennedy's *Preliminary Report on the 8th Census of the United States*.

for granting small annuities to the aged amongst them. Thus some provision is made to meet their peculiar necessities at each period of life,—to furnish the young with instruction, to provide able-bodied adults with employment, and to afford the aged and infirm, who are past work, some means of support.

The first institution for the instruction of the blind in Great Britain was established at Liverpool in the year 1791; it was followed by the asylums at Edinburgh and Bristol; and in 1799 was founded the school in London (St. George's Fields), now the largest in the country. During the last thirty years other institutions have been established in several of the principal towns in England.

Educational
institutions
for the blind.

The circumstances appertaining to the principal institutions for the instruction of the blind, at present in operation in England, will be found in the details of the subjoined Table. The requisites for admission into these establishments are, that the applicant shall be within certain limits of age, that he or she shall be totally blind—or have no greater degree of sight than to distinguish light from darkness—and of good health and sound intellect; a respectable householder must engage to receive the pupil on leaving the school. But even when the candidates are in every respect eligible they are rarely admitted except by a majority of the votes of the subscribers at an annual or half-yearly election. For the convenience of comparison with the Tables showing the distribution of the blind, the institutions are arranged according to the statistical divisions. We learn that of the 19,352 blind in England and Wales, the inmates of these institutions at all ages,—in some instances they remain several years after the age of 20,—were at the time of the Census only 760. There were in addition a few day-pupils and outmates; but as the enumerated blind between 5 and 20 years of age alone amounted to 2,173, the sufficiency of the existing provision for the education of the afflicted class now under consideration may well be questioned. The distribution of the schools is also defective; for example, in the county of York, with upwards of two millions of population, and 324 blind under 20 years of age, there is but one such institution with 65 inmates*; in the South-Midland and Welsh Divisions, containing an aggregate population of 2,600,000, with 2,630 blind (of whom 257 were under 20 years), there are no institutions whatever. The accommodation is very little in excess of the numbers already admitted; and if Boards of Guardians were to exercise more freely the powers conferred upon them by law with regard to sending children to these schools for instruction, it is doubtful whether there would be room. This circumstance, and the restrictive rules of admission to the existing institutions, may justly be urged as an argument for the establishment of a school specially devoted to the instruction of the pauper blind.

The second class of institutions for the blind comprises the manufacturing establishments intended to provide permanent employment for adults who usually reside at their own homes. This laudable object appears to be successfully accomplished by the Association for Promoting the General Welfare of the Blind, Euston Road, London, which employs in its manufactory, or benefits in other ways, about 170 persons, and 230 more are employed by affiliated societies in Bradford, Liverpool, Sheffield, and a few other towns. Work-shops are provided for adult workers (outmates) at some of the schools for the blind.

Industrial esta-
blishments.

The next class of charities addresses itself to the task of improving the intellectual, moral, and social condition of the blind. To this end various agencies, for the most part sufficiently indicated by the names of the societies, are employed; amongst these societies are—the Association for Supplying Home Teachers for the Blind; the Society for Printing and Distributing Books for the Blind; the Indigent Blind Visiting Society; and the Milton Society for Improving the Social Condition of the Blind. A fourth class includes the different funds and charities from which small annuities are granted, chiefly to the aged blind who have not been the recipients of parochial relief. Several of these funds owe their origin to the bequests of wealthy persons who were themselves sufferers from deprivation of sight; the Blind Man's Friend or Day's Charity founded by the late Mr. Day (of the firm of Day and Martin), who bequeathed 100,000*l.* to this benevolent object, and the Rev. W. Hetherington's Charity, which is administered by the Governors of Christ's Hospital, are examples. The latter charity, founded in 1774, now appropriates annuities of 10*l.* each to 600 blind persons over 61 years of age. The Painter-Stainers' Company's Charity grants pensions to 217 aged blind persons; the Cordwainers' Company's Charity distributes 5*l.* annually to 105 blind persons; and others of the City companies also grant small annuities for the relief of the same class. It would be too much to expect that these various charities, notwithstanding every care on the part of those who administer them, should not be occasionally abused; but at least

Other charities
for the blind.

* The North of England Manufactory for the Blind, at Sheffield, employs 29 workers, whose earnings average about 7*s.* per week, but it is not an educational institution.

TABLE XVIII.—Showing the LOCALITY, DATE of FOUNDATION, and AMOUNT of ACCOMMODATION, &c.
(From Returns furnished by the

Division.	Name of Institution.	Locality.	When instituted or opened.	Means of its Support.	Sexes admitted.	Accommodation for resident Pupils.		
						TOTAL.	Males.	Females.
I. LONDON	School for the Indigent Blind	St. George's Fields, Southwark, London.	1799	Donations and subscriptions, legacies, &c.	Both	160	80	80
	The London Society for teaching the Blind to read, and for training them in Industrial Occupations.	Upper Avenue Road, Regent's Park.	1838	Voluntary contributions and partial payments by those resident pupils who are not free pupils by election.	Both	57	26	31
II. SOUTH-EASTERN	Brighton Asylum for the Instruction of the Blind.	Eastern Road, Brighton	Instituted, Oct. 1841. New Asylum opened Oct. 1861.	Payments of 9 <i>l.</i> per annum for each child from 8 to 12 years of age. After that age 10 <i>l.</i> and upwards, according to circumstances, and by voluntary contributions.	Both	60	30	30
IV. EASTERN	Norwich Institution for the Indigent Blind.	Magdalen St. Norwich	1805	Voluntary contributions	Both	Pupils, 38 Aged persons, 12.	19 6	19 6
V. SOUTH-WESTERN	West of England Institution for the Instruction and Employment of the Blind.	Exeter	1838	Voluntary contributions, and a small payment for boarders, only 8 <i>s.</i> per week.	Both	50 Out-pupils, 10.	30 10	20 -
	Institution for the Blind and Deaf-and-Dumb (<i>d</i>).	Walcot Parade, Bath	1843	Voluntary contributions, and payments of pupils.	Both	Blind } 18 pupils }	8	10
VI. WEST-MIDLAND	Bristol Asylum or School of Industry for the Blind.	Bristol	1793 Incorporated 1832.	Interest of funded property, voluntary subscriptions, donations, and 3 <i>s.</i> per week from each pupil.	Both	60	35	25
	General Institution for the Blind.	Edgbaston, Birmingham.	1847; removed to present building in 1852.	Subscriptions, donations, legacies, interest from a small investment, and pupils fees. The pupils are charged 1 <i>l.</i> 16 <i>s.</i> per quarter in advance in almost all cases.	Both	(<i>e</i>) 64	40	24
VII. NORTH-MIDLAND	Midland Institution for the Blind.	Nottingham	1844; the present institution in 1855.	Charitable contributions, &c.	Both	47	25	22
VIII. NORTH-WESTERN.	School for the Indigent Blind	Liverpool	1791, and incorporated in 1829.	Annual subscription, donations, and legacies (each pupil paying 3 <i>s.</i> per week for board, &c.)	Both	90	52	38
	Catholic Blind Asylum	Liverpool	1841	Voluntary charity	Both	80	60	20
	Henshaw's Blind Asylum (<i>h</i>)	Manchester	Opened 1838, and new workshops for outmates in March 1861.	Interest arising from endowment of the founder (Thos. Henshaw, Esq.), and annual subscriptions and donations.	Both	81	48	33
IX. YORKSHIRE	Yorkshire School for the Blind	York	Opened 1835	Voluntary subscriptions	Both	70	44	26
X. NORTHERN	Royal Victoria Asylum for the Industrious Blind of the Northern Counties.	Newcastle-on-Tyne	In June 1838	Voluntary contributions, and an annual payment of £10 10 <i>s.</i> on behalf of each pupil.	Both	38	18	20

* The number of pupils or inmates as here stated having been derived from information furnished by the Principals or Secretaries of the various institutions does not include (a) Since the date of the Census a work-room has been erected capable of receiving 50 blind adults not inmates of the school. The value of goods manufactured is upwards of 1,200*l.* yearly.

(b) Exclusive of day-scholars, but including pupils who slept at the master's house, an arrangement since discontinued.

(c) The Number of inmates in March 1863 was 40.

(d) The particulars here given refer to the blind pupils only.

(e) Accommodation for 64 as regards dormitories, but in other respects for 80.

the PRINCIPAL INSTITUTIONS for the INSTRUCTION of the BLIND in ENGLAND and WALES.

			Total inmates: Pupils - 748 Aged - 12	416	332			

* Cases agree with the number returned in the Census Schedules, as shown in the Tables relating to Public Institutions in Vol. I.—Numbers and Distribution of the People.

(a) All pupils capable of learning are taught reading, writing, and arithmetic, and a portion of them learn grammar, geography, history, &c.

(f) A shop has been added to the building, with good results; the sales in 1862 amounted to 2984.

(g) An endowment of 20,000*l.* was left in 1810 by Mr. Henshaw of Oldham, and the sum of 10,000*l.* was subscribed by the inhabitants of Manchester for the purchase of and erection of a suitable building.

(h) Exclusive of two out-mates, married men, who having learnt their trades are receiving weekly wages for their work.

it cannot be said of them, as of some charities, that they tend to create the objects of their bounty.

Education of
the blind.

From the reports of the schools for the blind we gather that the intellectual culture is of a sound and practical character. There is no attempt to give them an education of a high order, as in some of the schools in the United States, where, besides reading, writing, geography, arithmetic, music, and so on, the pupils are instructed in algebra, natural and intellectual philosophy, rhetoric, and mathematics. Such a course of instruction would be of great advantage to those who were in after life to be employed as teachers; but as manual work must be the chief resort of the blind, the object to be aimed at is to obtain for them educational facilities not inferior to those enjoyed by sighted children of the same rank in life. The blind should be enabled to keep pace with the spirit of the age, which demands an advance of knowledge in all; and as they are shut out from the general system of public instruction to which the nation contributes so largely, the need of concerted efforts on the part of those who desire to promote their advancement is everywhere admitted. Unfortunately, however, there is a great diversity of opinion on subjects connected with the instruction of the blind. The partial advocates of the various systems of embossed printing (in raised type) by which the blind are taught to read, have been carried along by a party spirit which has resulted in great confusion and waste of the pecuniary resources of the charities. Several different systems are in use in England, and it seems almost incredible that after all the experience acquired in the institutions, even first principles have not yet been settled; whether, for instance, full spelling in letters familiar to the sighted or in arbitrary characters is preferable to an abbreviated method of spelling with or without arbitrary forms. At present books printed in embossed type are very costly, whichever system be followed*; and it is obvious that the only means by which an extension of the literature of the blind can be effected, so as to render the books accessible to all classes, will be by the adoption of one national, and, if practicable, international system, based on sound scientific principles, and suited to the wants of the great majority of the blind.†

Persons blind
and deaf-and-
dumb.

Instances in which persons are in the melancholy condition of being deaf-and-dumb as well as blind are unhappily more common than might have been supposed. In advanced age, deaf-mutes, like others, are liable to loss of vision, while the blind, and especially the born blind, may also be deaf-and-dumb,—indeed the latter are in a measure predisposed to the organic defects which result in mutism; for it is an established fact, that congenital blindness and deafness proceed from a common cause, and the virus which destroys the organs of one sense sometimes extends its work of destruction to a second. The table at foot furnishes some particulars concerning 30 persons, 17 males and 13 females, described as blind and deaf-and-dumb or dumb.‡ In 9 of these cases the blindness was congenital,

* It is stated that the price of the New Testament printed by Moon's system is 4*l.* 2*s.* 6*d.*, by Frère's system (phonetic), 2*l.* 10*s.*; by the systems of Lucas, Gall, and Alston, about 2*l.*; and by Howe's system, adopted in America in 1836, 16*s.* The first three mentioned employ arbitrary characters, the others either Roman numerals or common letters.

† One of the most earnest advocates of measures for the intellectual improvement and moral elevation of the blind, Mr. John Bird, M.R.C.S., himself afflicted with blindness, observes on this subject:—"The permanent form of relief type for the blind will not be invented till the earnest and inquiring educated blind of matured years shall be consulted, and their opinions, reasons, and objections shall be delivered and submitted to the judgment of a competent body of educated and disinterested philanthropists." *Contributions to Social Pathology, London 1862. 2d Ed., p. 21.*

‡ TABLE XIX.—SEX and AGE of 30 PERSONS who were described as BLIND and DEAF-AND-DUMB (or DUMB) also.

Stafford .	F.	19	Pauper . . .	Blind from birth, deaf-and-dumb.					

17 males, 13 females; total 30.

Note.—Mr. Buxton, of Liverpool, has described a recent case in the Court of Probate where the will of a lady who was born deaf-and-dumb, and at the age of 60 became blind also, was established. The will was not made until her 70th year, but the evidence in proof of her mental capacity to dispose of her property was held to be conclusive, and probate was granted.

and probably the deafness also ; there were 8 boys and 4 girls under 15 ; 2 men and 3 women were upwards of 60, and the conditions attending old age were added to blindness, deafness, and dumbness. In 3 cases, the persons were idiots, and therefore not properly belonging to the class of deaf-mutes.

We cannot close our remarks on this afflicted section of the population without adverting to the happy results which have attended the establishment of infirmaries and hospitals specially devoted to diseases of the eye, not only in the relief of suffering, but in promoting the advancement of ophthalmic medicine and surgery. The institutions of this character in London have afforded relief to thousands of sufferers, including many who have been restored to sight by successful operations for the removal of cataract ; and in Dublin, St. Mark's Hospital has been largely instrumental in relieving sufferers from this class of disease. It is true that the general hospitals, both metropolitan and provincial, admit patients labouring under diseases and accidents of the eye, but the superior advantages of special hospitals cannot be questioned. Hundreds amongst the poor of the United Kingdom may be said to lose their sight annually by bad surgery, or the want of good treatment such as those who have made ophthalmic diseases a specialty can supply.

Usefulness
of special
hospitals for
eye diseases.

2. *The Deaf-and-Dumb.*

The mode of obtaining at the Census an account of the number of deaf-mutes is precisely similar to that already noticed in reference to the blind : the words "deaf-and-dumb" were to be written against the name of any member of the family to whom such a description was applicable. Although in the schedules the word "dumb" was entered against the names of some who should have been described as deaf-and-dumb, it cannot be doubted in a few cases the persons returned as dumb were not destitute of hearing ; and in some instances idiots were erroneously returned as deaf-mutes. It would be impossible, however, without an extensive inquiry, to ascertain accurately the number of persons who should be excluded on the ground of their not being, strictly speaking, deaf-mutes ; and as such persons were, for the sake of convenience, classed with the deaf-and-dumb in the returns of 1851, the same course has been pursued on the present occasion. In preparing at the Census Office the abstract of the results, every care has been taken to exclude persons against whose names the word "deaf" was entered from misconception of the instructions on the part of heads of families or enumerators who mistook *deaf-and-dumb* for *deaf* or *dumb* ; a few young children, however, described as "deaf from birth," were excepted. It is not probable that the aggregate return presents an over-statement of number of deaf-mutes in England, since, from the uncertainty which surrounds the existence of deafness in the first years of infancy, and the natural reluctance of the parent to enter the child as deaf-and-dumb while there remains a glimmer of hope that it will ultimately hear, the returns are necessarily defective as regards infants.

Method of ob-
taining the
information.

According to the Census returns, the number of the deaf-and-dumb (including under that term all who were described as dumb) in England and Wales, was 12,236—of whom 6,841 were males and 5,395 females—being in the ratio of 1 in 1,640 of the general population. In 1851 the number returned was 10,314 (5,640 males and 4,674 females), and the ratio to the population was 1 in 1,738.

Number of
deaf-and-dumb
in England ;

As the figures for 1861 show a numerical increase of 19 per cent.,—the inhabitants of the country having increased only 12 per cent. in the decade—as well as an increased ratio to the general population, we are almost driven to one of two conclusions : either that in 1851 the numbers were understated to a greater extent than was anticipated, or that the infirmity of deaf-dumbness is on the increase in England. We have no certain information to guide us in forming a correct opinion on the subject ; but as the inquiry in 1851 was the first of the kind instituted in this country, it is not improbable that the deaf-and-dumb were less carefully noted in the schedules than on the more recent occasion.

In Scotland the number of deaf-mutes returned in 1861 was 2,335, or 1 in every 1,311 of the inhabitants, a numerical increase of 8 per cent. on the return of 1851, which was 2,155 deaf-mutes, or 1 in 1,340. The northern counties of Scotland contain a larger proportional number of the deaf-and-dumb than any other part of Great Britain. The number of the deaf-and-dumb and dumb only in Ireland on 8 April 1861 was 5,653 (3,132 males and 2,521 females), or 1 in every 1,026 of the population. It will be observed that the ratios for Scotland and Ireland are both much higher than that for England.

in Scotland ;

in Ireland.

Distribution
of deaf-and-
dumb in
England.

The aggregate returns for the United Kingdom, with the Channel Islands and the Isle of Man, give a total of 20,311 mutes, being 1 in every 1,432 of the population.*

The distribution of the deaf-and-dumb in England points to the fact that special influences, at present imperfectly understood, are in operation in particular localities. In Herefordshire the ratio is 1 in every 998 persons, while in Kent, Hants, Huntingdon, Leicester, York North Riding, and Durham, the ratios are 1 in 2,000 and upwards. Of the eleven Divisions of England, the South-western (Wilts, Dorset, Devon, Cornwall, and Somerset), contains the greatest proportional number of deaf-mutes as well as of the blind, and the Northern the least. The following are the numbers and ratios in the Divisions, which are arranged according to the prevalence of mutism:—

Div.	Number of Deaf-and- Dumb.	Proportion to Population.	Div.	Number of Deaf-and- Dumb.	Proportion to Population.
		<i>One in</i>			<i>One in</i>
5. South-western	- 1,321	- 1,390	3. South-midland	- 789	- 1,642
6. West-midland	- 1,613	- 1,511	9. York	- 1,222	- 1,649
1. London	- 1,819	- 1,542	7. North-midland	- 748	- 1,723
4. Eastern	- 729	- 1,567	2. South-eastern	- 1,022	- 1,808
11. Welsh	- 814	- 1,613	8. North-western	- 1,582	- 1,856
<i>England and Wales</i>	<i>12,236</i>	<i>- 1,640</i>	10. Northern	- 577	- 1,995

The above results are in the main conformable to those of 1851. Then, as now, the South-western Division stood out conspicuously as having the largest proportion of the deaf-and-dumb, and Herefordshire (in the West Midland division) filled the same position amongst the counties. It has been suggested that, in rural districts little disturbed by the presence of immigrants, the extent of deaf-dumbness may be influenced by the fact that members of the same families frequently intermarry, producing results similar to those observed in agricultural stock, under a system of breeding in and in. No doubt the counties lying in the South-western extremity of this island are by their geographical position peopled in a larger proportion by natives than counties occupying a midland situation; still amongst their inhabitants are large numbers of persons from other parts, and these are in a higher ratio than in some other counties where this infirmity is less common. In Herefordshire the native-born population is in the ratio of 75 in 100, consequently one-fourth of the people were immigrants.

Congenital
mutism.

Very little success attended the attempt to ascertain at the Census the number of congenital cases of deaf-mutism, by means of an instruction in the householders' schedule to the effect that persons deaf-and-dumb "from birth" should be so described. In many instances the fact was duly noted, but it was evident that in many others the instruction had escaped notice, or the person filling up the return was unable to give the information. Even the schedules of more than one institution for the class under consideration were altogether silent on this point. As incomplete statistics would be of no value, we considered the partial information not worth the labour of extracting. In Ireland, where a further investigation of every case of deaf-dumbness returned at the Census was made by the constabulary and police, much difficulty was experienced in ascertaining whether the individuals were born deaf or not.† From a large number of facts derived from the experience of various institutions in Europe and America, collected with much labour by Mr. D. Buxton, Principal of the Liverpool School for the Deaf-and-Dumb, that gentleman has arrived at the conclusion that it is hopeless at present to expect to establish any fixed ratio between cases of congenital deafness and those which have resulted from accident or from disease acquired after birth. Another writer, who is connected with the London School for the Deaf-and-Dumb, states that out of 3,050 well-authenticated cases within his own knowledge, 2,241 were *born deaf*, 759 resulted from various diseases,

* This ratio for the United Kingdom may be compared with the following statements which have been collected by the Irish Census Commissioners, and published in their *Report and Tables on the Status of Disease in Ireland, 1861*:—

	Deaf-and-Dumb to Population.		Deaf-and-Dumb to Population.
France	1 in 1,671	Wurtemberg	1 in 901
Belgium	1 " 2,277	Denmark	1 " 1,920
Holland	1 " 2,714	Sweden	1 " 1,360
Hanover	1 " 1,450	Norway	1 " 1,200
Prussia	1 " 1,334	Piedmont	1 " 563
Saxony	1 " 1,629	Savoy	1 " 443
Bavaria	1 " 1,774		

† Of 4,930 deaf-and-dumb persons (exclusive of 723 dumb not deaf), the Irish Commissioners return 4,010 as congenital deaf-mutes, and adding a portion of 186 persons the cause of whose infirmity was either uncertain or unknown, and also allowing for young children under the speaking age, they increase the number to 4,257. These numbers give the large proportion of 86 per cent. of congenital cases, against 14 per cent. from accident or disease acquired after birth.

and with respect to 50 no positive information could be obtained; and adding to these the results of 2,805 other cases in different institutions and countries, he concludes that the actual preponderance is about 60 per cent. on the side of the *congenitally deaf*, while 40 per cent. are *accidentally deaf*.*

The causes of congenital mutism have engaged the attention of eminent physiologists and pathologists, but they are still enveloped in much obscurity. One thing appears certain, that the organic defect which results in real deafness from birth is always incurable. Among the most common causes assigned for the appearance of congenital deafness in families are fright and morbid mental impressions on the part of the mother during gestation, consanguinity of the parents, and the transmission of the defect itself, or of the predisposition to it, from parents to their offspring.

In the special returns furnished to us by the clergy of Herefordshire respecting the deaf-and-dumb in their parishes, the common reply to the inquiry as to the supposed cause of the defect in the case of congenital mutes was, "the mother attributes it to a "fright which she had a few weeks before her confinement," and in some cases "the "mother attributes it to the impression left on her mind by a former child having been "born deaf-and-dumb." Whether morbid impressions on the mind of the mother really do affect the offspring in such a manner as to produce the defect in question is still, we believe, a matter of dispute. With regard to deaf-dumbness being a common result of the intermarriage of blood relations, the facts which have been adduced by the Irish Census Commissioners, by Dr. Boudin of Paris, and by other authorities, would seem to place the matter beyond dispute. Mr. Buxton states that in an inquiry which he made from a large number of persons he found that in about every *tenth* case of deaf-dumbness the individuals were the issue of cousins.† That the near relationship of parents should be attended by a certain degeneracy in the offspring is simply in conformity with a well-understood natural law; and where any taint or hereditary predisposition to disease exists, it is almost certain to betray itself in a subsequent generation; hence the long train of mental and physical diseases, including deafness, which may often be traced with certainty from the unoffending offspring to the progenitors. Where the parents are both congenitally deaf there is a great probability that their children will be deaf-mutes; and even where a person born deaf marries a sound person not related, such a marriage would be apt to introduce predisposition, and prove the first step, although perhaps only in a transitive form, for the re-appearance of congenital deafness in succeeding generations. The transmission of mutism by hereditary taint or family peculiarity must be regarded as an established fact.‡

Acquired mutism has its most frequent origin in diseases which in early life and before children have learned to speak, either deaden or destroy the sensibility or mechanical arrangement of the ear so as to occasion the defect of deafness of which dumbness is the consequence. Amongst these diseases scarlatina, typhus, small-pox, measles, and epileptic convulsions supervening on dentition, as well as the various forms of cerebral affection, are undoubtedly the most common causes of acquired deafness; but chiefly scarlatina, through which more children are said to become deaf-and-dumb than from any other malady. In districts notorious for the prevalence of zymotic diseases, the fruitful sources of deaf-dumbness continually exist, and whether in crowded towns or in the open country, wherever the supreme importance of sanitary science and preventive medicine remains unrecognised, the same lamentable results will be produced. The Irish Census Commissioners (1861) furnish the details of 763 cases of acquired mutism the causes of which they classify under three heads: (1) affections acting on the organs of

*On the Constitution of the Deaf-and-Dumb.—By James Hawkins, London, 1863.

†An Inquiry into the Causes of Deaf-Dumbness, a paper read before the Liverpool Medico-Chirurgical Society, Jan. 1857, by D. Buxton, F.R.S.L., Principal of the Liverpool School for the Deaf-and-Dumb. Mr. Buxton gives the result ascertained with respect to the offspring of 310 deaf-and-dumb persons, each of whom married a person not deaf-and-dumb, and the proportion of deaf-mutes in the whole of these families was 1 in 135, less than three fourths per cent. But in the case of 303 deaf-and-dumb men married to as many deaf-and-dumb women, 1 in every 20 of their offspring (5 per cent.) was a deaf-mute.

‡The well-known tendency of congenital mutism to run in families has been strikingly illustrated by the facts ascertained by the Irish Census Commissioners. One instance was mentioned in 1851, in which the grandfather, the father, and four grandchildren were all deaf-and-dumb; and in many other cases a plurality of relatives were affected. From a Table given in the Report on the Status of Disease for 1861 it appears that in 211 instances of congenital mutism, including 320 persons belonging to families some of the previous members of which were mute, 187 persons were born deaf-and-dumb where the disease came through the male parent, and 133 where the defect was transmitted through the female line. In one case of two mutes in the same family it was found that an uncle, cousins (number unspecified), three nephews, and two nieces were also deaf-and-dumb. In another case the relationship of the persons similarly affected included a grandfather, father, uncles, aunts, and cousins. The Commissioners remark,—"When, however, one of a family is born deaf-and-dumb, even without hereditary predisposition, or in "which there was no relationship between the parents, not only are those descended from such a marriage liable to mutism, even "after the intermission of a generation, but collateral branches of the same family occasionally exhibit the disease," p. 20. It was found that in 357 instances in Ireland there had been born two mutes in each family, in 159 instances three mute children born of the same parents, in 36 instances four mute children, in 13 instances five mute children; six mutes in a family occurred five times, and in one case there were no less than seven mutes born of the same parents, the sexes being two males and five females. An instance is also mentioned of a family of eight mutes born of the same parents who were third cousins.—Status of Disease for 1861, p. 18. In the little work of Mr. Hawkins, already cited, several instances of the transmission of mutism in families are given.

hearing, 146 cases, in 83 of which scarlatina was the assigned cause, while 63 are referred to small-pox, measles, and other maladies; (2) diseases and accidents affecting the brain and nervous system, 383 cases, including 109 referred to fever, 96 to paralysis, 37 to falls, and 45 to fright; and (3) unclassified, 234 cases, in which the most frequently assigned causes are, cold and exposure 39, scrofula 14, and sleeping in the open air 17; but in 158 instances, although attributed to disease or accident of some description, the immediate cause was not specified.* Mr. Buxton has, in like manner, classified the various causes assigned as having produced loss of hearing in 3,138 children not congenitally deaf who have entered institutions in Europe and America; and although the value of his statement is impaired by the large proportion of cases in which the cause was vaguely stated or unascertained, it affords abundant evidence of the pernicious effects of scarlatina, typhus, and other fevers, and zymotic diseases generally, in producing deaf-dumbness.† These diseases are also frequently mentioned as causes of the affliction in question in the returns furnished to us by the clergy of Herefordshire.

Having thus briefly adverted to the recognised causes of congenital and acquired mutism, we proceed to notice a few of the principal results shown in the tables which specially relate to the deaf-and-dumb.

Ages.

In Summary Table XXXV. (Vol. II. p. xcv) the *ages* of the persons of each sex returned as either “deaf-and-dumb” or “dumb” are stated for England and Wales and for each of the eleven statistical divisions in quinquennial periods. Exclusive of those under the speaking age, 3,184 male and 2,427 female mutes—total 5,611—were under 20 years of age; in 1851, the numbers were 2,750 and 2,210—total 4,960. The numbers at the ages from 5 to 10, (viz. 1,773 boys and girls,) and from 10 to 15, (viz. 1,783 boys and girls,) were greater than at any other periods of life. Between 5 and 20 years of age there were 5,056; at ages between 20 and 60 there were 5,809; but only 816, or 6·7 per cent., had reached 60 years of age, the proportion of the general population aged 60 and upwards being 7·4 per cent. In London, which contains the largest school for the deaf-and-dumb in the kingdom, the proportion of youthful deaf-mutes is higher than in any other division.

On comparing the ages of the deaf-and-dumb and of the blind with those of the general population, the most opposite results are shown with respect to these two classes. In the case of the blind, the numbers *increase* at each period from infancy to old age, after 55 very rapidly, and nearly in the same ratio as the general mortality. Of the deaf-and-dumb, the highest proportions are at the periods of age ranging between 5 and 25 years, and the numbers then gradually *diminish* as the ages advance.‡

* *Status of Disease in Ireland* for 1861, pp. 25-6.

† The following is condensed from a table in Mr. Buxton's excellent paper “*An Inquiry into the causes of deaf-dumbness*.”—

1. Affections acting locally on the organ of hearing, including scarlatina (448 cases), measles (123), ulcers (generally scrofulous or syphilitic), &c., of head, ears, and throat (238)	869
2. Diseases and accidents affecting the brain and nervous system, including typhus and other fevers (441 cases), fits and epilepsy (280), falls, blows, and other accidents (174), fright (86)	1,119
3. Other causes, including colds and rheumatism (130 cases), inflammation, &c. (183), various diseases and accidents unknown or doubtful (837)	1,150
Total	3,138

‡ TABLE XX.—PROPORTION of the BLIND and the DEAF-AND-DUMB at DIFFERENT AGES to the MALE and FEMALE POPULATION in ENGLAND and WALES in 1861.

85 and upw ^d	2468·5	2321·9	61·5	63·1

The increase in the proportion of the blind at the higher ages is the result of the additional numbers every year becoming blind. And the rate of increase after puberty is governed by the same law as that which governs other sickness.

The facts relating to deaf-and-dumb children under the age of 5 are from their nature imperfectly recorded.

The diminution of the proportion of the deaf-and-dumb after the age of 15 can only be accounted for by their mortality being at a higher rate than that of the general population.

The Summary Table XLIII. (Vol. II. p. cii) shows the *occupations* of the deaf-and-dumb, the number of persons of each sex under and above 20 years of age in each calling being distinguished. It is satisfactory to observe that the heavy calamity under which they labour does not disqualify a large proportion of the 6,841 male and 5,395 female mutes from following a great variety of those pursuits which sweeten the life of man by increasing his usefulness. A few are engaged in the professions, including 3 in the Civil Service, 1 conveyancer, 48 artists and engravers, 13 schoolmasters and teachers, 9 schoolmistresses and female teachers. Amongst the male occupations the largest items are,—agricultural labourers and farm servants, 594; labourers, undefined, 227; shoemakers, 505; tailors, 230; miners, 86; carpenters, 66; cotton manufacture, 57; farmers, 49; blacksmiths, 45; of “children and relatives” 1,855 are returned, besides 832 described as “scholars;” there are also 106 paupers and 65 lunatics not otherwise returned, and 714 “undescribed” males above 20 years of age. Turning to the occupations of the women and girls, we find 475 dressmakers and seamstresses, 281 domestic servants, 128 laundresses, 75 employed in the cotton manufacture, and 47 charwomen. Only 67 of the women are returned as wives and 16 as widows; the deaf-and-dumb “children and relatives” amount to 1,869, besides 465 described as “scholars;” 124 are paupers, 31 are lunatics, and with respect to 1,269 adults no information is given.

Occupations of the deaf-and-deaf.

Although the four-sensed can never in many employments successfully compete with persons gifted with all their faculties, the fact can no longer be questioned that the deaf-and-dumb when properly instructed are qualified to take their share in the labours and pursuits of active life; but in order that they may be effectually aided in the effort to support themselves it is requisite that the employments best suited to their capacity should be ascertained. Occupations of a simple and straightforward character which, once acquired, can be executed without the necessity of constant direction, are obviously those which the deaf-mute is best qualified to follow; and this may account for a large number of operatives among them being employed in the trades of tailoring and shoe-making. But it is said that the circle of their pursuits might be greatly enlarged, and that although deficient in the imaginative powers they possess the imitative faculty in such a high degree as would enable them to excel in many handicrafts. Unfortunately a great obstacle to their obtaining work in suitable trades arises from their inability to hold communications with persons who might become their employers.*

Suitable employments for the deaf-and-dumb.

The unhappy condition of the deaf-and-dumb who are not supplied with any artificial means of making their wants and wishes known to others, and who are destitute of the advantages of education, has excited the sympathy of the benevolent in every civilized country, and the efforts of those who have devoted themselves to their instruction with a view to raise them to the rank of intelligent and useful citizens have been attended with much success. In the year 1760, not long after the celebrated Abbé de l’Epeé had succeeded in awakening attention to the subject in France, a school for the education of the deaf-and-dumb was established in Edinburgh, by Thomas Braidwood. Some years later Mr. Braidwood removed to Hackney, and the presence of his school so near the metropolis is said to have led to the foundation of the London Asylum, the first public institution for the deaf-and-dumb in the British dominions, in the year 1792. This institution, the largest as well as the oldest of the class in the United Kingdom, has educated upwards of 3,000 persons, and has trained a staff of assistants from whom have been selected the principals of several other establishments; it contained 305 inmates at the time of the Census. Other institutions have sprung up in the more populous parts of the kingdom, and there are now 11 schools in England containing together about 1,000 pupils; 5 in Scotland with about 240 inmates, and 7 in Ireland with about 400 inmates, making in all 23 institutions with about 1,640 pupils in Great Britain and Ireland.† The locality, date of foundation, amount of accommodation, and other particulars concerning the several institutions in England will be found in the

Institutions for the education of the deaf-and-dumb.

* In a paper *On the means of improving the social condition of the Deaf-and-Dumb among the lower orders*, by the Rev. R. G. Baker, Vicar of Fulham, read at the London meeting of the *Congrès international de bienfaisance*, June 1862, the reverend gentleman forcibly points out that in providing for the welfare of this class the work has hitherto been confined to the instruction of their earlier years, the fact that they require a helping hand to obtain suitable situations being lost sight of. Mr. Baker states that they make efficient workmen as engravers, wood-carvers, bookbinders, watchmakers, iron and tinplate workers, gold-beaters, cabinet-makers, and coopers; and the girls and women as milliners and dress-makers, bookfolders, tailors, and laundresses. It will be seen by the Table of Occupations referred to in the text that many of the deaf-and-dumb were engaged in these trades and employments at the time of the Census.

† Several of the Principals of the existing institutions, like their predecessors the Braidwoods and Watsons, have by their practical writings rendered good service to the deaf-and-dumb; besides Mr. Buxton, of Liverpool, from whose works we have quoted, we may mention Dr. Scott, of the Exeter School, and Mr. Baker, of the Doncaster School. Nor should we omit to notice the valuable labours of Dr. Peet, of the New York Institution, and other American instructors of the deaf-and-dumb.

subjoined table. There are two or three private schools for deaf-mutes with respect to which we have received no specific information.*

It will be seen on reference to the table that the English institutions for the deaf-and-dumb depend for their support on voluntary contributions, donations, legacies, and annual payments made on behalf of the pupils. In all cases there are restrictions as to the age of admission, and in nearly all the managers are obliged to resort to the objectionable system of admitting the majority of the children after periodical elections by the subscribers,—a system which has the effect of shutting out many deserving objects, besides being attended with useless expense to the friends of the applicants. Nearly all the reports issued from these institutions represent that the funds at the disposal of the managers are inadequate to meet the increasing applications for admission; and earnest appeals are made to the charitable to send in contributions.

The ordinary means of instruction are in a great measure inapplicable to children whose original condition, as a writer on the subject has remarked, is far worse than that of persons who can “neither read nor write;” for it is that of persons who can neither read, nor write, nor hear, nor speak,—who are unable to ask for information when they

* The Irish Census Commissioners have ascertained that there were last year in foreign countries the following number of schools for the deaf-and-dumb:—In France 2 imperial and 44 others; Belgium, 5; Bavaria, 9; Hanover, 4; Wurtemberg, 3; Hesse Darmstadt, 2; Switzerland, 9; Austria, 15 (with 741 pupils); Saxony, 2; Holland, 3; Sweden, 1; Prussia, 25; Savoy, 1; Russia, 2; United States of America, 22, with 2,000 pupils. *Status of Disease*, 1861, p. 28. Mr. Kennedy, in his preliminary Report on the 8th Census of the United States, observes “the support of these 22 institutions costs not far from \$350,000 annually, of which as much as \$300,000 is appropriated by the legislatures of 29 States. Provision for the education of the Deaf-and-Dumb, in some cases restricted to the indigent, in others made free to all, is made by law in all the States except the sparsely settled ones.” A State provision for the same object exists in France, Belgium, Austria, Prussia, Russia, and in several other European countries.

X. NORTHERN -	Northern Counties Institution for the Deaf-and-Dumb.	Newcastle-upon-Tyne	1839, new building, 1861.	Subscriptions, donations, legacies, and payments for pupils.	Both -	110	60	50
XI. MONMOUTHSHIRE AND WALES.	Cambrian Institution for the Deaf-and-Dumb.	Swansea - -	1841 (at Aberystwith).	Voluntary contributions: and fees of paying pupils.	Both -	27	15	12

Note.—The number of pupils in these several institutions on 8th April 1861, as here stated on the authority of the Managers, differs slightly in a few instances from the number given at the Census, owing to the fact that the education is given at the institutions.

(a) It is remarked in the return—“If the boys are placed with proper masters they make much better workmen for commencing their trade with them.”

(b) In this institution deaf-and-dumb and blind children are admitted.

(c) No register exists of the number admitted since foundation or opening.

(d) The annual payment for pupils is 26. There is an association connected with this institution at Northampton.

want it, and unable to understand what is imparted to them by words.* Deaf-and-dumb children cannot be grouped with other children in ordinary schools with a reasonable prospect of making much educational progress. The mode of giving them instruction being peculiar, and their mode of receiving it being also peculiar, the necessity for committing them to the care of specially qualified teachers arises precisely as in the case of other children requiring instruction in special subjects, such as drawing or music. From these considerations it may be inferred that the education of deaf-mutes can only be effectually carried beyond the mere rudiments by means of the special schools established for their benefit.

It has been contended, however, that the “asylums” and other institutions for deaf-mutes as well as those for the blind, are open to objection, because their inmates are isolated from the world without, and cut off from family and social ties. The authority of the Canon Carton, of Bruges, who has devoted many years to the education of the deaf-and-dumb has been cited in favour of this view; but he has only recommended that in their early years they should be educated in ordinary schools among children of their own age, before their admission into special institutions.† The objections urged against these institutions apply equally to hospitals, workhouses, almshouses, and similar establishments, where persons of the same class or suffering under the same disability, are, for reasons of economy and convenience, collected together. Doubtless such

The Table contained in Vol. I.—Number and Distribution of the People. The “payments for pupils” are simply reimbursements for the cost of board and lodging; subscribers. In the Liverpool school all candidates are admitted on application, without canvas or election by the subscribers. The resident pupils at the time of the Census were 62, thus classified:—

	Boys.	Girls.
Congenitally deaf-and-dumb	25	15
Deaf from disease, &c.	13	6
Cause doubtful, generally congenital	4	.
	41	21

persons would be better off in well-ordered homes amongst kind and watchful relatives; but we know that advantages are offered to them in public establishments which they could not hope to attain in their often wretched habitations, and although these advantages are obtained at the sacrifice of home ties, the recipients are, upon the whole, great gainers by the removal to institutions where they are no longer a burden to those whose narrow means scarcely enable them to supply their own necessities.

Preparatory
education of
the deaf-and-
dumb.

With respect to deaf-and-dumb children, we are inclined to think that more might be done for them in the way of elementary instruction either at home or in ordinary day schools than at present. If assistance were afforded by popular manuals and school books, and if certificated schoolmasters of national schools were encouraged before leaving the training colleges to acquire the simple methods of conveying instruction to deaf-mutes, many of the years during which these children now "vegetate," to use the expression of the Canon Carton, in utter neglect, would be turned to useful account in the acquisition of rudimentary knowledge, and much valuable time would afterwards be saved to the professional teacher. At the ordinary day schools they would not only acquire the habit of order, but would learn to imitate letters and to write the names of many common objects. As the children are upon an average nearly nine years old before they are eligible for admission into the schools for the deaf-and-dumb, the necessity for some preparatory education is apparent.*

Societies for
sending
children to
special
institutions.

Associated with the institutions are several branch societies, by the agency of which deaf-and-dumb children of the poor are sent to the parent establishments to be educated at the expense of the charitable in their own localities. This is an excellent arrangement, which might with advantage be carried out in all the counties which are without institutions of their own; at present it too frequently happens that the charities in the large towns are burdened with the expense of inmates admitted without payment from distant parts.

We regret to find that the educators of the deaf-and-dumb, like those of the blind, are not agreed in the solution of many important questions connected with the difficult task they have undertaken. The system of lip reading and articulation, the artificial method of teaching the deaf-and-dumb to speak, so warmly advocated by some, has been condemned by others as sheer waste of time and labour; it is said to be gradually falling into disuse in the British institutions, although practised with so much success by Braidwood, Watson, and their immediate followers who made themselves familiar with the nature of speech and the anatomy of the organs employed in the utterance of words. In the United States, where the education of deaf-mutes has been carried to a higher point than has yet been attained in other countries, the system of articulation has been entirely disregarded.†

Small "
proportion of
deaf-and-dumb
children under
instruction.

It is stated on good authority that about 16 per cent., or one in six, of the deaf-and-dumb are of the proper age for instruction at school.‡ This proportion of one in six, however, is far from being reached in England, even if every allowance be made for pupils not in the special institutions. Of 12,236 mutes of both sexes, only 1001, or 1 in 12, were under tuition at the institutions; but in the householders' schedules 829 boys and 463 girls, making together 1,292 under 20 years of age, were entered as "scholars" in conformity with the instruction which required that children, if daily attending school, or receiving regular tuition under a tutor or governess at home, should be so described. As there are very few private schools for the deaf-and-dumb, and they contain only a small number of pupils, the children returned as "scholars" must of necessity include many who were only in attendance at ordinary day schools. Inclusive of these, the number under instruction does not exceed 10·5 per cent., or about 1 in 9 of the deaf-and-dumb. The Guardians of the poor are under a moral if not a legal obligation to send poor deaf-and-dumb children to the special schools, in order that they may become self-sustaining and not burdensome members of the community; and we agree with the Irish Census Commissioners in thinking that this duty should be rendered a compulsory one.

* "Deaf-and-Dumb children may be taught the formation of letters on a slate long before they are capable of doing anything else, and such an acquirement is of the greatest assistance to them when they are sent to school. After they have learnt thoroughly the names of a given number of simple visible objects, as *man, boy, woman, girl, body, head, arm, leg, &c.*, they should be taught by the same manner as they learnt these names to qualify them as *tall men, short women, &c.*"—Hawkins *On the Constitution of the Deaf-and-Dumb*, p. 86.

† It is said that the question of teaching articulation upon which such opposite views are held is really one of expense, more time, and a larger staff of assistants than the moderate means of the institutions generally could afford, being required where it is systematically taught. At the Columbia Institution for the instruction of the Deaf-and-Dumb and the Blind at Washington, founded in 1857 under the provisions of an Act of Congress, it is intended to afford deaf-mutes the means of acquiring a collegiate education to qualify them as instructors, and to enable them, to engage in pursuits and occupations usually beyond the reach of persons in their condition: the pupils are instructed according to the French system, improved and introduced into America by Dr. Gallaudet.

‡ *Chambers's Encyclopædia*, Art. "Deaf-and-Dumb."

We have already alluded to the inquiry which through the courtesy of the clergy in Herefordshire we have been enabled to make, as supplementary to the information collected at the Census, into the circumstances connected with the cases of blindness and deaf mutism in the parishes of that county, where the ratio of the blind and of the deaf-and-dumb to the general population is higher than in any other part of England. The facts thus obtained concerning the deaf-and-dumb in Herefordshire do not indeed furnish any solution of the causes of this high ratio,—a solution only to be arrived at after a minute and patient study of all the circumstances likely to influence the physical and social condition of the inhabitants; but the details, although confined to a comparatively small number of cases, are nevertheless not devoid of interest.

Special inquiry as to deaf-and-dumb in Herefordshire.

In a population of 106,796 within the registration limits of Herefordshire in 1861, there were 107 mutes, or 1 in every 1,000 persons. In 1851 the number returned was 94, or 1 in every 1,054 inhabitants. The clergyman of each parish in which any deaf mute was living at the time of the Census was furnished with a form containing the name, age, occupation, and place of abode of the person referred to, and beneath were printed the questions to which answers were desired. We had the satisfaction to receive information, more or less precise, with respect to almost every individual named, except where removal from the parish or death had occurred during the interval between the Census and this inquiry. Some of the statements furnished by the relatives of the mutes were of course of a vague and hearsay character, while in a few instances it was difficult to obtain correct answers to the questions bearing upon the other members of the family afflicted and the relationship of the parents, but upon the whole the answers appear to be tolerably complete.*

The following are the ages of the individuals of each sex as returned at the Census :—

Ages of deaf-and-dumb in Herefordshire.

TABLE XXII.

—		ALL AGES.	Under 5 Years.	5—	10—	15—	20—	40—	60—	80 and upwards.
Males	- -	60	1	7	6	5	23	16	2	—
Females	- -	47	1	5	4	9	19	4	4	1

Thus 38 were between the speaking age and 20 years of age, 62 were between 20 and 60, and 7 were aged 60 and upwards. There is no institution for the deaf-and-dumb in Herefordshire; a few children, therefore, may have been absent in schools at a distance.† For the sake of convenience, we shall notice the results of the answers to our inquiries in the order in which the latter appeared in the printed forms.

The object of the first question was to ascertain whether the deafness was congenital or acquired. 66 persons, 34 males and 32 females, were stated to have been born deaf; in 23, the defect was attributed to disease or accident; and in 5 cases no information on the subject was obtainable. The ratio of cases of congenital deafness, 70 per cent., is much higher than the supposed average of the whole kingdom; it is well known, however, that acquired mutism is much less common in the rural parts than in the large towns.

Our next inquiry had reference to the supposed cause of the defect in persons congenitally deaf, and elicited the following particulars with respect to the 66 individuals so described :—

Assigned causes of congenital deafness.

In 20 cases, the defect was attributed to fright or morbid impressions acting on the mind of the mother during pregnancy‡; in 7 to hereditary predisposition; in 3 to deafness

* The following questions were printed on the form, a blank space against each having been left for the answer :—

1. Was the above-named person born deaf-and-dumb, or did he become so afterwards?
2. If born so, to what cause is the defect attributed by the friends or relatives; whether to fright, hereditary predisposition, or the near relationship of parents, such as the intermarriage of cousins?
3. If he became deaf-and-dumb since birth, at what age did he become so; and to what cause or disease has the defect been attributed?
4. Are any other members of the family, parents or grand-parents, brothers or sisters, deaf-and-dumb?
5. If the person is educated, please to state where, and by what means, the education was acquired.
6. If married, how many children has he, and have any of them been either mute from birth, or subsequently from accident or disease?
7. In what occupation has he lately been employed, and has he been able to support himself?

† The pauper lunatic asylum for Hereford and three other counties is situated in Monmouthshire.

‡ Amongst the instances of "fright" to which the defect in their children was attributed by the mothers were these:—"A fright from the fire of a neighbouring cottage that was burnt down;"—"fright before the child was born, at seeing a neighbour suddenly struck down by paralysis;"—"frightened by a dog before the child's birth;"—"a great fright a short time before he was born; a little girl jumped on her back while she was washing;"—"the impression left on the mother's mind by a former child having been born deaf-and-dumb." In one instance the clergyman remarks,— "the mother had a great fright before the birth of the first child; this fright was destructive to the faculties of the first child (now aged 40), who can neither speak, nor walk, nor feed himself; quite an idiot. The effect extended seriously to the second, who is weak in intellect as in body, and liable to fits; slightly to the third, who can scarcely talk intelligibly; but little to the fourth; no great defect, but weak; and scarcely at all to the fifth, a shoemaker, who maintains himself, wife, and child." It may well be doubted whether the cause assigned for the condition of this family is the correct one.

Assigned
causes of
acquired
deafness.

or illness of mother; and in 3 to the near relationship of parents,—first cousins, in two instances. No cause could be assigned in the 33 remaining cases.

The causes of the defect in the case of those whose deafness was produced by disease or accident formed the next head of inquiry, with the following results:—

<i>Affections acting locally on the organs of hearing:—</i>		Small-pox	1,	
		measles	1, scarlatina	4
				6
<i>Diseases and accidents affecting the brain and nervous system:—</i>		Fever	2,	
		water on the brain	1, abscess on do.	1, convulsions
		epilepsy	1, fall	
		from a height	2, effect of a cut	1
				10
<i>Unclassified:—</i>		scrofula	1, unspecified	6
				7

23

Of these 23 persons, 12 were males and 11 females, and in more than half the cases the disease or accident occurred “in infancy” or before the 3rd year of age; in every case it occurred before the 7th year. The exact year, however, was not always stated.

Family pecu-
liarity.

With a view to ascertain the existence of any family peculiarity or hereditary taint, information was sought as to whether any other members of the family were similarly affected. In none of the cases of *acquired* mutism was there any mention of relatives so affected; but 27 of the persons born deaf were stated to have deaf-and-dumb relatives; viz.—in 2 instances, the mother; in 2 families, two brothers; in 1 family, three brothers; in 5, a brother and a sister; in 1, a brother, a sister, and an uncle; in 1, three sisters; in 1, a brother, a sister, and two distant cousins whose grandfather was first cousin to their grandfather; in 1, an uncle and a brother. In one of the families, three out of six children were deaf-and-dumb, the defect having appeared in alternate children. A few of the returns speak of the parents as unhealthy, or labouring under deformities, &c., and some of the children are illegitimate.

Education of
the deaf-and-
dumb in
Hereford.

The following is an abstract of the answers furnished to our inquiry as to whether the deaf-and-dumb persons had been educated, and if so, where:—

TABLE XXIII.

	AGES.							
	ALL AGES.	Under 5 Years.	5–	10–	15–	20–	40–	60 and upwards.
Not educated	69	2	12	6	10	24	8	7
Educated:								
At the London Institution	9	—	—	2	3	4	—	—
” Birmingham ditto	4	—	—	1	—	3	—	—
” Bristol ditto	1	—	—	—	—	1	—	—
” Parish School	1	—	—	1	—	—	—	—
Elsewhere	4	—	—	—	—	1	3	—
Not stated	6	—	—	—	—	2	4	—
TOTAL	94	2	12	10	13	35	15	7

Thus only 19 out of 94 persons are stated to have received any education either in institutions or elsewhere.

Of 57 adult deaf-and-dumb persons above 20 years of age, 4 of the men and 2 of the women were married, and in 5 instances they had children, none of whom were mutes.

Means of
support.

The last question had reference to their employments and means of support, and from the answers it appears that out of 94 at all ages, 30 were able wholly or partially to maintain themselves, of whom 16 were agricultural labourers, 1 farmer, 3 needlewomen, 2 living on their means, &c. Including 29 children, 64 were *unable* to support themselves; of these 13 were supported by relatives, and 10 were paupers. It will be seen that the proportion of the deaf-and-dumb able to support themselves by their own industry is much larger than that of the blind.*

It is a matter of regret that the census inquiry into the number of the deaf-and-dumb in other parts of the country could not have been supplemented by a secondary inquiry of the same nature as that just noticed with respect to Herefordshire. We did not feel justified, however, in taxing the clergy with the laborious task of investigating these cases while the services they rendered were gratuitous; moreover, we had reason to believe that in the populous town districts the plan of procedure which was adopted with success in rural parishes, where nearly every inhabitant is known to the clergyman, would have proved inadequate for the purpose of obtaining such information from persons in

* See Table XXIV. p. 65.

all grades of society. We venture to hope, however, that the additional information now afforded by the Census of 1861 with respect to both the blind and the deaf-and-dumb —imperfect as it is, compared with that collected in Ireland,—will throw some light on the important inquiry as to how far these afflictions are inevitable, and how far they are preventible by the progress of sanitary and medical science, and by the avoidance of all those conditions which are likely to favour their development and perpetuation.

X.—PUBLIC INSTITUTIONS.—INMATES OF WORKHOUSES, PRISONS, LUNATIC ASYLUMS, AND HOSPITALS.

We have already adverted to the aggregate number of the people of England and Wales who at the date of the Census were lodged in the workhouses, prisons, hospitals, lunatic asylums, and other establishments, which it has been found convenient to include under the general designation of “Public Institutions.” During the last decenniad there has been a considerable increase in the number of these institutions. The great principle of practical benevolence has been actively at work, and, with the increased wealth of the country, there has been remarked a greater disposition on the part of the rich to do good while living, instead of merely bequeathing a portion of what they have amassed to be dispensed in charitable objects after their decease. In the detailed tables in Vol. I. will be found a statement for each of the eleven Divisions of England and Wales, showing the total number of persons, and also of special inmates, (paupers, prisoners, &c.) in each of the principal public institutions.* Other tables are given in Vol. II. with respect to the sex, age, and former occupations of in-door paupers, of prisoners, and of patients in lunatic asylums and general hospitals.† The chief aggregate results disclosed by these tabular statements will now be briefly noticed.

1. Inmates of Workhouses.

It is well known that by the law of England all poor and destitute persons have an absolute right to food, shelter, and medical attendance, subject to certain conditions. Our system of relief to the poor consequently entails upon the country a vast expense, and no less a sum than 77,960,000*l.* was raised in poor rates in England and Wales in the ten years ended in 1860. Of this amount, however, upwards of 18,000,000*l.* were disbursed as part of the cost of the police and for other purposes unconnected with the relief of the poor; but Parliament voted during the ten years 1,246,000*l.* in part payment of the salaries of schoolmasters and medical officers, and for other expenses not charged upon the rates. The average net expenditure on the poor in England during

Expense of relief to the poor in England.

* See Population Tables, Vol. I., p. 215, for the Table relating to Div. I., London ; a similar Table is given for each of the other Divisions.

† Population Tables, Vol. II. Summary Tables XLIV.—XLVII., pp. ciii–cx.

the period under notice may be taken roughly at 6,000,000*l.* per annum, equal to an annual charge of nearly 6*s.* per head on the population; while the average number of paupers, in-door and out-door, was 892,670, or 4·7 per cent. of the people. In Scotland during the same period the annual average of paupers was 120,600, or 4·0 per cent. of the population. In Ireland, where out-door relief is almost extinct, the paupers were 95,880, or 1·5 per cent.

At the date of the Census the severe distress which has unhappily existed during the last two years in the cotton manufacturing districts in consequence of the civil war in the United States of America had not yet commenced, although in Her Majesty's speech on opening Parliament, 5th February 1861, allusion was made to "the serious differences" which have arisen among the States of the North American Union." According to the returns published by the Poor Law Board the average number of persons relieved, exclusive of vagrants and lunatic paupers in the quarter ended 31st March 1861 was 889,942; viz., 131,501 in-door and 758,441 out-door. In the corresponding quarters of 1862 and 1863 the returns of pauperism gave the following numbers, in which the effects of the failure of the cotton supply are too plainly discernible:—

	Total.	In-door.	Out-door.
1862 - - -	948,198	143,926	804,272
1863 - - -	1,091,873	143,661	948,212

Number of
persons in
receipt of
relief.

Paupers in
workhouses.

The number of paupers in *workhouses* (including children in the District schools) on the Census day was 125,722. This number is below the average for the quarter ending on the preceding 31st March, as derived from the returns of the Poor Law Board; probably the explanation may be found in the fact that many paupers are in the workhouses in the months of January and February who leave as soon as the weather becomes less severe and employment is obtainable, so that by the first week in April the number in-doors is greatly diminished. The ratio of paupers in workhouses was 1 in every 160 in the population, or 6·3 in every 1,000. At the Census of 1851 there were 126,488 in-door paupers, that is 1 to every 142 inhabitants, or 7 in 1,000.

It should be borne in mind that the partial relief given to out-door paupers is often continued for short periods only, on account of sickness or temporary distress, while the relief given in the workhouses is not only so complete as to supply all the actual necessities of the destitute poor, but is often continued for long periods, and in the case of aged persons generally for the remainder of their days. According to a Return made to the House of Commons in 1861 no less than 14,216 paupers had been inmates of workhouses during 5 years and upwards, of whom 4,940 had been inmates between 10 and 20 years, 1,322 between 20 and 30 years, and 175 upwards of 30 years.*

Distribution of
paupers.

The highest ratios of in-door paupers to the general population are observed in the counties contiguous to the metropolis, namely, in Middlesex and Surrey (Extra-metropolitan), Essex, and Kent, the pauper children belonging to several of the large London parishes being placed out in the Central District Schools and other establishments situated in those counties. In Hertfordshire also, and in Cambridgeshire, Suffolk, Norfolk, Wilts, and Leicestershire, the ratios are considerably above the average. In the North-western Division (Cheshire and Lancashire) 1 in-door pauper is returned in every 204 inhabitants; in the four northern counties 1 in 251; in Yorkshire 1 in 282; the lowest proportion is in the Welsh Division, where 1 in-door pauper is returned in every 319 of the population. In a few unions in Yorkshire and Wales, however, there are no workhouses, out-door relief only being given.

Sexes.

The relative numbers of the *sexes* of in-door paupers are not widely different, 62,320 being males and 63,402 females.

From the number of widows who are yearly left destitute, and the comparative helplessness of women, when in distress, a large excess of females in workhouses might perhaps have been expected. To every 10,000 males and 10,000 females in England and Wales there were 64 males and 62 females in workhouses at the time of the Census.

Ages.

It will be seen from the tables showing the *ages* of in-door paupers, that a large number of the aged, including some of the oldest people in the country, are sheltered in the workhouses; 20,882, or about one-sixth, were upwards of 70 years of age, including 390 aged 90 and upwards, and 19 said to be aged 100 and upwards; 45,903, or 37 per cent. of the whole number, were children under 15 years of age; 5,729 men and 13,876 women were between 20 and 40.†

* House of Commons paper, No. 490. Session 1861. The reasons assigned why the 14,216 persons included in the return are unable to maintain themselves are classed under the following heads: old age and infirmity, 5,932; mental disease, epilepsy, palsy, and "weak mind," 4,989; bodily disease, 924; bodily defects (including 429 blind, 165 bad sight, and 197 deaf-and-dumb), 1,619; moral defects, including intemperance, 182; other causes, including orphanage, 570. Pauper lunatics in Asylums are not included in the Return.

† Summary Table No. XXXVI. in Vol. II., p. xevi.

The abstract of the previous *occupations* of in-door paupers in Summary Table XLIV. Occupations. (Vol. II. p. ciii.) is derived from the statements of the masters of workhouses, who acted as enumerators for these institutions. It will be seen that almost every class of employment—professional, commercial, trading, manufacturing, and agricultural—is represented. The largest items are: agricultural and farm labourers, 8,285 men and boys and 1,388 women and girls; labourers undescribed 5,324; domestic servants, 15,108, all but 647 of whom are females; charwomen, 2,699; washerwomen, 1,663; milliners, dressmakers, seamstresses, &c., 2,603; shoemakers (both sexes), 2,133; tailors, 942; cotton manufacture, 2,103; seamen, merchant service, 848; soldiers and Chelsea pensioners, 207.

2. Prisoners.

Several important changes have been made in the law and practice relating to criminals since the Census of 1851. By an Act which came into operation in 1853, all sentences of transportation of less than 14 years were abolished prospectively, and sentences of “penal servitude” substituted for them, the terms of penal servitude being considerably shorter than those of transportation. At the same time power was given to grant tickets-of-leave to convicts for good conduct in prison, but revocable during the unexpired term of the sentence. By a subsequent Act (1857) sentences of transportation were abolished altogether, and sentences of penal servitude substituted for them in all cases. The sentences of penal servitude since 1857 have been carried into effect by detaining the convicts in separate confinement, chiefly at Millbank and Pentonville, for about nine months; while at the end of that period they have been removed to other prisons for associated labour on public works. The prisons used for the latter purpose are Chatham, Portsmouth, Portland, and Gibraltar for able-bodied convicts, Dartmoor for light-labour convicts, and Woking for invalids. Since 1858 no convicts have been confined in hulks. The convict establishment at Bermuda has been entirely given up, but a limited number of convicts has been selected from among those employed on public works for removal to Western Australia, which is the only colony to which they can now be sent. Juvenile male convicts under 16 years of age sentenced in Great Britain to penal servitude undergo their term of imprisonment in Parkhurst prison, Isle of Wight. Female convicts sentenced in England to penal servitude are mostly confined in Millbank and Brixton prisons.

From the criminal tables prepared at the Home Office, and annually presented to Parliament, it seems clear that the amount of crime in England has decreased in the last 21 years in its ratio to the population, especially during the last seven years (1856–62). During the two years 1861–2, however, a considerable increase of serious crimes was shown by the returns, and this increase was attributed by the Commissioners appointed to inquire into the subject at the close of 1862, partly to the defective system of secondary punishment in force, and partly to the accumulation of discharged convicts at home in consequence of the small number sent to a penal colony since 1853. These various circumstances, and also the fact that imprisonment for debt or bankruptcy has been in a great measure abolished, should be borne in mind in considering the Census tables relating to prisoners.

On the 8th April 1861, the number of prisoners detained in England and Wales in the convict establishments, county and borough prisons, gaols, bridewells, houses of correction, and reformatories certified by the Secretary of State for the reception of youthful offenders under the Act of 17 & 18 Vict. c. 36, was 26,096, viz., 21,177 males and 4,919 females. Of these some few were insolvent debtors (bankrupts), and a considerable number were awaiting their trial, but the majority had been convicted and were undergoing sentences. The ratio of prisoners of all classes to the general population was 1 in 769. At the Census of 1851 the aggregate number was 23,768, and the ratio 1 in 754. In every 10,000 males and as many females in England and Wales in 1861, there were in prison about 22 males and 5 females; in 1851 there were 23 males and 4 females. The great excess of prisoners above the average in London, Surrey, Kent, Hampshire, and other localities is attributable to the convict prisons situated within the metropolitan district and the counties named. In London the proportionate number is highest, and in the Welsh Division it is lowest, as in 1851.

As regards the *ages* of prisoners, the returns for 1851 and 1861 present the following results:—

	1851.	1861.
Under 20 years	5,976	6,281
20 and under 60	17,280	19,166
60 and upwards	512	649
Total	23,768	26,096

The increase in the absolute number of persons detained in prisons is mainly due to the recent legislation already referred to.

occupations.

The Summary Table XLV. (Vol. II. p. cvi.), showing the *Occupations* of prisoners, may be compared with the corresponding table published with the abstracts of 1851. It distinguishes the former employments, real or alleged, of 23,414 prisoners, but does not indicate the number of *professional* criminals who are withdrawn for a time from their ordinary pursuits. Amongst the occupations furnishing the largest numbers are: agricultural labourers, 2,240 (both sexes); labourers not otherwise described 2,933; domestic servants 1,054 (viz. 150 males and 904 females); shoemakers 1,022; tailors 902; hawkers and itinerant vendors 578; engaged in the cotton manufacture 649; carpenters, bricklayers, masons, slaters, plasterers, plumbers, and painters, together 1,543; seamen 770; soldiers 427; commercial clerks 270; milliners, dressmakers, and seamstresses 448; laundresses and washerwomen 257. There were 1,144 male and 1,538 female prisoners without stated occupations. Several members of the professions are included in the table, and 65 employés of the Post Office.

3. *Inmates of Lunatic Asylums.*

Treatment of
the insane.

The laws for the protection of the person and property of lunatics in England continue to be carried out with vigour and success. By a system of inspection and control both of public and private establishments for the reception of the insane, the number of patients is restricted within the limits of the accommodation afforded, and salutary regulations are enforced. All private asylums must be licensed, even where a single patient only is received. Every care which experience can suggest is bestowed on the internal arrangements and organization of the larger establishments, and those more recently constructed asylums are regarded as models of their kind. Restraint is only resorted to when absolutely necessary for the safety of the patients or their attendants; and the method of moral treatment, which includes the exercise of a mild but firm disciplinary power, has been extended to the employment of all the means calculated to improve the bodily and mental health. Appropriate manual labour, athletic exercises and games, reading and lectures, concerts, and other recreations, now fill a regular place in the treatment of the patients; and the conveniences, the comforts, and even in a small degree the luxuries of life are introduced into their apartments. There is reason to believe that by this gentle and judicious treatment a large increase has taken place in the number of cases of insanity which have been cured, especially in the early stages of the disease.

Number of the
insane in
asylums.

At the date of the Census there were in the principal civil lunatic asylums and establishments for the reception of the insane 24,345 persons, viz. 11,249 males and 13,096 females. This number is defective as regards the total amount of persons labouring under aberration of mind, as it not only excludes some lunatics in licensed houses where a very small number are received, and lunatics at large or in the custody of their relatives, but also the patients in military and naval asylums, as well as lunatic paupers in workhouses, and a few criminal lunatics in gaols, who are not distinguished from other inmates in the returns from those institutions. The number thus understated furnishes a ratio of 1 lunatic patient in an asylum to every 824 inhabitants of England and Wales. In 1851 the aggregate number returned in like manner was 16,426, or 1 in every 1,091 of the population. It will be observed that the excess in the number of lunatics in asylums in 1861 over those in 1851 amounts to no less than 7,919. To what is this increase to be ascribed? Are we to conclude that there is an increased liability to mental maladies among the people of this country, or are we to look to other circumstances for an explanation of this remarkable difference? The explanation is partly to be found in the fact that the increase has been principally in public asylums, and is limited almost entirely to pauper and criminal patients. Since 1851 pauper lunatics, returned in that year at the workhouses, have been freely removed to county lunatic asylums; but making every allowance for this circumstance, it is obvious that other influences have been in operation which have had the effect of increasing the number of lunatics in asylums.

Causes of
increase
of pauper
lunatics.

The Commissioners in Lunacy are of opinion that the increased number of pauper lunatics is chiefly due to the agency of three causes,—(1) the discovery of fit objects for treatment previously unnoticed, and the classification as insane of many persons formerly looked upon as ordinary paupers; (2) the increased number of these sent to asylums; and (3) the prolongation of their life when thus brought under care.* To what extent

* Fifteenth Report of Commissioners in Lunacy, p. 78.

the removal of pauper lunatics from workhouses and cottages has tended to prolong life has not been determined; but there can be no doubt that when destitute and diseased persons are placed under care in well-regulated establishments specially adapted for their protection and treatment, and in which they receive an abundant diet and careful medical attendance, the result will be a diminution of the rate of mortality amongst them. These considerations furnish sufficient reason for rejecting the inference suggested by the increased return of paupers in asylums that the inhabitants of this country are more prone than formerly to attacks of insanity.

In proportion to the population the lunatics in asylums were by far the most numerous in the South-midland Division (including Middlesex extra-metropolitan, wherein Hanwell, Colney Hatch, and other large establishments are included); the South-western Counties, Wilts, Dorset, Devon, Cornwall, and Somerset, follow next in order, then the West-midland, South-eastern, Eastern, and London; the ratios in the Welsh and the Northern Divisions are lowest of all. The average proportion of lunatics in asylums to every 10,000 males and as many females living in England and Wales is 11·5 of males and 12·7 of females. In each of the 11 statistical divisions, with the exception of London, the number is considerably larger than at the previous Census; and the diminution in the return for London is owing to the patients having been transferred to establishments beyond the metropolitan limits.*

According to a return by the Commissioners in Lunacy there were, on 31st December 1861, 42 county and borough lunatic asylums, 16 hospitals, and 105 licensed houses, in several of which paupers were received; in these 163 establishments there were in all 26,199 lunatics at that date.

As regards the *ages* of the patients in lunatic asylums, the Summary Table XXXVIII. (Vol. II. p. xcvi.) furnishes the following results:—

	Males.	Females.
Under 20 years	364	298
20 and under 40 years	4,700	4,763
40 " 60 "	4,583	5,687
60 " 80 "	1,530	2,252
80 and upwards	72	96
	<u>11,249</u>	<u>13,096</u>

After the 40th year, mental maladies are more common amongst women than men, but the excess of females above 60 must be considered as partly due to the superior longevity of that sex.

The *former occupations* of the insane are returned in Summary Table XLVI. (Vol. II. p. cviii.) according to the best information which the principal resident officers of the institutions could furnish. It will be seen by this Table, which deserves an attentive examination, that the professional and educated classes furnish a large number of patients: of clergymen and ministers of various religious denominations 95 are returned; of barristers and solicitors 82; physicians and surgeons 66; officers of the army and navy 113 (the military and naval asylums are excluded); schoolmasters and others engaged in tuition—men 77, women 250. Amongst the largest items are: agricultural and other labourers 2,587 (both sexes); female and domestic servants 2,707; shoemakers 560; milliners, dressmakers, seamstresses, &c. 884; tailors 296. The table includes 142 men and 699 women described as of independent means or "annuitants."

4. Patients in Hospitals.

The hospitals and medical charities of this country have not unjustly been regarded as objects of national pride, supported as they are almost exclusively by private benevolence; and so extensive is the range of benefits they afford, that there is scarcely any form of

* The following table shows the number of Patients in Lunatic Asylums returned in 1851 and 1861 in each of the 11 Divisions of England and Wales:—

TABLE XXV.

Division.	1851.	1861.	Division.	1851.	1861.	Division.	1851.	1861.

						TOTAL ENGLAND AND WALES	16,426	24,345

bodily suffering to which the doors of one or other of these institutions are not open. Next to the adoption of proper measures for the prevention of disease, a suitable provision for the speedy restoration of the sick to health is obviously of the greatest importance to the community. Unfortunately, the force of the old truism,—“prevention is better than cure”—has yet to be recognized in many places where hospitals and infirmaries have been established for the medical and surgical treatment of the poor when sick, but where the sanitary measures which would tend to preserve them in health are still in a great measure neglected.

Various kinds
of hospitals.

The hospitals for the sick in England are of three kinds:—*General Hospitals*, in which are received as in-patients or treated as out-patients, according to the urgency and severity of the cases, persons suffering from diseases (with certain exceptions), accidents, injuries, and deformities; *Special Hospitals*, which receive patients suffering from one class of diseases, as fever, small-pox, cancer, or consumption; and *Class Hospitals*, which receive only one description of persons, as soldiers, sailors, women, children, &c. In some parts of England hospitals are called infirmaries. Dispensaries are medical charities for out-patients only, who are often visited at their homes.*

Number of
in-patients.

Exclusive of the patients in the military and naval hospitals, and in the sick wards of workhouses, prisons, &c., (which are excepted from the Tables, as was done in 1851,) there were in hospitals in England and Wales on the day of the Census 10,414 patients, of whom 5,970 were males and 4,444 females. In 1851 the number of in-patients was 8,617, and the increase of 1,797 persons enumerated in these establishments may be ascribed to the additional accommodation for the sick afforded through the erection of new hospitals, and the enlargement of those already established. The above figures give the ratios of 1 in 1,927 of the population in civil hospitals in 1861, and 1 in 2,080 in 1851.

Distribution.

By far the highest ratio of the sick in hospitals is found in London, where 17·0 males and 12·6 females in every 10,000 of each sex were enumerated in these institutions, which contained 4,102 out of the 10,414 patients. Many of the patients came from the country, attracted by the great reputation of the medical staff of the metropolitan hospitals, or sent up by country practitioners. Next to the metropolis, the patients were most numerous in proportion to the population in the counties of Gloucester and Warwick, Oxford, Norfolk, and Hereford. The statistical *Division* in which they were proportionately least numerous is the Welsh, then the North-western (Cheshire and Lancashire), and the Northern.

Ages.

The *Ages* of the sick in hospitals will be found in Summary Table XXXIX. (Vol. II. p. xcvii.); the following is an abstract of the aggregate results for England and Wales:—

	Males.	Females.
Under 10 years	510	409
10 and under 20	1,263	1,251
20 „ 40	2,439	1,901
40 „ 60	1,382	685
60 „ 80	364	192
80 and upwards	12	6
Total	5,970	4,444

Sexes.

It will be seen that 3,433 of the patients, about one third, were under 20 years of age, and that after that age the men in hospitals are much more numerous than the women, a result partly due to the accidents and injuries to which the former are more particularly exposed by their avocations.

Abuse of
medical
charities.

Although the primary design of these institutions is to afford a refuge to persons who are unable to pay for private medical or surgical aid, there is good reason for believing that their benefits are not mainly conferred on those for whose special relief they were established, but frequently on workmen in receipt of high wages, and their families, who are scarcely to be regarded as proper objects of such charities. That the class of artisans and other working-men in our towns are, when employed, well able to set aside a small sum from their earnings to join a sick club or other provident society to provide for the evil days of sickness cannot be questioned; but it is said by competent judges that the indiscriminate manner in which gratuitous medical relief is afforded at the hospitals,

* The numerous hospitals or almshouses for the reception and permanent board of poor old persons of both sexes are not embraced within the purview of this section.

more especially in London, only tends to encourage in the workman habits of improvidence.*

The table showing the occupations of the patients in hospitals (Summary Table XLVII, Vol. II., p. cix.) presents a great variety of employments, and although many of the persons belonged to the class of workpeople who receive high wages when employed, it is of course impossible to conjecture how far their altered circumstances, when deprived of employment through sickness or accident, might have rendered them fit objects of charity. The following are some of the principal items in the table :—

Occupations
of hospital
patients.

Males.—Agricultural labourers, 665; labourer undefined, 582; seamen, 373; shoemakers, 175; domestic servants, 149; cabmen, coachmen, carmen, and carters, 168; carpenters and joiners, 144; coal miners, 120; bricklayers, 105; messengers and errand boys, 102; horsekeepers and grooms, 89; plumbers, 88; tailors, 88; iron manufacture, 76; masons, 73; clerks and commercial travellers, 63.

Females.—Domestic servants, 1,369, of whom 486 were under 20 years of age; milliners, dressmakers, and seamstresses, 320; laundresses and washerwomen, 123; charwomen, 67; cotton manufacture, 62; wives and widows, not otherwise described, 777.

Of late years the various matters connected with hospital administration have received the careful attention of members of the medical profession and others well qualified by long practical experience to speak with authority on such subjects. The labours of Miss Nightingale may be said to have created a new era in hospital management, and the reforms advocated by that lady will, we may fairly hope, ere long be carried out in some of the most important of these institutions.†

XI.—ISLANDS IN THE BRITISH SEAS.

These islands consist of two groups, the Isle of Man in the Irish Sea, and the Channel Islands. The whole of the Tables respecting these interesting islands are brought together at Vol. I., pp. 747–750, and Vol. II. pp. 905–929. They are on precisely the same plan as the Tables for England and Wales.

The population of the Isle of Man increased slightly from 52,387 to 52,469, in the interval from 1851 to 1861. Mr. Burman, Clerk of Council and Secretary to the Lieutenant-Governor of the island, remarks, that the rural population has decreased; which is attributed to the large number of young persons who go for employment to England, where wages are considerably higher, or emigrate to the Colonies and the United States. Shipbuilding at Peel, the extension of lead-mines, and the attraction of Douglas as a watering place, have raised the population of those localities.

Isle of Man.

The population of Jersey is 55,613, down to which it had fallen from 57,620 at the previous Census. The decrease is accounted for satisfactorily by Mr. Gardner, the Government Secretary. It is fairly attributable not so much to any decline in the advantages of Jersey as to the diminution of the disadvantages under which the English mainland laboured by heavy fiscal duties, which the progress of the public revenue and of free trade has enabled the Chancellor of the Exchequer to remove.

Jersey.

In Guernsey the population, for the same reasons, remained nearly stationary; and the increase of population in Alderney and the adjacent islands from 3,962 to 5,561 is due, as Captain Bell, Secretary to Government, remarks, to the “very large increase of workmen carrying on the works” in Alderney.

Guernsey, &c.

The population of the islands in the British Seas was nearly the same at the time of the two last Censuses: 143,126 and 143,447.

The various Tables present many points of interest, not only to the inhabitants but to all who desire to study small communities, in juxtaposition with neighbouring peoples.

Tables
138–143.

There were 23,012 inhabited houses in the islands, and 6·23 persons to a house.

There is a great excess of women in the islands; thus, to 100 men of the age of 20–40, there were 133 women, and at the higher ages the disproportion subsists.

Of 1,000 women of the age of 25–30, there are 503 wives, 471 spinsters, and 26 widows. See Appendix, pp. 168–9.

* This has been forcibly pointed out in papers by Dr. Guy of King's College, Dr. Markham, and others. According to an authentic statement, the wages paid to artificers and other workpeople in London are as follows:

Bricklayers, 33s. per week.	Painters, 32s. per week.
Carpenters, 32s. ”	Plumbers, 33s.
Masons, 32s. ”	Labourers, 20s. ”

† See “Notes on Hospitals,” of which a third edition has recently been published.

XII.—AREA AND POPULATION OF THE BRITISH EMPIRE.

It is desirable on many grounds that the population of the Queen's dominions should be enumerated simultaneously. And accordingly the Census of all the Australian Colonies was taken on the same day (April 8th) as the Census of England, and on the same plan, with this exception, that the numbers in the several religious denominations were distinguished in the southern hemisphere, without any of those deplorable consequences which were anticipated from the same kind of inquiry in England. The population of nearly all the colonies and dependencies was enumerated in 1861, except India.

Exclusive of India, the enumerated population of the United Kingdom, with its colonies and possessions, amounted to 38,817,957 souls, having at their disposal 3,486,878 square miles, or 9,030,645 square kilometers of territory.

The Colonial Census is so important that we have thought it right to give a summary of the results in the Appendix, pp. 170–212.

The Government of India has always been too weak to procure an accurate enumeration of the population, notwithstanding the remarkable and partial success in taking the Census of certain provinces under able administrators. The population we give of India must therefore be considered as only a rough approximation, available for some purposes, until the results of an accurate enumeration are obtained by the present Government of India.

The area of British India is 933,722 square miles, and the population 135,571,351 by estimate, which makes the area of the British Empire 4,420,600 square miles, and the population 174,389,308.

TABLE XXVI.—POPULATION of the BRITISH EMPIRE, 1861.

	AREA.		POPULATION.
	Square Miles.	Square Kilometers.

Deduct Military stationed in the Colonies - - - - -	—	—	47,814
Population of British Colonies and Possessions (exclusive of Military) -	—	—	9,496,669

* In most instances the Native Population, the Military, and persons on board vessels in the Navy and Merchant Service, are included in the Colonial Censuses.

CONCLUSION.

We have to thank Colonel Sir Henry James, R.E., for supplying us with the area of parishes and townships in the Northern counties, so far as they were ascertained by the Ordnance Survey Department, on July 1st, 1863. Lieut.-Colonel G. A. Leach, Assistant Tithe Commissioner, also rendered us valuable assistance.

The Superintendent Registrars and the Registrars of Births and Deaths discharged their numerous duties under the Census Act to our entire satisfaction.

Some alterations were made in the scales of fees, so as to pay the several officers as equitably as possible; and the expense of all the operations in the country and in the central office amounted to 1½*d.* per head on the population. The cost per 1,000 was 5*l.* 9*s.* in 1841, 5*l.* 4*s.* in 1851, and 4*l.* 15*s.* 5*d.* in 1861.

We cannot bring our labours to a close without expressing the sense we entertain of the efficient services rendered by the clerks appointed to this establishment by the Lords of the Treasury. In the preparation of the Abstracts they worked ten hours daily during several months, and in the performance of all the tasks assigned to them in the various branches of the inquiry they evinced intelligence and a degree of assiduity which could hardly have been looked for amongst persons temporarily employed on duties to which they were for the most part unaccustomed. Nor should we be doing justice to the officers and clerks of the General Register Office who were engaged on the Census, more particularly to Mr. W. Clode and Mr. G. Wyatt, who filled prominent positions in superintending important branches of the work, and also Mr. Bacon and Mr. Williams, if we did not express the acknowledgments due to them for the valuable assistances which from their previous pursuits they have been enabled to afford us in the execution of this work.

We have the honour to be,

Sir,

Your obedient and faithful Servants,

GEORGE GRAHAM, Registrar General.

WILLIAM FARR.

JAMES T. HAMMICK.

ENUMERATED POPULATION of the UNITED KINGDOM, April 8th, 1861,
exclusive of the part of the ARMY, NAVY, and MERCHANT SEAMEN (250,356) out
of the Country.

	Persons.	MALES.	FEMALES.

NOTE.—The above Table may be substituted for that on page viii of Population Tables, 1861, Vol. I., the revised and final numbers for Ireland not having been declared when that Volume was published.

[Form of Householder's Schedule.]

LIST of the MEMBERS of this FAMILY, of VISITORS, and of SERVANTS, who SLEPT or ABODE in this Dwelling on the NIGHT of SUNDAY, APRIL 7th, 1861.

NAME AND SURNAME.	RELATION to Head of Family.	CONDITION.	SEX.	AGE [Last Birthday].	RANK, PROFESSION, or OCCUPATION.	WHERE BORN.	If Deaf-and-Dumb, or Blind.
No Person ABSENT on the Night of Sunday, April 7th, to be entered here, except those who may be TRAVELLING or out of WORK, who shall be entered as VISITORS, and who RETURN HOME ON MONDAY, APRIL 8th.	State whether Wife, Son, Daughter, or other Relative, Visitor, Boarder, &c., or Servant.	Write either "Married," "Widowed," "Single," or "Unmarried," against the Names of all Persons, except Young Children.	Write "M" for Males, and "F" for Females.	For Infants under One Year state the Age in Months, writing "Under 1 Month," "1 Month," "2 Months," &c.	(Before filling up this Column you are requested to read the Instructions on the other side.)	Opposite the Names of those born in ENGLAND, write the County, and Town or Parish. If born in SCOTLAND, IRELAND, the BRITISH COLONIES, or the East Indies, state the Country. If born in FOREIGN PARTS state the Country; and if also a BRITISH SUBJECT add "British Subject," or "Naturalized British Subject," as the case may be.	Write "Deaf-and-Dumb," or "Blind," opposite the Name of the Person; and if so from Birth, add "from Birth."

[Form of Householder's Schedule—continued.]

CENSUS

OF

ENGLAND AND WALES,

1861.

No.

HOUSEHOLDER'S SCHEDULE.

Prepared under the direction of one of Her Majesty's Principal Secretaries of State, pursuant to the Act of 23 & 24 Vict. c. 61.

Parish or Township.	City, Town, Village, or Hamlet.	Street, Square, &c., or Road.	Name or No. of House.	Name of Occupier.
---------------------	---------------------------------	-------------------------------	-----------------------	-------------------

TO THE OCCUPIER.

YOU are requested to insert the particulars specified on the other page, in compliance with an Act which passed the House of Commons and the House of Lords in the last Session of Parliament, and received the assent of Her Majesty the Queen on the 6th of August 1860.

This Paper will be CALLED FOR on MONDAY, APRIL 8th, by the appointed Enumerator;

and it is desirable that you should have the answers written in the proper columns by the morning of that day, in order that his progress may not be delayed. It will be his duty, under the Act, to complete the return if it be defective, and to correct the errors. Any person assisted by you may write the return, if he or she can do so intelligibly. Persons who refuse to give correct information are liable to a Penalty of Five Pounds; besides the inconvenience and annoyance of appearing before two Justices of the Peace and being convicted of having made a wilful mis-statement of age, or of any of the other particulars. The Return is required to enable the Secretary of State to complete the SEVENTH CENSUS; which is to show the exact numbers, ages, and condition of the people,—their arrangement in families in different ranks, professions, and towns; and cities—their increase and progress during the last ten years. The facts will be published in General Abstracts only, and strict care will be taken that the returns are not used for the gratification of curiosity.

Approved,
G. C. LEWIS,
Home Office, Whitehall, Nov. 18th, 1860.
Registrar-General.

EXAMPLES OF THE MODE OF FILLING UP THE RETURN.

Name and Surname.	Relation to Head of Family.	Condition.	Sex.	Age [last Birth-day].	Rank, Profession, or Occupation.	Where Born.	If Deaf-and-Dumb or Blind.
1 George Wood.	Head of Family.	Married.	M.	48	Farmer of 317 acres, employing 8 labourers and 3 boys.	Surrey, Godstone.	
2 Maria Wood.	Wife.	Married.	F.	44	Farmer's Wife.	Scotland.	
3 Alan Wood.	Son.	Unmarried.	M.	20	Farmer's Son.	Surrey, Godstone.	
4 Flora Jane Wood.	Daughter.	Widow.	F.	12	Scholar.	Kent, Ramsgate.	
5 Ellen Macdonald.	Servant.	Unmarried.	F.	61	Fundholder.	Canada.	
6 Eliza Edwards.	Servant.	Unmarried.	F.	21	House Servant.	Middlesex, Paddington.	
7 Ann Young.	Servant.	Unmarried.	F.	22	Dairymaid.	Surrey, Croydon.	
8 Thomas Jones.	Servant.	Unmarried.	M.	21	Carter.	Essex, Epping.	
1 Janet Cox.	Head of Family.	Widow.	F.	40	Staymaker.	Scotland.	
2 Sophia Cox.	Daughter-in-law.	Married.	F.	24	Dressmaker.	Middlesex, Poplar.	
3 Alexander Cox.	Grandson.	Unmarried.	M.	1 Month.	Basket-maker.	Middlesex, Shoreditch.	
4 William Cox.	Son.	Unmarried.	M.	18	Formerly Launderer.	Surrey, Lambeth.	Blind (from birth).
5 Margaret Cox.	Mother-in-law.	Widow.	F.	73	Printer—Compositor.	Ireland.	
6 John Butler.	Boarder.	Widower.	M.	42		France (British Subject).	
1 Walter Johnson.	Lodger.	Unmarried.	M.	23	Ship Carpenter.	Durham, Sunderland.	

GENERAL INSTRUCTION.

This Paper is to be filled up by the OCCUPIER or Person in charge of the Dwelling.

If the house is let or sub-let to different Families or Lodgers, each OCCUPIER or LODGER must make a return for his portion of the house upon a SEPARATE PAPER.

(See Examples of the mode of filling up the Return.)

INSTRUCTIONS for filling up the Column headed "RANK, PROFESSION, or OCCUPATION."

The Superior Titles of PEERS and other PERSONS OF RANK, and any right officers of the Crown, may hold Magistracies, Alderdoms, and other important public offices, to state their profession after their official title.

ARMY AND NAVY.—Add, after the rank, "Army," "Artillery," "Royal Navy," "Royal Engineers," "Marines," "East India Service," as the case may be. Officers on "half-pay," or "retired," to be so described. Chelsea, Greenwich, and other Pensioners, to be so designated.

Persons in the CIVIL SERVICE to state the Department to which they are attached, after their rank; those on the Supernumerary List to be so distinguished.

CLERGYMEN of the Church of England to return themselves as "Rector of," "Vicar of," "Curate of," &c., or "without cure of souls." They are requested not to employ the indefinite term "Clerk." Roman Catholic Priests and Ministers of Foreign Churches to return themselves as such, and to state the name of the church or chapel in which they officiate. Dissenting Ministers to be designated as "Pastor of," "Minister of," "Chaplain of," &c. Local or occasional preachers must return their ordinary occupations; but may add "Local Methodist preacher," &c. &c.

LEGAL PROFESSION.—Barristers to state whether or not in actual practice; Officers of any Court, &c., to state the description of office and name of Court. The designation "Attorney" or "Solicitor," to be confined to those whose names are actually upon the Roll. Clerks in Solicitors' offices should state whether Solicitor's Managing, Articled, or General Clerk.

Members of the MEDICAL PROFESSION to state the University, College, or Hall, of which they are Graduates, Fellows, or Licentiates; also whether they practise as Physician, Surgeon, Dentist, Oculist, General Practitioner, &c., or are "not practising."

PROFESSORS, TEACHERS, PUBLIC WRITERS, Authors, and Scientific Men—to state the particular branch of Science or Literature which they teach or pursue; Artists, the art which they cultivate. Graduates should enter their degrees in this column.

PERSONS ENGAGED IN COMMERCE, as Merchants, Brokers, Agents, Commercial Travellers, to state in all cases the particular kind of business in which they are engaged, or the staple in which they chiefly deal. Members of the Stock Exchange, East India Merchants, &c., may be so described.

Commercial CLERK—always add in what branch of business. [Note.—Clerks in the Civil Service, and in Solicitors' offices, should be distinguished as above directed.] The term FARMER, to be applied only to the occupier of land. Example:—"Farmer of 317 acres, employing 8

labourers and 3 boys;" the actual number of acres, and of men and boys employed on the farm, must be entered in an additional column, to be filled up by the occupier, at home or abroad. FARM SERVANTS sleeping in the Farmer's house must be described in his schedule as "Carter," "Dairymaid," &c., as the case may be.

An out-door LABOURER, working on a farm, must be described as "Agricultural Labourer," "Shepherd," &c., as the case may be.

IN TRADES, MANUFACTURES, or other Business the Enumeration, in all cases, to be distinguished. Example:—"Carpenter-Master, employing 6 men and 2 boys," inserting always the number of persons of the trade in his employ if any, on April 8th. In the case of FIRMS, the number of persons employed should be returned by one partner only.

In the case of WORKERS in MINES or MANUFACTURES, and generally in the ARTS, the particular BRANCH of work and the MATERIAL, are always to be distinctly expressed if they are not implied in the names, as in "Coal-miner," "Brass-founder," "Silk-drawster." Where the trade is much subdivided, both TRADE and BRANCH are to be returned thus—"Watchmaker—Finisher;" "Printer—Compositor."

ARTISANS and MECHANICS should invariably state their particular branch of art or business.

WEAVER should always write "Silk," "Wool," "Worsted," "Cotton," &c., before this general term, so as to express distinctly the material which he weaves, thus—"Silk-Weaver."

MESSINGERS, PORTERS, LABOURERS, and SERVANTS, to be described according to the nature of their employment on the day of the Census.

A person following MORE THAN ONE DISTINCT BUSINESS should insert his several occupations in the order of their importance.

Persons following NO Profession, Trade, or calling, and holding no public office, but deriving their incomes chiefly from land, houses, mines, dividends, interest of money, annuities, &c., may designate themselves—"Landed Proprietor," "Proprietor of Iron Mines," "Proprietor of Houses," "Fund-holder," &c., as the case may be. Persons who have RETIRED FROM BUSINESS may be entered thus—"Retired Farmer," "Retired Grocer."

Persons in Almshouses, after being described as such, should state their PREVIOUS OCCUPATIONS.

WOMEN AND CHILDREN to be entered according to the above instructions. The occupations of those who are regularly employed from home, or who follow any business at home, to be distinctly recorded. Against the names of children daily attending school, or receiving regular tuition at home, write "Scholar."

APPENDIX TO REPORT.

NOTE.

A REFERENCE to the various TABLES comprised in this APPENDIX will be found in the ANALYTICAL TABLE of CONTENTS which precedes the REPORT. The TABLES are there indicated in groups according to the subjects to which they relate.

ENGLAND AND WALES.—ENUMERATED HOUSES AND POPULATION, 1861.

TABLE 1.—AREA in ACRES ; HOUSES, FAMILIES, and POPULATION of the COUNTIES of ENGLAND and WALES, enumerated on April 8th, 1861.

TABLE 3.—NUMBERS of the ARMY, NAVY, and MERCHANT SEAMEN in 1801–1861 which should be added to the POPULATION of the UNITED KINGDOM, as enumerated at the several CENSUSES (*exclusive of Natives of Colonies and Foreign Parts*).

	YEARS.	United Kingdom.	England and Wales.	Scotland.	Ireland.	Islands in the British Seas.
ARMY, NAVY, and MERCHANT SEAMEN, <i>Abroad as well as at Home, 1801–31.*</i>	1801	442,013	263,635	70,032	103,536	4,810
	1811	502,536	290,273	78,180	128,536	5,547
	1821	289,095	172,428	45,804	67,717	3,146
	1831	260,191	155,189	41,224	60,946	2,832
ARMY, NAVY, and MERCHANT SEAMEN, <i>either Abroad or in Ports of the UNITED KINGDOM, but not ashore, in 1841</i>	1841	202,954	121,050	32,155	47,540	2,209
ARMY, NAVY, and MERCHANT SEAMEN <i>Abroad in 1851 and 1861</i>	1851	212,194	126,561	33,620	49,704	2,309
	1861	250,356	162,273	34,514	51,342	2,227
Columns	1	2	3	4	5	6

Note.—The Army and Seamen *ashore* were not enumerated at the Censuses of 1801, 1811, 1821, 1831, but were returned *in the aggregate* with those *abroad*. In 1841, the Army at home and Seamen *ashore* were enumerated in the general population, and are not included in the numbers for that year, which comprise the Army, Navy, and Merchant Seamen *abroad or on board Ships in British or Irish Ports*. In 1851 and 1861 the Army and Seamen *ashore* and on board ships in British or Irish Ports were enumerated with the general population, and are not included in the above numbers. The numbers in column 2 are from the returns; those in the other columns, belonging respectively to England and Wales, Scotland, Ireland, and the Islands in the British Seas, are calculated from the ascertained proportions in 1851 and 1861 *who were born in the several Countries*.

* The proportions of the Army, Navy, and Merchant Seamen *abroad* belonging to England and Wales have been estimated at 181,817 in 1801, 146,136 in 1811, 84,688 in 1821, and 76,221 in 1831.

TABLE 4.—ARMY, NAVY, and MERCHANT SEAMEN **ABSENT** from the UNITED KINGDOM on April 8th, 1861.

	TOTAL.	BELONGING TO				
		England and Wales.	Scotland.	Ireland.	Islands in the British Seas.	Colonies and Foreign Parts.
Army	120,395	64,047	10,950	38,979	—	6,419
Navy and Marines	43,216	33,422	2,500	4,623	549	2,122
Merchant Seamen	99,453	64,804	21,064	7,740	1,678	4,167
TOTAL	263,064	162,273	34,514	51,342	2,227	12,708
Columns	1	2	3	4	5	6

Note.—The Military and Seamen *ashore* and on board ships in British or Irish ports were enumerated with the general population, and are therefore not included in the above Table. The numbers in column 1 are from the Returns; the numbers in columns 2–6 represent the numbers born in England and Wales, Scotland, Ireland, Islands in the British Seas, Colonies, and Foreign Parts, and have been calculated from the ascertained proportions in the aggregate returns showing the country of birth.

* The return applies only to natives of the United Kingdom who were domiciled in France at the time of the Census; persons temporarily visiting France for purposes connected with business, pleasure, or health are therefore not included.

† By the Swiss Census Return of 16th December 1859, published in Bern 1863, the total number of British subjects is stated at 1,202, being an increase of 629 since 1854 when the number was given at 573.

‡ From returns by Her Majesty's Consuls it is stated that many persons have inscribed their names in the consular registers simply because they were born at Gibraltar, although their parents, thus availing themselves of what they look upon as a right to be considered British subjects, merely for the purpose of obtaining an exemption from the consular service of Spain.

§ Exclusive of 193 natives of Malta and Gibraltar.

¶ Approximate Census of British subjects, from returns furnished by Her Majesty's Consuls.

†† The following is an abstract of the consular returns of 321 souls as entered in the returns: Consular Service, 4; Resident Artist, 30; Friar, 30; Rector of the English College, Jesuits, 4; Student of Propaganda Fides College, 4; Rector of the Scotch College, 1; Student of the Scotch College, 11; Rector of the Irish College, 1; Student of the Irish College, 3.

** Return of British subjects, exclusive of 1,751 natives.

†† British subjects, not including Maltese or Ionians, or persons protected as British subjects.

				1861	20,119,314	9,801,152	10,318,162

NOTE.—The Table has been deduced from the Estimated Population in the Middle of each of the seven Census Years 1801-1861.

The Population for each year from 1801 to 1841 has been obtained from the probable increase deduced from the annual excess of Baptisms over Burials, and from the population enumerated at each Census. (See Census Report for 1851, Vol. I. p. xlix.)

The population for each of the years from 1841 to 1861 is deduced from the ascertained rate of increase observed in the 20 years, and an allowance is made for the decrease in the rate.

TABLE 16.—ENUMERATED POPULATION of the UNITED KINGDOM, **exclusive** of the ARMY, NAVY, and MERCHANT SEAMEN at HOME and ABROAD, in 1801, 1811, 1821, and 1831, and of the Portion of the ARMY, NAVY, and MERCHANT SEAMEN ABROAD only in 1841, 1851, and 1861.

Note.—No Census of the Population of *Ireland* was taken prior to 1821; the numbers, therefore, for this part of the United Kingdom for 1801 and 1811 have been deduced from the Male and Female rates of increase 1821 to 1831. In 1788 it was estimated from the hearth-money returns and other data, by Mr. Parker Bushe, at 4,040,000. In 1805, Mr. Newenham, in his "Inquiry into the Population of Ireland," stated that its increase during the preceding 20 years had been great beyond all former precedent, and that there were good reasons for thinking that it then amounted to 5,395,456. See M'Culloch's account of the British Empire, Vol. I. page 436.

TABLE 17.—UNITED KINGDOM.—RATE of INCREASE PER CENT. of the POPULATION in each of the Decennial Periods 1821–31, 1831–41, 1841–51, and 1851–61, assuming that the Decennial Emigrants (exclusive of Foreigners *) had remained in the Country, and had not increased in the ten years.

CENSUS YEARS.	Number of Emigrants (exclusive of Foreigners) in the Intervals.	Increase of Population.	Increase of Population, + Number of Emigrants.	Enumerated Population of the United Kingdom at the Beginning of the Periods in Col. 1.	Decennial Rate of Increase per Cent. of Population, if the Emigrants (exclusive of Foreigners) had remained in the County and had not increased.
1821–31	225,878	3,120,298	3,346,176	21,272,187	15.730
1831–41	655,747	2,643,965	3,299,712	24,392,485	13.528
1841–51	1,545,543	709,499	2,255,042	27,036,450	8.341
1851–61	2,054,578	1,575,339	3,629,917	27,745,949	13.083

* The Native origin of emigrants was not ascertained until the year 1853. The number of emigrants who were foreigners sailing from British ports has been estimated for the years 1821–31, 1831–41, 1841–51, and 1851–52.

TABLE 18.—NUMBER of PERSONS enumerated in BARGES, BARNS, TENTS, and VESSELS in ENGLAND and WALES, at each of the CENSUSES 1841; 1851, and 1861.

	1841.	1851.	1861.

TABLE 20.—ENGLAND AND WALES.—NUMBER of PERSONS in PUBLIC INSTITUTIONS, 1851 and 1861.

DESCRIPTION OF PUBLIC INSTITUTION.	1851.			1861.			Average No. of Special Inmates to each Institution.	
	Number of Institutions.	Persons, including Officers and their Families.	Number of Special Inmates.	Number of Institutions.	Persons, including Officers and their Families.	Number of Special Inmates.	1851.	1861.
TOTAL	1,758	271,006	240,023	1,684	311,793	274,015	137	163
Workhouses	716	125,430	120,978	721	131,440	125,722	169	174
Hospitals	94	10,053	7,619	*167	13,200	10,414	81	62
Lunatic Asylums	127	18,141	15,243	144	29,198	24,345	120	169
Prisons	162	26,726	23,753	179	29,959	26,096	147	146
Barracks	152	48,567	37,421	191	80,839	63,840	246	334
Orphan Asylums and other Principal Charitable In- stitutions	507	42,089	35,009	†282	27,157	23,598	69	84

Note.—The Numbers for 1861 in the above Table will be found to differ from those in Summary Table XII., Vol. 1.; an alteration having been made in the number of establishments reckoned as public institutions.

* The apparent increase in the number of Hospitals in 1861 is ascribed to many of the smaller Hospitals not having been noticed as Public Institutions in 1851.

† The decrease in this number is attributed to the exclusion in 1861 of Almshouses as Public Institutions, most of which were so returned in 1851.

TABLE 21.—PROPORTION of MALES to every 100 FEMALES in ENGLAND and WALES, 1801 to 1861.

Years.	Number of MALES, including Army, Navy, and Merchant Service at home and abroad, to 100 FEMALES.	Number of MALES, excluding Army, Navy, and Merchant Service abroad, to 100 FEMALES.
1801	97·425	94·583

The Table is read thus:—In England and Wales the increase of females was such in the interval of the Census of 1801 and of 1811, that to 100 females living in 1801 there were 14 in 1811; every 100 increased to 114. The increase is at the rate of 14 per cent. in the 10 years 1801–11; 16 per cent. in the 10 years 1811–21; 16 per cent. in the 10 years 1821–31; 14 per cent. in the 10 years 1831–41; 13 per cent. in the 10 years 1841–51; and 13 per cent. in the 10 years 1851–61. The increase of persons and of males not disturbed by the fluctuations in the numbers of the army, royal navy, and seamen.

The minus sign (–) is used in this Table to denote that, instead of increasing, the population has decreased at the rate per cent. expressed by the figures before it.

Notes that the population was nearly stationary.

TABLE 26.—AVERAGE NUMBER of PERSONS to a FAMILY, PERSONS to a HOUSE, and FAMILIES to a HOUSE, in ENGLAND and WALES in 1861, inclusive and exclusive of PERSONS in INSTITUTIONS, in VESSELS in PORTS, &c., and of PERSONS enumerated OUT OF HOUSES.

	NUMBERS.			PROPORTIONS.		
	Inhabited Houses.	Families.	Persons.	Persons to a Family.	Persons to each Inhabited House.	Families to each Inhabited House.
England and Wales	3,739,505	4,491,524	20,066,224	4·47	5·37	1·20
Institutions (Officers and Inmates), Persons in Ships, and Persons living out of Houses	1,684	1,684	397,582	—	—	—
England and Wales, exclusive of Institutions, &c.	3,737,821	4,489,840	19,668,642	4·38	5·26	1·20

TABLE 27.—AVERAGE NUMBER of PERSONS to a FAMILY, PERSONS to a HOUSE, and FAMILIES to a HOUSE, in ENGLAND and WALES in 1851 and 1861.

YEARS.	NUMBERS.			PROPORTIONS.		
	Inhabited Houses.	Families.	Persons.*	Number of Persons in each Family.	Number of Persons in each House.	Number of Families to a House.
1851	3,278,039	3,712,290	17,927,609	4·83	5·47	1·13
1861	3,739,505	4,491,524	20,066,224	4·47	5·37	1·20

This Table may be read thus, without regard to the decimal points:—In 1861 the proportion of persons to families was 447 to 100; persons to inhabited houses 537 to 100; families to houses 120 to 100.

* The persons enumerated in 1851 and 1861 include the soldiers in barracks, &c., and the sailors in ships lying in port, but are exclusive of the Army, Navy, and Merchant Seamen abroad.

TABLE 28.—In 45,856 HOUSES, containing 258,157 PERSONS (in 14 of the SUB-DISTRICTS of ENGLAND and WALES), the PROPORTION PER CENT., (1) of HOUSES containing (n) PERSONS, and (2) the PROPORTION PER CENT. of PERSONS in each GROUP.

Number of Persons (n).	Houses in each Group.	Persons in Houses of each Group.	Of 100 Inhabited Houses, the proportion of Houses containing (n) Persons.	Of 100 Persons in Houses containing (n) Persons, the proportion living in each group.
1-5	26,963	92,426	58·799	35·802
6-10	15,623	114,124	34·070	44·207
11-15	2,151	26,714	4·691	10·348
16-20	606	10,685	1·321	4·139
21-25	265	5,971	·578	2·313
26-30	125	3,461	·273*	1·341
31-81	123	4,776	·268	1·850

The Table may be read thus:—Out of every 100 Inhabited Houses, 59 contained 1 to 5 persons, 34 contained 6 to 10 persons, 5 contained 11 to 15 persons, and so on. Out of every 100 persons, 36 were living in houses containing 1 to 5 persons, 44 were living in houses containing 6 to 10 persons, 10 were living in houses containing 11 to 15 persons, and so on.

TABLE 29.—INCREASE of HOUSES in the Interval between the CENSUSES of 1851 and 1861; also the AVERAGE NUMBER of PERSONS to a HOUSE, and of INHABITED HOUSES to 100 PERSONS, in 1851 and 1861, in each of the COUNTIES of ENGLAND and WALES.

COUNTIES.	Increase of Houses in the Interval 1851 and 1861.			Average Number of Persons to each Inhabited House.		Average Number of Inhabited Houses to every 100 Persons.	
	Inhabited.	Uninhabited.	Building.	1851.	1861.	1851.	1861.

Note.—The minus sign (—) denotes that, instead of increasing, the Houses have decreased in number to the extent expressed by the figures before which it is placed.

The columns headed "Average Number of Persons to each Inhabited House," and "Average Number of Inhabited Houses to every 100 Persons," may be read thus:—In the County of Bedford there were, in 1851, 51 persons to every 10 Inhabited Houses; in 1861, 49 persons to every 10 Inhabited Houses; and 198 Inhabited Houses in 1851, and 203 in 1861, to every 1,000 of the population.

TABLE 30.—ENGLAND AND WALES.—NUMBER of INHABITED HOUSES, 1861, and the NUMBER and PROPORTION of HOUSES ASSESSED to HOUSE DUTY in the Year ending 5th April 1862.

COUNTIES.	Number of Inhabited Houses, Census 1861.	Number of Houses of Rentals of £20 and upwards assessed for Duty in Year ending 5th April 1862. (See Note.)	Per-centage of Houses assessed to the Total Number Inhabited.	COUNTIES.	Number of Inhabited Houses, Census 1861.	Number of Houses of Rentals of £20 and upwards assessed for Duty in Year ending 5th April 1862. (See Note.)	Per-centage of Houses assessed to the Total Number Inhabited.

* The letters indicating combinations are completed by adding, as the case may be, (H. + W.), (W. or W*), (B. or S.), to the letters in this column. Thus the first line (C.) becomes H. + W. + C. in reference to column headed H. + W.

Note.—The Table may be read thus:—27,663 families, each having a man and wife at its head, had their children (one or more) with them when the Census was taken, but neither servants, other relatives, visitors, or trade-assistants;—2,592 had relatives (alone). The following are the Sub-districts from which the facts are taken:—

9:1 Pancras	Regent's Park.	440:5 Nottingham	Exchange.
12:2 St. Giles	St. Giles South.	481:4 Chorley	Chorley.
65:1 Canterbury	Canterbury.	497:9 Huddersfield	Huddersfield.
184:2 Luton	Luton.	546:1 Easington	Easington.
215:1 Bury St. Edmunds	Bury St. Edmunds.	582:3 Merthyr Tydfil	Merthyr Tydfil Upper.
264:1 Salisbury	Salisbury.	589:3 Carmarthen	Carmarthen.
371:3 Stoke-upon-Trent	Stoke-upon-Trent.	593:2 Cardigan	Cardigan.

Note.—In preparing this Table the following rules were adhered to:—For *Corporate* Towns not being Parliamentary Boroughs the Municipal limits have been taken *Parliamentary* Boroughs not being Corporate Towns the Parliamentary limits have been taken; in the cases of the Parliamentary Boroughs of Aylesbury, Cricklade, Retford, Much Wenlock, and New Shoreham some of the most populous parishes comprised therein have been taken; for Cities and Boroughs which are both *Municipal* and *Parliamentary*, the Parliamentary limits have been adopted, except in the few instances in which the Municipal limits exceed those fixed for Parliamentary purposes. Towns of 2,000 inhabitants and upwards, the district within the Local Board of Health, the Local Government Act, the Public Health Act, the Local Improvement Act, the Lighting Area, or the Pavine Area has been taken, as the case may be; for Towns having no defined boundaries, limits are taken suggested by the Superintendent Registrar and Registrar of Births and Deaths after consultation with the parochial authorities; and for Towns of less than 2,000 inhabitants, three-fourths of the population of the parish bearing the name of the town has been taken.

* The Area of the Towns as stated in this column is in part the result of an estimate. Wherever the true acreage is known it has been adopted, but in the numerous instances in which no exact information was obtainable, the known areas of the nearest local sub-divisions, if not extending too far into the rural parts, have been taken; where, however, these were wholly inapplicable, an estimated area was obtained by allowing one acre for every two inhabitants of the town. The errors in these assumptions do not materially affect the general results.

† The following are the names of the Cities, Boroughs, and Towns the population of which is comprised in the column headed "Population" in the Towns:—

In BEDFORDSHIRE.—Amphill, Bedford, Biggleswade, Dunstable, Harrold, Leighton-Buzzard, Luton, Pottton, Toddington, and Woburn.
In BERKSHIRE.—Abingdon, Faringdon, Hungerford, Maidenhead, Newbury, Reading, Wantage, Windsor, Wokingham, and parts of Great Marlow, Oxford, and Wallingford.
In BUCKINGHAMSHIRE.—Amersham, Aylesbury, Beaconsfield, Buckingham, Chesham, Eton, Fenny Stratford, Ivinghoe, Newport Pagnell, Olney, Princes Risborough, Slough, Stony Stratford, Wendover, Winslow, Wycombe, and parts of Colnbrook and Great Marlow.
In CAMBRIDGESHIRE.—Cambridge, Ely, Linton, March, Soham, Whittlesey, Wisbech, and parts of Newmarket and Royston.
In CHESHIRE.—Altrincham, Audlem, Birkenhead, Bollington, Chester, Congleton, Crewe, Dukinfield, Frodsham, Great Neston, Hyde, Knutsford, Macclesfield, Middlewich, Nantwich, New Brighton, Northwich, Runcorn, Sandbach, Tarporley, and parts of Stalybridge, Stockport, and Warrington.
In CORNWALL.—Bodmin, Camborne, Callington, Camelford, Charlestown, Falmouth, Fowey, Grampound, Helston, Launceston, Liskeard, Looe East and West, Lostwithiel, Marazion, Padstow, Penryn, Penzance, Redruth, St. Agnes, St. Austell, St. Columb, St. Ives, Saltash, Stratton, Trezona, and Truro.
In CUMBERLAND.—Alston, Brampton, Carlisle, Cockermouth, Egremont, Keswick, Lonsdale, Maryport, Penrith, Whitehaven, Wigton, and Workington.
In DERBYSHIRE.—Alfreton, Ashbourne, Bakewell, Belper, Buxton, Chapel-en-le-Frith, Chesterfield, Clay Cross, Derby, Glossop, Ilkeston, Melbourne, Staveley, and Wirksworth.
In DEVONSHIRE.—Ashburton, Axminster, Bampton, Barnstaple, Bideford, Brixham, Buckfastleigh, Chagford, Chudleigh, Chulmleigh, Colyton, Crediton, Culmpton, Dartmouth, Dawlish, Devonport, Exeter, Exmouth, Hatherleigh, Holsworthy, Honiton, Ilfracombe, Kingsbridge, Modbury, Moreton Hampstead, Newton Abbot, Okehampton, Ottery St. Mary, Paignton, Plymouth, Sidmouth, South Molton, Tavistock, Teignmouth, Tiverton, Topsham, Torquay, Torrington, and Totnes.
In DORSETSHIRE.—Bournemouth, Blandford, Bridport, Cerne, Dorchester, Lyme Regis, Poole, Shorborne, Sturminster Newton, Castle, Swanage, Wareham, Weymouth, Wimborne, and part of Shaftesbury.
In DURHAM.—Barnard Castle, Bishops Auckland, Chester-le-Street, Darlington, Durham, Gateshead, Hartlepool, Houghton-le-Spring, Seaham Harbour, Sedburgh, South Shields, Staithrop, Stockton, Sunderland, West Hartlepool, and Wolsingham.
In ESSEX.—Barking, Billericay, Braintree, Brentwood, Castle Hedingham, Chelmsford, Chipping Ongar, Coggeshall, Colchester, Epping, Grays Thurrock, Great Dunmow, Halstead, Harwich, Maldon, Manningtree, Rayleigh, Rochford, Romford, Saffron Walden, Southend, Stratford, Thaxted, Waltham Abbey, Witham, and part of Sudbury.
In GLOUCESTERSHIRE.—Berkeley, Cheltenham, Chipping Campden, Chip Sodbury, Cirencester, Coleford, Dursley, Fairford, Gloucester, Lechlade, Lyd Marshfield, Mitcheldean, Moreton in Marsh, Newent, Newnham, Northleach, S. Wold, Stroud, Tetbury, Tewkesbury, Thornbury, Winchcomb, Wootton under E and part of Bristol.
In HEREFORDSHIRE.—Bromyard, Hereford, Kingston, Ledbury, Leominster, and parts of Ludlow and Presteigne.
In HERTFORDSHIRE.—Berkhamstead, Bishop Stortford, Hatfield, Hemel Hempstead, Hertford, Hitchin, Tring, St. Albans, Ware, Watford, and part of Royston.
In HUNTINGDONSIRE.—Godmanchester, Huntingdon, Kimbolton, Ramsey, Ives, and St. Neots.
In KENT.—Ashford, Bromley, Canterbury, Chatham, Cranbrook, Dartford, Dover, Faversham, Folkestone, Gravesend, Hythe, Maidstone, Margate, Kent portion of the Metropolis, including Greenwich, Woolwich, &c., Milton, Ramsgate, Sandwich, Sevenoaks, Sheerness, Tenterden, Tunbridge, Wester Whitstable, Wrotham, and part of Tunbridge Wells.
In LANCASHIRE.—Accrington, Ashton-under-Lyne, Atherton, Bacup, Black Blackpool, Bolton, Burnley, Bury, Carmel, Chorley, Church, Clitheroe, Colne, Da Droylsden, Farnworth, Fleetwood on Wyre, Garstang, Great Harwood, Hasling Heywood, Hindley, Kirkham, Lancaster, Leigh, Liverpool, Lytham, Manchester, Middleton, Much Woolton, Newchurch, Newton in Makerfield, Oldham, Orms Over Darwen, Padilham, Poulton-le-Fylde, Prescott, Preston, Rochdale, St. Hel Salford, Southport, Tyldesley, Ulverston, Widnes, Wigan, and parts of Stalybri Stockport, Todmorden, and Warrington.
In LEICESTERSHIRE.—Ashby-de-la-Zouch, Castle Donington, Hinckley, Leice Loughborough, Lutterworth, Market Bosworth, Market Harborough, Me Mowbray, and Mount Sorrel.
In LINCOLNSHIRE.—Alford, Barton-on-Humber, Boston, Bourne, Brigg, Cal Crowland, Crowle, Donington, Epworth, Gainsborough, Grantham, Great Grin Holbeach, Horncastle, Kirtlington, Louth, Lincoln, Louth, Market Deeping, Ma Rase, Skeffton, Spalding, Spilsby, Wragby, and part of Stamford.
In MIDDLESEX.—Brentford, Hounslow, City of London, and district under Metronpoint Local Management Act (Middlesex portion), Staines, Uxbridge, part of Colnbrook.
In MONMOUTHSHIRE.—Abergavenny, Caerleon, Chepstow, Monmouth, New Pontypool, Tredegar, and Usk.
In NORFOLK.—Attleborough, Aylsham, Dereham, Diss, Downham, Faken Harleston, Holt, King's Lynn, North Walsham, Norwich, Swaffham, Walsor Watton, Wells-by-Sea, Wymondham, and parts of Brandon, Thetford, Yarmouth.

TABLE 46.—POPULATION of 72 TOWNS in ENGLAND and WALES containing upwards of 20,000 Inhabitants in 1861 with the Population at the previous Censuses within the same, or nearly the same, limits.

COUNTY.	City or Town.	POPULATION.							OBSERVATIONS.
		1801	1811	1821	1831	1841	1851	1861	
ENGLAND.	LONDON	958,863	1,138,815	1,378,947	1,654,994	1,948,417	2,362,236	2,903,989	Within the limits adopted by the Registrar-General for the "Weekly Table of Births and Deaths in London." The boundaries are uniform for the whole period.
BURKS	Reading	9,742	10,788	12,967	15,595	18,937	21,456	25,045	Reading Borough. The same limits are taken throughout.
CAMBRIDGE	Cambridge	10,087	11,108	14,142	20,917	24,453	27,815	28,361	Cambridge Borough, including resident members of the University; same limits 1801-61.
CHESTER	Birkenhead	667	795	1,313	4,195	11,563	34,469	51,049	Birkenhead Parliamentary Borough, 1851 and 1861; for previous years the population of the four Townships of Birkenhead, Cloughton, Oxtan, and Tranmere is inserted; their population in 1851 amounted to 33,525, and in 1861 to 50,384 persons.
	Chester	15,174	16,140	19,949	21,344	23,866	27,766	31,110	Old limits of the City of Chester, 1801-31; present limits 1841-61. Population within the old City was 23,115 in 1841; 26,800 in 1851; and 30,136 in 1861.
	Macclesfield	8,743	12,299	17,746	23,129	32,629	39,048	36,101	Macclesfield Borough, 1841-61. Macclesfield Township (containing 24,137 in 1841; 29,648 in 1851; and 27,475 in 1861) is entered for previous years.
	Stalybridge (Cheshire and Lancashire.)	Not ascertainable 1801-41.					20,760	24,921	Municipal Borough of Stalybridge is situate partly in Townships of Dukinfield and Stalyley in Cheshire and partly in Ashton-under-Lyne Parish in Lancashire; the population in 1861 within the limits adopted for the Town in 1851 was 21,720 persons.
	Stockport	14,880	17,545	21,726	25,460	50,154	53,835	54,681	Stockport Borough for 1841-61; the population within the present limits is given; for the other years that of the Stockport old Borough or Township, which contained 28,431 inhabitants in 1841; 30,589 in 1851; and 30,746 in 1861.
CUMBERLAND	Carlisle	9,415	11,476	14,416	18,865	21,550	26,310	29,417	City of Carlisle, 1841-61; and the present limits, as nearly as possible, for the previous years.
DERBY	Derby	10,832	13,043	17,423	23,627	32,741	40,609	43,091	Derby Borough; identical limits throughout.
DEVON	Devonport	27,154	35,257	39,021	44,454	43,532	50,159	64,783	Devonport Parliamentary Borough; present limits for all the periods.
	Exeter	17,412	18,896	23,479	28,242	37,231	40,688	41,740	Old limits of Exeter, 1801-31; present Parliamentary limits 1841-61. Population within the old limits was 31,395 in 1841; 32,818 in 1851; and 33,738 in 1861.
	Plymouth	16,040	20,803	21,591	31,050	36,520	52,221	62,599	Plymouth Borough; present limits throughout.
DURNAM	Gateshead	8,597	8,782	11,767	15,177	20,123	25,568	33,587	Gateshead Parish, 1801-31; Municipal and Parliamentary limits, 1841-61. The Parish contained 19,595 persons in 1841; 24,805 in 1851; and 32,749 in 1861.
	South Shields	11,011	15,165	16,503	18,756	23,072	28,974	35,239	South Shields Borough; present limits, 1801-61.
	Sunderland	24,908	25,821	31,891	40,735	53,835	67,394	85,797	Sunderland Parliamentary Borough; present limits for all the years.
ESSEX	Colchester	11,520	12,544	14,016	16,167	17,790	19,443	23,809	Colchester Borough; same limits throughout.
GLOUCESTER	Bristol	61,153	71,433	85,108	104,408	125,146	137,323	154,093	Present limits of Bristol, 1841-61; nearly the same limits are taken for the previous years.
	Cheltenham	3,076	8,325	13,396	22,942	31,411	35,051	39,603	Cheltenham Parish, which is co-extensive with the Parliamentary Borough, 1801-61.
KENT	Canterbury	9,000	10,200	12,779	13,679	17,904	18,398	21,324	Canterbury City, present limits, 1841-61. Ancient limits 1801-31; the population within the same limits was 15,003 in 1841; 14,100 in 1851; and 16,643 in 1861.
	Chatham	12,940	15,787	19,177	21,124	24,269	28,424	36,177	Parliamentary Borough of Chatham, 1841-61; nearly the corresponding limits for 1801-31.
	Dover	8,023	11,230	12,664	15,645	19,189	22,244	25,325	Borough of Dover, 1841-61; nearly the same limits, 1801-31.
	Maidstone	8,027	9,443	12,508	15,790	18,986	20,801	23,058	Parliamentary Borough of Maidstone; identical limits, 1801-61.
LANCASTER	Ashton-under-Lyne	6,391	7,959	9,222	14,035	22,678	29,791	33,917	Present Parliamentary limits of Ashton-under-Lyne, 1841-61; nearly the corresponding area, 1801-31.
	Blackburn	11,980	15,083	21,940	27,061	36,629	46,536	63,126	Blackburn Borough; present limits, 1801-61.
	Bolton	17,966	24,789	32,045	42,245	51,029	61,171	70,395	Bolton Borough; present limits for all the years.
	Burnley	3,918	5,405	8,242	10,026	14,224	20,823	28,700	Municipal Borough in 1861; Town of Burnley, 1851; nearly the same limits, 1801-41.
	Bury	9,152	11,302	13,480	19,140	24,846	31,262	37,563	Bury Parliamentary Borough, 1841-61; for 1801-31, the population of the Townships of Bury and Elton is inserted; in 1841 their population was 25,912; in 1851, 32,262; and in 1861, 38,569.
	Liverpool	82,295	104,104	138,354	201,761	286,487	375,955	443,938	Liverpool Borough, for 1841-61; nearly the corresponding area is taken for 1801-31.
	Manchester	76,788	91,130	129,035	187,022	242,983	316,213	357,979	The population within the present City of Manchester is here given for all the years.
	Oldham	21,977	29,479	38,201	50,513	60,451	72,357	94,344	Parliamentary Borough of Oldham; the present limits are taken for the whole period.
	Preston	12,174	17,300	24,859	33,871	50,887	60,542	82,985	Preston Borough; present limits throughout.
	Rochdale	8,542	10,753	14,017	19,041	24,272	29,195	38,184	Rochdale Parliamentary Borough, 1841-61; nearly the corresponding limits, 1801-31.
	Salford	18,088	24,744	32,600	50,810	68,386	85,108	102,449	The population within the present limits of Salford Borough is given for 1841-61; and for previous years that of the three Townships of Salford, Broughton, and Pendleton; their population in 1841 was 68,026; in 1851, 84,773; and in 1861, 101,787.

E 46.—POPULATION of 72 TOWNS in ENGLAND and WALES containing upwards of 20,000 Inhabitants in 1861 with the Population at the previous Censuses within the same, or nearly the same, limits—*continued*.

COUNTY.	City or Town.	POPULATION.							OBSERVATIONS.
		1801	1811	1821	1831	1841	1851	1861	
CHESHIRE— <i>cont.</i>	Warrington	11,321	12,682	14,822	18,184	21,346	23,363	28,947	Parliamentary limits of Warrington, 1841-61; the corresponding area, as nearly as possible, 1801-31.
	Wigan	10,989	14,060	17,716	20,774	25,517	31,941	37,658	Wigan Borough; present limits, 1801-61.
LEICESTER	Leicester	17,005	23,453	31,036	40,639	50,806	60,584	68,056	The present limits of the Borough of Leicester are taken for the whole period.
LINCOLN	Lincoln	7,197	8,599	9,995	11,217	13,896	17,533	20,999	Lincoln City; present limits throughout.
SOUTH	Newport	1,423	3,025	4,951	7,062	10,815	19,323	23,249	Newport Borough; present limits 1841-61; St. Woollos Parish, 1801-31; a portion of the Parish, containing in 1851, 1,149, and in 1861, 1,780 persons, is not within the present limits of the Borough.
NORFOLK	Norwich	36,854	36,256	50,288	61,116	62,344	68,713	74,391	The City of Norwich; present limits throughout.

HUMBERLAND	Newcastle-upon-Tyne	33,048	32,573	41,794	53,613	70,337	87,784	100,103	Borough of Newcastle-upon-Tyne; present limits throughout.
	Tynemouth	13,171	17,548	23,173	23,206	25,416	29,170	34,021	Tynemouth Borough; present limits throughout.
NOTTINGHAM	Nottingham	28,801	34,030	40,190	50,220	52,164	57,407	74,693	Nottingham Borough; same limits, 1801-61.
OXFORD	Oxford	11,694	12,931	16,304	20,649	24,258	27,843	27,560	Oxford, as returned in the Population Abstracts, 1801-31; present extended limits, 1841-61; the population within the ancient limits in 1841 was 23,855; in 1851, 25,249; and in 1861, 25,249. Resident members of the University are included.
	Shrewsbury	14,730	16,825	19,854	21,297	18,217	19,681	22,163	Shrewsbury Poor Law Incorporation for 1801-31. The present Borough for 1841-61. The population of that part of the Incorporation not included in the present Borough in 1841 was 3,301; in 1851, 3,423; and in 1861, 3,621 persons.
BATH	Bath	33,196	38,408	46,700	50,800	53,106	54,240	52,528	Present limits of the City of Bath for the whole period.
PORTSMOUTH	Portsmouth	33,226	41,587	46,743	50,389	53,032	72,096	94,799	Portsmouth Borough; present limits throughout.
	Southampton	7,913	9,617	13,353	19,324	27,744	35,305	43,960	Town and County of the Town of Southampton; same limits, 1801-61.
STOKE-UPON-TRENT	Stoke-upon-Trent	23,278	31,557	40,237	51,589	68,444	84,027	101,207	Parliamentary Borough of Stoke-upon-Trent (including Hanley Municipal Borough) comprises an important part of the Staffordshire Pottery District; present limits throughout.
	Walsall	10,399	11,189	11,914	15,066	19,857	25,680	37,760	Walsall Parish, 1801-31; the Borough, 1841-61. Part of the Parish not included in the Borough contained 995 persons in 1841; 1,142 in 1851; and 1,930 in 1861.
	Wolverhampton	30,584	43,190	53,011	67,514	93,245	119,748	147,670	Wolverhampton Parliamentary Borough; present limits throughout.
IPSWICH	Ipswich	11,277	13,670	17,186	20,201	25,384	32,914	37,950	Ipswich Borough; same limits, 1801-61.
CREYDON	Croydon	Not ascertainable 1801-41.					10,200	20,323	For 1851 and 1861 the population of Croydon Town is entered. The entire parish contained 5,743 persons in 1801; 7,801 in 1811; 9,254 in 1821; 12,447 in 1831; 16,712 in 1841; 20,343 in 1851; and 30,240 persons in 1861.
BRIGHTON	Brighton	7,440	12,205	24,741	41,994	49,170	69,673	87,317	Parliamentary Borough of Brighton; present limits throughout.
	Hastings	2,982	3,848	6,111	10,097	11,617	17,011	22,910	Hastings Parliamentary Borough, 1841-61. For 1801-31 the population within the old Borough is entered. In 1841 there were 11,570 persons; in 1851 17,076; and in 1861, 22,797 within the ancient limits.
BIRMINGHAM	Birmingham	70,070	82,753	101,722	143,986	182,922	232,841	293,076	Present Borough of Birmingham, 1801-61.
COVENTRY	Coventry	16,034	17,923	21,448	27,298	31,032	36,812	41,647	Parliamentary City of Coventry; present limits throughout.
DUDLEY	Dudley	10,107	13,925	18,211	23,430	31,232	37,962	44,975	Dudley Parliamentary Borough; present limits throughout.
WORCESTER	Worcester	11,460	13,814	17,023	18,610	27,004	27,528	31,227	The City of Worcester, as returned in the Population Abstracts, 1801-31; extended limits (consisting of parts of parishes of which the Population, prior to 1841, cannot be ascertained), 1841-61.
BRADFORD	Bradford	13,264	16,012	26,307	43,527	66,715	103,778	106,218	Borough of Bradford; present limits throughout.
	Halifax	12,010	12,766	17,056	21,552	27,520	33,582	37,014	Present limits of Halifax Borough, 1841-61; the corresponding area, as nearly as possible, 1801-31.
HUDDESFIELD	Huddersfield	7,268	9,671	13,234	19,035	25,068	30,880	34,877	Huddersfield Parliamentary Borough; present limits throughout.
	Hull	29,580	37,005	44,520	51,911	67,308	84,690	97,661	Borough of Kingston-upon-Hull, 1841-61; nearly the corresponding limits, 1801-31.
LEEDS	Leeds	53,162	62,534	83,796	123,393	152,074	172,270	207,165	Borough of Leeds; present limits throughout.
SHEFFIELD	Sheffield	45,755	53,231	65,275	91,692	111,091	135,310	185,172	Borough of Sheffield; present limits throughout.
WAKEFIELD	Wakefield	10,581	11,393	14,164	15,932	18,842	22,057	23,150	Wakefield Parliamentary Borough, 1841-61; nearly the corresponding limits, 1801-31.
YORK	York	16,846	19,099	21,711	26,260	28,842	36,303	40,433	Municipal limits of York, 1801-61.
WALES. AMORGAN	Cardiff	1,870	2,457	3,521	6,187	10,077	18,351	32,954	Cardiff Borough; present limits throughout.
	Merthyr Tydfil	10,127	14,945	20,959	27,281	43,031	63,080	83,875	Merthyr-Tydfil Parliamentary Borough, 1841-61; the corresponding limits, as nearly as possible, 1801-31.
	Swansea	10,117	11,963	14,896	19,672	24,604	31,461	41,606	Swansea Borough, 1841-61; limits for 1801 31 as nearly as possible.
Town Population, as above		2,215,261	2,663,432	3,320,896	4,206,482	5,188,064	6,427,692	7,667,622	* The population of the Town of Croydon was not distinguished in the earlier years. In 1861 the population of the entire parish was 20,343, the population of the town being 10,200. For 1801-41 it has been assumed that the population of the Town of Croydon bore the same proportion to that of the entire parish as it did in 1851. A similar estimate has been made for the population 1801-41 of the Town of Stalybridge, which extends into the two sub-districts of Dukinfield and Hartshead, whose united population in 1851 was 42,115, the population of the Town of Stalybridge being 21,098 in 1851.
Estimated Population of Croydon and Stalybridge * (1801-41)		6,492	8,781	11,744	19,476	25,919	—	—	
TOTAL		2,221,753	2,672,213	3,332,640	4,225,958	5,213,983	6,427,692	7,667,622	

TABLE 47.—ENUMERATED POPULATION of the 72 LARGE TOWNS of ENGLAND and WALES, 1801-1861.

YEARS.	Total Population enumerated in England and Wales.	Population of the Country and of Towns containing in 1861 less than 20,000 Inhabitants.	TOWNS OF 20,000 INHABITANTS AND UPWARDS IN 1861.		
			Total Population in London and 71 other Towns.	Including	
				London.	Other Large Towns.
1801	8,892,536	6,670,783	2,221,753	958,863	1,262,890
1811	10,164,256	7,492,043	2,672,213	1,138,815	1,533,398
1821	12,000,236	8,667,596	3,332,640	1,378,947	1,953,693
1831	13,896,797	9,670,839	4,225,958	1,654,994	2,570,964
1841	15,914,148	10,700,165	5,213,983	1,948,417	3,265,566
1851	17,927,609	11,499,917	6,427,692	2,362,236	4,065,456
1861	20,066,224	12,398,602	7,667,622	2,803,989	4,863,633
Increment, 1801-61	11,173,688	5,727,819	5,445,869	1,845,126	3,600,743
Increase per Cent.	126	86	245	192	285
Annual Rate of Increase per Cent.	1.366	1.039	2.085	1.804	2.272

Note.—The Area of the above 72 Towns comprises 524,702 acres = 820 square miles = 2,123 square kilometers.

TABLE 48.—POPULATION of 580 TOWNS in ENGLAND and WALES in 1851 and 1861.

^a Within the limits adopted for the "Weekly Table of Births and Deaths in London."

^b The 63 County or Assize Towns are as follow:—viz., 40 in England, Appleby, Aylesbury, Bedford, Bodmin, Bridgwater, Bury St. Edmunds, Cambridge, Carlisle, Chelmsford, Chester, Colchester, Coventry, Croydon, Derby, Devizes, Dorchester, Durham, Exeter, Gloucester, Guildford, Hereford, Hertford, Huntingdon, Ipswich, Kingston-upon-Thames, Lancaster, Leicester, Leves, Lincoln, Liverpool, Maidstone, Monmouth, Newcastle-upon-Tyne, Northampton, Norwich, Nottingham, Oakham, Oxford, Reading, Salisbury, Shrewsbury, Stafford, Taunton, Truro, Warwick, Wells, Winchester, Worcester, and York; and 14 in Wales, Bala, Beaumaris, Brecknock, Cardiff, Cardigan, Carmarthen, Carnarvon, Dolgelly, Haverfordwest, Mold, Presteigne, Ruthin, Swansea, and Welshpool. In some Counties the chief town is undetermined and the Assizes are held at two Towns alternately, hence the number of County or Assize Towns exceeds the number of Counties.

^c The Watering Places in England are, Inland—Cheltenham, Bath, Leamington, and Tunbridge Wells. On the Coast—Brighton, Ramsgate, Margate, Worthing, Weymouth, Scarborough, Ryde, Cowes, Ilfracombe, Dover, and Torquay.

^d The 23 Sea-ports (excluding London) are Liverpool, Bristol, Hull, Newcastle-upon-Tyne, Sunderland, Tynemouth (including North Shields),

South Shields, Hartlepool (including West Hartlepool), Birkenhead, Scarborough, Whitby, Goole, Kings Lynn, Grimsby, Whitehaven, Yarmouth, Dover, Portsmouth, Plymouth, Southampton, Poole, Cardiff, and Swansea.

^e The 41 Manufacturing Towns are—Leicester, Nottingham, Loughborough, and Hinckley (engaged chiefly in the manufacture of stockings); Worcester, Woodstock, and Yeovil (gloves); Northampton and Wellingborough (shoes); Leeds, Bradford (Yk.), Huddersfield, Halifax, Wakefield, Rochdale, Stroud, Bradford (Wils), Trowbridge, Witney, Kendal, Kidderminster (wool); Norwich (wool and silk); Coventry, Macclesfield, Derby, Spitalfields, and Bethnal Green (silk); Luton and Dunstable (straw plait); Manchester and Salford, Preston, Bury, Bolton, Oldham, Ashton, Blackburn, Stockport, Chorley, Wigan, Carlisle, and Belper (cotton).

^f These 27 Towns are—Stoke-upon-Trent (pottery); Northwich, Nantwich, and Droitchich (salt); Heiston, Camborne, Redruth, St. Austell, Illogan, Gwennap, and St. Just (copper and tin); Newcastle-upon-Tyne, South Shields, Tynemouth (including North Shields), Sunderland, Swansea, Wolverhampton, and Chesterfield (coals); Merthyr Tydfil, Tredegar, Rotherham, Wolverhampton, Walsall, Dudley, and Chesterfield (iron); and Birmingham and Sheffield (manufacture of hardware).

TABLE 53.—NUMBER OF DIVISIONS, COUNTIES, DISTRICTS, SUB-DISTRICTS, PARISHES OR PLACES, ENUMERATION DISTRICTS, HOUSES, POPULATION, and AREA in ACRES, in ENGLAND and WALES, and in each of the 11 DIVISIONS ; and, To an AVERAGE DIVISION the Number of Counties, Districts, Sub-districts, Parishes or Places, Enumeration Districts,* Houses, Population, and Acres ; also the Number of the several subsequent items to an average County, District, Sub-district, Parish or Place, Enumeration District, House, and Person, at the time of the Census, 1861.

* Including 533 large Public Institutions.

Note.—These Logarithms will be found useful for various calculations.

TABLE 59.—MEAN AGES of the POPULATION of ENGLAND and WALES, as enumerated in 1851 and 1861, and as they would be if the Annual Number of Births remained stationary.

(For 1861.—Deduced from Table 56.)

AGE.	These Numbers express the Ages of the Population in 1851 and 1861, including Army, Navy, and Merchant Seamen abroad.						These Numbers express the Ages of the Population, if the Births, instead of increasing, remain invariable.		
	The MEAN AGE of Persons of the AGES in the First Column, and upwards, March 31, 1851, and April 8, 1861.						The MEAN AGE of Persons of the AGES in the First Column, and upwards, by the English Life Table, No. 3.

95—	97·5	97·5	97·4	97·4	97·6	97·6	97·1	97·0	97·1

The Table may be read thus:—The AVERAGE AGE of all the Males in England and Wales was 26·0 years in 1851, and 26·1 years in 1861; the average age of Females 26·8 years in 1851, and 27·0 years in 1861. The length of life is such in this country, however, that the natural age of the Males is 31·8 years, of Females 32·3 years. The reduced average age of the actual population arises from the annual increase of births, and the resulting excess of young over old people living.

The average age of Males who were of the age 20 and upwards was 40·0 years in 1851, and 40·4 years in 1861; of Females 40·7 in 1851, and 40·9 in 1861. By the Life Table it is shown that 44·0 and 44·8 are the normal ages of that portion of a stationary population subject to the English law of mortality.

After 60 the two series of results, exhibiting the actual ages and the calculated ages, nearly agree; and after 80 the ages returned slightly exceed the ages calculated (columns 8, 9, 10); whence it may be inferred that the chief increase of births has taken place since 1770–90, as the registers show to be the fact.

TABLE 60.—ESTIMATED AGES of the ARMY, NAVY, MARINES, and MERCHANT SEAMEN ABROAD* in 1861 belonging to the UNITED KINGDOM, who were not included in the enumerated Population.

AGES.	Belonging to				
	United Kingdom.	England and Wales.	Scotland.	Ireland.	Islands in the British Seas.

60—	539	365	100	66	8
65 and upwards	190	125	33	30	2

Note.—By subtracting the numbers in this Table from the numbers at corresponding ages in Table 55, the Population at Home, uncorrected for errors of stated ages, is obtained.

* The Numbers of the Army, Navy, and Marines at the different Ages serving Abroad were not distinguished in the returns from those serving at Home. In estimating the Ages in the above Table it has been assumed that the Numbers at each Age of those serving abroad were in the same proportion as those serving at Home and Abroad.

The Table read horizontally shows that of the 9,135,396 persons aged 0 and under 20 years, and born in the period 1841–1861, 7,660,850 will probably be living, aged 20 and under 40 years, in the year 1881,—5,551,182 in 1901, aged 40–60,—2,996,843 in 1921, aged 60–80,—348,326 in 1941, aged 80–100,—and 853 aged 100 and upwards in 1961. Of the 7,356,988 persons aged 0 and under 20 and born in the period 1821 to 1841, 6,147,201 aged 20 and under 40 were living in 1861 and so on.

NOTE.—The *enumerated* population is in thicker type, and against it is the enumeration year.

TABLE 64.—SHOWING the PROPORTION of the POPULATION of ENGLAND and WALES at FIVE PERIODS of LIFE to 100 Persons under the Age of 20. (The Army, Navy, and Merchant Seamen Abroad as well as at Home are included.)

Note. The number of persons in the Professional Class is in certain districts considerably augmented by the presence of the Military or the Royal Navy in Barracks or in Naval Stations; thus, in Districts No. 19, Farnham, and 41, Farnborough, the Camp at Aldershot is the cause of the proportion in the Professional Class being 42.9 per cent. and 40.7 per cent. respectively, instead of being somewhat less than 4 per cent., as in neighbouring districts. Districts in which this disturbance prevails are indicated by an *, and the figures for making a correction by excluding the Army and Navy will be found in Vol. II.—Population Tables, 1861, the Occupational Tables given for each district in each respective divisional part.

33.—NUMBER of PERSONS aged 20 YEARS and UPWARDS in EACH of the SIX CLASSES of OCCUPATIONS, and the PROPORTIONAL NUMBERS PER CENT.—SUPERINTENDENT REGISTRARS' DISTRICTS or POOR LAW UNIONS—continued.

SUPERINTENDENT REGISTRARS' DISTRICTS or POOR LAW UNIONS.	PERSONS aged 20 Years and upwards.							To every 100 PERSONS aged 20 Years and upwards of ALL OCCUPATIONS, the PROPORTIONAL NUMBER of EACH CLASS.

FARMERS do not return or some of whose par-	10297	7390	4713	3041	2114	1642	1163	1090	746	2503	1069	608	353	223	122	82	45	17	15	59	37297	9394	47191

The Table read vertically shows that 3 Labourers were returned as employed on each of 3 farms or holdings under 5 acres, on each of 15 farms or holdings under 10 acres, on each of 62 farms of 10 and under 20 acres. Read horizontally, the Table shows that of 6,205 Farmers, each occupying 100 acres and under 1,862 made returns as employing One Man each, 1,415 as employing Two Men each, 1,273 as employing Three Men each, and so on. The above numbers are exclusive of women and children returned as labourers on farms. The number of Farmers appearing in this and the following Tables will not agree with the number returned under the respective counties in the Occupation Tables, the discrepancy being caused partly by the exclusion from the above numbers of 5,600 Farmers who made no returns respecting either the acreage of their farms or the number of labourers employed, partly by the fact that in the Occupation Tables retired Farmers are referred to their former occupations, and partly owing to a certain number of persons who, when it appeared to be their chief pursuit, a Table (99) showing the trades and professions carried on by Farmers and other occupiers of land, in addition to the cultivation of the land, will be found at the end of this series of Tables for Farmers.

88.—FARMERS, with the NUMBER of LABOURERS employed, and of ACRES occupied, as returned at the CENSUS of 1851* in the following REGISTRATION COUNTIES :—BUCKINGHAM, CAMBRIDGE, CHESTER, CUMBERLAND, LINCOLN, NORFOLK, SALOP, SUSSEX, WILTS, and the NORTH RIDING of YORK.

						Annuitant	3

Many Farmers and occupiers of land, engaged in other pursuits besides farming, returned themselves as in the following examples:—"Farmer and Innkeeper (farming 9 acres, employing 9 labourers)"; "Miller and Farmer of 371 acres (employing 20 labourers and 2 boys)"; "Butcher and Farmer of 120 acres (employing 7 labourers and 2 boys)". In the Occupation Tables, Farmers having double or treble occupations were classified in conformity with the principle invariably adopted in the case of persons having more than one occupation; namely, to return them under that which appeared to be their chief or leading pursuit. The returns sometimes failed to distinguish the number of labourers engaged on the land from those employed by the same master in his other business; in these instances the labourers in the Table of Farmers will be over-stated as applied to the farms. Besides the persons included in the present Table there were, probably, many others in trades and professions who occupied land but omitted to state the fact in their returns.

TABLE 100.—NUMBERS and PROPORTIONS of FARM HOLDINGS of various Sizes in the REGISTRATION COUNTIES of BUCKINGHAM, CAMBRIDGE, CHESTER, CUMBERLAND, LINCOLN, NORFOLK, SALOP, SUSSEX, WILTS, and in the NORTH RIDING of YORK, as returned at the Censuses of 1851 and 1861.

SIZE OF FARM HOLDINGS IN ACRES.	NUMBER OF FARM HOLDINGS.		Of every 1,000 Farm Holdings, the proportional Number of the Size represented in the first column.	
	1851.	1861.	1851.	1861.
TOTAL - - -	52,552*	46,526*	1000·00	1000·00
Under 100 Acres - - - -	31,583	26,567	600·99	571·00
100- Acres - - - -	11,035	10,022	209·98	215·41
200- „ - - - -	4,863	4,666	92·65	100·29

400- „ - - - -	1,060	1,096	20·17	23·56
500- „ - - - -	648	640	12·33	13·76
600- „ - - - -	881	942	16·76	20·25
1,000 and upwards - - -	323	308	6·15	6·62

* The above numbers exclude 416 Farms in 1851, and 665 in 1861, from which no returns of *acreage* were received. Persons described in the Returns as “Farmers,” but who gave no information respecting either the *acreage* of the farms or the *number of men employed* are also excluded. In many cases, it is believed, these were not at the time of the Census actual occupiers of land, but retired farmers, farmers’ sons, &c. In 1861 the numbers of persons returned as farmers were 57,426, while the numbers in 1851 were 56,447; including 4,904 women in 1861, and 4,879 in 1851.

TABLE 101.—NUMBER of FARM HOLDINGS under 100 ACRES returned at the CENSUSES of 1851 and 1861 in the REGISTRATION COUNTIES of BUCKINGHAM, CAMBRIDGE, CHESTER, CUMBERLAND, LINCOLN, NORFOLK, SALOP, SUSSEX, WILTS, and in the NORTH RIDING of YORK.

IV.—MERCHANT SEAMEN.

TABLE 118.—NUMBER of MARINERS (including MASTERS, MATES, APPRENTICES, and BOYS) employed in BRITISH MERCHANT VESSELS and AFLOAT on 8th April 1861. (*Exclusive of Mariners who were dwelling on Shore or were absent from their Ships on 8th April 1861.*)

	Number of Mariners.
TOTAL of Mariners Afloat in British Merchant Vessels - - - - -	(a) 141,160
In Home Trade and Foreign-going British Vessels in the Ports of the United Kingdom, on 8th April 1861 :— (b) (c)	
In English Ports - - - - -	28,660
„ Scotch Ports - - - - -	4,377
„ Irish Ports - - - - -	7,960
„ Channel Islands and Isle of Man - - - - -	710
	41,707
In Home Trade Vessels absent on 8th April 1861, but which arrived in Port before 1st May 1861 - - - - -	17,398
In Foreign-going Vessels absent from the United Kingdom on 8th April 1861 (as stated by the Registrar General of Merchant Seamen) - - - - -	(d) 82,055

(a) The number of Seamen enumerated on SHORE in England and Wales and Channel Islands, &c. was 72,627, making a total of 213,787 afloat and ashore, exclusive of those ashore in Scotland and Ireland, the reports for which are not yet published.

(b) Home Trade Vessels are those trading on the Coasts of the United Kingdom, or to ports within the limits of the rivers Elbe and Brest. Foreign-going Vessels are vessels trading beyond those limits.

(c) Exclusive of 1,023 British Seamen employed in Foreign and Colonial Vessels. The Number of Mariners in Foreign and Colonial Vessels in the Ports of the United Kingdom, Channel Islands, and Isle of Man, on 8th April 1861, was as follows :—In English Ports 15,688, of whom 14,756 were Foreigners, 649 British, and 283 Natives of Colonies. In Scotch Ports 2,087, of whom 2,049 were Foreigners, 34 British, and 4 Natives of Colonies. In Irish Ports 1,499, of whom 1,123 were Foreigners, 338 British, and 39 Natives of Colonies. In Channel Islands and Isle of Man 62, of whom 60 were Foreigners, and 2 British; making a total of 19,336, of whom 17,937 were Foreigners, 1,023 British, and 326 Natives of Colonies.

(d) The Registrar General of Merchant Seamen and Shipping states in reference to this Return :—“24,772 Mariners employed in the Foreign Trade were in the United Kingdom in excess of the number of Seamen engaged in the same trade in 1851; this is accounted for by fewer vessels, but of much larger tonnage, with relatively augmented crews, being employed in the Foreign Trade in 1861, and a greater number of vessels being in port when the Census Return of that year was made.”

* Including the Islands in the British Seas.

† Including persons born at Sea.

‡ The increase of Irish in Colchester since 1851 is attributable to the formation of a Military Camp in the neighbourhood.

§ Within the limits adopted by the Registrar General for the weekly Table of Mortality.

Note. The Ages of the Inhabitants of these Towns will be found in Summary Table III. Vol. 2., and their Occupations in the detailed Tables of their respective Divisions.

TABLE 127.—Of the 2,061,093 PERSONS living in ENGLAND and WALES BORN in LONDON, the NUMBERS living in London and in the following Groups of COUNTIES.

GROUPS OF COUNTIES.	POPULATION 1861.	
I.—LONDON - - - -	1,741,177	On comparing this Table with the next it will be seen that London sent 107,816 of her children into, and received 222,319 from, the South-eastern Counties, leaving a balance of 114,503 in favour of London.
II.—SOUTH-EASTERN COUNTIES - - - -	107,816	
III.—SOUTH-MIDLAND COUNTIES - - - -	60,516	
IV.—EASTERN COUNTIES - - - -	37,664	
V.—SOUTH-WESTERN COUNTIES - - - -	23,649	
VI.—WEST-MIDLAND COUNTIES - - - -	31,776	
VII.—NORTH-MIDLAND COUNTIES - - - -	10,417	
VIII.—NORTH-WESTERN COUNTIES - - - -	21,565	
IX.—YORKSHIRE - - - -	12,540	
X.—NORTHERN COUNTIES - - - -	7,866	
XI.—MONMOUTHSHIRE AND WALES - - - -	6,607	

The Table may be read thus:—Of the 2,061,093 persons born in London and living in England and Wales, 1,741,177 were living in London, 107,816 in the South-eastern Counties, 60,516 in the South-midland Counties, at the time of the Census, and so on.

TABLE 128.—BIRTH-PLACES of the INHABITANTS of LONDON.

WHERE BORN.	Of the 2,803,989 Inhabitants of London the Number born in the several Groups of Counties and elsewhere.	Inhabitants of the Counties, and Countries from which the Immigrants came.	Of 100 Inhabitants of London the Proportion born in the several Groups of Counties and elsewhere.	To 100 Inhabitants of the several Groups of Counties the Proportion living in London who were born in the said Counties, &c.

OTHER STATES	1'25	'61	1'85	'48	'31	'04

In calculating the proportion per cent. of the natives of each country, the number of Foreigners whose Country of Birth was not ascertained has been omitted.

The Table may be read thus:—To every 100 Foreigners enumerated in England and Wales 15'50 were natives of France, 5'30 of Italy, and 25'59 of Germany. To every 100 Foreigners enumerated in London, 16'87 were natives of France, 5'00 of Italy, and 30'53 of Germany. By disregarding the decimal point the proportions will read to 10,000; thus, to every 10,000 Foreigners enumerated in England and Wales, 1,550 were natives of France, 279 of Switzerland, 169 of Spain, and so on for other countries.

ENGLAND AND WALES.

THE BLIND.

The Table may be read thus:—To every 10,000 Males living in England and Wales there were 10.5 Blind; 7.0 Deaf-and-Dumb; 63.7 Paupers in Workhouses; 21.7 Prisoners; 11.5 Lunatics in Asylums; and 6.1 Patients in Hospitals.

Asylum for Pauper Lunatics of the Counties of Oxford and Berks is situate in that part of the Liberty of Littlemoor which is in the Registration County of Berks, in the Civil County of Oxford.

Asylum for Pauper Lunatics of the Counties of Hertford, Huntingdon, and Bedford is situate in Bedfordshire.

A large proportion of lunatics in asylums to the population in the County of Wilts arises from the circumstance of several private lunatic asylums (including Fisherton containing 386 inmates) being situate in the county, in addition to the County Asylum.

Asylum for Pauper Lunatics of the County of Hereford is situate in Monmouthshire. The Pauper Lunatics for the Counties of Brecon and Radnor are included in the numbers returned for Monmouthshire.

Pauper Lunatics for the County of Montgomery are included in the numbers returned for Shropshire.

Asylum for Pauper Lunatics of the County of Derby is situate in the Township of Mickleover, which is in the Registration County of Stafford, but in the Civil County of Derby.

Asylum for Pauper Lunatics of the County of Rutland is situate in Leicestershire.

Asylum for Pauper Lunatics of the North and East Ridings of Yorkshire is situate in the Clifton Township, which is in the Registration East Riding, but in the Civil County of Yorkshire.

Pauper Lunatics for the Counties of Cumberland and Westmorland were included, at the time of the Census, in the numbers returned for the Dunston Lodge Asylum in the Township of Lowside. Since the Census of 1861 a new asylum for the Pauper Lunatics of Cumberland and Westmorland has been opened near Carlisle.

Males	165,584	113,384	49,035	3,165
Females	165,273	107,822	49,069	8,382

TABLE 164.—OCCUPATIONS, 1861.—The following are the employments in which the largest numbers are engaged:—

Farmers	37,897	Shoemakers	1,976
Farm Labourers	9,306	Blacksmiths	1,518
Fishermen	7,659	Merchants	1,472
Mariners	5,243	Coopers	1,145
Carpenters	4,463	Shipwrights	1,122
Labourers (undefined)	3,908		

There were 385 Clergymen and Ministers, 205 Physicians and Surgeons, 147 Barristers and Attorneys, 864 Teachers, and 665 Miners.

It is stated that many persons ordinarily employed in farming are in certain seasons engaged in the fisheries, keeping boats for the purpose.

TABLE 165.—COUNTRY of BIRTH of the POPULATION of NOVA SCOTIA, 1861.

TABLE 167.—NUMBER of DEAF-AND-DUMB, BLIND, LUNATICS, and IDIOTS in NOVA SCOTIA, 1861.

		DEAF-AND-DUMB.	BLIND.	LUNATICS.	IDIOTS.
TOTAL	- -	300	185	245	317
Males	- -	165	93	121	178
Females	- -	135	92	124	139

The Deaf-and-Dumb are in the proportion of 1 in every 1,100 of the population; the Blind 1 in 1,788; the Insane 1 in 970. There is an Institution for the Deaf-and-Dumb at Halifax, with 42 pupils in 1860.

MORTALITY in NOVA SCOTIA.—In the year ended 30th March 1861 the deaths were 4,679, or 14 in 1,000 of the population. One-third of the deaths were those of children under five years; the rate of mortality was much higher than usual, diphtheria having carried off more than 1,000 persons during the year. In 1851 the rate of mortality was 10 in 1,000.

HALIFAX CITY.—Population in 1861, 25,026; deaths in year ended 30th March 1861, 324.

10. PRINCE EDWARD'S ISLAND.

Area in Square Miles.	TOTAL POPULATION.			COLOUR.*								
	PERSONS.	Males.	Females.	WHITE.			BROWN.			BLACK.		
				PERSONS.	Males.	Females.	PERSONS.	Males.	Females.	PERSONS.	Males.	Females.
6,400	441,264	213,521	227,743	13,816	7,295	6,521	81,065	38,223	42,842	346,374	167,277	179,097

* There is an unexplained discrepancy between the numbers returned under "Colour" and the general total of population.

INCREASE.—The previous Census of Jamaica, taken in 1844, exhibited a total of 377,433 souls. Governor Darling remarks, however, that "it was generally understood at the time that this " Census was very imperfectly taken, and that the population was returned at much below the " reality. The present Census gives a total of 441,264 souls. This is also below the number, for " there is no doubt that in some districts the enumeration was not made with the care which " should have been applied to the discharge of a duty of the kind. I have never met with any " one who has demurred to the belief I myself entertain, that the total would be more correctly " placed at 450,000, whilst many are of opinion that it considerably exceeds even that amount. " Considering that the community has in the interval between the two enumerations been twice " visited by cholera and twice by small-pox—the former of which maladies is said to have claimed " at least 40,000 victims—and that the increase by immigration since 1844 has not exceeded " 12,238, the result is much more favourable than was expected by many attentive observers, and " amongst these by medical men, some of whom have not been slow to conclude that the paucity " of their own number in comparison with the extent of the population, and their entire absence " in some districts, forbade the possibility of that increase, which, however, has undoubtedly taken " place. Upon the white population there appears, indeed, to have been a decrease during the " 17 years at a rate of about 13 per cent, the number in 1844 being 15,776, in 1861 13,816, " while the coloured population, as it is called in the Census of 1844, or 'Brown,' as it is " denominated in that of 1861, has increased at the rate of about 20 per cent, the numbers being " respectively, in 1844, 68,529; in 1861, 81,065; and the Black population at the rate of 18 per " cent, their numbers being recorded in 1844 at 293,128; in 1861, 346,374. Those who held the " opinion that the population had decreased, founded it mainly upon their belief in the great " increase of infant mortality, but a comparison of the returns shows that this belief is erroneous; " for in 1844, when the total population was reckoned at 377,433, the number of children under " five years of age was taken at 51,707, or about one-seventh of the whole; while in 1861, with " a population of 441,264, the number under five has been determined at 61,137, which it will be " seen is as nearly as possible in the same proportion."

TABLE 185.—AGES of the TOTAL POPULATION of JAMAICA, 1861.

TOTAL.	Under 2 Years of Age.	From 2 to under 5 Years.	From 5 to under 10.	From 10 to under 15.	From 15 to under 20.	From 20 to under 30.	From 30 to under 40.	From 40 to under 50.	From 50 to under 60.	From 60 Years and upwards.	Not stated.

Domestic Servants	16,073	Seamstresses and Washerwomen	11,055
Fishermen, Boatmen, Seamen, and Mariners	2,423	Various Trades and Miscellaneous Callings, and Occupations not included in the foregoing	4,206
Lodging House and Tavern Keepers	59	Children of tender Years and Persons of no Occupation	99,842
Medical Men	94		
Ministers of Religion	276		

The return states that the Occupations cannot be relied upon for exactness, especially under the heads of Ministers of Religion, Public Officers, Soldiers, and Children of tender Years and Persons of no Occupation.

Governor Darling, in the *Blue Book* for 1860, remarks: "The formation of a middle class or body of small farmers, to which I have more than once referred, is making progress, and promises, I continue to think, social results of a highly satisfactory character."

16. BRITISH HONDURAS.

TABLE 191.—AREA, and POPULATION of BRITISH HONDURAS, according to the CENSUS taken on 8th April 1861.

AREA in Square Miles.	PERSONS.	Males.	Females.	RACE.								
				Anglo-Saxon.	Anglo-African.	Pure Indians.	Mixed (Indian predominant).	Spanish and Indian (Spanish predominant).	African.	Carib.	Pure Spanish.	Other Races.
17,000	25,635	13,789	11,846	880	2,544	4,675	4,340	3,693	2,528	1,825	1,713	3,437

The Acting Superintendent, Mr. Price, remarks on the return:—"I believe this is the first Census taken with any precision. I do not now think our information is quite to be depended upon, and I am disposed to think our numbers under-rated by 4,000 or 5,000. However that may be, it is evident that we have room here for a population a hundredfold larger than we now have. The inhabitants embrace a peculiarly great variety of nationalities; thirty-seven countries and forty-two races (including mixtures, of course) are represented in this settlement."

18. ANTIGUA AND BARBUDA.

TABLE 201.—POPULATION enumerated on 8th April 1861.

—	AREA in Square Miles.	PERSONS.	Males.	Females.	White.	Black.	Coloured.
Antigua -	108	36,412	16,742	19,670	2,556	27,237	6,619
Barbuda -	75	713	318	395	4	446	263
TOTAL -	183	37,125	17,060	20,065	2,560	27,683	6,882

INCREASE.—At the previous Census in 1856 the population of ANTIGUA was 35,408 ; the net increase, after making allowance for persons in vessels omitted in 1856, is 769. In 1851, however, the population was 37,136, or 724 more than in 1861. Governor Hamilton remarks, “There is no record kept of persons who leave the island, the number of whom is probably considerable.”

THE SEXES.—The proportions between the sexes are for the whole Island of Antigua as 117 females to every 100 males ; and in the chief town (St. John's) 155 females to 100 males—a remarkable disparity of the sexes. The preponderance of females begins at the earlier ages and continues to increase until between 70 and 80 years of age, when the females are twice as numerous as the males.

The Colonial Secretary remarks:—"With the exception of the very large proportion of seamstresses, the occupations are in number and description such as might have been expected. At least one-half of the population appears to consist of what are called the productive classes, the agriculturists numbering 13,859. Of the 11,073 whose occupations have not been specified, nine-tenths in all probability will be found to consist of children under 10 years of age, and others who, though actively and usefully employed, have found it difficult to designate their peculiar avocation."

19. ST. CHRISTOPHER'S AND ANGUILLA.

TABLE 207.—AREA, and POPULATION according to the CENSUS taken 8th April 1861.

	AREA in Square Miles.	POPULATION.		
		PERSONS.†	Males.	Females.
	103*	24,303	11,303	13,000

* St. Kitts, 68 square miles; Anguilla, 35.

† The number of Whites is stated to be "about 2,200."

INCREASE.—According to the Census of 1st January 1855 the population was 20,741; it has, therefore, increased by 3,562 souls since that Census. A part of the increase is due to immigration. Lieut.-Governor Sir Benjamin Pine, in a report transmitted with the *Blue Book* for 1860, observes: "Since 1855 about 620 Portuguese from Madeira have arrived in this island, of which, probably, 50 have since left it for other colonies. A small number of refugees from the Dutch islands, where slavery still exists, and also some few persons from the neighbouring French and Swedish islands, have settled here since 1855. After making allowance for these accidental accessions, it seems that the natural increase of the population has amounted to about 3,000 souls. * * * *"

It appears that the population of the town of Basseterre has increased to the extent of 1,920. As to the rest of the population, the Census does not distinguish between the part of it settled in the towns and villages and the part of it settled on estates. I am of opinion, however, that a general migration has taken place of late years from the latter to the former."

AGES.—As regards age the returns furnish only the numbers under and above 10 years; viz.—

	Under 10 Years.			10 Years and upwards.
Males	-	-	3,206	8,097
Females	-	-	3,271	9,729
TOTAL	-	-	6,477	17,826

TABLE 208.—NUMBER of BIRTHS and DEATHS in the Years 1859 and 1860.

YEAR.	BIRTHS.								DEATHS.								
	TOTAL.			LEGITIMATE.		ILLEGITIMATE.			TOTAL.			ONE YEAR AND UNDER.		BETWEEN 1 AND 14 YEARS.		ADULTS.	
	Males and Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males and Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	
1859	1,072	558	514	284	292	274	222	783	427	356	198	140	63	69	166	147	
1860	1,110	555	555	302	317	253	238	1,065	540	525	234	199	129	129	177	197	

The excess of 282 deaths in 1860 over the number in 1859 is attributed to the prevalence of diphtheria, which carried off 165 persons, and partly to other causes, showing "that there is still room for the application of medical care." It will be seen that the illegitimate births bear a large proportion to the legitimate, being 496 to 576 in 1859, and 491 to 619 in 1860.

TABLE 209.—**ANGUILLA**.—This island is a part of the Lieutenant Government of St. Christopher's, from which it is distant about 60 miles. It contains an area of about 35 square miles. Population about 2,500, of whom about 100 are white. Lieut.-Governor Sir B. Pine remarks: "In former times this island was productive and prosperous, but of late years it has sunk into nearly total ruin, and a large part of its population has at times been reduced almost to starvation. This has been attributed to the severe droughts which visit the island. * * * The black and coloured population are among the most intelligent of their class in the West Indies. This fact has been attributed to the circumstance that these people, owing to their straitened condition at home, are constantly roaming about the other islands seeking employment and carrying on petty trade. The people are, however, generally indolent."

20. NEVIS.

TABLE 210.—AREA, and POPULATION according to the CENSUS of 1861.

AREA in Square Miles.	POPULATION.					
	PERSONS.	Males.	Females.	White.	Black.	Coloured.
20	9,822	4,526	5,296	260	7,508	2,054

INCREASE.—The Administrator of the Government states that no Census of Nevis had been taken for 17 years until 8th April 1861. He adds: "I find the opinion very generally prevailing that there has been considerable increase in the population since 1844, notwithstanding that the losses from epidemic cholera in 1855 are known to have reached 1,000." (*Blue Book*, 1860.)

* Acting Governor Berkeley remarks in forwarding the returns—"In addition to the value to be placed, in a statistical point of view, on a correct return of this description, it is gratifying to consider that the undertaking has, in the present instance, been accomplished without any hindrance or opposition on the part of the inhabitants; whereas, on the last occasion, an attempt of a similar nature was attended with a very serious outbreak of popular feeling."

WINDWARD ISLANDS.

23. ST. LUCIA.

TABLE 217.—AREA, and POPULATION of ST. LUCIA according to the CENSUS taken 13th May 1861.

AREA in Square Miles.	PERSONS.	Males.	Females.	White.	Black.	Coloured.
250	26,674	13,124	13,550	928	18,089	7,657

INCREASE.—The population in 1851 was returned as 24,290, but the machinery for taking the Census is said to have been defective. The effects of the ravages of cholera since 1851 have been counterbalanced by the natural increase of population, the accession of settlers from the neighbouring islands, particularly Barbados and Martinique, and the introduction of about 1,200 Indian labourers in 1859 and 1860.

AREA in Square Miles.	POPULATION.		
	PERSONS.	Males.	Females.
133	31,900	15,413	16,487

DECREASE.—The enumerated population on 3rd October 1851 was 32,671. The decrease of 771 persons, equal to 2·36 per cent. for the period of 9½ years, is attributed by Mr. Mitchell, Commissioner-General, “partly to emigration, but chiefly to the effects of cholera in 1854, which swept off, within a period of three months, 3,778 of the inhabitants. The withdrawal of the military in the same year has also contributed in some extent to the decrease of the population. * * *

“The decrease would have been still greater were it not for the 879 Indian immigrants introduced during the last few years, and 214 liberated Africans during this and the last year.” It is further stated that the falling off is partly owing to a considerable number of the labouring class having purposely absented themselves from the island of Carriacou in order to avoid making the returns, believing or feigning to believe that their names were required for the purpose of imposing a poll tax on them.

* Parliamentary Return No. 147, Session 1863.

INCREASE.—In 1851 the population was 69,609; the increase is therefore 14,829. Of this number 9,319 persons are derived from India and 461 from China, leaving 5,049, or rather less than 8 in 1,000 per annum, as the natural increase of the Native, Colonial, European, and African population. Cholera carried off 7,483 persons in 1854. The preponderance of males (to the number of 7,710) arises in a great measure from the introduction from India of a large majority of males; the existing arrangement provides, however, that an adequate number of females shall accompany each importation of Indian immigrants.

76,000	155,026	148,026	79,644	68,382	7,000	11,488 143,538

29. BRITISH GUIANA—*continued.*

INCREASE.—Exclusive of the native Indians residing within the territory, the population in 1851 was 125,692; the returns for 1861, exclusive of aborigines and military, show an increase of 22,334, or 17·77 per cent., in ten years. A considerable immigration into British Guiana had taken place during the decade. The number of East Indians in 1851 was 7,682; in 1861 there were 24,710 East Indians and Chinese, including their children born in the colony; in the ten years 9,450 immigrants had been introduced from Madeira and the Cape de Verde Islands, and 1,508 from St. Helena and Sierra Leone. Some of the Coolie immigrants had returned to India and some Portuguese to Madeira. The mortality amongst the natives of Madeira is stated to have been considerable. Population in 1861 of chief town—Georgetown, Demerara—29,174.

Number of BIRTHS and DEATHS in 1860.—Births, 747; Deaths, 1,093.

Number of SCHOOLS and SCHOLARS, 1860.—Schools, 71; Scholars, 11,016.

32. GOLD COAST.

TABLE 256.—AREA.—The British territory, strictly speaking, is limited to the forts and to the distance of a cannon shot around them, but British influence and jurisdiction extend over an area variously estimated at from 6,000 to 8,000 square miles.

POPULATION.—According to a return for the year 1858, printed in the volume issued by the Board of Trade, the Gold Coast settlements contained 151,346 inhabitants (including 70 whites), "exclusive of the Assin territory, which is not supposed to contain more than 5,000 persons." The same return (151,346) is given in Parliamentary Paper No. 147, Sess. 1863. Governor Andrews, however, in a despatch accompanying the *Blue Book* for 1860, gives a widely different statement. He remarks: "To take a census of the population would be, if not impracticable, at all events a most expensive proceeding. The prejudice the natives have against such a measure may appear strange to a civilized community, when informed that the grounds for dislike rest on the supposition that some fearful fatality would be sure to follow. It is, therefore, not to be wondered at that people so superstitious would make every attempt to evade the accomplishment of such an undertaking. There can be no doubt that the population for the extent of territory is sparse—for hours together you may travel in the interior and not meet with a human being. The population, I am persuaded, has been much exaggerated when I have seen it noted down as high as 900,000; probably the proximate number would be 450,000, distributed by 200,000 living on the seaboard and within a day's journey from the coast; the remainder scattered in various interior parts of the protectorate."

Justice is administered to this large population by British magistrates. From the force of circumstances the custom of domestic slavery has to be recognized.

33. CAPE OF GOOD HOPE.

TABLE 257.—AREA, and POPULATION according to the latest Returns in 1856.

AREA in Square Miles.	POPULATION.				
	TOTAL.	White.	Coloured.	Aliens.	Various,— Malays, &c.
104,931	267,096	102,156	129,167	10,584	25,189

In the *Blue Book* for 1860 the population of the Cape Colony (including 10,584 aliens) is stated to be 260,196; viz., West Division 147,067, East Division 113,029.

34. BRITISH KAFFRARIA.

TABLE 258.—British Kaffraria was separated from the Cape Colony and constituted a separate colony by Letters Patent in 1860. Its progress is said to have been greatly promoted by the introduction of a number of English and Dutch farmers from the neighbouring colony, who hold their grants of land under military servitude and the payment of an annual ground-rent.

AREA - About 5,000 square miles.

POPULATION in 1861* - Total 81,353 - { European 6,705.
(including Military, about 2000.) { Native - 74,648.

TABLE 259.—AREA, and APPROXIMATE POPULATION in 1860.

AREA in Square Miles.	POPULATION.			WHITE.			COLOURED.		
	TOTAL.	Males.	Females.	TOTAL.	Males.	Females.	TOTAL.	Males.	Females.
14,337*	157,583	74,503	83,080	11,950	6,749	5,201	145,633	67,754	77,879

* Parliamentary Return No. 147, Session 1863.—The Board of Trade Tables, however, give 18,000 square miles as the area; and another authority, the *Colonial Office List* for 1863, states that the colony "comprises an area of about twelve millions and a half of acres" = 19,375 square miles.

Lieut.-Governor Scott, in a despatch dated 18th August 1862, writes to the Duke of Newcastle:—"The importance of obtaining periodically a census of the population of this colony has not been overlooked by the Government, but no law has been passed for this purpose because of the probable effect the taking of a census of our native tribes might have on these uncivilized people. On this subject I would beg to refer your Grace to my Despatch No. 38, 2nd June 1858, and to Sir E. B. Lytton's reply, No. 21,

35. NATAL—continued.

“ of the 25th August 1858. The natives have apparently a strong objection to being numbered, and cannot understand that it is made only for purposes of general usefulness, and not with any view of effecting their relations with the Government. We have the means of obtaining an approximate census of the natives in the collection of the yearly hut tax, and we have not deemed it expedient to run any risk of arousing the suspicions of the natives by adopting any more accurate procedure; indeed, a census taken in the manner pursued in reference to the numbering of a civilized people could not be carried out; it would require to be done through the various resident magistrates, and would be a work of labour and much time. A census of the colonists could no doubt be obtained periodically; and in the interim between this time and the next session of the Legislative Council I will give the whole subject my full consideration, with the view to enacting a law for the purpose.”

ISLANDS IN THE SOUTH ATLANTIC OCEAN.

36. ST. HELENA.

TABLE 260.—AREA, and POPULATION of the Island of St. HELENA, according to the CENSUS of 7th April 1861.

	AREA in Square Miles.	POPULATION.		
		PERSONS.	Males.	Females.
	47	6,860*	3,774	3,086

* Including Garrison 948 (viz., 760 males and 188 females), and Shipping 416 (viz., 404 males and 12 females).

INCREASE.—The above numbers show an increase of 727 in the number of inhabitants since the Census of 1851. Of late years the demand for labour in the island has greatly increased, and wages to artificers and labourers are said to have advanced at least 50, and in some instances more than 100, per cent.

TABLE 261.—AGES of the POPULATION of St. HELENA, 1861 (exclusive of Garrison and Shipping).

	TOTAL.	Males.	Females.
7,600*	536*	352	214

* Parliamentary Return No. 147, Session 1863.—In the Board of Trade Tables the area is stated to be 13,000 square miles.

POSSESSIONS IN THE INDIAN OCEAN, AND HONG-KONG.

38. MAURITIUS.

TABLE 267.—AREA, and POPULATION of MAURITIUS, according to the CENSUS taken in April 1861.

AREA in Square Miles.	POPULATION.				
				TOTAL.	Females.
708	TOTAL	-	-	322,517	211,003
	Resident Population	-	-	310,050	202,961
	Military in Port Louis and elsewhere	-	-	2,350	2,105
	Crews of Mercantile Shipping	-	-	1,062	1,044
				313,462	206,110
	Seychelles	-	-	7,486	3,767
	Rodrigues and other Dependencies	-	-	1,569	1,126

INCREASE.—The progress of population in Mauritius is shown by the following results of the three last enumerations :—

Year.	Resident Population.	Military and Shipping.	Total.	Increase per Cent.
1846	158,462	2,627	161,089	14.1
1851	180,823	2,683	183,506	
1861	310,050	3,412	313,462	72.0

The total increase since 1846 is 152,373 persons, or 96.3 per cent. The resident population of Port Louis (City and District) in 1861 amounted to 74,525, being 24,616 more than in 1851. Persons to a square mile, 437 in 1861.—In Seychelles and other dependencies of Mauritius the population in 1851 was 8,001; increase in ten years, 1,054.

TABLE 268.—AGES of the RESIDENT POPULATION of MAURITIUS, 1861.

SEX.	ALL AGES.	Under 1.	1 and under 5.	5—	10—	15—	20—	25—	30—	35—	40—	45—	50—	55—	60—	65—	70—	75—	80—	85—	90—	95—	100—	Not stated.
Males -	202,961	3,691	13,110	14,247	13,924	15,741	22,173	26,964	29,103	22,603	14,786	8,724	6,024	3,105	2,984	1,213	873	343	206	71	51	23	16	2081
Females	107,089	3,891	13,231	12,968	10,372	10,124	11,196	11,792	9,808	6,760	5,084	3,167	2,747	1,531	1,617	685	502	251	126	35	35	13	7	1147

In every 100 persons of all ages, 65.6 are males and 34.4 are females. Under 15 the proportions are—males 14.5, females 13.1; between 15 and 50—males 45.4, females 18.7. The centesimal proportion of females to males in the whole resident population is 52; of women to men in the Indian population, 34.

38. MAURITIUS—*continued.*

TABLE 269.—CIVIL CONDITION of the RESIDENT POPULATION of MAURITIUS, 1861.

	TOTAL.	Males.	Females.
TOTAL - - - -	310,050	202,961	107,089
Married - - - -	47,032	24,236	22,796
Unmarried - - - -	89,399	63,109	26,290

Others - - - -	356	356	—				
	16,461	15,159	1,302				

The proportion of the whole male population engaged in *agriculture* amounts to 47 per cent.; in *commerce, trade, and labour* other than *agricultural*, about 20 per cent. The number of males employed on sugar estates is 89,961, of whom 84,380 are Indians, or born of Indian parents; the number of Indian origin thus employed in 1851 was 41,887, or less than one-half. In other pursuits the employment of the Indian population has also largely increased.

	TOTAL.	WHITE.			COLOURED.			ALIENS and STRANGERS.
		PERSONS.	Males.	Females.	PERSONS.	Males.	Females.	
24,700	1,919,487*	6,696	4,044	2,652	1,885,844	971,073	914,771	26,947

* Including the military and their families, 4,786 persons, viz., 1,345 white and 3,441 coloured. In a statement made before the International Statistical Congress in London, 1890, Governor Sir C. J. MacCarthy, who represented Ceylon, referred to the difficulties attending the ascertainment of the correct population of the island, where an inquiry on the model of the English Census would excite suspicion if it did not produce groundless discontent amongst the people, who would regard it as a mere preliminary to a tax. Sir Charles stated that he had reason to believe the returns made by the local authorities were defective, and that the real population of the island was upwards of 2,000,000 of souls.

39. CEYLON—*continued.*

TABLE 279.—NUMBER of BIRTHS, MARRIAGES, and DEATHS in each of the Years 1859, 1860, and 1861.

YEARS.	BIRTHS.	MARRIAGES.	DEATHS.
1859	43,767	22,022	28,534
1860	50,663	22,391	37,718*
1861	46,751	18,310	37,480

* In the year 1860 the ravages of fever among the native population of many of the provinces are said to have been almost unprecedented. The Government Agent of the Southern Province reported that in some districts sickness prevailed in every village. He found houses abandoned, the country almost desolate, and in addition to the scourge of fever, famine also threatened, owing to the crops having been destroyed by the long-protracted drought. The North-western Province presented a picture no less melancholy; whole villages were deserted, and in one district alone the Government Agent estimated the deaths at little short of 6,000 in three months. Of 2,185 cases of cholera treated in the Government Hospitals, upwards of two-thirds—viz., 1,521—proved fatal. (*Blue Book*, 1860.)

TABLE 280.—NUMBER of PERSONS engaged in AGRICULTURE, MANUFACTURES, and COMMERCE in 1861.

AGRICULTURE.	MANUFACTURES.	COMMERCE.
549,759	58,773	100,375

40. HONG-KONG.

TABLE 281.—AREA, and POPULATION of the COLONY of HONG-KONG, according to the CENSUS of 31st December 1861 (exclusive of MILITARY stationed in the Colony and the CREWS of Her Majesty's Ships in the Harbour).

AREA in Square Miles.	POPULATION.										
	TOTAL.			EUROPEAN AND AMERICAN.			CHINESE AND OTHERS.			Number residing on Shore.	Number living in Boats.
	PERSONS.	Males.	Females.	PERSONS.	Males.	Females.	PERSONS.	Males.	Females.		
32	119,321	87,945	31,376	1,557	1,146	411	117,764	86,799	30,965	88,412	30,909

The above numbers give an increase in the total population of 20,404 on the Census of 31st December 1860, a portion of which is attributable to the acquisition of the Kowloon Peninsula. The 117,764 returned as "Chinese and others" are composed of 116,380 Chinese, 1,284 natives of Goa and Manilla, Indians and others of mixed blood, 100 aliens chiefly seamen and temporary residents. On 31st December 1860 the boat population was 28,559; viz., 19,558 males, and 9,001 females.

HOUSES AND BOATS.—European houses, 1,244; viz., 177 public buildings and 1,067 private dwellings, shops, and offices. Chinese houses, 4,939. Boats, 4,284—viz., junks, 32; cargo boats, 291; fishing boats, 692; Hakow and Pullaway boats, 304; sampans, 2,557; lorchas, 5; others, 403.

The following observations of Governor Sir Hercules Robinson on the population return for 1860 appear in the *Blue Book* for that year:—"The island has no natural advantages beyond a good harbour, happily situated at the southern threshold of the Chinese Empire, and forming, as it were, the entrance gate of its seaboard. It has neither agriculture nor manufactures. It produces nothing for either export or consumption, and is not capable of growing supplies sufficient to feed its inhabitants for one single day. The population must, therefore, be fed by sea-borne supplies, and the numbers must, I conceive, be limited to the amount of fixed employment which can at all times be found here. If we could offer the starving myriads of the opposite continent unlimited employment, which would yield the settler even two meals a day of rice and fish, with twopence a day for tobacco and luxuries, with common shelter and commonest clothing, I believe we might congregate a million souls under our rule within two years; but we have no such field of labour to offer, or fixed employment of any importance beyond the labour connected with our harbour and our public and private works."

41. LABUAN.

TABLE 282.—AREA, and POPULATION of the ISLAND of LABUAN in 1860.

AREA in Square Miles.	POPULATION.								
	TOTAL.			WHITE.			COLOURED.		
	PERSONS.	Males.	Females.	PERSONS.	Males.	Females.	PERSONS.	Males.	Females.

* Including 160 military, viz., 8 white and 152 coloured.

According to the *Blue Book* for 1859, the population of Labuan was in that year 1,774, including only 16 whites.

AUSTRALIA AND NEW ZEALAND.

42. NEW SOUTH WALES.

TABLE 283.—AREA, and POPULATION according to the CENSUS of 7th April 1861.

AREA in Square Miles.	POPULATION.				
	PERSONS.	Males.	Females.	Of European Origin.	Chinese.
323,437	350,860*	198,488	152,372	337,874	12,986

* Exclusive of the crews of Colonial vessels at sea, and of the roving aborigines.

INCREASE.—On the 1st March 1856, exclusive of the Northern Districts (erected in the year 1859 into the colony of Queensland), the population of New South Wales was 249,282 persons; an addition of 101,578 persons, or 40·75 per cent., has taken place in the interval of little more than five years. The natural increase by the excess of births over deaths was 36,818, or 14·76 per cent., leaving the balance of 64,760 persons, or 26 per cent., to be supplied by immigration. Exclusive of Chinese the immigrants between 1856 and 1860 were 37,409 males and 14,922 females.—Population of the city of Sydney, 56,394 in 1861.

TABLE 284.—AGES of the POPULATION of NEW SOUTH WALES, 1861.

SEX.	ALL AGES.	Under 5 Years.	5—	10—	15—	20—	25—	30—	35—	40—	45—	50—	55—	60—	65—	70—	75—	80 & up- wards.	Unspe- cified.
Males - -	198,488	28,118	20,849	18,082	16,445	18,158	20,307	16,823	12,166	12,166	9,333	7,843	4,207	4,253	1,502	1,027	403	390	6,416
Females - -	152,372	27,722	20,815	17,635	17,201	15,210	14,125	10,022	7,861	7,574	5,021	3,825	2,027	1,045	687	439	211	137	215
Per Cent. { Males -	56·57	8·01	5·94	5·15	4·69	5·18	5·79	4·79	3·47	3·47	2·66	2·24	1·20	1·21	0·43	0·29	0·11	0·11	1·83
{ Females	43·43	7·90	5·93	5·03	4·90	4·33	4·03	2·88	2·24	2·16	1·43	1·09	0·58	0·47	0·20	0·12	0·08	0·04	0·06

Casting out the Chinese element (numbering 12,986), the population of European origin furnishes the proportion of 54·9 per cent. of males to 45·1 per cent. of females; in other words, to every 1,000 males there are only 821 females. Up to 20 there is a remarkable equality in the sexes; from this period the deficiency of females becomes apparent. The “unspecified” ages have reference chiefly to the Chinese population.

TABLE 285.—CIVIL CONDITION of the POPULATION of NEW SOUTH WALES, 1861.

	TOTAL.	UNMARRIED.	MARRIED.	Widowers and Widows.	Unspecified.

43. QUEENSLAND.

TABLE 290.—AREA, and POPULATION of the COLONY of QUEENSLAND, according to the CENSUS taken on 7th April 1861.

	AREA in Square Miles.	POPULATION (exclusive of Aborigines).			ABORIGINES, Estimated Number.
		PERSONS.	Males.	Females.	
	678,000*	30,059	18,121	11,938	15,000

* Statistical Register of Queensland for 1861; of this territory 560,000 square miles lie east of longitude 141°, and 118,000 between 141° and 138°; approximate area of country occupied by pastoral stations, 195,000.

INCREASE.—In 1856, when the colony was a portion of New South Wales, the territory which now forms Queensland contained a population of only 16,907; it has therefore increased in five years by the addition of 13,152 souls, or at the rate of 77·8 per cent. The natural increase by excess of births over deaths has been 3,133, or 18·5 per cent.; the remaining increase of 10,019, or 59·3 per cent., is therefore the result of immigration, intercolonial as well as European. Deducting 538 Chinese, the proportion of the sexes is about 68 females to 100 males.

TABLE 291.—AGES of the POPULATION, 1861.

—	ALL AGES.	Under 1 Year.	1 and under 5.	5—	10—	15—	20—	25—	30—	35—	40—	45—	50—	55—	60—	65—	70—	75—	80 and upwards. Unspecified.	
Males -	18,121	652	2,069	1,564	1,085	1,093	2,082	2,567	2,103	1,467	1,314	869	658	273	168	60	29	12	8	48
Females -	11,938	637	2,115	1,640	1,030	1,015	1,233	1,390	945	683	522	325	218	82	56	10	18	2	3	14

Assuming those under 10 years of age and over 70 to be *non-producers*, the return shows that 29·1 per cent. of the population may be so classed; the remaining 71 per cent., between the ages of 10 and 70, constitute the producers who have to maintain and educate the former class.

TABLE 292.—CIVIL CONDITION of the PEOPLE of QUEENSLAND, 1861.

	TOTAL.	Unmarried.	Married.	Widowed.	Unspecified.
Males -	18,121	12,680	5,073	356	12
Females -	11,938	6,828	4,818	291	1

Out of every 100 males 28·0 are married, and out of every 100 females 40·4 are married; but deducting those under 15 years of age, the proportions will be,—males 39·8, females 73·9 per cent.

43. QUEENSLAND—*continued.*

Can read and write	-	-	- 17,152 or 57·1 per cent.
	30,059		

Of children between 5 and 15 years of age, 5,319 in number, 3,163 or 59·46 are said to be "to all good purposes uneducated."

44. VICTORIA.

TABLE 297.—AREA, and POPULATION of the COLONY of VICTORIA, according to the CENSUS taken on 8th April 1861.

AREA in Square Miles.	POPULATION.			CHINESE and ABORIGINES included in the foregoing numbers.			
	PERSONS.	Males.	Females.	CHINESE.		ABORIGINES.*	
				Males.	Females.	Males.	Females.
86,831	540,322	328,651	211,671	24,724	8	1,046	648

* It is not supposed that all the aborigines were enumerated, but it is considered certain that their number does not exceed 2,000.

INCREASE.—By the Census of 1851, taken shortly before the discovery of the gold, the population of the colony was 77,345; that number has in ten years increased by 462,977 persons, or about 600 per cent. The growth of the population is shown by the results of the subsequent enumerations:—

45. SOUTH AUSTRALIA.

TABLE 301.—AREA, and POPULATION of the PROVINCE of SOUTH AUSTRALIA, according to the CENSUS taken 8th April 1861.

AREA in Square Miles.	POPULATION, exclusive of Aborigines and migratory Persons.			ABORIGINES.		
	PERSONS.	Males.	Females.	PERSONS.	Males.	Females.
383,328	126,830*	65,048	61,782	5,046	2,642	2,404

* An addition of 1,170 may be made for unenumerated and migratory population.

INCREASE.—The numerical and centesimal increase of the population of South Australia will be shown by the following Table :—

TABLE 302.

CENSUS OF	PERSONS (exclusive of Aborigines, &c.)	INCREASE ON PREVIOUS CENSUS.	
		Numerical.	Per Cent.
1844	17,366	—	—
1846	22,390	5,024	28·93
1850	63,700	41,310	184·50
1855	85,189	21,489	33·73
1861	126,830	41,641	48·88

The natural increase during the six years from 1855 added nearly a fourth to the population, and immigration gave the same increase.—Population of the City of Adelaide, 18,303 in 1861.

TABLE 303.—AGES of the PEOPLE of SOUTH AUSTRALIA, 1861 (exclusive of unenumerated and migratory Population and Aborigines).

SEX.	ALL AGES.	Under 5 Years.	5 and under 10.	10 and under 15.	15 and under 21.	21 and under 26.	26 and under 31.	31 and under 36.	36 and under 41.	41 and under 46.	46 and under 51.	51 and under 56.	56 and under 61.	61 and under 66.	66 and under 71.	71 and under 76.	76 and under 81.	81 and upwards.	Un-specified.
Males—	65,048	12,237	8,956	6,653	6,459	5,377	6,050	4,775	4,427	3,034	2,940	1,663	1,203	616	299	163	66	25	105
Females	61,782	12,007	9,126	6,405	7,067	6,101	5,898	3,851	3,524	2,423	2,139	1,276	909	507	262	114	52	19	102

The proportion of males to females of all ages is 51·29 per cent. of the former to 48·71 per cent. of the latter, or an excess of 2·58 per cent. of males. At the early ages—under 5 years—the proportion is only slightly in favour of the males, viz., 0·19 per cent., although the difference between the number of births of girls and of boys in the colony is said to be as much as 108 boys to 100 girls. From 5 to 15 the numbers of the sexes are nearly equal, and in the next periods—15 to 20 and up to 25—the females predominate. The proportion of persons between the ages of 14 and 60 is 56·41 per cent., leaving 43·59 per cent. of non-effectives dependent upon them for protection and support.

„ XV.—Persons whose pursuits have not been specified, or who were unemployed, &c. - }	1,103	1,083	20

Agricultural, pastoral, and horticultural pursuits occupy the majority of the industrial population; the number engaged therein being 18·24 per cent. of the whole community, and 60 in every 100 males above 14 years of age. Commerce, trade, and manufactures engaged the attention of 13,899 persons, or 11 per cent. of the population. The total number engaged in mining was 1,908, of whom 1,264 were copper miners, and only 55 gold miners.

45. SOUTH AUSTRALIA—continued.

TABLE 306.—BIRTH-PLACES of the POPULATION of SOUTH AUSTRALIA, 1861 (*exclusive of unenumerated and migratory Population and Aborigines*).

WHERE BORN.	PERSONS.	Males.	Females.	WHERE BORN.	PERSONS.	Males.	Females.
TOTAL	126,830	65,048	61,782	Born in Foreign States :			
Born in British Dominions :				France	123	78	45
South Australia	48,613	24,388	24,225	Germany	8,863	4,879	3,984
Victoria	687	353	334	China	40	39	1
New South Wales	507	253	254	Other Foreign Countries	725	562	163
Other British Possessions	1,415	751	664	Born at Sea	562	281	281
England and Wales	44,843	24,015	20,828	Unspecified	109	70	39
Scotland	7,649	3,971	3,678				
Ireland	12,694	5,408	7,286				

The native-born amount to 38·35 per cent. of the population ; the next largest class are persons of English birth, forming 35·36 per cent. ; the immigrants from Ireland form 10 per cent., those from Germany 7 per cent., and those from Scotland 6 per cent. Of the English there is about one-sixth more males than females, the reverse being the case as regards the Irish. The aborigines, enumerated were 5,046, viz., 2,642 males and 2,404 females ; of these, 850 were children, a remarkably small proportion. The number of males employed by settlers was 457. The immigrants entered the colony at the following periods:

	Persons.		Persons.
From 1836 to 1840	8,311	From 1851 to 1855	28,344
" 1841 " 1845	3,054	" 1856 " 7th April 1861	17,813
" 1846 " 1850	18,971	Not stated	1,724
	30,336	TOTAL	78,217

Thus it appears that of the immigrants 30,336, or 38·8 per cent., are colonists of more than ten years' standing. About half of the 8,863 Germans have been more than ten years in the colony. Two-thirds of the immigrants from Ireland arrived subsequently to 1859.

TABLE 307.—SICK or INFIRM in the POPULATION of SOUTH AUSTRALIA, 1861 (*exclusive of ABORIGINES*).

SEX.	TOTAL.	Sick.	Deaf.	Deaf-and-Dumb.	Blind.	Crippled and Maimed.
TOTAL	1,528	1,302	74	20	39	93
Males	765	625	43	13	23	61
Females	763	677	31	7	16	32

From the returns it appears that at the date of the Census 1·03 per cent. of the population were unable, from sickness, to follow their usual occupation ; the deaf, dumb, and blind formed ·10 per cent., and the crippled and maimed ·07 per cent. Each sex furnishes an equal number of non-effectives, but the males have a great proportion afflicted by incurable infirmity, and nearly double the number of crippled and maimed.

TABLE 308.—STATE of EDUCATION in SOUTH AUSTRALIA, 1861 (*exclusive of ABORIGINES*).

	CHILDREN aged 5 Years and under 15.		15 and under 21.		ADULTS 21 and upwards.

Can read only	8,546	27·44	1,255	9·28	7,712	13·32
Cannot read	6,748	21·67	698	5·16	4,825	8·33
Unknown	719	2·31	160	1·18	665	1·15
TOTAL	31,140	100·00	13,526	100·00	57,920	100·00

Between the ages of 5 and 21 the number of females who can read and write exceeds that of the males, but above the age of 21 the reverse is the case,—more men can read than women. Young girls are less frequently called upon to assist in the occupations of their parents than boys ; while the uneducated adult community has been increased by a number of uneducated female immigrants.

RELIGIOUS DENOMINATIONS.—A column was provided in the householders' schedules with a view to ascertain the number of persons belonging to the several religious denominations ; but as the information was to be supplied voluntarily, instead of being made compulsory as in other colonies, the particulars were so imperfectly returned that it was not considered desirable to abstract, for publication, the facts ascertained.

46. WESTERN AUSTRALIA.

TABLE 309.—AREA, and POPULATION of WESTERN AUSTRALIA, according to the CENSUS of 31st March 1861.

AREA in Square Miles.	PERSONS.	Males.	Females.
978,000*	15,593†	9,843	5,750

* Parliamentary Return No. 147, Session 1863.

† Including military and convicts. The aborigines appear to be excluded.

INCREASE.—The previous Census was taken on 31st December 1859, when the colony contained 14,837 inhabitants. The male population aged 15 years and upwards was at that time as follows: Free, 3,097; Expires and conditional-pardon men, 1,173; Ticket-of-leave men, 1,616; Ditto on hands of Government, 50; Prisoners, 1,007; Military, 169; Total, 7,112.—Western Australia is by far the largest of the British Colonies. As defined by Her Majesty's Commission, it includes all that portion of New Holland situated to the westward of 129° E. longitude; its greatest length is 1,280 miles from north to south, and 800 miles from east to west.

METROPOLIS LOCAL MANAGEMENT ACT.

TABLE 334.—STATEMENT showing the NUMBER of **Inhabited Houses** and the **Population** according to the CENSUS of 1861 in the several **Wards** formed for the ELECTION of VESTRY-MEN in METROPOLITAN PARISHES divided under the Metropolis Local Management Act (19 Vict. c. 120.)—(In this Table the Parishes are arranged in the order adopted in the Schedule to that Act.)

(The boundaries of the respective Wards are set out in the Supplement to the "London Gazette," No. 21,802, Oct. 20, 1855.)

THE NEW CLASSIFICATION OF THE PEOPLE ACCORDING TO THEIR EMPLOYMENTS.

The people of England are variously employed. Indeed the employments are so numerous that the task of reducing them into scientific order appears, at first sight, to be hopeless. The economy of labour is exceedingly intricate, and its results are marvellous. Walk through a town. Who is now prepared to explain the distribution of houses, shops, manufactures, and trades—the numbers in each profession—the subordination of the men—the relations of the masters to each other—their connexion with the people of the country around—the ties which bind towns to other towns—the intercourse of nations with foreign nations?

How were the great works which surround us created? How has the face of England been changed since it was first peopled? How are the products of all climates exchanged? Who can tell what varieties of pleasures wealth can command; what innumerable comforts the middling classes enjoy; and what precious privileges civilization places within the reach of the humblest handicraftsman!*

Universal order reigns in nature, and it is not likely to be absent from the regions of human industry. Indeed it is certain that, amidst all confusions, order pervades the societies of men; for some of their industrial laws have been discovered by human genius; and if more progress has not been made, it is because men's minds have not been earnestly directed to the observation, registration, and analysis of social phenomena. Yet the stability of society is of importance to every man, and every individual participates in its improvements.

Two great classes of persons have been distinguished by political economists: those who are unproductive; and those who create products. It is in reference to the nature of these products that the people are classified in occupations.

A new science necessarily introduces new ideas, which must be expressed either by new words, or by words already in use, in new senses laid down by definitions. In this inquiry product, process, value, and other terms are employed in senses which require some explanation.

A product satisfies some of man's faculties; it exists in limited quantity; it can be acquired exclusively; it is saleable; and is rendered fit for use by human skill. It is created value. It is property in the inceptive state. Light and oxygen are indispensable to life. The sunlight and the air supply the bulk of all of these elements that we require; and they are the gifts of Heaven. But in the nights of winter men require artificial lights; and these lights are products. They are produced by human skill, exist in limited quantity, are saleable; and by the inventions of men as much labour as would formerly produce a hundred rushlights produces a thousand gaslights. The invention is now enjoyed as a free gift which genius has conferred on mankind; the cost is the value of the labour and skill by which the gaslight is produced. It is only with this value, measured by the price, with which we have to do in treating of products in industrial statistics. Thus, a loaf of bread is a product, but the inestimable air we breathe is not a product;—candle-light is a product, the life-giving sunshine is not a product.

Among the unproductive classes are children; their playful acts, and the joys which they give to their parents, like the sunlight, the fresh air, the songs of birds, and the beauties of nature, have no exchangeable value. The infirm and the sick are often unproductive. Gipsies and vagrants produce nothing valuable. Certain ladies, like the lilies of the field, neither toil nor spin; and as many gentlemen would perhaps find equal difficulty in pointing out anything of value which their heads or their hands produce.

The greater part of mankind are, however, employed during the whole of their days in making articles of exchangeable value; for equivalent services, supplying our wants, executing our wishes, gratifying our tastes, edifying us, protecting us from danger, preserving our property. All are rendering services to all on equitable terms. It is this part of the national life that is to be described.

The matter of all products is supplied by nature; and all the known elements of matter consist of some sixty-four kinds of atoms in various states and combinations. Thirty-six of them are of common occurrence.

The following elements and their compounds constitute nearly all the economic products. Each element is designated in chemistry by symbols, generally taken, to make them international, from the first letters of the Latin names.

	Chemical Symbol.
<i>Noble metals:</i>	
Gold (Aurum)	- Au
Platinum (Platinum)	- Pt
<i>Easily fusible metals:</i>	
Quicksilver (Hydrargyrum)	- Hy
Bismuth	- Bi
Tin (Stibium)	- St
Lead (Plumbum)	- Pb
Zinc	- Zn
<i>Difficultly fusible metals:</i>	
Silver (Argentum)	- Ag
Copper (Cuprum)	- Cu
Cobalt	- Co
Nikel	- Ni
Manganese	- Mn
Iron (Ferrum)	- Fe
<i>Metallic elements:</i>	
Aluminium	- Al
Magnesium	- Mg
Sodium (Natrium)	- Na
Potassium (Kalium)	- K
Antimony (Stibium)	- St
Arsenic	- As
<i>Acid radicals:</i>	
Sulphur	- S
Phosphorus	- P
Silicon	- Si
Nitrogen	- N
Carbon	- C
Hydrogen	- H
Iodine	- I
Chlorine	- Cl
Oxygen	- O

Compounds of these elements constitute the chief products. Among the most important are the organic products, consisting of oxygen, hydrogen, nitrogen, carbon, and other elements in smaller proportions. Vegetable elements may be designated by *V*; the animal products by *A*; mineral elements by *M*.

The above bodies are ponderable, and have all the ordinary properties of matter.

Certain forces or states of bodies, for they are never observed apart from other matter, can be studied, and may be conveniently classed among the simple elements of production. Such are dynamic force, heat, magnetism, electricity, light, life.

If the materials of all products are supplied by nature, the power by which they are wrought is partly external and partly human; the skill, being wholly human, it, rather than the muscular force of the labourer, gives them their values.

Products are made in various ways. Thus three substances—potash, lime, and sand—are exposed to a high temperature, at which they combine, and thus constitute not only a chemical but an industrial

Producers.

Industrial
Products.Industrial
elements.Products by
combina-
tion, or by
changes
of form.

* See Bastiat, *Harmonies Economiques*.

product; for in the glass they have acquired new properties and an increase of value, which is every day tested by the price in the market. This product is the result of a chemical combination. Lead exists as an ore in combination with sulphur; by the separation of the sulphur the lead is produced; and by melting, and throwing the lead into a mould, it becomes a new product—tubular lead. But the manufacturer sells the lead to the plumber; who again sells it with his labour to the consumer; and the transfer from one place to another, without any change, chemical or formal, in the metal, by placing it in the hands of the person who wants it, gives it an additional value, and makes it a new product. The producer is called a maker, of which smith is the equivalent: thus we have watch-maker, and gold-smith. Jeweller, plumber, clothier, are other forms.

Products
and pro-
cesses.

In industry *products* must be distinguished from articles passing through successive *processes*. Thus, take the case of bread. The landlord lets the farm. The farmer ploughs the land, manures it, sows the seed; the wheat plant is produced, and is protected from injury until it is mature; it is then ripe wheat. This is the first process. The crop is (2) cut; is (3) carried to the stackyard, and there built up in ricks; is (4) thrashed; is (5) winnowed; and is (6) finally sent to the market in the form of the product—wheat, which is sold to the miller. It will be observed that the *processes* are often performed by different sets of men, in successive intervals of time, yet the product is one; for new *products* are transferred to new owners. The miller, passing it through divers processes, grinds the wheat, sells the flour—a new product—to the baker. The flour, with salt and yeast, is converted into the new product—bread—by the baker; who sells it to the public. Thus the first materials are sold to the farmer (seed, use of land); the wheat is sold to the miller; the flour is sold to the baker; the bread is sold to the public. The ingredients of the bread in this case are bought and sold four times. And four products imply four kinds of producers—the landlord, the farmer, the miller, and the baker.

In the early stages of society the owner of the soil grows, grinds, and bakes the wheat; so that the changes are a series of processes ending in the product, which is consumed in the house. In the country the baker is superseded, and the flour is baked at home.

Upon the other hand, in the present advanced state of industry, a class of merchants often intervenes between the farmer and the miller, or between the miller and the baker; it is the corn merchant, whose services are always called into requisition when the farmers and millers are in one country, the bakers in another.

This succession of products is of the highest importance in the organization of industry; and in the several branches of trade it is found to follow a regular course.

Every science has a system of symbols to facilitate its theory; and as industrial science requires this assistance, I shall avail myself of its use in a rapid enumeration of some of the principal products of this country.

Of all the materials existing in nature, some become products by arduous acquisition, some by accidental discovery. Others are conquered or acquired by companies of armed adventurers or by nations. The national wealth is always under the protection of the national arms. The cost of the conquest of a territory is often enormous. India and the British colonies were purchased by much blood, and by millions of gold. The property acquired by the community is transmitted to proprietors under certain conditions, and is guaranteed by society. The mineral property was vested primarily in the crown, representing society; but it has now, to a large extent, been transferred to the proprietors of mines.

It is evident that a mine has all the properties of a product. It has been acquired, is therefore a *primary product*, and is sold or let to the person who extracts its produce. From an iron mine the ironmaster

extracts ironstone, smelts it, and converts it into *pig iron*, which is a *secondary product*. The pig iron is converted into cast iron, or into malleable iron at the refinery, and the mill for puddling and rolling, where it becomes a *tertiary product*. From the tertiary products the black-smith, the nailer, and the white-smith make products of the *fourth order*; and besides anchors, boilers, bits, and nails, we have also for sale by the ironmonger and hardware and other dealers stoves, grates, fenders, frying-pans, skewers, rivets, screws, bolts, handles, hinges, curry-combs, swivels, gas meters, steam engines, iron steamers, and railways. Bar iron is also converted into steel by cementation with charcoal, and steel is a product of the *fourth order*. Saws, scissors, bodkins, needles, awls, fish-hooks, harpoons, spades, steel small ware, springs, steel pens, steel plates, are products of the *fifth order*. When these articles are manufactured by a class, and sold to the retail dealer, they become products of the *sixth order*.

Iron (ferrum) is the chief element in all these products; and the symbol Fe_n will serve to designate a product of iron of the order n . Thus Fe_0 will denote simply the iron existing in the unappropriated mine; Fe_1 the primary product, ironstone in the possession of the proprietor or the miner; Fe_2 the secondary product, pig iron; Fe_3 the tertiary products, cast iron, malleable iron; Fe_4 the products of the fourth order, such as nails, grates, steel; Fe_5 the products of the fifth order, swords, knives, needles. The industrial product Fe_n is not the element of which chemistry treats; it is that element in combination with oxygen, carbonic acid, carbon, silica, phosphorus, arsenic, and other ingredients. So it is with the other metals among industrial products. As the chemists take the initials of the *Latin* names to designate the chemical elements in a sort of universal language, I adopt a similar course for the same reasons in characterising industrial products.

COPPER, Cuprum. Cu_1 , Copper mine appropriated; Cu_2 , native copper and the various ores (extracted from the mine by the copper miner); Cu_3 , the metal smelted (copper smelter); Cu_4 , copper-smiths' wares, copper plates, copper money.

TIN, Stannum. St_1 , tin mine appropriated; St_2 , the ore, tinstone or peroxide of tin, tin pyrites (extracted from mine by tin miner); St_3 , tin ingots, plates (tin smelter); St_4 , tinware, tags, tinfoil; compounds, $(Cu_3 + St_3)_4$ = bellmetal, bells; $(St_3 \text{ on } Fe_3)_4$ = tinplated iron.

ZINC, zinc mine, Z_1 ; Z_2 , ores, blende (sulphuret), calamine (silicate), and the carbonate, the metal extracted from the mine; Z_3 , zinc manufactures, tubes, plates, statues; compounds, $(Cu_3 + Z_3)_4$, brass; $(Cu_3 + Z_3)_5$, brass works, buttons, pins, thimbles, wire, candle-sticks, lamps, cocks, roasting-jacks (of which the makers are called button-makers, &c.)

LEAD, Plumbum. P_1 , lead mine; P_2 , lead ores, galena (sulphuret), lead pigs; (processes), lead pipe, sheet lead; compounds, $(P_2 + St_3)_4$ = pewter, spoons, jugs, plates.

ANTIMONY, Stibium. Sb_1 , mine; Sb_2 , ore (sulphuret), metal; compounds, $(Sb_2 + P_2)_3$ = printer's type, consisting of lead and antimony.

ARSENIC. As_1 , mine; As_2 , ore, arsenic, arsenious acid, and other compounds; $(As_2 + P_2)_3$ = shot, consisting of lead and arsenic.

SILVER, Argentum. Ar_1 , silver mine; Ar_2 , silver ores, native silver, silver ingots; Ar_3 = silver plate, silver coins; compounds $(Ar_3 \text{ on German silver})_5$.

GOLD, Aurum. Au_1 , a gold mine, a gold digging; Au_2 , extracted native gold, gold ore (gold digger); Au_3 , metal, gold ingots; Au_4 , gold coins, gold leaf, gold thread, gold plates; $(Au_3 \text{ on wood or on metals})_5$.

CARBON. C_1 , diamond bed, diamond mine; C_2 , rough diamonds; C_3 , brilliants, rose diamonds. (See Coal.)

SALT (Na.Cl). Na_1 , salt mine; Na_2 , salt crystalized; Na_3 , salt retailed.

Mineral
products of
successive
orders.

WATER. In the unappropriated state water exists in the ocean, in rain, in clouds. It is a compound of an atom of hydrogen to an atom of oxygen (HO)₀; (HO)₁, well water, pump water, river water, ice appropriated; (HO)₂, water carried or conveyed by pipe, imported Wenham lake ice. It will be observed that men pay nothing for the magnificent system of distillation by which water is raised from the ocean, to be precipitated and collected in springs and streams; they pay only for the human services which render it a product varying in value. Compounds (HO)₂ + sugar + fruit juices = ices. Soda water, beverages of every kind, are compounds of water.

LAND, Terra (T). The surface of the earth supplies the materials of a large class of products. Minerals, of which the products already described consist, are generally found underground; vegetables live in the soil; and though animals move about they find their food and rest on the surface. A person acquiring possession of the land acquires the vegetation on its surface, and a right to the animals, as against any other person: he also retains the right to the results of all the improvements which he effects in the soil, to the trees which are planted, and to the buildings which are erected on it, as well as to all its contingent advantages. A portion of this land with its buildings is a farm, and as it is let for a rent it is a primary product; so is a garden (T₁). The land unappropriated is designated by T₀.

VEGETABLE PRODUCTS, Vegetabilia, (V) are derived from the whole range of the vegetable kingdom. Mr. Hind sets down the known species of plants at 133,000; and Humboldt estimates the species of flowering plants at 213,000, of which immense numbers are in countries whose floras are unknown to science. Humboldt in 1846 estimated the number of cultivated flowering plants at 35,600. Hooker's British Flora of native plants contains 1500 species; but Loudon, in the Hortus Britannicus, enumerated 26,660 flowering plants which now are or recently have been cultivated in British gardens. Among the profusion of living plants which have been reviewed by botanists in our fields and gardens only a small number yield fruits, seeds, and various articles of exchangeable value naturally; others have been rendered valuable by cultivation. These plants, like the land, are primary products (V₁), and are either taken with the land, or included in the stock of the farmer, the gardener, and the planter.

V₂. Among the secondary products of the vegetable kingdom are wheat, straw, barley, rye, oats, bread fruit, dates, rice, maize, potatoes, peas, beans, turnips, carrots; apples, cider, pears, plums, apricots, oranges, peaches; hops, grapes and wine, olives and oil; tea, coffee, cocoa, tobacco and cigars; cloves, nutmegs, pepper, ginger, sugar and treacle; hemp, flax, cotton wool, New Zealand flax; vetches, clovers, grasses and hay, Iceland moss; wood and timber; flowers.

V₃. Among the tertiary products of the vegetable kingdom may be mentioned, flour and bran, malt, oatmeal; brandy, loaf sugar, rum, preserves of fruits; thread, ropes; turpentine, pyroligneous acid; straw-plait; chairs, tables, wood houses, ships.

V₄. Bread, ale, porter, gin, whiskey, sailcloth, brown calico, muslin, lace, are products of the fourth order.

V₅. Bleached, dyed, printed cotton, and sails, are products of the fifth order.

V₆. Dresses, shirts, cloths of various kinds, are products of the sixth order.

Some products are consumed in their first form. Many articles commonly secondary products, such as

potatoes, turnips, apples, grass, are consumed by the producers. Oftentimes the products are advanced a step further than the list indicates, by the intervention of the merchant or the shopkeeper; thus potatoes, vegetables, and fruit are sold in towns to the greengrocer and fruiterer, in whose hands they become tertiary products; and cotton wool, a secondary product in America, sold to the merchant, becomes a tertiary product in Liverpool. Articles undergo great changes without becoming new products; thus grapes are converted into wine, apples into cider, thread often into calico, without changing hands. In certain processes articles are converted into distinct products; a cereal plant, for instance, becomes by thrashing straw and grain; wheat becomes bran and flour. And it is rare that the whole of a product is converted into another product: thus, some grapes are eaten, others are made into wine; some wood is burnt and some is converted into ships. Certain articles are converted, as apples into cider, into simple products; others, like wood, serve to make a multitude of different products on which distinct orders of men are employed, such as joiners, carpenters, coopers, shipbuilders, coachmakers; and it often happens that the principal product in these cases is combined with other products derived from the mineral and animal kingdoms.

Each vegetable product of great importance, such as wheat, might be indicated by separate symbols; but I have considered it enough to indicate the whole of them under (V), leaving the detailed enumeration until the inquiry be complete.

The **ANIMAL KINGDOM** supplies a large number of products. Man derives from it articles of food, clothing, and furniture. Hundreds of thousands of animal forms exist, and birds, quadrupeds, fish, reptiles, insects, and molluscs every year produce young; but these products in the popular sense are rarely products in the economical sense. They either supply no want, gratify no desire, give no pleasure, or the pleasure is common to every one, and is not acquired by skill; hence they are not saleable; and a thing does not become an economic product unless it is sold or is saleable. A few species have become products of great value. Useful wild animals only become products by capture, for on appropriated land and water they are sold with the land and water. On unappropriated land they are worth nothing until they are caught.

A₁. Hares, rabbits, pheasants, deer, fish, and the useful appendages of wild animals; the young of domestic animals, colts, calves, whelps, lambs, eggs, chickens; bees, silkworms, are primary products; and some of them are often reared by the grower till they become horses, cattle, dogs, sheep, poultry, or till they yield milk, butter, cheese, wool, silk, honey, or some other products. They are often sold also in the early stage, and thus become secondary products in the hands of the game dealer, the grazier, the sheep feeder, the milkman, and others. The primary animal products constitute the farmer's live *stock* in the proper sense of that word.

A₂. Among secondary animal products are meat, pork, sausages; hides, skins, hair, bristles, bones, horns; twisted silk, organzine; dyed feathers, quills; woollen yarn; tanned hides; tallow candles.

A₃. Tertiary products are cooked meat in shops and hotels; hats; feather beds, catgut, gold-beater's skin, woollen cloth, flannel, silk, satin, ribbons, velvet, crape; leather (curried), japanned leather.

A₄. Products of the *fourth order* are shoes, gloves, coats, silk dresses, woollen dresses.

In this class, as in other classes of products, the merchant or the shopkeeper intervenes, and in numberless instances the product is thus advanced one or two degrees. Silk, a primary product in Broussa, is sold (1) by the country people (2) to the dealers in the silk bazaar, by whom it is forwarded to Constantinople, where

Animal products; domestic animals; game; wild animals.

in the brokers' rooms it is (3) sold to the merchants, by whom it is imported into England before it reaches the throwster, who in this case converts it into a product of the fourth order.

Complex products.

Some of the most valuable products are made up of combinations of other products; as in the watch, which is made of steel, brass, gold, precious stones, enamel, by many different processes, and by many different workpeople. A pianoforte, a coach, a waggon, a saddle, a house, a steam packet, a picture, a book, a rifle, are also examples of composite products; to which, several of those already classified under their chief elements may be likewise referred.

All these are material products. They often endure for many years. They generally undergo great changes in the hands of their makers. Sometimes their chemical properties are entirely altered, and sometimes new forms are created by the genius of the artist out of rude blocks of stone.

Products by transfer or transport.

But to constitute a new product, none of these changes are necessary. An increase of value with transfer by sale constitutes a new product. Sugar in the West Indies can impart none of its sweetness to English lips; tokay, champagne, gold, silver, rubies, and tea, become new products, and acquire new value, by their transport from abroad, or from a seaport, to places accessible to their consumers. The value of these acts of production is accurately expressed by their cost; and though less evident, the increased value is as certain as the value of the intrinsic changes by which new chemical products are made. A large class of persons live on their gains by conveying men, animals, goods, messages, and news from one place to another. Products have to be preserved; they are produced in one season, and are used all the year round; they are produced annually, like hops, and barley, in unequal quantities, and are consumed in nearly equal quantities day by day; or they are produced in equal quantities, and are consumed at irregular intervals. The mercantile class takes charge of products, and equalizes their distribution in time and place; places them in warehouses, keeps them in store, and produces them in the market when they are wanted. Now foreign wheat, when purchased in Odessa, and lodged in a London warehouse, acquires value without undergoing any visible change; and the merchant, taking the risk of deterioration and discharging his office in buying and selling, is a producer. What is the product in this case? The useful thing placed in the possession of the persons to whom at that time it is useful. The banker renders services of this kind in securities, and the shopkeeper in goods. The broker, the agent, and the salesman perform certain simple processes of production.

The utility of all products depends upon the services which they can render man. It is for the services of a horse that he is hired; and unless he could render these services he would not be a product. In like manner it is for the services of the railway carriage that one class of people pay in proportion to the skill and labour which are exerted by another class in rendering those services through the medium of that vehicle. And so all products are mere means by which men render men service. The cost incurred in rendering a product fit for service regulates its price. Sometimes the service is direct; and men purchase the direct services of men for precisely the same reasons as they purchase other products. The men themselves rendering these services are indeed products, and the variable value of their services is estimated in the market on the same principles as other values. A valet's service is a product in as strict a sense as a horse's; and it is paid for on similar terms.

A child can render no useful service. The nurse, the servant, the schoolmaster, the professor, and the master who teaches him a business, contribute to the building up of the civilized man, capable of rendering his fellow men valuable services. His talents are rendered available by the skill of his instructors;

who are therefore themselves productive members of society.

Domestic servants, hairdressers, innkeepers, and all the ministers to the necessities, comforts, and luxuries of men, are productive, inasmuch as they render services which have exchangeable value.

Labour is more than mere muscular effort. In handwork the hand is directed by the intellect. It is employed for definite times; with precision, dexterity, and an intelligent aim. The value of the work varies rather with the skill than with the muscular effort, and it derives its value more from the expenditure of nervous than of muscular force; for the labour may, but the skill may not be replaced by the horse, the ox, steam, or gunpowder. When a product is said to be worth so much, it is to be understood that on the average the price represents the average value of the skill required for its production. All the products which have been enumerated represent skill; and its variable amounts are expressed by the average prices.

There are intellectual products. Ideas go through a series of processes in the mind; and in the end they assume definite shapes, which satisfy, gratify, delight, or benefit men. They are expressed by painters, sculptors, architects, and artisans of every kind in the products of the arts; they can also be expressed in "winged words" and in printed characters. Art is a product. Truth is a product. Sensation is a product. Emotion is a product. Man has a thirst for knowledge, and science enables him to interpret and command nature. Hence physicians, philosophers, mathematicians, chemists, botanists, naturalists, orators, historians, poets, prophets, judges, and statesmen produce the highest order of utilities. Their ideas, like sunshine rather than fire, it is true, have something godlike in them, and have a perpetual tendency to pass freely from mind to mind, and thus ceasing to be industrial products, become common wealth.

For a certain time inventions are appropriated. Speeches and even sermons are delivered within precincts; and men often pay for places as they pay to see pictures, plays, operas, and curiosities. Books enjoy the copyright which is the most sacred of all property.

The opinion of the physician, the advice of the solicitor, the pleading of the barrister, the decision of the judge, are special in every individual case, and are not therefore common property; these products are often paid for by definite fees.

Health is the indispensable condition of happiness; he therefore who teaches his fellows how to live healthily, the surgeon who rescues them from danger, and the physician who cures their diseases, create the product of products, the healthy man. They produce exchangeable values, and are paid for their services.

All products, and life itself, are possessed under certain conditions; the relations of men to each other in society are subject to law, and their rights often appear to be conflicting. The advocate and the judge, so far as they uphold the principles of justice, vindicate the laws, maintain rights, and settle strifes, enhance the value of everything valuable existing. For if justice fails in a country, the value of its products falls; their current value, therefore, depends to a considerable extent upon the existence of the class administering justice.

Men have many moral wants besides those which are satisfied by the administration of justice. They have sentiments which the lawyer never addresses. The mind is troubled by diseases for which the physician has no medicines. Happiness is the result not only of the pleasures of sense but of virtue and righteousness, duty and right, charity and mercy, hope and faith; of all that is comprehended under the term religion.

The existence of a sacerdotal order, or of a class of religious ministers, does not depend upon the profession of any special creed, or even upon any peculiar form of service. Our conceptions of the infinite vary infinitely; so do their symbols. They change in time and place. Priesthoods nevertheless are perpetual. They existed when the people prostrated themselves

Intellectual products.

Material products are services embodied.

Services are direct or indirect.

Changes wrought in the state of the mind or of the body are services, and are paid for as other products.

before stocks and stones; when they worshipped the stars; when they adored the gods of Hellas. And when these old divinities became mere æsthetical images, fading from faith into poetry, their priests were replaced by the pastors and bishops of the Christian churches. Every new sect of any extent, except the Quakers, has its ministers. And it is certain that the order will never disappear under any of the phases of faith which develop themselves in the revealing evolutions of the human intellect.

The services of the clergy assume various forms in becoming products. They officiate in churches; administer sacraments; preach sermons. They preside at marriages, baptisms, and burials. They visit the sick, and perform almost officially many social offices. The rites and duties for which the priesthood of the world are paid, by tithes, by stipends, by salaries, by fees, by sacrifices, and by offerings, vary.

The communities of monks and nuns are sometimes productive indirectly; but in principle they are unproductive.

Men of nearly all races are addicted to arms. They use them still to attack wild animals, of which many species are subjugated. But the chief use of arms has ever been in war. Men are the only formidable enemies of men. And it is in war that some of the most striking feats of courage, endurance, skill, combination, and intellect have been achieved. Valiant nations put forth all their strength in war, and under this mighty stimulus have often nearly doubled their annual productions. In ten years of the last great war the people of England increased at the rate of fourteen per cent. Their products increased at least at an equal rate. The present races of Englishmen obtained their country and its colonial possessions by conquest. Europe was acquired by the sword; and by the sword the possessions of each nation are defended.

As the rights of the individuals of a community to their possessions are now recognized among themselves in every civilized state, so the rights of states to their dominions is mutually recognized. But national rights and the rights of individuals are alike called in question by enemies in war; so that every civilized state has still to provide for the defence of its possessions, for the maintenance of its independence, and for the security of the lives of its population. These objects it accomplishes partly by militia and volunteers, but chiefly by a regular military force.

No one denies that the property of a country consists of its products; but to preserve that property from destruction and pillage is a service, which is of as much value as the creation of a certain proportion of the products. It is of the nature of an insurance; but the premium is paid not to replace but to prevent loss. Safety is a product. A military force is therefore productive. But any expenditure in excess of that necessary for national protection is waste. And if the nations of Europe now maintaining men in arms came to the same explicit agreement among themselves as their individual proprietors, to mutually guarantee each other's rights, the product, safety, would be obtained at less cost, for less labour, and for less blood, than are now expended. European wars are now unproductive.

In certain states the rights of men to property of any kind are mutually contested; society does not exist. The majority in the land agree to guarantee each other's possessions, and to protect each other's lives against all assailants, so a civil community is constituted. A minority, surviving, like the nomadic vagrants in settled countries, are kept under restraint by civil force; and order is upheld among all ranks by a police in the most advanced countries. Magistrates and the police produce security against the violence of individuals.

Men have a natural inclination to live in communities, and in the state of society their powers are exercised with the greatest effect. An enemy a hundred strong by attacking each individual in succession may destroy ten thousand; but if the ten thousand are united in an army, assuming everything

else equal, each individual becomes a thousand times as strong as he was, either for attack, for defence, or for any concerted action. He is, as far as regards certain acts, quite impotent alone, while his power in combination is increased in the ratio of a small fraction to a large unit. Within certain limits and for certain purposes the power of societies of men always increases directly with their numbers, and in a greater ratio. The power of society is exercised by sovereigns. As the numbers and the force in communities differs, so the numbers who exercise the sovereignty vary. Where the legislative and executive powers are in the hands of one person, the sovereign is an absolute monarch; where the power is in the hands of the whole of the citizens, the government is a democracy. Absolute government by a small number is an oligarchy. A happy form of government appears to be that in which the sovereignty is in the hands of a monarch, ministers, an aristocracy, and the freely chosen representatives of the contributors to the common fund out of which the public expenditure is paid. If power is in one hand, and carries out the decisions of the legislature, the nation's wisdom, which cannot be concentrated in one head, has a share in determining, inspiring, and directing its use.

The utility of the product, which may be designated in one word,—government, is evident. It has existed in all ages, and is found in every clime. Men have been content to pay a high price for it. In the worst form it is everywhere preferred to anarchy; but its advantages, like those of the air we breathe, become most apparent when they are partially withdrawn. Power acts on its own subjects, and on foreign states.

The primary product of the state is its constitution. This includes the choice of the sovereign; the recognition of the senate; the election of the members of the legislature; the selection of ministers; the nomination of the dignitaries, the officers, and all the other servants of the state. The sovereign, as the impersonation of the state, awards its honours. And the government enumerates the population; registers the marriages, births, and deaths of the people; protects their lives; defines property by surveys and maps; secures its tenure and its transmission. It takes charge of the whole of the national property; of palaces, parks, forests, lands, picture galleries, museums, national libraries, barracks, fortresses, ships, stock. It coins money, issues tokens, and sometimes controls the currency. It is responsible to the public creditor, and pays the dividends. It collects the taxes, and disburses the revenue. The form of religion has often been changed by legislation; under theocracies it is a part of the law. Prelates are chosen by the state; so are judges and magistrates. Crimes are pursued and judicial sentences are executed by the Crown, of which mercy is the prerogative.

The sciences and the arts are in various ways promoted by enlightened governments. The press, the drama, and free discussion are sometimes unwisely controlled. Roads are made; canals and rivers are adapted to navigation; ports are opened on the ocean; packets and telegraphs are subsidized. Letters, parcels, money, are distributed all over the Empire. Manufactures of various kinds are undertaken by government. The munitions of war are manufactured. The soldier is recruited, trained, clothed, fed, lodged, educated, disciplined, rewarded, punished, by the war department; he is watched over by military chaplains and surgeons. Machinery, chemical compounds, gunpowder, small arms, cannons, are manufactured in government establishments. Ships are built by the admiralties; and other articles are made in the dockyards for the navy. Salt, tobacco, opium, are also often produced in national establishments for fiscal reasons; but no one pretends that the manufacture of ordinary products, or even of Gobelin tapestry, is the legitimate function of any government.

The sovereign, in his action on other powers, contracts international alliances; performs friendly offices; wages war; makes peace. He governs colonies and

The highest Officers of Government are correctly classed among producers.

Ministers, Peers, Members of Parliament.

Civil Service in the various Government Offices, and artificers in the employ of the Government.

subjugated territories. He defends the empire, and throws over his subjects everywhere, the protection claimed, in *Civis Romanus sum*.

The form which this product assumes varies in every nation and at different times. It is determined by experience; by the character of the people, and the nature of country. Only the supreme power is, however, exclusively in the hands of the sovereign; circumscribed power is exercised by the feudal chief, or the city; the sanitary, the police, and the economical administration is carried on partly by the village, town, county authorities. The government of the family is left to its head; and a large part of the residuary power is in free states under the control of the individual. In the wilderness the man governs himself; in the most populous countries it is only a part of his control with which the state stands charged.

Voluntary societies are formed, not on the basis of local circumscription, but for definite enterprises. They are governed by directors. Among them the Bank of England, the late East India Company, the Hudson's Bay Company, dock companies, canal companies, water companies, gas companies, bridge companies, steam ship companies, road trustees, and railway companies. Magnificent enterprises of the greatest utility attest the value of these circumscribed associations; the power, the prosperity, the happiness, the health, and the glory of nations are the best proofs of the value of them.

NAMING OF PRODUCERS.

I now proceed to show how producers are named. The men who make products are, in English, often called makers. Thus, a watch is a product, and its producer is called a watchmaker. Of the same form we have coachmaker, shoemaker, dressmaker, needle-maker, toolmaker, umbrella-maker, wire-maker, yeast-maker, and a multitude of others. These names are formed by the coalescence of two nouns; *maker* is appended to the name of the product.

Other producers are characterized by adding smith to the name of the product, as gunsmith, locksmith, sawsmith, chainsmith, and anchorsmith. The proper name Arrowsmith—derived from a profession, like that of Bowyer—is almost extinct. Smith, from the root smite, is the maker of things by striking and welding. The different kinds of smiths are characterized by prefixes, as goldsmith, silversmith, and coppersmith. Instead of ironsmith, there are blacksmith and whitesmith.

The name of the workman is often formed by adding worker to the substance on which he toils, as ivory-worker, pearl-worker, wax-worker, wire-worker, tinplate-worker.

The most ancient form of the word for worker was wright, which is derived from the same root; and as smith was applied specially to a worker in metal, wright characterized the worker in wood,—wheelwright, shipwright, millwright.

Manufacturer is now extensively used instead of maker; and it is applied not so much to *hand-workers* (*manu*) as to workers with machinery in production on a large scale, as cotton-manufacturer, silk-manufacturer, glass-manufacturer, iron-manufacturer, paper-manufacturer, needle-manufacturer. The workers are often called vulgarly "hands," "factory-hands," or operatives; for which it is scarcely allowable to drop craftsman, artificer, and artizan.

The makers of products in cast-metal are called founders:—bellfounder, typefounder, ironfounder, brassfounder.

The men who get things from mines under-ground are called miners: iron-miners, copper-miners, gold-miners. As blacksmith is substituted for ironsmith, so collier is used instead of coal-miner, the coloration of the skin being so characteristic that it gives the names.

The maker of living animals by breeding is called a breeder;—as horse-breeder, fish-breeder, cattle-breeder.

The name of the worker is sometimes given by adding *man* to the thing or act with which he is associated in work; thus horseman, coachman, carman, shopman, warehouseman, woodman, nurseryman, sea-

man, boatman, bellman, tinman, fireman, oilman; in showman, salesman, decoyman, huntsman, workman, their action suggests the name; in fisherman and lighterman the *er* interposed only precludes ambiguity. Errandboy, shopwoman, charwoman, fisherwoman, barge-woman, housemaid, barmaid, and dairymaid are formed on the same principle.

A characteristic adjective is sometimes prefixed to man; as nobleman, gentleman, alderman, clergyman, medical-man, foreman.

Keeper, opener, broker, dealer, seller, and monger form with other nouns a multitude of compound names,—as in book-keeper, pew-opener, bill-broker, teadealer, bookseller, fishmonger, ironmonger. The two nouns are often detached, but tend to agglutination.

A remarkable series of names to designate men of different occupations is derived from verbs. Thus instead of breadmaker we have, briefly, baker; instead of clothesmaker, tailor; contracted forms of "he who bakes" and "he who cuts;" the *er* having the force of who, being derived from the same source as *er*,—he, and *der* = who, in German. Maker itself is formed in the same way, and may be read "he who makes." These are characteristic short names. The termination is sometimes in *or*, but more frequently in *er*. It serves the same purposes in Latin, French, and the other tongues of the same family. We have auditor, orator, author, mayor, doctor, sculptor, actor, visitor, factor, contractor, solicitor, valuer, assayer, astronomer, writer, manager, banker, builder, printer, brazier, brewer, butcher, joiner, carpenter, spinner, chaser, draper, clothier, cooper, coroner (*coronator*), dyer, courier, currier, carrier, drover, cutler, dancer, diver, engraver, meter, fuller, gardener, fruiterer (the last *er* is superfluous), geographer, glazier, grazier, farmer (he who farms), grocer, hosier, haulier, teacher, traveller, minister, and others. This suffix is sometimes written *ar*, as in pedlar, beggar, scholar; or *eer*, as in auctioneer, pamphleteer.

Engineer, or engineer, is properly he who engines, or works engines; as a gunner works guns. But it has acquired and should retain a larger sense in civil engineer. Engineman (after the analogy of coachman) should designate the man having charge of a stationary steam engine; engine driver, of the man driving a locomotive; engine maker would be the appropriate name of its class.

Brewster may be taken to illustrate the origin of other verbal names. It is evident that the act of brewing precedes the noun; for it was performed for centuries as part of the business of the house, by servants who had other duties in charge, before brewers as a distinct body existed. The person brewing when present might be addressed as "thou who brewest," and when absent he would be spoken of as "he who brews"; which became, in conformity with Anglo-Saxon analogy, brewster or brewer; the latter, as it is shorter, and as the direct form of address, gave way, taking the place of the former in English.

By the same process baker (which occurs in Chaucer) and baker, as well as webster, weber, weaver, were formed, leaving the surnames Brewster, Baxter, and Webster. Spinster, throwster, and songster are still in use; so are chorister and barrister. Some writers have endeavoured to show that the termination is feminine; but spinster, now spinner, as in cotton spinner, only designated an unmarried woman, because spinning was an occupation in which men never engaged, except under such fascinations as Hercules felt. If seamster was feminine, why should we have seamstress?

The termination *er* is used in the same way in the French and German as it is in the English language: boulanger, boucher, cordonnier, épicier: bäcker, fleischer, schneider. The French use *er* where we and the Germans use maker—as in horloger, uhrmacher, watchmaker; cordonnier, shoemaker, schuhmacher. In German schuster recalls webster in English. The *or* in Latin becomes *eur* in French, as in actor, acteur; factor, facteur. δατήρ, γενετήρ, dator, genitor, are corresponding Greek forms; so are ποιητής and ἐπισκοπος.

Municipal
Officers.

Officers of
great public
companies.

Producers.

poeta, episcopus. There is a similar suffix in the Sanscrit: *pitār*, father, is feeder, or he who nourishes.*

Notary, actuary, antiquary, apothecary, secretary, and missionary are other forms of the same suffix.

The termination *ist* is used instead of *er* after verbs of Greek origin; thus we have botany, botanize; and botanist, he who botanizes: Chronologist, geologist, machinist, magnetist, metallurgist, nosologist, ornithologist, physiologist. Words from other sources take the same termination: Chemist, artist, capitalist, dentist, ventriloquist, pugilist.

The names of some occupations are derived from present participles, implying continued action of a peculiar kind: thus student (*studens*, *studentis*), agent, constituent, servant, vagrant, emigrant, accountant, merchant, annuitant, assistant, lieutenant. The Anglo-Saxon had words of this formation. Our Saviour was the *Hælend*, the *Healing*, and not the Healer, as he might be called now, in English.

The *t* is sometimes omitted, as in comedian, publican, artisan, equestrian, pedestrian, optician, musician, physician, librarian.

Past participles and adjectives are used with articles, without any nouns after them, to designate casual groups of men, as the learned, the instructed, the misled, the ignorant, the beautiful, the mechanical. The word mechanic is applied generally as worker and labourer, but might, by consent, well take the place of machine-maker. It is not clear whether apprentice from *apprendere*, *apprenant*, *appris*, implies the learning or the learned novice.

Where a number of persons performing different offices is collected together in the service of a company we have such terms as the canal service, steam-navigation service, water service, telegraph service, railway service, colonial service, East India service, civil service. These words we have been obliged to use, but they are abstract names of groups, like cotton manufacture, glass manufacture, and do not apply to the individuals of which the groups are composed. Short names will be, no doubt, ultimately adopted, such as civilian for civil servant, telegrapher, railwayman, which sound strange at first, but, if required, will come into use. Officer may be used as in police officer, applied to the higher grades, and policeman to men in the ranks; thus railway officer would designate managers, secretaries; railwayman, porters and policemen.

Every product gives occupation to men; and the number of occupations would be innumerable, if names were not in some way generalized. Thus naval officer and military officer cover the various ranks from admiral to midshipman, general to ensign. Needle-maker includes the wire-drawer, wheel-turner, stamper, rubber, scourer, pointer, eyer, filer, finisher, paperer, labeller, and in all 24 branches of work; the making consisting of separate processes which are performed by their appropriate workers, who for some purposes are separately named, and for others are all designated by the one word needle-maker. After the makers come the merchants, the agents, the users of the products, where it is a tool; thus, there is the needlewoman and the tailor. The lace manufacture employs makers in 28 processes, giving separate names to the workers. There are 27 kinds of knife-makers. All these are conveniently grouped under one head for general purposes.

In like manner it becomes necessary now, for statistical purposes, to form groups of groups, and to pursue nearly the same course in classification as has been pursued with so much advantage in the natural sciences.

As man, as a living being, has his place in the animal kingdom, so the working-men of various types form groups in the economic kingdom; and the groups require distinctive names, framed on the analogies which have already, in reference to single

occupations, been discussed. Those names may be taken as in natural history from Greek or Latin sources, to assist the memory, and to facilitate the scientific intercourse of nations.

It is not necessary to adopt all the sub-divisions in use in other sciences; such as varieties, species, genera, families, orders, and classes.

Men may be conveniently grouped as producers in six classes and in eighteen orders. *Georgici* may be applied to the agricultural class, and serve for the types of the names. The *First Class* acts directly on men, and may by the same analogy be named *Andrergici* (*ἀνρ*, a man), or, by contraction, *Andrici*; the second class, working in dwellings, *Oikici* (*οἶκος*, house); the third class, *Agorici* (*ἀγορά*, market-place); the fourth class, *Georgici* (*γῆ*, earth, and *ἔργον*, work); the fifth class, *Technici* (*τέχνη*, art, handicraft). As the sixth class is founded partly on imperfect returns, it is not proposed at present to name it. The orders may also be named on the same plan.

CLASSIFICATION OF PRODUCERS.

I.—PROFESSIONAL CLASS. (Orders 1, 2, 3.)

Andrici.

This great class includes those persons who are rendering direct service to mankind, and satisfying their intellectual, moral, and devotional wants.

The three first Orders consist of civil servants, national or local; the army and navy; the learned professions, with their immediate subordinates; literary and scientific men, as well as artists in the widest sense.

The first Order (1; 1) includes the members of the Government, and the civil service; (2) the police and other local officers; and (3) the East India and Colonial Service.

The army (2; 1) and navy (2; 2) are in the service of the Government; and are intimately connected with it in all states. And the clergy in the Established Church, as well as the lawyers in the courts of justice, are in official subordination to the Sovereign; but the great majority of the members of these professions are neither nominated nor paid by the Crown. Like the medical, the literary, and the scientific professions, which were at one time included in the Church, and were supported by its livings, the clergy and lawyers assert their independence, and are, therefore, made separate Sub-orders. So are authors, artists, musicians, actors, teachers, and scientific men. Nearly all the members of the class are paid directly for their services; and these services have no intermediary, being rarely fixed in any commodity. The pay varies in each Order, and it is either proportional to the time (salaries, wages, pay), the job (fees), or the quality and quantity of work done (piecework).

Orders

1. *Persons engaged in the General or Local Government of the Country.*
2. *Persons engaged in the Defence of the Country.*
3. *Persons engaged in the Learned Professions or engaged in Literature, Art, and Science (with their immediate Subordinates).*

II.—DOMESTIC CLASS. (Orders 4 and 5.) *Oikici.*

The persons in this Class are all employed, if they are employed at all, in houses. Some supply simply service, others with it supply board and lodging (Order 5). They are paid wages (servants), or they are paid for the board and lodging and attendance which they supply. The publicans and beersellers are so much associated and so often confounded with hotel and inn keepers that they are retained in the same Order; although the Order dealing in "drinks" may claim them. The wife and grown-up children (Order 4) perform at home for the bulk of the population the same duties as the persons in Order 5; but they are not paid directly in money for their services, as they form a part of the natural family; consequently

* See Bopp's Grammar by Eastwick, Part III., p. 1097-1104, for names, in the termination *ar*. Bopp has not unravelled this subject, and is unsatisfactory.

they are distinguished in a separate Order. The very young children properly belong to the non-productive class, and they may there constitute a section; scholars and other children are learning the elements of their future occupations; but until that occupation is determined they remain in the same Order as their mothers.

Orders

4. *Persons engaged in the Domestic Offices or Duties of Wives, Mothers, Mistresses of Families, Children, Relatives* (not otherwise returned).

5. *Persons engaged in entertaining, and performing Personal Offices for Man.*

III.—COMMERCIAL CLASS. (Orders 6 and 7.)

Agorici.

The merchant buys any article like tea, abroad, transports it to England, and there sells it. He performs the like operation at home. But as a merchant he effects no change in any of the commodities in which he deals. He buys and sells, and is paid for his services by a varying but rated profit on the goods.

The carrying order convey commodities, passengers, and messages by land or water, from one place to another. They also warehouse goods. They are paid for their services in fares, freight, and charges, which bear some proportion to the weight, bulk, and other properties of the goods. They are all in Order 7., and are closely related to the Order preceding; hence the two Orders (6-7) together may be called the Commercial Class.

Orders

6. *Persons who buy or sell, keep or lend Money, Houses, or Goods of various Kinds.*

7. *Persons engaged in the Conveyance of Men, Animals, Goods, and Messages.*

IV.—AGRICULTURAL CLASS. (Orders 8 and 9.)

Georgici.

We now come to a great class which is employed in producing grain, fruit, grass, animals, and other products from the soil. They may be called Growers; for their products grow and are obtained from the living kingdoms of nature. The heads of the Class are paid, not directly for their services, but indirectly in the price of the products which they sell in the market or elsewhere. Thus the price of a quarter of wheat includes the pay of the services of all the persons employed in its production as well as the cost of the tools and machines, including the land, by means of which it is produced and brought to market. Agricultural servants and labourers are paid in wages which the farmers advance. The persons engaged in gardens or woods are in separate Sub-orders.

The men in Order 9. are employed in catching, training, or dealing in living animals of various kinds. They are the representatives of the hunters of the early stages of civilization, and may be considered an appendage to the previous pastoral and agricultural class, so forming Class IV., which thus includes hunting tribes, the pastoral clans and the agricultural people of the world.

Orders

8. *Persons possessing or working the Land and engaged in growing Grains, Fruits, Grasses, Animals, and other Products.*

9. *Persons engaged about Animals.*

V.—INDUSTRIAL CLASS. (Orders 10, 11, 12, 13, 14, and 15.) Technici.

This is the Class of makers or artizans. They deal in matter that is either no longer living, or that never lived. They alter the form, texture, or composition of the materials in which they work, so as to produce a great variety of goods, instruments, and machines. Their pay and profits are charged in the price of commodities; the wages of the workmen being advanced by their masters.

This Class is grouped according to the materials, distinguishing those derived from the three kingdoms of nature.

The first Order (10.) of the Class includes artizans, making products of various materials, derived from the three kingdoms, such as coaches, ships, workshops, factories, houses, and their furniture or other contents.

Then follow the persons engaged in the textile fabrics (Order 11.) Wool, silk, cotton, flax, and hemp are durable, and divisible; their manufacture admits of the sub-division of labour and the application of machinery. The workers in these materials are the essentially manufacturing class. In a Sub-order (4.) are the artizans who convert the manufactured fabrics, and some other matters, into dress.

Human food, drinks, and stimulants, derived from the animal and vegetable kingdoms, occupy a distinct Order (12.) sub-divided into three Sub-orders.

Then follow (13.) the persons chiefly or exclusively working and dealing in other animal substances than food, (14.) those working and dealing in vegetable substances, and (15.) those working and dealing chiefly in minerals and metals. The first Sub-order of the latter Order (15.) includes the mining population of every kind; the other thirteen Sub-orders include the chief workers in the metals and minerals, beginning with coal, and ending with steel.

Orders

10. *Persons engaged in Art and Mechanic Productions, in which Matters of various Kinds are employed in combination.*

11. *Persons working and dealing in the Textile Fabrics and in Dress.*

12. *Persons working and dealing in Food and Drinks.*

13. *Persons working and dealing in Animal Substances.*

14. *Persons working and dealing in Vegetable Substances.*

15. *Persons working and dealing in Minerals.*

VI.—INDEFINITE AND NON-PRODUCTIVE CLASS. (Orders 16, 17, and 18.)

The last Class includes the numbers returned in a vague way, so as to scarcely admit of classification among either the professional, the domestic, the commercial, the agricultural, or the industrial classes.

It embraces the totally distinct Orders of general labourers (16.), persons of property returned as of no occupation (17.), and persons supported by the community (18.) Many of the persons in Orders 16 and 17 properly belong to the other classes.

Orders

16. *Labourers and others—Branch of Labour undefined.*

17. *Persons of Rank or Property not returned under any Office or Occupation.*

18. *Persons supported by the Community, and of no specified Occupation.*

Other Persons of no stated Occupation or Condition.

PROPOSED INQUIRY INTO THE OCCUPATIONS OF THE PEOPLE.

SIR,

The occupation of each person was demanded at the last Census; and to me you delegated the task of framing a classification of the people of this country in the several ranks of life. The task was difficult, and could be only imperfectly performed, on account of the imperfections of the materials. Different designations are applied to similar occupations in several parts of the country; and the same names are sometimes applied to different occupations. Trades which are carried on by the same individual in some cases are in others variously subdivided in the hands of several workpeople bearing distinct names. The subject has never been scientifically considered; so the nomenclature is unsettled. Trades have been described; but the several classes of workmen have not been distinguished; and the existing organization of the labour of England is very imperfectly understood.

In the great movement of the late French revolution (1848) much was said and written about a new organization of labour. Sound principles found able defenders; but the existing organization of labour in Europe—its means and its results—appeared to be very imperfectly known by either party. And the strikes which are so frequently witnessed in these days often arise from ignorance.

Social phenomena—like the phenomena of the heavens—are governed by laws. Nothing is accidental in the marvellous economy of society; and the investigation of its laws, while it will dissipate illusions and remove misapprehensions, will cherish just hopes, and lead to innumerable improvements. Errors will be dissipated. The workman, when the truth is known, will no longer fancy that he alone is the producer of wealth; and the master will learn that he can best win industrial victories with the aid of intelligent, healthy, contented men, and not with mere “hands.”

The foundation of the science of society is supplied by an exact enumeration of all the various classes of individuals of which the society consists. That has been attempted at the last Census. But to make the information as useful as is possible the enumeration must necessarily be followed by a special inquiry; of which I submitted to you the plan, after the Census of 1851, when you authorized me to draw up a letter, with queries, to be addressed to the most intelligent persons of all classes and of the various professions, requesting such information and assistance as would enable the censors to give a useful account of the organization of the labour of the United Kingdom.

The influence of the several occupations on the health of the people is an important branch of the inquiry, in which it may be possible to obtain the valuable assistance of members of the medical profession who attend different classes of workmen.

To obtain good information at the least cost to the public, it will be necessary to secure the co-operation of intelligent persons who are engaged in the multifarious trades of the country.

They would, as has been found by experience, answer such questions as may be put to them of a general character, and not relating to particular concerns.

The questions applicable to the several classes necessarily vary, but a complete set is subjoined, which suffice to indicate the line of inquiry.

One specimen of the information to be obtained is annexed; it was supplied by the able manager of one of the great South Staffordshire works. We have others equally elaborate. A short memorandum on the Cornish mines is added. Several valuable papers are reserved.

By collecting these papers from different quarters, and comparing the information with the Census Returns, a satisfactory account might be compiled of the persons employed in every well-defined and distinct occupation in England and Wales. The nomenclature might be settled; occupations might be briefly defined; and the classification be placed on a permanent basis. The collateral inquiry into the health of the workpeople would yield important results. I subjoin a circular of which specimens were sent out, and filled up in 1857.

To complete this brief outline of the plan of inquiry, a draft description of the medical profession is subjoined. It is written to show that the plan of inquiry, with some modifications, is applicable to the professions, which Adam Smith erroneously called unproductive, although they are more difficult to describe than manufactures, of which the products are material.

I have the honour to be,

Sir,

Your faithful servant,

To the Registrar General.

W. FARR.

1863, July.

HEADS OF INQUIRY.

Name of Profession, Art, Manufacture, Occupation?
Name of Person by whom information is given?
Address?
His description?
Date?

AGENTS.

Names and descriptions of the Agents which are employed in the several processes; cost of the same, and whether provided by masters or men.

- (1) Animals.
- (2) Tools, Instruments.
- (3) Implements.
- (4) Vehicles.
- (5) Vessels.

- (6) Machines.
- (7) Structures.
- (8) Ground.

Where the tools, &c. are numerous, state the names of those peculiar to the trade or business, and those in most constant use.

MATERIALS.

Names, proportions, market-prices; class of trade from which the materials are procured.

- (1) Materials, the combination, separation, and modification of which constitutes the product.
- (2) Materials, parts of which enter into the product.
- (3) Materials that are consumed in the production (as coals in the manufacture of iron).

PROCESSES.

A brief description of the whole, and of the peculiarities of the several parts.

- (1) General arrangements of buildings, machines, work-people.
- (2) Records or Accounts.
- (3) Test of Materials, and Products employed—

Counting.

Weighing.

Chemical testing.
- (4) Sorting, classifying—

Materials.

Products.
- (5) Packing, storing, keeping, watching, or guarding—

Materials.

Products.
- (6) Making, manufacturing—

(1)

(2)

(3)

(4)
- (7) Are any of the work-people employed in the night ?
- Describe the several important steps of the process, the time between each, and when the work goes through several hands, the portion which is performed by each ; as an example, give the day or hour, or the precise dates, at which each process is usually or in one case performed ?

PRODUCTS.

- (1) Names and short descriptions of products, or of the principal products, where they are numerous.
- (2) Varieties in the quality and prices of products of the same name.
- (3) Usual Bulk and Weight of products [also specific gravity or weight as compared with an equal bulk of water].
- (4) How conveyed, or by whom driven, if alive, to market or to customers.
- (5) How products are sold—

(1) At markets (by bulk or sample) or fairs.

(2) At shops or warehouses of Producer.

Of Wholesale Merchant.

(3) By Commercial Travellers (selling by sample or by bulk).

(4) Whether exposed in Shop Windows, or advertised in Newspapers.

(5) Class of persons to whom sold by producer—

Merchants.

Wholesale Houses.

Other Trades.

Shopkeepers (retail).

The Public at large.
- (6) Prices of products, in money—

By Weight.

" Number.

" Quality.
- (7) Credit, ordinary intervals of time—

Between the Purchase of Materials.

" Finishing of product.

" Sale of product.

" Delivery of product.

" Payment in paper.

" Payment in money.
- (8) Particular customs of profession, business, or trade.
- (9) General historical notice of any important changes—

In Tools and Machines.

" Materials.

" Processes.

" Products, Nature, Form, Quality.

" Prices.

" System of Credit."

Where books admit of it, state quality and price of some well-defined product in 1801, 1811, 1821, 1831, 1841, 1851, 1861. Effects of protection, laws, inventions on trade or art.

MASTERS AND MEN.

- The business is carried on—

By Companies.

" Firms.

" Individual Masters.
- Classes and numbers—

Of Directors.

" Officers.

" Managers.

" Clerks.

" Overseers.

" Overlookers.

" Men.
- Numbers, proportions of each class.
- Peculiar talents, or qualities in the most efficient of the class.
- Recognized Sub-divisions of the Trade (such as High and Low Priced Bakers).

MASTERS.

- Amount of capital engaged in an average concern.
- The amount in one of the largest concerns.
- The amount in one of the small concerns.
- Gross income of a concern.
- Average income in great concerns.
- Average income in small concerns.
- Ordinary net income.
- Proportion of net income to capital.
- Ordinary number of hands in employ of a master.
- Interruptions of business by the seasons, by other causes ; weeks thus lost in the year.
- Is business transmitted often from father to son ?
- Usual age of masters when they commence business.
- Do men ever become masters ?
- How men become masters ?
- The profession or business followed by special race or class of men (as Jews, &c.)
- Is the trade hazardous ?
- Usual causes of hazard and failures in business.
- Age at which masters retire from business.
- Estimated amount of property realized in business.
- Known instances of great wealth acquired.
- Upon what terms business is sold.

MEN.

- Special talents required in men.
- Of 100 apprenticed boys, proportion that would be unable to learn the profession, business, art.
- Age of learning, apprenticeship.
- Term of apprenticeship.
- Conditions of apprenticeship, fees.
- Peculiar costume of workpeople—

At work.

At other times.

WAGES.

SEXES.	AGES.							
	15-	25-	35-	45-	55-	65-	75-	85-
Males -								
Females -								

- This form may be used for the hands employed in each of the different branches.
- Do workmen bring up sons to the trade ?
- Salubrity or insalubrity of the trade.
- Diseases incidental to workpeople.
- Causes of the same.
- Temperance or intemperance of workpeople.
- Hours of work at different seasons, night or day.
- Slack seasons.
- What provision is usually made for sickness.

" " for old age.

" " for families.
- Improvement in condition of men since 1801.

SOUTH STAFFORDSHIRE.—COAL MINING.

Name of Profession, Art, }
 Manufacture, Occupation } Coal-mining.

Name of Person by whom }
 information is given }
 Address }
 His description } This paper is by an
 eminent authority at
 the head of one of
 the great Staffordshire
 works.

Date February 1857.

AGENTS.

Names and descriptions of the Agents which are employed in the several processes; cost of the same; and whether provided by masters or men.

- (1) Animals }
 (2) Tools, Instruments } The animals employed are
 (3) Implements } horses; the exceptions are
 (4) Vehicles } so few as not to be worth
 (5) Vessels } noticing. The class of horses
 (6) Machines } depends on the nature of the
 (7) Structures } mine; in the thin seams ponies
 (8) Ground } are used, while in the thick
 coal or 'ten-yard coal, where

there is plenty of head room, very large and fine animals are often sent down the pits, and work underground for years, such as are worth 40*l.* to 50*l.* each. Sometimes as many as 20 of such horses are working in one coal-pit; the most usual number is probably 8 or 12, but of course this varies according to circumstances. These horses are generally supplied and kept by the charter master or "butty," who works the pit by contract, employing and paying the men under him, and finding at his own cost various materials as specified in his contract.

2, 3, 4, 5, 6, are referred to in the supplemental lists of tools, &c., and technical terms with explanations herewith.

MATERIALS.

Names, proportions, market prices: class of trade from which the materials are procured.

- (1) Materials the combina- }
 tion, separation, and } Coal mining in South Stafford-
 modification of which } shire is carried on princi-
 constitutes the product. } pally for the supply of the

iron manufacture; and although some of the coals are almost exclusively appropriated for household purposes, and are sold for the same, yet the quantity so dealt with bears a very small proportion to the quantity used in manufacture. The "ten yard" coal is considered the best for iron making, but it is to some extent also sold for household purposes. The coals lower in the series are not so good in quality, and do not fetch so good a price. Besides this the thick coal is classified into many sorts, as best coal, common coal, lumps, (a smaller size,) large slack, (smaller still,) and fine slack (the smallest). Prices vary greatly, according to the condition of trade. It is difficult to give a clear index of the prices over a series of years and of all kinds; but supposing we classify the thick coal as the standard, and bring it under three kinds, "large coal," "middle sized," and "small," and assume the produce to be one fourth of the first, two fourths of the second, one fourth of the third; the proportions vary in almost every mine, but I can only take a very general index; say, therefore, over a period of the last ten years:—

PRICES OF THICK COAL.

	Large Coals.	Middle Coals.	Small Coals.	General Average.
Maximum price	11 <i>s.</i> per ton	9 <i>s.</i> per ton	3 <i>s.</i> 6 <i>d.</i> per ton.	8 <i>s.</i> 1 <i>d.</i>
Minimum price	7 <i>s.</i> " "	5 <i>s.</i> " "	2 <i>s.</i> per ton	4 <i>s.</i> 9 <i>d.</i>
Aggregate average	- " -	- " -	- " -	6 <i>s.</i> 5 <i>d.</i>

PROCESSES.

A brief description of the whole—and of the peculiarities of the several parts.

- (1) General arrangements }
 of buildings, machines, } Coal mining in South Stafford-
 workpeople } shire derives its character-
 (2) Records or Accounts ... } istic features, in some de-

gree, from the peculiarity of the ten-yard coal (30 feet thick) called "the thick coal."

The workable seams of coal in the district vary from 2 ft. 6 ins. to 10 ft. thick, and then, without any intermediate gradation, to the thick coal. Another element in the character of the district, especially as regards arrangement of machinery, is the occurrence of numerous workable strata of ironstone among the coal beds; some of these ironstones are worked along with the coal, but most of them are worked alone as distinct workings.

The "thin coals," up to 6 feet thick, are worked after the fashion called "long wall" or Shropshire system; that is to say, the whole of the seam of coal over a certain area is taken out without leaving any pillars. The operation is continued by carrying forward the excavation to a great width, say 100 to 200 yards, from day to day, in one continuous line called the "face" or "wall," allowing the super-incumbent strata to fall down constantly behind, through which the drawing roads or ways, from the face to the pit shaft, have to be maintained, and have consequently to be partially excavated again and again, and occasionally supported by props of wood.

The ironstone strata are for the most part worked in a similar way, *i.e.* "long work."

The coal seams from 6 to 10 feet thick are generally worked in what is called ordinary pillar and stall work, *i.e.* pillars of about 3 yards square are left of the full thickness of the coal, to support the "roof," at intervals of 4 yards more or less according to the nature of the rock immediately upon the coal, called by the miner "the roof."

The thick coal has methods of working peculiar to itself to which I will refer by and by.

Keeping the foregoing in view, a colliery in South Staffordshire may be briefly described thus:—It consists generally of a certain number of *pairs* of pit shafts of from 6½ feet to 8 feet in diameter, the pair being a few yards asunder, and so sunk from surface through the required coals for the purpose of ventilation, (one being an "upcast" or egress shaft, and the other a "downcast" or ingress shaft in respect to the air, of each pair,) the numbers varying according to the extent of the tract of mines about to be worked and other circumstances. In the thick-coal part of the district, a whimsey or steam engine is attached to each pair of pits, for drawing produce to surface; in other parts of the district one whimsey often does duty for two pairs or more. Where much water has to be pumped from the mines, a special engine and pumps are appropriated for the purpose to one pit shaft, called the "water engine" and "engine pit."

The workpeople are divided generally into three great classes, the thick-coal men, the thin-coal men, and the men who work in pits getting ironstone, the last class being called "miners" (the ironstone is technically called "mine," hence "miners"). The wages of the thick-coal collier are always higher than those of the thin-coal collier, because his occupation, on the usual system of getting thick-coal, is very hazardous. The wages of the thin-collier are always on the same scale as the miner. These classes are again divided as follows:—1st, men on surface connected with the pit, called "banksmen." Below ground, 2d, "bandsmen," comprising men and boys who load waggons, drive horses, and do other general work, but who do not *work with the pick*, and whose standard of wages is for a day of 12 hours; 3rd, "pickmen," comprising all men who work with the pick, or who have labour to perform connected with getting the coal, of a skilled character, and which is consequently paid for by the same standard as the pickmen who work by measure, of which he can do 1½ day in a day. (See *ante*.)

The mode of working the thick coal usually adopted is (after having driven "gate roads" and airways to a certain extent), to excavate portions of the stratum to its full thickness, leaving pillars of coal, of about 10 yards square, extending from the rock or shale immediately below the coal to the rock or shale

immediately above it (*i.e.* from the floor to the roof). These excavations are called "sides of work," and they contain from two up to eight or more of such pillars, and in every case are surrounded by a wall of coal called a "rib," so that each excavation may be shut out and kept independent, in order to prevent the spontaneous combustion of the refuse.

The first part of the operation in the excavation is to partially clear out from 6 to 8 feet thick of the coal around the intended pillars; this is called "undergoing." The second part of the operation is to cut down the superincumbent portion of the coal, called "cutting in" the coal, or "cutting in the side of work." The second operation is the most hazardous to the lives of the men, from the great height from which ultimately the coal has to fall, and from the difficulty of seeing the roof by reason of its distance.

There is another mode of working the thick coal adopted by a few of the coalmasters in the district, by which the risk to the lives of the men is greatly less, and the whole of the stratum of coal is got out, thereby evading the waste by pillars and ribs accruing in the old system (probably from one third to one fourth of the whole stratum). This mode is to get the upper half of the stratum first by a modified "long work," bringing the whole of that portion out, and allowing the roof to settle down on to the lower portion, and after a certain time, by a precisely similar operation, to get the lower half of the stratum. It may be questioned how far this mode would answer in cases where there are no shales of any kind interposed between the partings of the thick coal (the thick coal is a series of well-defined thin coals laid one on the other, and between some of them is sometimes interposed a shale varying from a few inches to upwards of a foot in thickness); but where there is any well-defined shale towards the middle of the stratum, as very often happens, there can be no question as to the advantage of this mode. I do not, however, say it would not answer in the former case.

There are classes of labourers employed in collieries not comprised in the foregoing; they, however, are not considered colliers. There are enginemen ("whimsey men"), carpenters, blacksmiths, and general labourers, coal loaders, and the like.

Records.—Mining plans are now almost universally kept in this district, on which all the workings are recorded from time to time.

*General historical notice of
any important changes—*

*" products, nature,
form, quality,*

" prices.....

" system of credit...

It is scarcely necessary, perhaps, to state what is so well known in the history of mining, and applies equally to this district and all others, viz., that the present development of mining industry is the result of the application of the steam engine as perfected by Watt towards the end of last century; from that time the progress has been rapid and continuous.

South Staffordshire, however, has undoubtedly made slower progress in mechanical appliances to mining than any other district of importance in the kingdom. This may in some measure be due to the "buttery system;" but it is attributable also very much to the following causes:—

- 1st. The easy character of the strata generally to sink pit shafts through.
- 2d. The comparatively small depth at which a large proportion of the mineral wealth of the district is found.
- 3d. The great number of workable seams of coal and ironstone found within that limited depth over a large portion of the district.

These circumstances have conspired to render it apparently more economical to have a great number of pit shafts at short distances from one another, at each of which a small quantity is raised, than to have

few shafts with appliances sufficient to draw a large quantity at each; and the result has been, that as a rule small steam engines are used, and an inferior character of machinery generally obtains; consequently a "rough and ready" system has pervaded all the operations, and has been perpetuated, instead of scientific arrangement.

The deeper sinking to the thick coal necessitates a different character of operations, which already manifest themselves somewhat, and as these become more general, which will be the case as the yet remaining portion of the field of thick coal is developed, more scientific arrangements will be required, and no doubt will obtain.

MASTERS AND MEN.

<i>The business is carried on—</i>	
<i>by companies.....</i>	Very rarely.
<i>" firms.....</i>	Very often.
<i>" individual masters.</i>	Oftenest.

I may as well allude here to the position of the contractor, who is called a "charter master" or "buttery," as this system of contract, which almost universally pervades the South Staffordshire mining districts, greatly influences the division and arrangement of mining labour in it. I take it, the "charter master" originally was really the mine proprietor, *i.e.*, the party obtaining a charter from the Crown, or from the lord of the manor, to work a certain tract of minerals on royalty or a yearly payment, or otherwise, as a speculation. Now the term implies the contractor who agrees to raise for the mine proprietor coals from the mine at a certain rate per ton, delivered on the pit bank (which is called his "charter" price), employing and paying the men at his own cost, and generally purchasing and keeping the necessary horses, the candles, the beer, certain parts of the waggons or skips, and a portion of the timber. The proprietor sinks the pit shafts, erects the whimsies and the water engines, and all the necessary machinery, in fact, makes all the necessary "plant" of the colliery, and also in general "opens out," as it is called, the workings of the mine, *i.e.*, makes certain initiatory "headways," gate-roads, &c., and he generally undertakes to keep free the mine from water, and to pay for new "openings out" of the main from time to time (called new "ranges of work"), and to pay for gate-roads and airways, and the like, in addition to the contract price or "charter." The charter master is mostly called the "buttery." Two men join in partnership generally in a pit contract, and are called "butteries." In the mining districts of South Staffordshire and of Shropshire, two or more equals banding together for effecting any purpose are called "butteries;" an assistant, therefore, provided he be an equal, is a "buttery." Hence the terms "to buttery," meaning to aid; to "go butteries," meaning to join each other in an undertaking.

The working colliers are the servants of the "buttery," and consequently come little in contact with the colliery proprietor or coal owner; they find no materials of any kind (even their working picks are furnished by the buttery); and in a thick coal-pit each man is allowed two quarts of beer, furnished free to him by the buttery. They work by the day, but those who work with the "pick" have a certain measure of work to do, called a "day's work," of which an expert man can do a "day and half" in the twelve hours. The measure, whether in thick coal or thin seams, (for the system is universal in all,) is called the "stent" or "stint," and other men employed in the pits have generally a certain amount of special work to perform according to circumstances, also called a "stent;" hence to be bound to perform a certain amount of work in a certain time is "to be stented."

There is a standard rate of wages upon the so-called "day's work" of the *pickman*, which standard is from time to time altered, not by the buttery, but by the coal master, according to the market price of coal, or to the demand for labour, or otherwise, and the buttery's "charter" or contract price is arranged to rise and

fall according to the alterations in such standard of wages. The butty regulates the collateral branches of labour upon that standard, according to his own view, in the details of which he is not controlled.

The butty is usually a man who has himself been a working collier; his general characteristics are a knowledge of the manual operations of mining, considerable shrewdness, and energy enough to act on the wills of other men; but general intelligence is not often his characteristic, for many cannot write, and there are not a few who cannot read. Notwithstanding this, very many of them employ from 50 to 100 men. The butty employs under him several overseers or foremen, called "doggies;" the number varying according to the extent of the pit, say a doggy for every 30 men. The doggy's ostensible duty is to arrange the men at their work, and to "measure on the stent." They are chosen from among the rest as being steady and expert. The doggy if of saving habits frequently becomes a butty; the butty occasionally accumulates considerable property, and sometimes becomes himself a coal master. The system has many evils, but these circumstances are perhaps among its advantages.

Classes and numbers..... It is difficult to give an index of true proportions of different classes when the mines are separated from the manufactures with which they are, as before explained, for the most part connected. Such collieries as are so are called "sale collieries," and I can only give, what I conceive, to be an approximate estimate.

For 100 persons employed, they may be divided as follows :

	Men.	Boys.	TOTAL.
Clerks	2	—	2
"Butties"	2	—	2
Doggies or overmen (below)	2	—	2
Men above ground, including sundry kinds of labour	15	2	17
Men and boys below ground (colliers proper)	54	23	77
Total Men = 75 } = 100	75	25	100
Boys = 25 }			

To this may be added,
One colliery manager or bailiff to 300
One surveyor - - - - - 300

There are no special talents required for the ordinary collier; good health and physical power are the requisites; and for those departments which may be termed skilled, expertness with the pick being the principal feature, *early* teaching seems to be the only essential. For other departments of labour below ground, young and middle-aged men (say 20 to 35 years old) previously unaccustomed to the work answer the purpose; but for working with the pick those only who commence as boys in the pit ever become expert. The system of apprenticing pauper children to "butties" used at a former period to obtain, but the practice is now discontinued. No kind of apprenticeships now obtains. The skilled labour (so called) is principally supplied from the children of the colliers themselves, who take them to work at an early age; 10 to 12 years of age. If they fail to commence before they reach 12 years, they show a disinclination to adopt the mode of life. Those children especially who remain at school beyond that age show such a disinclination. This fact argues the desirability of arrangements (if possible) for the *partial* attendance at school of the boys after they commence to work in the pits for a certain period.

WAGES.

The wages of boys are very high in comparison with those of the men, the demand being generally in excess of the supply.

There is no material difference in the earnings of men at different ages. They commence to obtain full wages at the age of 20 or 21 years, and continue for the most part to obtain full wages up to the age of 55 years, beyond which age there are few colliers at work.

Female labour is not much employed in the collieries of South Staffordshire, and as a rule it is considerably on the *decrease*.

TABLE of RATES of PITMEN'S WAGES PER DAY over a Period of last Ten Years.

	LOWEST RATES OF PERIOD.				HIGHEST RATES OF PERIOD.			
	Nominal Standard Rates,	Actual Earnings,			Nominal Standard Rates.	Actual Earnings.		
		Men, 20 to 55 Years.	Boys.			Men, 20 to 55 Years.	Boys.	
			12 Years.	15 Years.			12 Years.	15 Years.
Thick-coal "Banksmen"	..	3s. to 3s. 6d.	1s. 3d.	2s.	..	4s. to 5s. 6d.	1s. 9d.	3s.
Do. "Pickmen"	3s.	4s.	..	..	5s.	6s. to 7s.	..	..
Thin-coal men and "Miners" "Banksmen"	..	2s. 6d. to 3s.	1s. 3d.	2s.	..	3s. to 4s. 6d.	1s. 6d.	2s. 9d.

They work on an average five days per week.

MASTERS.

Amount of capital engaged in an average concern
The amount in one of the largest concerns
The amount in one of the small concerns
Gross income of a concern
Average income in great concerns
Average income in small concerns
Ordinary net income
Proportion of net income to capital
Ordinary number of hands in employ of a master
Interruptions of business by the seasons—by other causes; weeks thus lost in the year ..

very shallow, and which are not troubled with *water* and the like, are inexpensive. On the other hand, there are some in which difficulties of a special character arise in sinking, or in which there is much

water to contend with, or where the workable strata are at great depths, which require very large outlays.

In such opposite cases the capital and the commercial "returns" bear relatively a very different proportion. It is possible, however, to evolve a kind of average measure of capital in respect of quantity raised, which may give an approximate index to the whole upon which general calculations may be based. A "plant" of 6,000*l.* might, for example, in that way represent an annual produce of 40,000 tons of coal, which would probably have to be renewed every ten years. For every such quantity, therefore, a sum of 800*l.* a year would be requisite to repay capital and interest thereon.

Thus, given the total quantity of coals raised in South Staffordshire annually ÷ 40,000 tons × 6,000*l.* = capital employed.

I have no means of ascertaining the total quantity of coals raised annually in the district; but if, for

example, it were assumed at 7,000,000 tons, then $\div 40,000$ tons $\times 6,000$ l. would represent a total capital of 1,050,000l.

The ironstone raised per annum may be treated in a similar manner; but assuming that an equal capital would be required to raise *one third* of the annual quantity, i.e., 13,000 tons of ironstone raised annually would represent 6,000l. capital. I have no means of correctly estimating the total quantity of ironstone raised, but assuming it to be 1,500,000 tons annually then $\div 13,000$ tons $\times 6,000$ l., a capital would be represented of 690,000l. These two sums added together would give a gross total of 1,740,000l., or in round numbers 1 $\frac{3}{4}$ millions.

Again, as to profits, &c., the average value of the products may be divided thus:

Return of capital, interest, and profit	- $\frac{2}{13}$ ths.
"Lord's rent" or the value of the mineral property.	- $\frac{1}{13}$ ths.
Materials	- $\frac{3}{13}$ ths.
Labour (i.e. wages)	- $\frac{6}{13}$ ths.
Is business transmitted often from father to son?	Yes.
Do men ever become masters? ...	Yes.

MEN.

Peculiar costume of work-people—	The working dress of the colliers now seems to be universally flannel trousers, a shirt, and a loose frock called a "smock frock" reaching to the knees.	
	at work.....	
	at other times ...	

The Sunday dress, or as it is called the "holiday clothes," is exceedingly various; greatly "modernized" of late years. The ambition of the more steady is to possess "a suit of black,"—black cloth.

Diseases incidental to work-people..... } Asthma and diseases of the heart.

Temperance (abstinence of workpeople.....) } A very great amount of intemperance among the mining population.

Hours of work at different seasons, night or day } About one tenth of the men employed work at night.

What provision is made for sickness, for old age, for families } In the larger establishments there is very often a stated allowance made by the proprietors in case of accident, and where a permanent disablement results, the allowance is continued for a certain period, from twelve months to two years, or sometimes longer, according to circumstances. In cases also of fatal accident a similar allowance is made to the widows. The men themselves also in all such cases have among themselves what they call "gatherings" or collections weekly from all the men and boys employed in the respective pits, from 3d. to 6d. each. But there is no general rule.

Some collieries have "sick clubs," or as they are called "field clubs," to which all the men and boys subscribe, and from which an allowance is made in case of sickness, from 5s. to 7s. a week, or the like; but there is no general plan. For the most part the colliers and miners, and all other classes of workmen, are members of independent "friendly societies," or as they generally call them, "lodges," of which there are numbers in every place in the district, and which are almost universally held at public houses, and the rules are of course constructed with a view to "the good of the house." They are as a rule conducted on a vicious system, and based on false and imperfect calculations, so that they afford no real security for effecting the objects they have in view. The universality of the system, bad as it is, however, shows the *desire* to make a provision, and the effort only wants direction into the proper channel to be productive of great good. I am bound to say too, that among the colliers of this district there is great kindness of disposition oftentimes manifested towards each other in cases of accident and distress; the sums subscribed in such cases (not fitfully, but from week to week, over long periods) have occasionally surprised me,

Provision for old age is the *last* thing thought of among the mining population, and still less provision against premature death; consequently the savings bank is rarely used; deferred annuities or insurance never. The only investment used is that of "building societies." The collier has a great desire to possess a house of his own; and often to obtain it he mortgages the property so highly as to pay nearly equal to a full rent in shape of interest.

ARTICLES USED IN COAL PITS—SOUTH STAFFORDSHIRE.

Name.	Description.
The "Skip"	—Is a small stage of wood or iron, about 3' 6" $\times$ 4' 0", on four small iron wheels, with a loose iron ring at each corner, and generally has an iron bow across it, which corresponds in form and use with the handle of a basket. The coal or other product of the mine is loaded on it with rings or squares piled one above another to keep the load together in shape.
The "Rings" or Squares	—Are of iron hoop, 6 or 7 inches broad, and of the size of the bottom of the skip.
The "Tacklers" or a pair of "Tacklers"	—Consists of four stout chains about 9 feet long, all joined together at one end by one strong ring, the other ends furnished with hooks, for attaching the loaded skip by its four loose rings to the pit rope or "band" to be drawn up the shaft.
The "Tackle Skip" or "Tackled Skip"	—Is the same as the other skips, but without wheels. It and its tacklers are kept exclusively for raising or lowering persons.
"Dog Hook"	—Is a light iron hook, a short wooden handle through the eye, for taking hold of the skip to turn it round or adjust its position.
"The Pick."	—Iron head with steel points, "helve" or handle of wood, for "holing" or cutting horizontally into the bottom part of the coal and "cutting," meaning vertically.
"Crows" or Crowbars	large and small — For wrenching down the coal after the holing is done.
The "Dresser" or "Tomahawk."	—A heavy pick, with one steel point, for breaking the coal when loosened by the crowbar, &c.
The "Wedge"	—Is of iron to drive into cracks in the coal to burst it asunder and thereby assist the crowbar.
The "Hammer."	—Of various sizes, for driving wedges, &c., and breaking the coal.
* The "Pricker."	—

(9 or 10 feet long.) Iron head and "stail" or handle of wood, for removing the prop wood when the coal is to be allowed to fall.

* The "Jobber"—Is a light wooden stake with an iron point, by which it is stuck upright, to serve as a candlestick.

* These are exclusively used in the "Thick Coal."

Name.	Description.	Name.	Description.
The "Rake"—	Is of Iron, has six or seven strong teeth about 7 inches long and 2 inches apart. For filling the smaller lumps into the basket.	Water Engine.—	Steam engine for pumping the water from the pit.
The "Basket"—	Of stout wood shavings or of sheet iron, of an oval form, about 6 inches deep. It is laid somewhat on edge while being filled with the rake	Pumps, Lifts, and Trees.—	Pit pumps consist of one or more divisions called "lifts," and these of pipes 3 yards long called "pump trees."
		Clapper—	Is the signalling apparatus placed in or near the engine-house, and is worked by a wire which is fastened to it and taken to the pit frame, and sometimes to the bottom of the shaft, which is pulled or "rung" as a signal for the engine to "pull up," "hold," or stop, and "short" or let down.
* The "Scuvin" or "Frank"—	Is a shovel with from 12 to 15 prongs instead of a blade, making a lifting part about 15" sq. For lifting what is left by the rake, all but the very fine dirt.	The Band—	Is the rope or chain worked by the engine for drawing the products of the pit to the surface, and lowering or raising the men into or out of the pit.
Shovels—	For loading the fine dirt and other rubbish.	The Foot-hook Chain—	Attached to the end of the band where there is no cage, for facility of suspending the load.
The "Druggan"—	Is a wrought-iron tank on four wheels, for taking fresh water down the pit for the horses, or for drawing water out of the workings.	The "Log."—	An iron weight fastened some length up the foot-hook chain to prevent the end of the band, when not loaded, from being pulled over the pulley by the weight of that part of it between the pulley and the engine.
The "Bowk"—	Is a large strong wrought-iron bucket, for raising and lowering the men and materials in sinking or repairing a pit shaft.	The Pit Frame.—	Erected over the top of the shaft for the support of the pulley.
The Water Barrel—	Of wrought iron, for drawing the water which accumulates at the bottom of the shaft to the surface. It is furnished with a self-acting valve in the bottom.	The Pulley.—	A large iron wheel on the top of the pit frame on which the band runs.
The "Lander"—	Is a large wrought-iron or wooden trough into which the barrel empties itself, and from which the water runs away in a culvert or other water-course.	The Runner.—	A square platform or stage on four wheels, which is run over the top of the shaft as soon as the load has been drawn sufficiently above the surface to admit it under it. On it the load is lowered or "landed." It is then drawn back from over the shaft, and the load removed.
Blasting or "Blowing" Tools.—	For forming the hole for the blasting powder, and ramming after the powder is placed.	The Cage.—	In the few instances in this district in which cages are used there are no runners required, a moveable stage attached to the bands working between wooden guide rods or slides placed vertically in the shaft; on it the skips and men and materials are let down or drawn up.
Drink Bottles—	Are little wooden barrels for holding from 10 to 20 quarts of pit drink (beer) for the men.	The Hovel.—	A building near the pit for the shelter of the banksmen and others at work on the surface.
Safety Lamps.—	For ascertaining the presence of fire-damp (explosive gas).	The Pit—	Is the whole of the workings under the surface.
Candles—	Small, about 16 to the pound, carried about fixed in a bit of soft clay, or stuck on the sides of the roads or working places.	The Shaft.—	The vertical and generally cylindrical opening from the surface down to the stratum or "measure" to be worked. It is usually 7 to 8 feet diameter, lined with brick and mortar or dry brick. Shafts are generally sunk in pairs for ventilation.
† "Sprags"—	Are pieces of timber about the size of a man's arm, used as props when the excavation in the bottom of the coal is about 2 feet high.	The Inset.—	The opening at the bottom of the shaft, being the beginning of the underground roads.
† "Holing trees."—	Are larger props used when the excavation reaches 4 or 5 feet high.	The Inset Bar.—	The first bar over the inset.
† "Stall trees"—	Are the largest props for places 3 feet high and upwards.	Gate Roads—	Are the roads or passages driven out or formed in the solid coal or other stratum, or preserved open in the "gob" or "waste." Along them the products of the pit are drawn to the bottom of the shaft. They are frequently arranged so that two or more of them shall serve as
† "Bars."—	Stout pieces of timber put horizontally across the roads, &c., to keep the sides from falling into the roads, &c.	Air Doors.—	Airways or courses, wooden doors being put in such of them as it is intended the air should not pass along.
† "Settings."—	The bars are sometimes supported at end by an upright "tree." The three pieces are then called a "setting."		
† "Stretchers" or "Straighteners"—	Are bars, generally somewhat oblique, to support a place which is not vertical.		
"Rails" and "Sleepers"—	Of wrought or cast iron are laid on the roads to form tramways for the skips.		
EXPLANATION OF TERMS USED AT COAL AND IRON-STONE PITS IN SOUTH STAFFORDSHIRE.			
Relating to Operations and Things used.			
Whimsey.—Steam engine for winding or drawing the products of the pit to the surface.			

* Pronounced, "Skuv-rin."

† Timber for supports, oak or larch poles, from 5 to 8 inches diameter.

Name.	Description.
Heads or Headings.	The roads in thin mines are generally so called.
Air Heads.	Smaller passages, from 3 to 4 feet square, driven in connexion with the gate roads for the purpose of ventilation in those cases in which the arrangement of the roads would not suit.
Spout.	Temporary communication between air head and gate road.
Side of Work.	The large excavations in the thick or ten-yard coal, generally in the form of a rectangular room, with from one to eight or nine pillars, formed by stalls or openings about 10 yards wide and 10 yards apart, which leaves the pillars about 10 yards square, thus :

Bolt Hole.	The end of the gate road at A is called the bolt hole. There are sometimes two bolt holes and no air head. The four walls or sides are called ribs, and the partitions of coal (about 10 yards thick) which are left to separate the sides of work from each other are also called ribs. The excavation is commenced by "holing," which is a horizontal cut made the full breadth of the stall in the lowest part of the coal, taking out a thickness of about 2 feet 6 inches. A vertical "cutting" is then made along the stall to the height of about 8 feet, generally on one side only, and the coal either falls of itself to that height, or is brought down by crow-bars. When the whole side of work is made of this height it is said to be "undergone." It is then "cut in," an operation similar to undergoing, but in the upper part of the coal, and in the reverse direction, being begun at the end farthest from the bolt hole. As the cutting in progresses the "shut comes," that is the shaly stratum next above the coal falls, leaving the rock for the roof, which will sometimes remain up for many years. As soon as the coal is all got out, except what is left as pillars, a "dam" of brick and mortar is built across the gate road (at B),
Ribs.	
Holing.	
"Cutting" and "undergoing."	
"Cutting in."	
"Shut."	
"Dam."	

Name.	Description.
"Square work."	of working is called "square work."
The Face or Wall Face.	The working place in thin coal and ironstone pits. It is usually in one continuous line, more or less curved, sometimes 400 or 500 yards long, divided into lengths of 40 or 50 yards called "navveys," by the roads which come to it from the shaft. The holing is here done at one time all along one or more of the navveys, but only $\frac{3}{4}$ or 1 yard "in" or forward, and the top is "got off," generally requiring powder to be used in blasting or "blowing," particularly in the ironstone. When this stuff has been loaded up and drawn away, the timber along the face is shifted forward, and as much of the rubbish as there is room for is built up behind, which, with the breaking down of the roof, forms the "gob" or "waste," passages being left through it for the roads.
"Navveys."	
"Gob" or "Waste."	

Terms relating to Persons.

Whimsey Man.	The engine tender who works the winding engine.
Fireman.	The stoker at the steam boilers.
Butty.	Charter master or contractor for working the pit by his own men at a certain rate per ton.
Banksman.	Has the management at the surface of everything coming up or going down the shaft, pushing on and off the runner when there is one.
Hanger-on.	Has a duty similar to the banksman's, at the bottom of the shaft.
Horse Drivers underground.	Are lads who manage the horses employed in drawing the skips out and in between the working places and the shaft. Men are employed as horse drivers on the surface, as they have to "tip" or empty the skips.
Bandsmen.	Load the skips and break up the large masses of coal, &c. into sizes suitable for being loaded, and in the thin coal and ironstones they "set" or place the timber for the temporary support of the roof, except where timberers are kept for that purpose.
Pickmen or Pikemen.	Do the holing, cutting, and undergoing, and cutting in, make the gate roads and air heads, and do generally all that is done with the pick. In the thick coal they do the principal part of the timbering.
Doggie.	The underlooker or foreman in charge of the men underground. He also makes the examination of the pit in the morning with the safety lamp before the men are allowed to go to their work.
Horse Fettler.	Horsekeeper having the care of the horses underground, and the keeping of the stable in order.

MINES IN CORNWALL.

STATEMENT showing the Number of Mines at work in Cornwall in 1854, with the Outlay, Number of Men employed, Produce, and other Particulars.—Compiled by Mr. Nicholas Ennor of Wiveliscombe, Somerset.

Number of Mines now at work in Cornwall is about	Average Cost to open each.	Total Outlay required to open them.	Number of Tons of different Ores raised annually.	Average Value per Ton.	Total annual Value of Ores returned.	Number of Individuals employed.	Quantity of Ore raised by each Man.	Men's average yearly Wages.	Total Annual Amount of Men's Wages.	Lords' Dues.	Annual Amount of Dues.	Annual Amount of Poor Rates at 2s. of the Pound on Dues paid by Companies.
350	£ 8,000	£ 2,800,000										
THE AMOUNT OF ORE RAISED IN THE YEAR.				£ s. d.	£		Tons.	£	£		£	£
Copper	-	-	151,000	6 7 6	962,625	20,000	7½	35	700,000	½	62,164	6,216
Lead and Antimony	-	-	5,600	17 0 0	95,200	1,850	3	30	55,500	½	6,346	634
Tin	-	-	4,000	60 0 0	240,000	5,303	½	30	159,000	½	13,333	1,333
Iron, Blende, and Arsenic	-	-	20,000	1 0 0	20,000	400	50	30	12,000	¾	1,000	50
			180,600		1,317,825	27,550			926,500		82,843	8,233

AGENTS.

Names and Descriptions of the Agents which are employed; cost of the same, &c.

CANDLES—consumed by men and boys, 2 lbs. per week or 100 lbs per year each; for 16,000 underground men and boys = 1,600,000 lbs. at 6d. per lb.	£ 40,000
POWDER—¼ lb. each day per man, or 50 lbs. each per year; for 16,000 underground men and boys = 800,000 lbs. at 6d. per lb.	20,000
IRON AND STEEL—1 lb. per day wasted by each man, or 2½ cwt. per year = 2,000 tons at 12l. per ton	24,000
TIMBER—¼ foot per day each; for 27,550 persons (as all employed use timber), 75 feet each = 2,066,250 feet, cost at 1s. foot	103,312
COALS—for 340 engines, 1 ton per day each for 350 days = 119,000 tons at 1l. per ton delivered at the mine	119,000
CHAINS, ROPES, &c.—including buckets and surface tram-irons, for waste each day 2s. or 30l. per year each for 350 mines	10,500
LEATHER—and Hemp, Oil, and Grease, 2s. 6d. each day for 300 days, or 37l. 10s. per year for 350 mines	13,125
STEAM ENGINES—340, varying from 20 inches to 100 in cylinder, cost with pumps and erections 2,300l. each = 782,000l.; supposing these engines to stand 10 years, and then resold at a reduction of 1,000l. each, being a loss per year of	34,000
WATER WHEELS—350 (one to each mine), at a cost of 120l. each = 42,000l. They are reduced half in value in 10 years, say a loss per year of	2,000
LAND—500 acres yearly damaged, 2l. per acre	1,000
SAFETY FUZE—and other incidental expenses	10,000

WAGES. Individuals Amount of Wages.

Men who work underground ¾ths by day and ¼th by night (in addition to about 1850 classed with the boys)	14,150
Wages paid this class, viz., 14,150 men at 40l. per year	566,000
Mechanics and other surface labourers	3,000

Wages paid this class, viz., 3,000 at 39l. per year	-	117,000
Boys and girls, half of each, at 16l. 3s. per year	9,000	-
Wages paid this class, viz., 9,000 at 16l. 3s. per year	-	145,000
Agents and clerks, 4 to each mine or 1 to 20 men, at 70l. per year	1,400	-
Wages paid this class annually	-	98,000
TOTAL	27,550	926,350

REMARKS.

The Mines in Cornwall are about 350. They are worked by companies in shares varying from 64 to 100,000, and sold accordingly.

Agents and Clerks, for each department, are provided by the companies.

Machinery.—Chiefly steam engines, varying from 20 to 100-inch cylinders. Some mines have as much as 60,000l. worth of machinery on them.

Average Capital required to work a mine, 8,000l.; large mines, such as Wheal Vor, 100,000l.

Rock.—Chiefly clay, slate, and granite.

Tools.—Picks, shovels, borers, wheelbarrows, &c.

Materials.—Candles, powder, timber, iron, coals, chains, ropes, and leather.

Buildings.—Machine-houses, office, smith's shop and workshops.

Produce.—Principally copper, which lies out of doors unguarded; it is sold by tender, 21 cwt. to a ton, taking a bill of three months, and is all taken to Wales to smelt.

Lead and Tin ore, when marketable, is generally kept under lock; most of it is sold by tender; lead 21 cwt. to the ton, tin 20 cwt. Two thirds of the tin is smelted in the county, and shipped in blocks to the market.

Iron, Blende, and Arsenic is sold by private contract, 21 cwt. to the ton, to the best bidder, and chiefly taken to Wales to smelt.

Individuals dependent on mining in Cornwall about 70,000; about 27,500 are employed on the works. 16,000 work under ground, ¾ by day and ¼ by night.

Mining in Cornwall is not much impeded by season.

Work in mines is nearly all let by contract.

Apprentices.—None taken in mines; children either work at contract or day work, following the steps of

their parents; they live at home until they can provide for themselves.

Workmen become agents from knowledge and activity, and often large shareholders in the mine; some of them accumulated immense wealth.

Mining has been carried on by the same race, from father to the son, for centuries.

Conditions of miners are very much improved within the last half century. Children are better educated. They are an intelligent shrewd class of people when cultivated.

Temperance.—They are the most temperate of any class of men in England, with the exception of the agriculturists.

Age.—Average about 45 years; that is those working in deep mines.

The Disease incidental to the occupation is consumption, originating from working in deep and badly ventilated mines.

Sickness.—Provision for sickness is made by the payment of a shilling per month, for which they get medical attendance, and seven shillings per week when ill, but only as long as the mine is worked.

Dividends.—Some large productive mines pay great dividends. Wheal Buller paid last year 53,760*l*. Average mines pay from 2,000*l*. to 6,000*l*. 45 mines last year paid 230,000*l*.

Vessels employed to carry ores and china clay 220, employing about 1,000 individuals. The majority of those vessels bring back iron and coals for the mines and their dependencies.

STATEMENT OF ANNUAL EXPENDITURE and PRODUCE.

ANNUAL EXPENDITURE.		ANNUAL PRODUCE.	
	£		£
Total amount of men's wages - - - - -	926,500	Copper, 151,000 tons at 6 <i>l</i> . 7 <i>s</i> . 6 <i>d</i> . per ton - -	962,625
Dues paid to lords - - - - -	82,843

		Balance of profit - - - - -	4,000

This shows a profit of 4,000*l*. a year on an outlay of 20,000*l*.

SANITARY INQUIRY CONNECTED WITH OCCUPATIONS.

(Circular.)

Sir,

General Register Office,
London, 1857.

The Registrar-General desires to be able to give some account of the peculiar diseases incidental to persons engaged in different occupations; and of the causes of those diseases.

He has requested me to conduct this medical inquiry; and I venture to request your assistance in extending it to the occupations which abound in your neighbourhood, and especially to the members of the most numerous classes who have fallen under your observation in the course of practice. You are requested to record, however briefly, your impressions on the matter in the annexed paper; and should you be able to devote time to the questions affecting the well-being and the life of the working classes, you will be able, I doubt not, to give information, and to make suggestions which may do much good.

Any more extended paper which you may be pleased to communicate, as well as the *brief replies to the heads of inquiry*, will be duly acknowledged in the report to the Registrar-General. Additional copies of the form will be furnished to you, if desired.

I beg, at the close of this letter, to quote, for the motto of the inquiry, the words of Ramazzini, that great ornament of medicine, who first set us the example of applying the resources of medical science to prevent and to cure the special diseases of men who are engaged in the useful arts:—

“I confess that I publish this imperfect work that others may apply helping hands, until an entire treatise, complete in all its parts, is produced, deserving a place in the halls of medicine. And that is certainly due to the miserable condition of [many] workmen, by whose manual labours, which, though sometimes low and dirty, are yet necessary, so many advantages arise to the commonwealth. That is due, I say, from the most excellent of all arts, as Hippocrates in his precepts, called medicine, which gratuitously succours and cures the poor man.”*

I have the honour to be,
Sirs,

Yours faithfully,
To _____ W. FARR.

SCHEDULE OF QUERIES REFERRED TO IN THE FOREGOING CIRCULAR.

Name of Occupation. _____

I. DISEASES OR INJURIES to which persons in the Occupation are peculiarly liable.

HEADS OF INQUIRY.

BRIEF NOTES ON THE SEVERAL SUBJECTS.

- (1) *Zymotic diseases*:—Such as Typhus, Cholera, Rheumatic Fever.
- (2) *Constitutional diseases*:—Such as Cancer, Phthisis.
- (3) *Local diseases*:—Such as inflammations of the several organs.
- (4) *In Men*, age of senile debility. In Women, accidents in Child-bearing, Suckling, &c. due to occupations.
- (5) *Violent diseases and deaths*, distinguishing suicides, and accidents from various causes.

NOTE.—See complete List of Diseases in the Registrar-General's Sixteenth Annual Report.

II. HYGIENIC CONDITIONS.

- (1) *Atmosphere* in which the work is done—Peculiarities of—
 - (a) Its Chemical Composition:
 - (b) Its Mechanical Impurities:
 - (c) Its Temperature in Summer and Winter:
 - (d) Its Moisture.

* Ramazzini, *De Morbis Artificum*.

HEADS OF INQUIRY.

- (2) *Clothing* :—
 (a) Its Kind:
 (b) Its Cleanliness.
- (3) *Workplaces and Shops* :—Size, Warmth, Cubic contents to each Man, Ventilation.
- (4) *Dwellings* :—Size, Number of Rooms, Cleanliness, Ventilation.
- (5) *Water* :—Purity, Quantity; Baths.
- (6) *Food* :
 (a) Usual quantity of Weight
 Average quan- Animal Uncooked.
 tity con- Food ...
 sumed by one Vegetables
 Man daily. Bread,....
- Want or scarcity of Food, how frequent.
- (b) *Drinks* :—Kind :
 Daily quantity.
 Excesses, frequency of.
- (7) *Habits* :—Moral :
 Physical.
- (8) Common Causes of Injury, disease, or death of each class of Workmen.

III. SUGGESTED IMPROVEMENTS of the Sanitary Condition of the Workpeople.—(Refer to the heads in Section II.)

BRIEF NOTES ON THE SEVERAL SUBJECTS.

IV. STATISTICS. Where Clubs, or other ready means of obtaining information exist, it will be desirable to get returns showing briefly—

HEADS OF INQUIRY.

BRIEF NOTES ON THE SEVERAL SUBJECTS.

- (1) The number of attacks of Sickness in a given number of Workmen :
- (2) The accidents of various kinds befalling each class of Workpeople :
- (3) The Deaths by disease and by accident out of
- (4) A given number of Workpeople in one, two, or more years.
- These will be found to vary sensibly at the Ages, 10 and under 15.

NOTE.—State how far the above observations are applicable to the Masters as well as the men who work at the particular occupation.

GENERAL REMARKS.

MEDICAL PROFESSION.

(Draft Report, as an example of the proposed mode of describing the professions (Class 1.) in connection with the Statistics of the Census, 1861.)

Physician, surgeon, apothecary; medical practitioner; medical assistant, medical student; dentist; subordinate and irregular practitioners of medicine.

The members of this profession practise the healing art. They often practise distinct branches; but those who, treating all diseases, and supplying the sick with medicine, are sometimes called surgeons, general practitioners, or, popularly, doctors, may be taken as a type of the family (*asclepiadæ*). I shall use the word surgeon in the above sense.

The surgeon visits his patients, who are frequently confined to bed at home; or his patients visit him, so that he has a surgery, or consulting room, attached to his private residence, which is generally in a town or village. In London several surgeons dwell in the same street.

Surgical instruments are numerous; among them are lancets, bistouris, scalpels, trephines, knives, saws, catheters, splints, bandages, ligatures, plasters. A list for a surgeon commencing practice enumerates 120 different kinds of instruments; 204 instruments altogether, exclusive of 42 curved needles, and pins for harelip. They are made up in cases. The drugs are derived from the three kingdoms of nature, and are enumerated in the London Pharmacopeia. Calomel, bluepill, opium, camphor, quinine, Peruvian bark, chloroform, ipecacuanha, tartarized antimony, rhubarb, aloes, Epsom salts, iodine, and iron in various combinations, are found in every surgery. Drugs are usually given in some combination; in mixtures or draughts; in pills; and in powders. Remedies, such as hot and cold baths, are not kept in the surgeon's establishment; and besides drugs he prescribes various diets, exercises, change of climate, and mental regimen.

Surgeons travel long distances, so they keep horses or carriages to visit their patients; and their medicines, small in bulk, are carefully weighed, measured, compounded, and sent regularly to the patient's house. These duties are discharged by assistants, apprentices, and boys. The drugs are rarely tested chemically in the surgery.

The products of medical art are health, ease from pain, and tranquil death in mature age. Sick men are the materials which it aims at converting into

healthy men; it makes the lame walk, the blind see; and its results are shown by the rates of mortality, the duration of sickness, and the patient's state on recovery.

Sickness differs in its nature and in the organs which it affects; so the first part of the process which the surgeon performs after he is called in is the discovery of the symptoms, and of the disease, that is (1) the diagnosis, (2) which, when he is satisfied of the evidence, he usually, for their guidance or comfort, communicates to the friends, with his view of the probable course and termination (prognosis); (3) finally he prescribes the treatment, and (4) sometimes operates, administers, or supplies the remedies.

The disease process varies in duration. Thus the mean duration of Asiatic cholera is 6 days (11 days in those who recover, 63 hours in those who die); of small-pox in the hospital 36 days; of consumption two years; and the case varies in its results, ending either in death, or complete recovery, or partial recovery. Each disease pursues its natural course if left to itself, lasts a certain time, and then terminates; the chances of life varying with the disease, age, and attendant circumstances. Medical art accelerates recovery, and increases the chances in its favour. This is the true sense of curing.

The surgeon is not paid for products, but for remedies and services. His name, written in brass, is on the door; and blue, red, or other lights point out his residence at night, for he is called up by the night-bell. He cannot advertise in any way without derogation.

Some practitioners make out bills, charging so much for every mixture, draught, box of pills, packet of powders; but for this system charges for visits and operations are now often substituted. The charge for a visit ranges from half-a-crown to half a sovereign; the fee of a physician, or pure surgeon, is a guinea for one visit, or in some cases for two; two guineas for a consultation. For journeys to the country a guinea a mile by road; two guineas for three miles by railway are the London charges.

Surgical instruments were formerly rude; and indeed at one time surgeons were confounded with

barbers. All the instruments in the present day are excellent; the stethoscope, with percussion, for examining the sounds of the chest, serves to indicate various states of the lungs and heart. It was invented by Laennec, and is only one of many instruments first made in this century to enable medical men to ascertain the probable state of "the inward parts" of men's bodies. The discovery of chloroform, which renders men unconscious, and insensible to pain for given times, with little danger to life, is another recent medical triumph, as great as the ligature for staunching bleeding arteries. Chemical analysis and the microscope are often employed with advantage in investigating the nature of urine and blood, as well as pus, tubercle, and other morbid products. Quinine and other active principles are separated from the inert matters with which they are found mixed; and potent compounds, such as calomel, iodide of potash, and tartarized antimony are manufactured. Vaccination and lime juice are examples of an important class of prophylactics. Sanitary arrangements also preserve health.

The London Apothecaries Company had, by its act of 1815, the power of preventing any man from practising medicine generally in England, without their licence, and in consequence introduced a system of examinations, which have had a beneficial effect, without any countervailing disadvantage. The examination of this class will henceforward probably be conducted by the London College of Physicians, which undertakes to confer its licence on liberal terms. The graduate is expected to be acquainted with the structure and functions of all parts of the body (anatomy and physiology); its diseases (pathology and nosology); and their treatment (therapeutics). He is examined in mathematics, chemistry, botany, and the natural sciences. Some knowledge of Latin was required formerly; and now the medical graduate has to obtain a preliminary degree in arts. The fee for the licence of the College of Physicians, London, is 15*l.* 15*s.*; for the membership, 31*l.* 10*s.* The member of the College of Surgeons pays 20 guineas for his diploma, and 10 guineas more if he become a fellow.

Surgeons sometimes form partnerships of two or even three in towns, but they generally practise individually. Assistants have sometimes charge of distant branches of the concern.

The greater part of the capital of the surgeon is sunk in his sustenance and education. Formerly he paid an apprenticeship fee of 100*l.*, 200*l.*, 300*l.*, . . . 1,000*l.*; served five years; after that "walked the hospitals," and at the same time attended lectures. The medical student has now to attend settled courses of lectures in schools approved by the medical council, the London College of Surgeons requiring proofs of his having passed four years in his professional studies. The fees for the three years' course of study required by that college and the Apothecaries Company are 105*l.* at one of the great London schools. A considerable sum is necessarily sunk in acquiring practice. His ordinary instruments cost about 58*l.* The cost of the medical fittings of an ordinary surgery is from 5*l.* to 50*l.*, the cost of an ordinary shop complete with medical fittings is 150*l.* in London. Horses or carriages take the rest. The amounts vary; but capitals ranging from 1,000*l.* to 5,000*l.* are expended in the establishment of a surgeon or physician in full practice. The income, after some deduction for the cost of articles, is net. It gradually rises from nothing to 100*l.*, 300*l.*, 500*l.*, 1,000*l.*, or 2,000*l.* a year. A few physicians, consulting surgeons, accoucheurs, dentists, and oculists in London earn incomes of 5,000*l.* a year; and one or two eminent surgeons have realized by intense labour 10,000*l.* a year or more for several successive years. Sir Astley Cooper is said to have gained 21,000*l.* in a single year.* The income and outgo are lowest in thinly

peopled districts. In exceedingly remote districts surgeons cannot live: the incomes are highest in towns.

The business decreases in healthy seasons, and increases in epidemics. Chaucer's doctor had "kept that he wan in the pestilence." And it has been argued that medical men profit by plagues, and are interested in their prevalence, although it is admitted that all sanitary improvements began with them. Against this is to be set the danger of dying by pestilence, incurred by the medical attendants; a danger from which they now never shrink. Epidemics too, like cholera, destroy the ailing patients at one fell swoop. The surgeon loses in two ways in an unhealthy place; the people become poor and unable to pay, while his life is shortened, and his income, being of the nature of a life annuity, is reduced in value. It would, however, be advantageous to families of all classes to pay their medical adviser fixed sums annually, so that he might have the opportunity of preventing as well as of curing diseases.

Surgeons can pass the London College of Surgeons on attaining 21 years of age, and having the diploma, commence practice; but, except in rare cases, they seldom get into extensive practice in less than ten years, unless they succeed their fathers, are admitted into a firm, or purchase the goodwill of a business. A practitioner can introduce a graduate to his patients, and by making him a partner, or by certain arrangements, often secure him the succession. "Practices" are advertised for sale; and some transfers are negotiated through agents. A year's purchase is the ordinary price. Widows sometimes secure a share of the profits. The income of an established practitioner is tolerably secure, but it necessarily depends upon his health, and upon the goodwill of his patients. Cases of failure occur; and then to become an assistant, or turn to some other occupation, is the only resource.

A large proportion of the members of the profession leave a certain amount of personal property at death. Thus in 1858 three left 50,000*l.* and upwards; twenty left 10,000*l.* and upwards; a hundred and twenty-seven left 1,000*l.* and upwards, and a hundred and seventy-three left smaller sums. Of the 300 it appears that 194 made wills; 106 died intestate. The average amount was 3,139*l.* Thirty-five left less than 100*l.*† How many left no personal property is unknown; but the number of such cases cannot have been considerable. The large fortunes are not made in this profession; for it is paid only for personal services, and great gain is not its chief aim. The direct object of the art is to do good to mankind, by studying and applying the science of life; so it is not so much enriching as ennobling—saving. In this respect, Hippocrates truly called it godlike. "I have always thought it," writes Sydenham, "a greater happiness to discover a certain method of curing even the slightest disease than to accumulate the largest fortune; and who ever compasses the former I esteem not only happier but better and wiser. For can a person give a stronger proof of his benevolence and wisdom than by endeavouring always to promote the public good, rather than his private interest, as he makes so small and inconsiderable part of the whole? * * * and in reality as it is the part of a wicked man to destroy his fellow creatures, so it is the duty of a good man to preserve them, and instruct others how to save them from death, even after his own decease. Nor can anything be more inhuman and detestable than to insinuate a disregard and unconcern for whatever misfortunes may happen to mankind after our death."* The surgeon has sometimes to save men by inflicting pain. "I find that it is better to assist mankind than to be commended by them," is another of his maxims. Similar sentiments are expressed in the oath of Hippocrates, which was taken by the Asclepiadæ,

* Pettigrew. It is probable that this included the whole of the income from all sources.

* Sydenham's works. Epistle to Dr. Brady.

† Registrar General's 22nd Annual Report, pp. 174–181.

and has been handed down from the earliest times.* The Greeks deified medicine in Apollo, Æsculapius, Hygeia, and Panacea. An old physician reverently calls Christ "the heavenly chirurgion;" for the surgeon is familiar with the poor, and visits men in their sorrows, in their sufferings, and in their deaths. Scientific physicians of all nations seek truth in the same field; are friends; and in battle the surgeon staunches the blood and binds up the wounds of enemies; so sacred is humanity held in this profession.

Every profession has its defects, and even crimes. The best, corrupted, too, becomes the worst. So there are instances in the criminal returns of surgeons having intentionally poisoned their patients. In other cases surgeons have committed suicide with the poisons at hand in the bottles of their *materia medica*. The ignorance or accidental errors of individuals are still oftener fatal, or hurtful. Puerperal fever has been sometimes communicated to his patient by the accoucheur; and by wilfully neglecting to act at the proper moment, or by fearing to employ powerful remedies, and by wrong application, or by violent doses at improper seasons, irreparable mischief is sometimes done. They stand by their office between life and death; but science is imperfect, and the art is imperfectly carried out by fallible men. The superstitious belief in a multitude of drugs, and scepticism, are opposite defects, which are occasionally observed. The rapid moral as well as intellectual progress of the whole body of the profession will naturally reduce all accidental evils to a minimum. Persons committing a crime or any infamy are struck off the register of the profession; but no man's name can be struck off on the ground of his having advanced or adopted any new medical theory whatever.†

The physician is bound to serve all through life science and truth; so he is not tied down on entering his career to the profession of belief in any articles of faith drawn out by fallible men; and he cannot for any fee sustain a bad cause without loss of character.

Cultivated observation, and intellect of at least average development, are required in the surgeon; he should also possess good sense, be inventive, courageous, and persuasive. Linacre and Caius, who revived the ancient learning; Morton, Glisson, Radcliffe, Meade, Sloane who founded the British Museum; Wiseman, Cheselden, Huxham, Pringle, Darwin, Fothergill, Cullen, Gregory, Heberden, Abernethy, Astley Cooper, Charles Bell, Graves, and Bright are famous physicians and surgeons who have flourished in these islands. Sir Benjamin Brodie, the most distinguished surgeon of his day, was President of the Royal Society.

Hippocrates and Galen, among the ancients; Harvey, Sydenham, Pringle, John Hunter, and Jenner, among the moderns, are some of the loftiest examples of human genius. The profession is justly called learned. The annals of medicine are full of interesting discoveries. The literature of medicine is replete with information, and it now fills extensive libraries in the colleges. The library of the Royal College of Surgeons contains 30,000 volumes, besides 18,000 theses and pamphlets. The Hunterian Museum in London is an unparalleled monument of industry. The medical council, the colleges, the societies, the schools with their bands of learned professors, the local hospitals, the asylums, and the dispensaries all over the country, are the institutions in which this profession exercises many of its functions. Medical journals, — weekly, monthly, quarterly, — with the transactions of societies, and the medical directory, keep the whole body well informed on the subjects in which all its members are interested.

The work is hard, and can only be successfully performed by the healthy; so young men who enter the profession are accepted by insurance offices as average

lives. Their rest is disturbed at night; and they undoubtedly encounter danger in visiting the sick suffering from zymotic diseases in close chambers and in unhealthy places. These dangers diminish with the progress of age, as they know what precautions to take, and can check disease in its incipient stages.

It will be seen in Table 5, p. 248, that the mortality is higher among surgeons up to the age of 55 than it is in the general population. They suffer from inexperience, exposure, and anxiety in their first years. In the case of protracted sickness the surgeon who has no private fortune has no adequate provision; and the resources of those infirm from age are drawn from early savings. The distress arising under these circumstances is mitigated by benevolent societies. Widows' and orphans' funds supply destitute families with small pensions; and the medical college at Epsom, while it affords education at a moderate rate, opens its asylum to decayed members of the fraternity.

Persons actually practising medicine are divided into two great classes. The first class consists of the members of the medical colleges, the licentiates of the Society of Apothecaries, and the medical graduates of universities. Under the Medical Act, 1858, cap. 90., these persons were entitled to be registered if they chose upon paying a fee of 2*l.* as qualified medical practitioners, the body by which they have been examined being described. The number of names on the English Register was on September 30, 1861, 13,206. The registered practitioner can recover in any court of law "reasonable charges for professional aid, advice, and visits, and the cost of any medicines or other medical or surgical appliances rendered or supplied by him to his patients." He alone, since January 1, 1859, can recover such charges, or hold medical appointments in the public service or in public institutions. The qualifications vary infinitely in value in individuals; and they also vary in the several classes, representing, as they do, different orders of education and very different acquirements, as the examining bodies are numerous, and their fees and tests various. The medical council, under the Act, has the power to regulate the courses of study, and the examinations to a certain extent for the future.* The registered practitioner can alone grant valid medical certificates.

Many physicians and surgeons retire for various reasons from medical practice, engage in other pursuits, and are not registered. Upon the other hand, any person can still practise medicine, and this right is used by great numbers of persons who have no knowledge of medical science. They prescribe drugs, perform minor operations, or take up and sometimes practise largely in the treatment of particular diseases. They are called, as a body, sometimes unqualified or irregular practitioners, and sometimes quacks.

Medical practice admits of several subdivisions. The pure *physician* treats only internal diseases, and writes prescriptions, which are made up by the apothecary or the druggist.

The pure *surgeon* treats external diseases, such as ulcers, which he dresses; reduces dislocated limbs; sets broken bones; extracts or crushes stone; ties blood vessels; and operates when necessary. He also prescribes, as the external parts are influenced by internal remedies. He does not supply medicines.

The apothecary was formerly the druggist; he gradually became the family doctor, and until recently all the practitioners who supplied patients with medicines as well as advice were compelled by law to become licentiates of the London company. They have often degrees of universities, and often are fellows of the College of Surgeons. Under the name of *medical man*, *surgeon*, *general practitioner*, *doctor*, they practise all branches of medicine.

The Medical Assistant discharges nearly the same

* Works by Littré. See *Opkos*, vol. 4.

† Medical Act, section 28.

* Sections 20, 21.

duties as the pupil; he lives in the house of the surgeon, compounds medicines, keeps the books, receives messages, sometimes prescribes, and sometimes visits patients. If he has a diploma he is a "qualified" assistant; if he visits patients he is called a visiting assistant. His salary varies from mere maintenance to that and 100*l.* a year. Sometimes assistants are married, and live on their small salaries.

The consulting physician and the consulting surgeon live in large cities, and are consulted by the patient at their own houses, or meet the family medical man in consultation. They cannot in any way employ subordinate assistants, but do the work themselves. This limits their incomes. Their reputation is solidly based on the judgment of their profession, after long experience; so they necessarily acquire extensive practice only at a somewhat advanced age, say 45. Their preliminary education is often prolonged.

The brain is the characteristic organ of man; its disorders derange entirely his spiritual nature. *Lunacy physicians* treat mental diseases generally in asylums, of which they are sometimes the proprietors. So barbarous was the treatment of lunatics formerly that these physicians were called mad-doctors.

The eye is subject to many distinguishable diseases; the operations on it are delicate, and the results are often decisive. Hence some surgeons practise on the eye alone, and are called *oculists*.

The ear is an exquisite organ; but its diseases are obscurer than those of the eye, so the useful operations are neither numerous nor decisive. Still the sense of hearing is of the utmost importance; useful instruments have been invented, and some surgeons study its diseases exclusively. They are *aurists*.

The teeth are subject to many diseases; they decay; they can be extracted, and artificial substitutes can be fixed in their place. They occupy many *dentists*. An odontological society has been recently established in London.

Deformities of the spine and limbs are treated by *orthopædic* surgeons, who divide tendons, and employ *apparatus*.

Syphilis is treated in special hospitals; so are skin diseases, which are numerous, and difficult to cure. They are studied more especially by a few surgeons; but they have not given names to any class.

Childbearing is attended with some dangers, which can be averted by medical skill, and its pains can be mitigated. A skilful class of the profession practise in this line, and are called *accoucheurs*. These physicians also treat the diseases of women and children. They are numerous, and have established an obstetric society.

Whenever a physician, like the late Dr. Bright, studies a peculiar class of diseases, he is very properly consulted in those cases; and every important organ of the body, every special disease, has been especially studied by one or more eminent men. To this, however, their practice is not restricted. Still, in the capitals of great empires, there is a constant tendency to further subdivisions of labour.

The profession is further subdivided in reference to the class of persons under care. The army has its own surgeons; so has the navy. There are poor-law surgeons, and club doctors. The poor-law surgeon is paid by the guardians for attending paupers and other poor people, in or out of the workhouse. He generally supplies the medicines, and is inadequately paid. The Odd-Fellow and other clubs engage the surgeon by the year to attend them, and sometimes their families, at 4*s.* to 6*s.* a head.

The conservation of the public health is the highest department of medical art, and prevention being better than cure,—the city more important than the individual,—it is also the most useful. *Medical Health Officers* have been recently appointed in London and some of the great towns, with great advantage. They

study the health of the community; describe its prevailing diseases; analyze air and water; investigate causes of death; indicate some and carry out other sanitary measures. From the studies of this class of the profession the happiest results may be anticipated. Diseases can be quenched in their origin; and by hygiene, which has heretofore been neglected in the schools, the human race can be indefinitely improved.

The medical profession was formerly subdivided into sects differing in doctrines. One sect gave brandy and stimulants to excess; another used the lancet or leeches indiscriminately. One drug was regarded as a panacea by one school; an endless catalogue of simples entered into the prescriptions of another. Expectant medicine on one hand, and large doses of active remedies, alternately gained the ascendancy. These divisions no longer exist to any extent in the British schools; and the only sects of which traces remain are the homœopathists and the hydropathists. The homœopath professes to cure diseases by the administration of infinitely small doses, thus getting rid of nauseous drugs,—the hydropath, by the external and internal use of abundance of pure water, conjoined, in both cases, with simplicity and regularity of diet, and exercise. We are now on the borders of quackery.

It is held to be the duty of every physician who discovers a useful remedy to reveal it for the benefit of mankind; and the College of Physicians forbids its members to use for the sake of gain any remedy which he keeps secret. So no remedy is patented by the regular members of the profession; but the right to this as well as to other inventions being sanctioned by political economy, other men are restricted by no such scruples; and a considerable revenue is derived from the sale of labels for "patent medicines." It amounted in 1860 to 45,281*l.*, while 4,969*l.* were paid in the same year by medicine venders for licences. Nearly all of these patent medicines are well known drugs, compounded in various ways, and, taken indiscriminately by the sick, they are mischievous. Some of their authors are impostors.

Medical art is imperfect. Several diseases are admittedly incurable; and the duration and mortality of diseases under the actual systems of treatment have been determined by strict analytic methods in only two or three instances. Skilled medical practitioners are almost inaccessible in some parts of the country; and the poor will not pay for medicine and advice. Hence it is that large numbers of the population resort to quacks and to irregular practitioners. *Herb doctors, worm doctors, bone-setters*, figure in the Census.

Midwives have never hitherto in this country been taught the mechanism of child-bearing; yet they attend large numbers of women in their confinement. Midwifery is certainly one of the employments which instructed women may practise as well as nursing. A devoted nurse, well taught in hygiene, and knowing practically the nature and accidents of various kinds of sickness, deserves, as Miss Nightingale has shown, a place next to the doctor; indeed medical treatment can only be effectually carried out through the agency of good nurses. And ere long such a race of nurses will probably exist.

The extraction of blood with cupping-glasses requires nice manipulation, and is practised by a few *cuppers*. The same remark holds of bleeding by leeches; several *bleeders*, who manage and apply leeches, were enumerated. Corns are treated by *chiropodists*, who are sometimes called corn-cutters. The practisers of these arts are not surgeons, but they perform minor surgical operations.

The *druggists*, who have no medical education, often prescribe as well as sell drugs. People also often prescribe for themselves. Again, in London and some of the large towns, several surgeons and apothecaries also keep open shops, vend drugs, and trespass on the domain of the chemist and druggist. The line of demarcation between the surgeon and the druggist is thus broken down.

Medical art requires the exclusive service of its followers. So there are few instances, with the above exception, of surgeons in practice following any other business. Akenside, Armstrong, Darwin, and Keats live among the poets; Arbuthnot among the wits; Young among the philosophers. Goldsmith, Davy, Wollaston, Joseph Hume, and some leading merchants, began their career in medicine. Hitherto baronet is the highest title conferred on a physician or surgeon. So the profession is not re-

presented officially in the House of Peers; and the voice of none of its leading members is heard in the House of Commons.

The annexed Tables exhibit the numbers who returned themselves in England and Wales as belonging to the profession in 1851 and 1861. They show besides the distribution over the country; the ages; and the rates of mortality.

July 1863.

W. FARR.

TABLE 1.—The MEDICAL PROFESSION and their immediate SUBORDINATES (CLASS I., ORDER 3., Sub-order 3.), as returned by its regular and irregular members at the Census.

OCCUPATIONS.	MEN.		WOMEN.	
	1851.	1861.	1851.	1861.
TOTAL	33,559	35,995	2,402	2,446
Physician	1,771	2,385	—	—

Subordinate and Irregular Practitioners, and in 1851 Surgical Instrument Makers	1851	687	346	24	12	7	39	37	26	45	104	31	16
	1861	397	122	21	20	14	12	29	25	46	75	28	5
TOTAL -	1851	29,002	7,790	2,572	1,573	1,259	2,538	3,181	1,648	3,349	2,598	1,354	1,140
	1861	31,057	7,708	2,981	1,707	1,323	2,487	3,432	1,825	3,833	2,914	1,506	1,341

Note.—The numbers in Table 3, in each Registration Division, differ slightly from those returned at the Census of 1861: but the total number in England and Wales will be found to agree with that published in the Population Tables (see Note to Summary Table XVII., Census of 1861, Vol. II.)

TABLE 4.—To EVERY 10,000 of the MEAN POPULATION, 1851 and 1861: the AVERAGE NUMBER of PHYSICIANS, SURGEONS, and other MEDICAL MEN (including MEDICAL STUDENTS and ASSISTANTS), aged 20 YEARS and UPWARDS, and the AVERAGE ANNUAL RATE of MORTALITY of the POPULATION in the 10 YEARS 1851–60, in EACH of the REGISTRATION DIVISIONS of ENGLAND and WALES.

Registration Divisions.	Proportional Number of Medical Men to every 10,000 Persons living.	Average Annual Rate of Mortality to 10,000 Persons living.	Probable Numbers constantly sick in 10,000 inhabitants.	Numbers constantly sick to one Medical Man.
ENGLAND AND WALES	9·3	222	444	47
1. London	19·4	236	472	24
2. South-eastern Counties	10·6	196	392	37
3. South-midland Counties	8·4	204	408	49
4. Eastern Counties	7·2	206	412	57
5. South-western Counties	8·8	200	400	45
6. West-midland Counties	8·3	224	448	54
7. North-midland Counties	7·2	211	422	59
8. North-western Counties	6·4	255	510	80
9. Yorkshire	7·2	231	462	64
10. Northern Counties	7·6	220	440	58
11. Monmouthshire and Wales	5·7	213	426	75

Thus to one Medical Man there were on an average 1071 persons in England and Wales, 514 in London, and 1769 in Monmouthshire and Wales; or to every 10,000 persons living there were 9·3 Medical Men in England and Wales, 19·4 in London, and 5·7 in Monmouthshire and Wales.

TABLE 5.—ANNUAL RATE of MORTALITY PER CENT. amongst PHYSICIANS and SURGEONS in the Year 1851, and in the 2 Years 1860–1.

Ages.	Living.		Deaths.		Annual Rate of Mortality per Cent.		Mean Annual Rate of Mortality per Cent. in 3 Years.	Average Annual Rate of Mortality of Males in England in the 10 Years 1849–58.
	1851.	1861.	In the Year 1851.	In Two Years 1860–1.	1851.	1860–1.		
20 & upwards	17,469	18,022	349	777	—	—	—	—
20–	2,171	2,402	25	31	1·152	·645	·814	·868*
25–	4,649	4,151	61	93	1·312	1·120	1·184	·969
35–	4,745	4,007	64	108	1·349	1·348	1·348	1·276
45–	2,998	3,776	60	152	2·001	2·013	2·009	1·866
55–	1,852	2,247	50	128	2·700	2·848	2·799	3·182
65–	773	1,073	44	136	5·692	6·337	6·122	6·603
75–	247	324	35	109	14·170	16·821	15·937	14·577
85 & upwards	34	42	10	20	29·412	23·810	25·677	26·801*

* English Life Table No. 3. The Table may be read thus:—The annual rate of mortality per cent. among medical men of the age 25 and under 35 was 1·184 in three years, which was 0·215 above the average.

INTRODUCTORY NOTE.

THIS Volume of Abstracts of the Returns which have been collected under the authority of the Census Act for England and Wales, comprises Tables of the Ages of the People, of their Condition as regards Marriage, of their Occupations, and of their Birth-places. Special Tables are appropriated to the Blind, the Deaf-and-Dumb, and the Inmates of certain Public Institutions.

To facilitate comparison, the form and arrangement of the Tables are substantially the same as in the Abstracts of the Census Returns of 1851. In some particulars, however, the information now given is more minute; for example, new columns show the number of children returned *at each year of age* under 5; the *ages* of married, unmarried, and widowed persons in each District; the distinction of *sex* throughout the Birth-place Tables; the countries of birth and the occupations of *Foreigners*, &c.

The nomenclature of many occupations is in an unsettled state. But in 1851 an attempt was made to frame a classification under which all the varieties of occupation could be placed; and that classification was to a certain extent successful. After further experience, its groups have been simplified and its ramifications extended, so as to exhibit in one view the whole population of England and Wales marshalled in six groups, according to their various occupations. The few changes give greater prominence to some branches of industry; and while in all essential respects the present Tables correspond with those of the previous Census, several additional items have been distinguished. A more particular notice of the alterations which have been made will be found in the Report on the Census to be presented to Parliament.

The arrangement of the details under the Eleven Statistical Divisions of England has been adopted to facilitate the sale of the Tables in separate Parts.

Census Office, London,
1 July 1863.

^a The Registration or Union Counties consist of groups of entire Registration Districts; which Districts are, in general, identical with the Poor Law Unions. As population is located, the Registration Counties differ more or less from the Geographical Counties as set forth in Summary Table I.

For the Parishes and Places comprised in the Superintendent Registrars' Districts constituting the Registration Counties, see "Population Tables, Vol. I.—Numerical Metropolitan Districts, Division I."

Note.—The Table is read thus:—In London there were 2,863,989 persons of both sexes, viz., 1,367,781 males, of whom 589,976 were under 20 years of age and 1,530,983 were under 20 years of age,—891,125 aged 20 years and upwards,—and so on.

* For Ages of Husbands and their Wives in combination, see Summary Table IX.

† In the few instances in which persons described as married have been returned at any age under 15, they have been classified with the persons aged 15 and over 20 years.

Note.—The Table is read thus:—In England and Wales there were *unmarried* 5,987,861 males, of whom 3,587,750 were under 15 years of age;—295,220 were under 20 years;—666,475 aged 20 and under 25 years;—and so on; and 6,044,266 females, of whom 3,562,268 were under 15 years of age;—944,711 aged 15 and under 20 years;—and so on. There were of *married* persons, 3,428,443 Husbands,—5,966 under 20 years of age;—191,591 aged 20 and under 25 years;—and so on; and 3,488,952 Wives, under 20 years of age,—321,200 aged 20 and under 25 years;—and so on. And there were of *widowed* persons, 359,955 Widowers,—78 under 20 years of age,—2,144 aged 20 and under 25 years;—and so on; and 756,717 Widows,—279 under 20 years,—4,717 aged 20 and under 25 years;—and so on.

TABLE VI.—ENGLAND AND WALES.—UNMARRIED PERSONS enumerated at different Ages—MALES.

and Registration Counties.	UN- MARRIED MALES OF ALL AGES.	Under 15 Years.	15—	20—	25—	30—	35—	40—	45—	50—	55—	60—	65—	70—	75—	80—	85—	90—	95—	100 and upw.

RECAPITULATION: Husbands																								3,428,443				
Wives																								3,488,952				
Widowers																								359,955				
Widows																								756,717				
TOTAL included in this Table																								8,034,067				

In the few instances in which persons described as married have been returned at any age under 15, they have been classified in these Tables of Ages of Husbands and Wives with the persons aged 15 and under 16 years.

The Table next vertically shows the number of Wives at each age, with the ages of their Husbands:—Thus, in England and Wales, Two Wives of the age of 25 and under 30 years had Husbands aged 15; Twenty-seven had Husbands aged 16; One hundred and forty-six had Husbands aged 17; Nine hundred and twenty-five had Husbands aged 18; Three thousand four hundred and fifty-four had Husbands aged 19; Nine hundred and twenty-five had Husbands aged 20; and so on.

Horizontally the Table shows the number of Husbands at each age, with the ages of their Wives:—Thus, Ten Husbands of the age of 25 and under 30 years had Wives aged 15; Fifty-five had Wives aged 16; Two hundred and ninety-seven had Wives aged 17; One thousand four hundred and thirty-two had Wives aged 18.

In all, 3,428,443 Husbands and 3,488,952 Wives were enumerated as residing together on the night of the Census.

There were also 186,021 Husbands whose Wives were absent (i.e., the Wives were not returned in the same houses as their Husbands), making in all 3,428,443 Husbands enumerated.

There were also 246,530 Wives whose Husbands were absent (i.e., the Husbands were not returned in the same houses as their Wives), making in all 3,488,952 Wives enumerated; also 359,955 Widowers and 756,717 Widows enumerated; making a GRAND TOTAL of 8,034,067 persons who have entered the married state.

TABLE X.—ENGLAND AND WALES.—CIVIL CONDITION OF PERSONS AGED 15 YEARS AND UPWARDS.

* In the few instances in which persons described as married have been returned at any age under 15, they have been classified in these Tables of Ages of Husbands and Wives with the persons aged 15 and under 16 years.

Note.—The Table read vertically shows the number of Wives at each age, with the ages of their Husbands:—Thus, in the Islands in the British Seas One Wife of 25 and under 30 years had a Husband aged 19; Two had Husbands aged 20; One hundred and ninety-four had Husbands aged 21 and under the age of 25. Read horizontally the Table shows the number of Husbands at each age, with the ages of their Wives:—Thus, Two Husbands of the age of 25 and under 30 years had a Wife aged 16; Two had Wives aged 17; Seven had Wives aged 18.

At all ages 21,264 Husbands and 21,264 Wives were enumerated as residing together on the night of the Census. There were also 1,375 Husbands whose Wives were absent (i.e. the Wives were not returned in the same houses as their Husbands), making in all 22,639 Husbands enumerated; and 2,563 Wives whose Husbands were absent (i.e. the Husbands were not returned in the same houses as their Wives), making in all 23,827 Wives enumerated; also 2,383 Widowers and 7,325 Widows enumerated; making a GRAND TOTAL of 56,174 persons who have entered the married state.

consulting this Alphabetical List of Occupations, reference should also be made to the Classified Arrangement shown in Tables XVIII. to XX., in which kindred employments are grouped together under the Orders and Sub-orders here indicated by numbers in the columns headed "Reference to Classified Arrangement." Occupations closely connected in this Table will not in all cases represent the sum of the details given in the Divisional Tables.

Printed in CAPITALS are those distinguished in the Tables of Occupations in Counties, Towns, and Districts throughout; the items printed in the ordinary character found in such Tables under the head of "Others," in the respective Sub-orders; while those printed in *italics* are the more important occupations comprised under "Others" in the respective Sub-orders in Tables XIX. and XX.

Persons of the Army and Navy on Half-pay are understated, many of them who omitted to insert "Half-pay" after stating their rank having been classed as "Others." The items "Officer" and "Half-pay Officer" should be taken collectively, both in the case of the Army and Navy. For returns of the entire Army and Navy, see others and men, abroad and at home, see Appendix to Report in Vol. III.

TABLE XVII.—ENGLAND AND WALES.—OCCUPATIONS of the PEOPLE.—*continued.*

* In addition to those here returned, many persons connected with the land, as proprietors or occupiers, are classed under other heads according to their professions. This remark applies especially to persons referred to Orders 6 and 17.

† For Returns of the entire Army and Navy, distinguishing Officers and Men, abroad and at home, see Appendix to Report in Vol. III.

§ It is probable that a considerable number of the children here returned were under tuition, although not described as "Scholars" in the Householders' Schedule.

Note.—In this and the following Table the Occupations are arranged according to the principle of classification adopted in the preceding Summary, Table XVIII. Order or Sub-order consists of Occupations inapplicable to both sexes, it occurs only in the Table for the sex to which it is appropriate.

Persons engaged in more than one branch of trade are referred to that which appeared to be their chief pursuit. Where inadequate numbers are returned under employment, the apparent deficiencies in all probability arise from persons partly engaged in them being returned in other capacities.

The numbers returned under trades and manufactures comprise all persons employed in them, including labourers, apprentices, and assistants, as well as masters. Persons are thus referred to occupations usually followed by adults. Women also, chiefly widows who carry on the trades of their deceased husbands, are sometimes under employments commonly followed by men. Superannuated persons, and others described as *retired*, as well as the inmates of public institutions, are classified under former occupations, when stated.

Upon a final revision of the Classified Arrangement of Occupations, the numbers in this and the preceding Table have been subjected to some alteration, which will not strictly represent the sum of the details given in the divisional Tables.

The items printed in CAPITALS are those distinguished in the Tables of Occupations in Counties, Towns, and Districts throughout; the other items are included under "Others" under the respective Sub-orders in those Tables.

* Such of the Peers and Members of the House of Commons as are not here returned are either entered in other capacities, or omitted on account of absence from the day of the Census.

† The numbers of Officers of the Army and Navy on Half-pay are understated, many of them who omitted to insert "Half-pay" after stating their rank having been considered as *Effectives*. The items "Other" and "Half-pay Officer" should be taken collectively, both in the case of the Army and Navy. For returns of the entire Army and Navy, including Officers and men, abroad and at home, see Appendix to Report in Vol. III.

(a) Including 10 High Sheriffs, 7 Lord Lieutenants, 36 Deputy Lieutenants, 36 Coroners and Coroners' Officers, 13 High Constables, 22 Magistrates' Clerks, 7 Clerks of the Peace, 6 Sanitary Officers, 6 Pinders, 1 Executioner.

(b) Including 322 Volunteers not otherwise described.

Note.—In consulting this Alphabetical List of Occupations, reference should also be made to the Classified Arrangement shown in Tables No. XXII. and XXIII. lxx, lxxi, lxxii, in which kindred employments are brought together under the Classes and Sub-classes here indicated by numbers in the columns headed "Reference to Classified Arrangement." Occupations closely connected with each other are necessarily separated in an alphabetical arrangement, which should be used with caution by those who wish to arrive at general results.

Persons engaged in more than one occupation have been referred to that which appeared to be their chief or leading pursuit; hence it frequently happens that an statement is made of the numbers following particular employments. In some cases, where small numbers are returned as engaged in making or selling articles of general consumption, the accuracy of the returns will, perhaps, be questioned; but it should be remembered that a great subdivision of trades is required and supported only in principal towns, and that the apparent deficiencies in all probability arise from many persons employed in connexion with such articles being entered under denominations.

The numbers returned under trades and manufactures comprise generally all persons employed in them—labourers, apprentices, as well as assistants—thus forming more correct test than any other of the relative importance of each trade. Many young persons are thus referred to occupations usually followed by adults. Women chiefly widows who carry on the trades of their deceased husbands, are sometimes returned under employments commonly followed by men. The wives of tradesmen, Beersellers, Lodging-house Keepers, Shoemakers, Butchers, Farmers, and Shopkeepers are returned apart from the wives generally, as they are usually engaged in the business as their husbands. Superannuated persons, and others described as *retired*, as well as the inmates of public institutions, are classed under their former occupations, when they are stated.

The occupations printed in *italics* are included in their respective Sub-orders under the term "Others" in the Classified Tables above mentioned. All the remaining occupations are distinguished in those Tables.

Note.—In this and following Table the Occupations are arranged according to the principle of classification adopted in Table 6 of Islands in the British Seas, p. 10. The Roman Numerals and the other figures in the first column indicate the numbers of the several Orders and Sub-orders to which the various Occupations have been referred; but where a particular Occupation is inapplicable to the sex, or where no persons are classified as following it, the item is omitted in order to save space.

Persons engaged in more than one branch of trade are referred to that which appeared to be their chief pursuit.

The numbers returned under trades and manufactures comprise all persons employed in them, including labourers, apprentices, and assistants, as well as employers.

young persons are sometimes classed under Occupations usually followed by adults.

The Table is read thus:—In the Islands in the British Seas there were 141 Clergymen of all ages, of whom 61 were aged 20 years and upwards, in the Isle of Man, 20 years and upwards, in Jersey, and 35 aged 20 years and upwards, in Guernsey and adjacent Islands. See Order III., Sub-order 1 (a).

* These consist of the Islands of Alderney, Herm, Jethou, and Le Marchant, and the Isles of Great and Little Sark.

† It is probable that a considerable number of the children here returned were under tuition, although not described as "Scholars" in the Householders' Schedule.

‡ The Sons, Grandsons, Brothers, and Nephews (not otherwise described) of Farmers, when 15 years of age and upwards and resident on the farm or holding, are separately returned as they are usually engaged on the business of the farm, &c.

§ All labourers in agriculture (except Shepherds out-door) not living in the farmhouses are returned under the head "Agricultural Labourer;" those living in the house of the farmer are classed under "Farm Servant (in-door)," including, among others, Wagoner, Carter, Farmer's Groom, and General Servant.

XVII.—ISLANDS IN THE BRITISH SEAS.—OCCUPATIONS of MALES *under* 20, and 20 Years and *upwards*

Notes.—The Wives of Innkeepers, Publicans, Lodging-house Keepers, Shoemakers, Shopkeepers, Butchers, and Farmers are specifically returned in the Table, as being generally engaged in the same business as their husbands. (See also Notes under Table XXI.)

* The "Wives," "Daughters," "Grand-daughters," "Sisters," and "Nieces" (not otherwise described) of Farmers and of Graziers are, if aged 15 years and resident on the farm, &c., presumed to be more or less engaged in farming pursuits, and are therefore referred to Order VIII.; those under 15 years of age are returned as "Children," &c., or as "Scholars." Order IV., Sub-orders 3, 4, respectively. The return for "Farm Servant (in-door)" includes Dairy-women and all Female Servants living in the houses, except those employed in domestic duties, as Cooks, Housemaids, Nurses, &c.

BIRTH-PLACES OF THE PEOPLE.

—The "Country of Birth" of Persons born in Foreign Parts was required to be specifically stated in the Householders' Schedule, but owing to a want of precision in the mode of giving that information it is probable that the natives of Prussia, Austria, and Hungary are understated, and that the numbers referred to "Germany" include some persons born in those countries.
Children born in the United Kingdom of Foreign Parents are not included in the above numbers.

TABLE XXVII.—ENGLAND AND WALES.—NUMBER of FOREIGNERS, distinguishing MALES and FEMALES, in EUROPE, in ASIA, in AFRICA, and in AMERICA, &c., enumerated in each of the REGISTRATION DIVISIONS.—continued.

(continued at p. lxxxii.)

Notes.—In these Tables the Occupations are arranged according to the principle of classification adopted in the preceding Summary, Table XXIX. The Roman Numerals in the first column indicate the numbers of the several Orders and Sub-orders to which the various Occupations have been referred. The term "Others" is used to denote persons engaged in more than one branch of trade or to that which appeared to be their chief pursuit. The numbers returned under trades and manufactures comprise all persons employed in them, including labourers, apprentices, and assistants, as well as employed young persons are thus sometimes classed under Occupations usually followed by adults.

* The Occupations here returned of the Inmates of Workhouses, Prisons, and Lunatic Asylums are those followed by persons previous to their becoming inmates, as stated by the masters, keepers, governors, or proprietors. The Occupations of the Blind (as principals or assistants) are in some instances those followed by them at the period of the Census, but in the majority of cases their former pursuits were stated; the returns do not, however, admit of the employment which they were engaged before loss of sight being distinguished from those carried on in a state of blindness.

See also Notes at foot of Table XXXIII.

* Although in some instances the Occupations of the Blind (as principals or assistants) are those actually followed by the Blind at the period of the Census, former pursuits are, in the majority of cases, referred to. The returns do not admit of the employments in which persons were engaged before loss of sight being distinguished from those carried on in a state of blindness. In this and subsequent Tables of the Blind, the Occupations are arranged according to the principle of classification adopted in the General Tables of the Occupations of the People, and shown in the preceding Table. The Roman Numerals and the other figures in the column headed "Occupations" indicate the numbers of the several Orders and Sub-orders to which the various employments have been referred.

* Details respecting the former Occupations of In-door Paupers, as here classified, are derived from the statements of the Masters of Workhouses, by whom the entries in all cases made. In these Tables relating to Workhouses the various employments are arranged according to the principle of classification adopted in the tables of the Occupations of the People, and shown in the preceding Summary Table No. XL. The Roman Numerals and the other figures in the column headed "Orders" indicate the numbers of the several Orders and Sub-orders to which the several employments have been referred.

									Paper-box Maker		

* The details of the Occupations of the inmates of Civil Prisons (exclusive of Reformatories, Police Stations, and Lock-ups) are derived from the statements of the Governors thereof, by whom the returns were made. In this Table the Occupations are arranged according to the principle of classification adopted in the General Statement of the Occupations of the People, and shown in Summary Table No. XI. The Roman Numerals and the other figures in the column headed "Occupations" indicate the numbers of the several Orders and Sub-orders to which the various employments have been referred.

Within the limits adopted by the Registrar-General for the Weekly Tables of Mortality, comprising 36 Districts in Middlesex, Surrey, and Kent. The Superintendent Registrars' Districts are for the most part co-extensive with Unions or single Parishes under Boards of Guardians or with Parishes in which the relief of the poor is administered by local Acts. For the Parishes and Places comprised in each District or Union, see "Population Tables, Vol. I.—Numbers and Distribution of the People."

The Extra-metropolitan Districts of Middlesex, see Division III.—South-midland Counties.

For the Number of Children at each Year of Age under 5, see Table 4.

† For Ages of Husbands and their Wives in combination, see Table 6.

† In the few instances in which persons described as married have been returned at any age under 15, they have been classified with the persons aged 15 and under 15 years.—The Table is read thus:—In Division I.—London there were unmarried 785,716 males, of whom 461,027 were under 15 years of age, 119,218 aged 15 and under 20 years, 94,842 aged 20 and under 25 years, and so on; and 870,650 females, of whom 465,877 were under 15 years of age, 134,405 aged 15 and under 20 years, 105,435 aged 20 and under 25 years, and so on; and 481,386 husbands, of whom 719 were under 15 years of age, 27,425 aged 20 and under 25 years, and so on; and 495,024 wives, of whom 4,740 were under 15 years of age, 48,518 aged 20 and under 25 years, and so on. And there were widowed persons, 40,679 widowers, 12 under 20 years of age, 281 aged 20 and under 25 years, and so on; and 130,534 widows, 61 under 20 years, 888 aged 20 and under 25 years, and so on. The difference between the number of Husbands and Wives arises from married persons having been apart, and either the Husband or Wife having been absent from the Division on the night of the Census.

Few instances in which persons described as married have been returned at any age under 15, they have been classified in this Table of Ages of Husbands and the persons aged 15 and under 16 years.

The Table read vertically shows the number of Wives at each age, with the ages of their Husbands:—Thus, in London, Three Wives of the age of 25 and under had Husbands aged 18; Ten had Husbands aged 19; One hundred and thirty-two had Husbands aged 20; Four thousand nine hundred and fifteen had Husbands under the age of 25.

Similarly the Table shows the number of Husbands at each age, with the ages of their Wives:—Thus, Nine Husbands of the age of 25 and under 30 years had Wives aged 15 and Wives aged 17; Two hundred and thirty-two had Wives aged 18.

There are 449,923 Husbands and 449,928 Wives were enumerated as residing together on the night of the Census.

There are 31,458 Husbands whose Wives were absent (i.e., the Wives were not returned in the same houses as their Husbands), making in all 481,386 Husbands in the Division.

Table 7.—CIVIL CONDITION OF PERSONS AGED 15 YEARS AND UPWARDS—IN DISTRICTS.

* In addition to those here returned, many persons connected with the land, as proprietors or occupiers, are classed under other heads according to their professions. This remark applies especially to persons referred to Orders and 17.

† It is probable that a considerable number of the children here returned were under tuition, although not described as "Scholars" in the Householders' Schedule.

LONDON—continued.

Note.—In the present and subsequent Tables the Occupations are arranged according to the principle of classification adopted in the preceding Summary. The Names and the other figures in the first column indicate the numbers of the several Orders and Sub-orders to which the various Occupations are here referred. A "Other" is placed in the second column, and so on, to the sex or where a person is described as being in it, the item is omitted in order to save space. The Occupations in "Others" in the several Sub-orders appear in detail in the Summary Table for England and Wales.

Persons engaged in more than one branch of trade are referred to that which appeared to be their chief pursuit.

The figures in the second and third columns comprise all persons employed in them, including laborers, apprentices, and assistants, as well as employers.

Persons are thus sometimes classed under Occupations usually followed by adults.

The figures in the fourth column are those of persons of 20 years of age and under 25 years, 25 and under 35 years, 35 and under 45 years, and so on for each respective column of age. See Order III., Sub-order 1 (a).

es "Daughters," "Grand-daughters," "Sisters," and "Nieces" (not otherwise described) of Farmers and of Graziers are, if aged 15 years and resident on the farm, to be more or less engaged in farming pursuits, and are therefore referred to Order VIII.; those under 15 years of age are returned as "Children and Relatives," or "Order IV. Sub-orders 3, & respectively. The return for "Farm Servant (in-door)" includes dairywomen and all female servants living in farm-houses, except in domestic duties, as cooks, housemaids, nurses, &c.

Note.—The Country of Birth of Persons born in Foreign Parts was required to be stated in the Householders' Schedule, but owing to a want of precision in giving that information it is probable that the Natives of Prussia, Austria, and Hungary are understated in these Tables, and that the numbers referred to Germany include some persons born in the above Countries.

The Children born in the United Kingdom of Foreign Parents are not included in the above numbers.

GNERS,

n ASIA, in AFRICA, and in AMERICA, &c., enumerated in the DISTRICTS of LONDON.

* For ages of Husbands and their Wives in combination, see Table 8.

† In the few instances in which persons described as married have been returned at any age under 15, they have been classified with the persons aged 15 and under.

Note.—The Table is read thus:—In Division II.—South-eastern Counties, there were unmarried 578,966 males, of whom 327,416 were under 15 years of age, 90,660 and under 20 years, 72,953 aged 20 and under 25 years, and so on; and 553,039 females, of whom 323,642 were under 15 years of age, 82,188 aged 15 and under 20 years, and so on. There were married persons, 304,525 Husbands, 255 under 20 years of age, 13,147 aged 20 and under 25 years, and so on; and 309,979 Wives, 2248 years of age, 25,943 aged 20 and under 25 years, and so on. And there were of widowed persons, 35,690 Widowers, 5 under 20 years of age, 131 aged 20 and under 25 years, and so on; and 65,462 Widows, 20 under 20 years, 346 aged 20 and under 25 years, and so on. The difference between the number of Husbands and Wives arises from couples having been apart, and either the Husband or Wife having been absent from the Division on the night of the Census.

DIVISION II.—SOUTH-EASTERN COUNTIES.

few instances in which persons described as married have been returned at any age *under 15*, they have been classified in these Tables of Ages of Husbands and the persons aged 15 and under 16 years.

The Table read *vertically* shows the number of *Wives* at each age, with the ages of their Husbands.—Thus, in the South-eastern Counties, *Two Wives* of the age of 30 years had Husbands aged 18; *Thirteen* had Husbands aged 19; *Fifty-nine* had Husbands aged 20; *Two thousand five hundred and thirty-seven* had Husbands under 25 years of age.

Horizontally, the Table shows the number of *Husbands* at each age, with the ages of their *Wives*.—Thus, *One Husband* of the age of 25 and under 30 years had a *Wife* of 16 years of age; *Three* had *Wives* aged 16; *Thirty-three* had *Wives* aged 17.

Of 254,872 Husbands and 254,872 *Wives* were enumerated as residing together on the night of the Census.

There are, 19,633 Husbands whose *Wives* were *absent* (*i.e.*, the *Wives* were not returned in the same houses as their Husbands), making in all 304,525 Husbands enumerated; 107 *Wives* whose Husbands were *absent* (*i.e.*, the Husbands were not returned in the same houses as their *Wives*), making a total of 309,979 *Wives* enumerated at the Census.

AGE OF WIFE.

Notes.—In the present and subsequent Tables the Occupations are arranged according to the principle of classification adopted in the preceding summary. The numbers and the other figures in the first column indicate the numbers of the several Orders and Sub-orders to which the various Occupations have been referred; by a particular Occupation is inapplicable to the sex, or where two persons are classified as following it, the item is omitted in order to save space. The Occupations referred to as "Others" in the several Sub-orders appear in detail in the Summary Table for England and Wales.

Persons engaged in more than one branch of trade are referred to that which appeared to be their chief pursuit.

The numbers returned under trades and manufactures comprise all persons employed in them, including labourers, apprentices, and assistants, as well as employers.

The figures under the heading of "Others" comprise all persons engaged in occupations usually followed by adults.

The figures under the heading of "Age" are the number of persons in each of the following age groups:—In the Extra-metropolitan part of Surrey there were 333 Clergymen of all ages, of whom 5 were aged 20 and under 25 years, 87 aged 25 and under 35 years, 100 aged 35 and under 45 years, and so on for each respective column of age. See Order III. Sub-order 1 (a).

Agricultural Labourer	152				10	49	35	28	11	11																		

* The "Wives," "Daughters," "Grandchildren," "Sisters," and "Nieces" (and otherwise described) of Farmers and of Graziers are if aged 15 years and reside in the household, presumed to be more or less engaged in farming pursuits, and are therefore reformed (Order VII); those under 15 years of age are returned as "Child Relatives," or as "Scholars," Order IV, Sub-orders 3, 4, respectively. The return for "Farm Servant (in-door)" includes Dairy-women and all Female Servants living in houses, except those employed in domestic duties, as Cooks, Housemaids, Nurses, &c.

Note.—The Wives of Innkeepers, Publicans, Lodging-house Keepers, Shoemakers, Shopkeepers, Butchers, and Farmers are specifically returned in the Table, as they are generally engaged in the same business as their husbands. (See also Notes under Tables 10 and 11.)

Note.—The Country of Birth of Persons born in Foreign Parts was required to be stated in the Householders' Schedule, but owing to a want of precision in the mode of giving that information it is probable that the natives of Prussia, Austria, and Hungary are understated in these Tables, and that the numbers referred to Germany include some persons born in the above Countries.
The Children born in the United Kingdom of Foreign Parents are not included in the above numbers.

Table 25.—AGES and COUNTRY of BIRTH of FOREIGNERS, distinguishing MALES and FEMALES, being NATIVES of EUROPEAN STATES, enumerated in the REGISTRATION or UNION COUNTIES of the SOUTH-EASTERN DIVISION.

For Ages of Husbands and their Wives in combination, see Table 8.

In the few instances in which persons described as married have been returned at any age under 15, they have been classified with the persons aged 15 and under 20 years.

Note.—The Table is read thus:—In Division III.—South-midland Counties, there were unmarried 383,829 males, of whom 239,616 were under 15 years of age,—62,001 aged 15 and under 20 years,—37,768 aged 20 and under 25 years,—and so on; and 389,882 females, of whom 235,938 were under 15 years of age,—60,558 aged 15 and under 20 years,—and 38,427 aged 20 and under 25 years,—and so on. And there were married persons, 223,421 Husbands, 357 under 20 years of age,—12,022 aged 20 and under 25 years,—and so on; and 225,443 Wives, 1,599 under 20 years of age,—19,019 aged 20 and under 25 years,—and so on. The difference between the number of Husbands and Wives arises from married couples having been apart, and either the Husband or Wife having been absent from the Division on the night of the Census.

Wives whose Husbands were resident with them	2	15	104	408	931	2194	15640	28639	30020	28734	27299	22365	18519	14120	11066	6803	3863	1532	423	90	5	3	.	.	212825	10596	223421
Wives whose Husbands were absent	8	3	16	39	73	164	1021	1703	1709	1671	1536	1332	1151	879	728	349	184	71	23	6	2	.	.	.	12618	Wives whose Husbands were absent.	
Total of Wives enumerated	10	18	120	447	1004	2358	16661	30302	31729	30305	28885	23697	19670	14999	11794	7152	4047	1603	446	96	7	3	.	.	223443	Total of Wives enumerated.	

Note.—The Table read vertically shows the number of *Wives* at each age, with the ages of their *Husbands*.—Thus, in the South-midland Counties, *Two* Wives of the age of 15 and under 30 years had *Husbands* aged 18; *Eleven* had *Husbands* aged 19; *Seventy-eight* had *Husbands* aged 20. *Two thousand two hundred and ninety-seven* had *Husbands* aged 21 and under the age of 25.

Read horizontally the Table shows the number of *Husbands* at each age, with the ages of their *Wives*.—Thus, *Two* *Husbands* of the age of 25 and under 30 years had *Wives* aged 16; *Thirteen* had *Wives* aged 17; *Seventy-six* had *Wives* aged 18.

At all ages, 212,825 *Husbands* and 212,825 *Wives* were enumerated as residing together on the night of the Census. There were also 10,506 *Husbands* whose *Wives* were absent (i.e., the *Wives* were not returned in the same houses as their *Husbands*), making in all 223,421 *Husbands* enumerated; and 12,618 *Wives* whose *Husbands* were absent (i.e., the *Husbands* were not returned in the same houses as their *Wives*), making a total of 225,443 *Wives* enumerated in the Division.

In the few instances in which persons described as married have been returned at any age under 15, they have been classified in these Tables of Ages of *Husbands* and *Wives* with the persons aged 15 and under 16 years.

* In the few instances in which persons described as married have been returned at any age under 15, they have been classified with the persons aged 15 and under 20 years.

Note.—M. denotes Males; F. Females; H. Husbands; W. Wives; Wr. Widowers; and Wid. Widows.

The Table is read thus:—In the Staines District or Union there were, of the age of 15 years and upwards, 1,928 Bachelors, 1,859 Spinsters, 2,661 Husbands, 2,684 Widows, 300 Widowers, and 543 Widows. Of the Bachelors, 790 were aged 15 and under 20 years, 480 aged 20 and under 25 years, 353 aged 25 and under 35 years, and so on. The same mode of reading applies also to the married and widowed.

Table 9.—CIVIL CONDITION OF PERSONS AGED 15 YEARS AND UPWARDS—In DISTRICTS—continued.

	2. Widows (not otherwise described)	13,026	—	13,026	—	3	—	13,023
	3. Children and Relatives at home (not otherwise described) †	243,940	104,888	139,052	104,385	123,746	503	15,306
	4. Scholars (so described)	217,278	107,121	110,157	106,201	110,040	920	117
	5. 1. In Board and Lodging	12,199	5,876	6,323	73	21	5,803	6,302
	2. Attendance (Domestic Servants, &c.)	79,878	13,436	66,442	3,934	23,456	9,502	42,986

In addition to those here returned, many persons connected with land, as proprietors or occupiers, are classed under other heads according to their professions and occupations. This remark applies especially to persons referred to Orders 6 and 17.

It is probable that a considerable number of the children here returned were under tuition, although not described as "Scholars" in the Household's Schedules.

SOUTH-MIDLAND COUNTIES—continued.

7 HERTFORDSHIRE—*cont.*

* The "Wives," "Daughters," "Grand-daughters," "Sisters," and "Nieces" (not otherwise described) of Farmers and of Gradiers are, if aged 15 years and residing in Farms, &c., presumed to be more or less engaged in farming pursuits, and are therefore referred to Order VIII.; those under 15 years of age are returned as "Children of Farmers," or as "Scholars." Order IV. Sub-orders 3, 4, respectively. The return for "Farm Servant (in-door)" includes dairymen and all female servants in Farms, houses, except those employed in domestic duties, as Cooks, Housemaids, Nurses, &c.

—The Country of Birth of Persons born in Foreign Parts was required to be stated in the Householders' Schedule, but owing to a want of precision in the mode of that information it is probable that the natives of Prussia, Austria, and Hungary are understated in these Tables, and that the numbers referred to Germany are some persons born in the above Countries.

Children born in the United Kingdom of Foreign Parents are not included in the above numbers.

Table 27.—NUMBER, AGES, and COUNTRY of BIRTH of FOREIGNERS, distinguishing MALES and FEMALES, by NATIVES of EUROPEAN STATES, enumerated in the REGISTRATION or UNION COUNTIES of the SOUTH MIDLAND DIVISION.
